WHAT A BOTANIST MAY SEE IN HONOLULU

(Continued from page 6.) mate leaves with large entire leaflets. The cylindrical, deep brown pods, fifteen inches or more in length and three-fourths of an inch in diameter, are rather ornamental than otherwise, as they sway with every breeze.

A third allied species has a foliage very similar to that just described, only that the heavy fronds have a peculiarly graceful droop. The pods in external appearance resemble those of Purging Cassia.

I have left for the last, mention of a genus which must be the first to attract the attention of the stranger, viz: Poinciana, nearly related to Caesalpinia. One species forms a rather straggling shrub with thorny branches, known commonly as Pride of Barbadoes, or Barbadoes flower-fence, the scarlet and orange blossoms with crimped petals and long exserted stamens, forming stately pyramids of bloom, each raceme occupying a month or more in expanding its numerous buds.

There are other plants equally embued with a passion for brilliant color—the cardinal flower of the meadow, the Zauschneria of California hillsides, the Atamasco lily, the scarlet Salvia, the rose and the carnation of the gardens, but where among them all is one which can pour forth her passion in any such lavish creation? Well is the tree named Poinciana regia.

August Shipbuilding. The Bureau of Navigation reports that 105 vessels aggregating 9,504 gross tons were built and officially numbered in the United States during the month of August, 1904.

INDICATIONS OF RHEUMATISM. Sore and swollen joints, sharp, shooting pains, torturing muscles, no rest, no sleep—that means rheumatism. It is a stubborn disease to fight, but Chamberlain's Pain Balm has conquered it thousands of times.

JAPAN SMALL EATERS. The Japanese cuisine does not include butchers' meat, bread, butter and potatoes. Rice is not, as commonly supposed, the daily food of the poor, but can be afforded by the well-to-do only.

OF CURRENT INTEREST.

PASSING OF MESSENGER BOYS.

From present indications the messenger boy, so far as Wall street is concerned, will soon be a mere memory. The financial district is loaded upon by these gray suited creatures as a structure, and it is. All the trouble has arisen over the fact that several Wall street commission merchants, members of the Produce exchange, are putting in a new machine which will do away with the messenger boy service between the telegraph office and the brokers' sanctum.

NOTABLE SUICIDES.

At least three European monarchs are known to have taken their own lives during the last 100 years, one of whom, the late Sultan of Turkey, Abdul Assiz, became Abdul As-was through the medium of a convenient pair of scissors. Added to these are at least a dozen princes of the blood, the more prominent of whom perhaps was Prince Gaston, of Bourbon, the son of the late King of Naples, who was married to the Infanta Isabella of Spain, and who cut his throat in the presence of his wife.

A PARSIMONIOUS ASTOR.

It is said in London that although William Waldorf Astor occasionally indulges in vast expenditures such as the purchase of Cliveden or a splendid steam yacht, he has taken to parsimonious ways in small matters. They declare that on a recent occasion he even objected to paying 6 cents each for cabbages, denouncing it as "a monstrous imposition" on the part of his grocer.

REMARKABLE CLOCK.

One of the most remarkable forms of clock in the world is a clock fan manufactured by a Swiss jeweler. The clock consists of twelve leaves hinged like an ordinary fan. The number of the hour is marked from 1 to 12 at the end of each of these leaves.

THE CHINESE EMPIRE.

Miss Kate Carl, an English artist, who has been commissioned to paint a portrait of Tsi An, Empress of China, describes her as "a shrewd, temperamental old lady, with the soul of a tigress in the skin of a woman." She is up every morning before 3 o'clock and receives reports from her ministers an hour later. By 5 o'clock she is ready to give the artist a sitting. Her majesty, now 70 years old, is quite vain of her hands, which are really very pretty.

AROUND THE WORLD ON FOOT.

Last year Oscar Zeller of Zossen started on foot from Berlin for a trip around the world. His plan was to go via Mukden, Vladivostok and Japan to America. The war frustrated that plan, and he has now started for Berlin Straits, along the northernmost Siberian telegraph line. His success is considered very doubtful.

SPIDERS LIKE MUSIC.

Spiders are passionately fond of music. At a performance in Missouri the concert hall was made disagreeable by a sudden invasion of spiders, which were drawn by a violin from the cracks and crannies of the ancient building. They crawled upon the floor and upon the stage.

HUMAN HIDES.

It is said that in the precincts of Westminster Abbey the fingerplate of a door is covered with leather made from human skin, but the story is not based on anything firmer than tradition. Hides do exist, however, found in human skin.

JAPS SMALL EATERS.

The Japanese cuisine does not include butchers' meat, bread, butter and potatoes. Rice is not, as commonly supposed, the daily food of the poor, but can be afforded by the well-to-do only.

Sleep for Skin-Tortured Babies And Rest for Tired Mothers

In a warm bath with CUTICURA SOAP and a single anointing with CUTICURA, purest of emollients and greatest of skin cures. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply skin and scalp humours, with loss of hair of infants and children, and is sure to succeed when all else fails.

SPOTS ON THE MOON.

Cambridge, Mass., Aug. 24.—A telegram has been received here from Professor W. H. Pickering, who is at the Lowell Observatory, California, tending to confirm an observation made by him last month. He saw a hazy patch in the large lunar crater, Plato, which had not been detected before. It was again seen on August 2 and 3. It had then grown dark, measured about two inches in diameter and resembled a small crater. The object is said to coincide in position with a previously recorded craterlet, but is apparently larger. Renewed scrutiny in the last few days reveals the continued existence of the feature, which now measures three miles across. Two other tiny craterlets and a dark spot on the floor of Plato, not previously reported, are also announced by Professor Pickering.
