All communication to be addressed to 1319-1y W. H. RICE, Lihue, Kauai

make a report which would be worth something. It was generally said that through professional jealousy the President of the Board of Health would not let other physicians have a chance to try and cure the disease.

Rep. Nawahi said that there was no harm in waiting. There was evidently a split in the committee. The minority wanted to go up and do something or get something. Perhaps they will get the leprosy, and perhaps they might get some valuable facts. I hope the House will postpone the consideration of the item. It is very important. We can't spend all the public money on the settlement.

Rep. White was in favor of postponing consideration. The majority of the committee have not done their duty. They were captured by the Superintendent, who led them around where he wanted them to go. He entertained them royally, gave them cigars, and charged them to the government.

Rep. Kapahaole was in favor of postponing consideration of the item. The House is not here to take the simple say so of the Ministers. The statements of the last speaker are entirely untrue. It is true there is a store at the Settlement; it belongs to the Government. I am sorry that members should be willing to pick up things they hear on the street corners, and bring them in here and state them as facts. It is not true that any members of the committee were misled. They had full notice of the departure of the steamer.

Noble Crabbe supported the item of \$234,000. Noble Baldwin—If we are to obtain any further light from this committee—I should be willing to wait—but nothing of the sort seems likely. From conversation with the members of the committee I judge that the people of the Settlement are very well cared for, and their complaints are trivial. The appropriation this year is \$48,000 more than last. I am not in favor of scripping them in any way, but giving them all they need.

Rep. Robert Wilcox—I am in favor of postponing this item. I think more ought to be done in the way of medical treatment for leprosy itself. There is a good physician there, but he does not attempt to treat leprosy, but only the other diseases to which patients may be subject. If leprosy cannot be cured, it can be relieved, and its rapid development checked. Rep. Kanealii spoke, but his remarks were not translated. Same with Rep. White.

Rep. Rice stated that notice was given to the committee. The member from Lahaina was not there, and is making unwarranted statements.

Rep. Kanhi explained at some length that he wished the chairman to put the motion. The item passed at \$234,000. Government physicians, \$35,000. Noble von Tempy—I move it pass at \$40,000. It will be needed.

Noble J. M. Horner—This matter ought to be regulated so that the people may get some consideration for this money. I have heard to-day for the first time of any gratuitous distribution of medicines.

Rep. Brown—I am in favor of an appropriation for government physicians, but I think the way some of them perform their duties is disgraceful. I know of a case where a physician posted up a notice that he would be passing along the government road at nine every Monday morning. The patients were expected to come out in the road. The Board of Health ought to reorganize the whole service, and inquire into it. They will do nothing for a poor man unless he pays them, or unless they are sure of their money in some way. It ought to be thoroughly investigated, and the government physician instructed to go to the houses of the poor and treat them for nothing.

Noble Burchard—My experience of government physicians has been more fortunate than that of the last speaker. The government physician of N. Kohala rides over to Waimea, a long way, to doctor natives or nothing, and he doctors natives who could pay him. He has a large practice among natives who pay him nothing. Rep. Knudsen—I am happy to learn that there are some government physicians who do their duty. On Kauai I know a physician who never goes near a native unless he can pay him. A native lay sick eight months, and the doctor never went near him. This item should be passed with the proviso that the physicians shall attend sick natives at their houses without charge. I name but one case, but I could name many. I know of one doctor who saw a man who had fallen from his horse and broken a limb, who never went near him, when any Christian man would have gone for pity of a sick man.

Noble Cornwell—I would not be doing my duty towards the resident physician of Waikiki if I did not speak. I know that he has the confidence of foreigners and natives, and he travels miles in dark nights to attend Hawaiians. If there is a deserving doctor in these islands it is Dr. Herbert.

Rep. Rice moved reference to a select committee, as there had been petitions on the subject of government physicians. Rep. Kanhi wanted the President to put the question. The motion to refer to a select committee was carried.

The Committee rose and reported progress. The House adopted its report. President Walker appointed as Committee on Government Physicians, Rep. Rice, Nobles Hind, Phillips, Baldwin and Rep. Nawahi.

Notice was given of the meeting of various committees.

The House adjourned at 4:05 P. M. until Friday morning.

(Continued on seventh page.)

Notice!

THE ANNUAL MEETING OF THE Honolulu Sugar Co. will be held on WEDNESDAY, August 12th, 1890, at 10 o'clock A. M., at the office of C. Brewer & Co., Honolulu. WM. W. HALL, Secretary. 1332-31

NOTICE!

TO THE STOCKHOLDERS OF THE Hilo and Hawaii Telephone and Telegraph Co. A dividend of ONE DOLLAR per share will be payable at the office of the Company on July 22, 1890. By order of Board of Directors. E. E. RICHARDS, Secretary. Hilo, Hawaii, July 2, 1890. 1331-41

Administrator's Notice.

THE UNDERSIGNED HAVING been appointed Administrator of the Estate of Lucy Alona Hardie, late of Honolulu, deceased, hereby notifies all persons having claims against said estate to present the same to the undersigned within six months from the date of the publication hereof, or they will be forever barred. J. O. CARTER, Administrator Estate of Lucy Alona Hardie. Honolulu, July 11th, 1890. 1331-41

inmates. The people at Molokai are unwilling to have them in the home. The hon. member read an extract from the report of the Board of Health, verifying this statement, and favoring the establishment of a home at the settlement, where they can be isolated and yet can occasionally see them. The report states that there are forty children at the settlement who showed no sign of the disease and yet are at large in the settlement.

Rep. Robt. Wilcox moved the committee take a recess till 1:30. Carried.

Afternoon Session.

The House re-assembled at 1:40.

The motion to pass the item as in the bill was carried on a rising vote.

Noble Macfarlane moved insertion of \$1,500 for Kapiolani Maternity Home in account with the report of the Finance Committee to which the petition had been referred.

The secretary read the said report. Noble Baldwin—I think the object is worthy and I am in favor of some appropriation, but I think the committee might have given us a little information so that we might vote intelligently and not at hap-hazard.

Noble Muller said Her Majesty had furnished a house gratuitously and certain Hawaiian ladies had volunteered their services. The thing was an experiment. The appropriation might be given, and if the enterprise was not a success it need not be continued.

Rep. Kapahaole was willing to make the appropriation, but this was not the right place in the bill. It ought to be further down. The Board of Health has nothing to do with it. I hope the hon. member will withdraw his motion, and we can put it in further down. Motion withdrawn.

Medicines (for gratuitous distribution) \$8,000.

Rep. Waipuliani said the medicines supplied were of poor quality, and more money would be needed, if any medicines were to be supplied.

Rep. Kanhi—I am in favor of the item as in the bill, no matter what we appropriate.

Noble Walker said that the time of the House should not be occupied in this way. The Board of Health probably know what they were about.

Noble J. M. Horner—I would like to ask the Ministers about these medicines when and how are they distributed.

Minister Peterson—The medicines are distributed to the Government country physicians who give them to anyone who asks for them.

Rep. Kapahaole asked if \$200 for Molokai included the medicines for leper settlement.

Noble Burchard said some medicine was distributed by others than Government physicians. Frank Spencer and the speaker thought the Minister of the Interior had distributed medicines gratuitously. He would like to see the system extended.

Rep. Kanealii would like to know whether the drug store in Waikuku was public or private property.

Minister Spencer—I think both. It is kept by a Government physician, and some of the drugs belong to him and some to the Government.

Rep. Kanealii—I know that he always charges for medicines. Perhaps he keeps the free drugs at the hospital, I would like to know.

Minister Spencer—As I understand it the medicines are for the poor and indigent and not for those who can pay.

Noble Walbridge—I have sent hundreds of natives to Dr. Herbert and they have never paid a cent either for medicines or treatment.

Rep. Kapahaole—On the Kona side of Molokai there is no Government physician. Who has charge of the medicines for that side?

Minister Spencer—Dr. Swift has charge of the medicines. If anyone is sick on the Kona side he will attend them.

Rep. Kapahaole—It is next to impossible to get a doctor on the Kona side. The messenger has to go over the other side and down into the leper settlement (after getting a permit first) and then persuade the doctor to come. The people on the Kona side are virtually without a Government physician.

Rep. Kapahaole moved the item be increased by \$500 so as to make a more liberal allowance for Molokai. Last session the appropriation was \$10,000 and \$9,000 was spent, and I move the item pass at \$10,000.

Purchase of kuleanas \$2,500 at Kala-ua. Passed.

Segregation, support and treatment of lepers \$210,000.

Minister Spencer moved it pass at \$234,000. A mistake had been made as the estimate per capita had been changed from \$75 to \$85. While I should be doing wrong to ask for \$1 more than is needed for the support of these poor people, I should also be doing wrong to ask for \$1 less than is needed.

Rep. Kahookano moved consideration of the item be postponed until the committee has presented its reports.

Rep. Robt. Wilcox—I am in favor of passage as the Minister recommends. If the committee think anything further is necessary we can add it on the third reading.

Rep. Nawahi—What is the item for? Minister Spencer explained what the item was for. The figures what he gave footed up \$230,000 from which \$10,000 had been taken, for what purpose the Minister did not know, but it did not strike him as in accordance with the eternal fitness of things.

Rep. Nawahi said that there might be some system by which the settlement might be made self-supporting. This item is getting larger and larger every year. A great many of the people there are able to work.

Rep. Kapahaole hoped the motion to postpone consideration will prevail. The matter was of great importance.

Minister Brown—I see no reason for the postponement of this item. It is the result of careful estimates based on the expenditures of the last two years. The committee may have some very interesting information, but probably nothing which can upset these careful calculations.

Noble McCarthy—I am in favor of passing the item at \$234,000, an increase on last year of \$48,000. There is a further contingent fund of \$25,000, which will probably cover anything which may be recommended.

Rep. Kalua was in favor of passing the item as asked for. Lepers are sent there for our benefit, not for theirs, and we ought to pay for it.

Rep. Kanealii was in favor of postponement of the item. Nine or ten of the committee had been to Molokai, the rest having been left through being misled by the statements of the member from Lihue and others. The rest of the committee preferred to go up there, and

morrow is the anniversary of the restoration of Hawaiian independence, resolved, that it be celebrated as a holiday, and when this House adjourn it adjourn until Friday, August 1.

The resolution was unanimously adopted.

Rep. Lucas reads by title an Act to Regulate the Importation and Sale of Opium.

Noble Crabbe moved the order of the day; carried.

The House proceeded to the consideration of the Appropriation Bill in the Committee of the Whole. Noble Phillips in the chair.

Building, repairs and maintenance of hospitals, \$16,000.

Minister Spencer gave the details.

Rep. Nawahi said that if Waituku was entitled to a hospital Hilo certainly was. It is no more than right that the people of Hilo should have the same privileges as those of Honolulu and Waituku.

Rep. Rickard moved the consideration of the bill be deferred until action had been taken on the bill providing for the erection of hospitals. Instead of deferring the item, it might be referred to a select committee and I so move.

Minister Peterson moved it be referred to the Sanitary Committee to consider in connection with the remarks of the member from Hilo with instructions to ascertain the cost of a proper hospital for Hilo.

Rep. Baker favored reference to a select committee, with a member from each island.

Rep. Nawahi—There is some misunderstanding with regard to the hospital bill. That bill provides for leper settlement.

Rep. Brown moved that when the committee rise it recommend reference to the Sanitary Committee which could deal with the whole subject.

Referred to Sanitary Committee.

Noble Walbridge—I move insertion here, in accordance with a resolution introduced by me, of \$3,000 for the purpose of adding to the grounds and removing buildings next to the hospital at Waituku. I know that hospital and how admirably managed and valuable it is. I know they have not proper facilities for their work, and that this expenditure is indispensable, and I know that everyone who has seen that hospital will agree with me.

Rep. Brown—I would like to ask whether the land can be bought for \$3,000.

Noble Walbridge—it will buy the land and pay for moving buildings on it.

Rep. Brown—I think this item should be included in the one already referred to the Sanitary Committee, and I move it be referred to that committee with the former item. I am in favor of letting the Board of Health have all the money possible; but we must not let our feelings run away with us to the detriment of other items in the Appropriation Bill. We have got the harbor here. We are asked for \$210,000 for the support of lepers alone, and I think it is possible to get along without these improvements they should do so.

Noble Baldwin—As one interested in the item, I have no objection to the reference to the Sanitary Committee. It is the only hospital on the island—is open to all classes. They have only a mean little yard. The out-houses are too close to the main building. I would like to see it pass and believe it will pass eventually.

Rep. Kalua—I move the item be inserted. I do not think it necessary to refer it to any committee. The hospital is very very cramped. Sometimes there have been eight patients in one room. A price has already been fixed for the land. The hospital does a great deal more if it were enlarged.

Rep. Brown—Unless the item reads precisely what its for, you will not be able to use any excess after the purchase of the land.

Noble Walbridge—it reads purchase of land and removal of buildings. I have no particular objection to its going to the Sanitary Committee, as I think it would be safe in their hands.

The Secretary read the resolution originally introduced by Noble Walbridge in regard to the item.

Rep. Brown moved that the committee recommend the House to take this resolution from the table and refer it to the Sanitary Committee.

The motion to refer to the Sanitary Committee was carried.

Repairs and care of quarantine \$4,500. Minister Spencer gave the items. Passed.

Quarantine expenses \$5,000.

Minister Peterson—This is a contingent item and will be used only in case of necessity. Passed.

Kapiolani Home (including cost of moving to Kalihi) \$6,500.

Noble McCarthy moved to strike out words including cost of moving to Kalihi. The object is to give the Board of Health discretion to move it when they chose.

Rep. Brown—it was originally moved from the leper settlement down here because it was intended for children of lepers. They should not be kept up at Molokai as long as they show no signs of leprosy. They may never have it. It is now at Kakaako, but it is desired to move it to Kalihi so that they can receive the attention of Dr. Lutz.

Minister Peterson—I am in favor of the amendment of Noble McCarthy because it gives the Board a discretion which it ought to have. They would not remove it without careful consideration. I agree to a certain extent with the remarks of the member from Honolulu. The children are born chiefly at Molokai and if they are there, their parents can see them. The Board should settle when it is to be moved or whether it shall be moved at all.

Rep. Kapahaole—I am in favor of passing the item as in the bill. I think the children ought to be cared for in Honolulu. They ought not to be on Molokai. It would be very hard to regulate the visiting of their parents. There would be contamination. It is better to have them here when the settlement is so crowded. The matter was brought up at the settlement in 1888, and the unanimous wish was to have the children brought down here. During the recent visit of the committee no dissatisfaction was expressed.

Noble Baldwin—This is a very important question involving the health of the nation and ought not to be left to the Board of Health. The House can and ought to decide it right here. They are kept separated, so that if they have not inherited it, they cannot get it. Much as I love my children—if I were a leper at Molokai, I should want my children not to be there so that there might be no chance of their taking it.

Noble McCarthy—Since establishing the home there have been about thirty-

heard has confirmed me in my opinion—the opinion I have just expressed—that the present law is a good one. The proposed law ought to provide for cases in which a scholar may be excused at thirteen, when he has showed himself proficient. If this amendment is not adopted I shall vote for indefinite postponement.

Noble Burchard—I think the chief objection to this bill would be remedied if it were specified that all scholars who might pass a certain examination at thirteen could cease going to school. The dull boys would be stirred to effort by such a law. My own observation is that the boys who go to work early turn out best, and make the most successful men. I am in favor of referring to a committee.

Rep. Knudsen—I have had a pretty long experience with the country schools from Kamehameha III.—on. In my district of Waimea, Kauai, there are four Government schools. I used to go to all the quarterly examinations, and knew every child personally. My experience is that fifteen years is too much of a good thing. When they are thirteen, they begin to feel as if they were young men, and want to do something. I don't think they improve much after that age. Girls in this country can marry at fourteen, and it seems rather inconsistent that they should be compelled to go to school when they are legally marriageable. They are generally proficient in the common branches when they are thirteen. I think I can say with twenty-eight years experience that the law will not work hardship to the Hawaiians. I do love the young folks with all my heart, and I would not favor anything to do them any harm.

Rep. Brown—We all know that the law now keeps children at school until they are fifteen. The proposed change reduces that age to thirteen. I think for the wants of the country compulsory education should not be beyond thirteen years. Children can always continue their study after that age. I think the laboring class of the Portuguese will learn all they need, and more than they would have learned at home.

Rep. Nawahi—I am not in favor of the bill. Things are different in this country from what they are in America. There they have long winters, and have to work. There are no petitions for this. It comes from the plantations. Those who defend it are connected with the plantations. This talk about helping the Portuguese is merely to help the bill through.

Rep. Kapahaole—The law sought to be amended has existed twenty years. No one petitions to have it changed. I think one reason the Hawaiians are so well educated is because they go to school so long. I have no objection to referring the bill to a committee.

Rep. Kanealii—Remarks are not translated.

The motion to indefinitely postpone was carried on a rising vote of nineteen to sixteen, the parties being pretty evenly divided. The ministry voted against indefinite postponement.

President appointed on the Civil Service Bill, Rep. Brown, Noble Marsden, Rep. Waipuliani, Minister of Interior and Rep. Marquis.

President Walker stated that there was no more business.

House adjourned at 3:15.

Forty-Fourth Day.

WEDNESDAY, July 30.

The House met at 10 A. M. Prayer by Chaplain. Minutes of preceding day read and approved.

Rep. Cummings for Printing Committee reports majority and minority reports on the Honolulu Market printed; ordered distributed.

Rep. Brown presents majority report, signed by Brown, Isenberg and Minister of the Interior, for Committee appointed to consider a petition of L. Ahlo for \$3,000 for building a reservoir. The committee find that in 1889 bids were called for to build a government reservoir at Laakaa, the highest bid was about \$17,000, the lowest about \$5,000, being that of two Chinamen. The lowest bid was accepted, and L. Ahlo became bondsman for the contractors. The latter found that there was more excavating than they had estimated. They wished to be relieved from their contract, but this was denied, and one of them absconded to China. The weather was very bad. L. Ahlo, as bondsman, completed the work, and his petition is for the excess of its cost in labor above the contract price which has been paid. The committee find that the work has been well done, to the satisfaction of the Government and to the loss of petitioner; but they think that this is a mistake in having entered into the affair of his own accord. They find that it would establish a dangerous precedent to grant a petition of this kind, and would have a bad effect on persons making bids for Government work; they, therefore, recommend that the prayer of the petitioner be denied.

The report was laid on the table to be considered with the minority report.

Rep. Kalua, for Select Committee on Bill No. 37, asked for more time.

Rep. Rickard gives notice of an Act to Repeal Chap. V. of the Civil Code, to regulate the bureau of Public Instruction.

Rep. Nawahi reads an Act to prohibit the erection of barb wire fences in certain places. The bill prohibits their erection in public places and along highways.
