

PUNUI DISTRICT WINS HARD FIGHT FOR CIRCLE ROAD

Board of Supervisors Turns Down Country Club and Accepts Planning Commission Compromise

ONLY FAIR TO PEOPLE CITY FATHERS DECIDE

But After Vote Is Taken Member Horner Intimates That Project Has Not Been Won

The supervisors last evening put the stamp of their approval on the Circle Drive plan for giving the upper Punui district an outlet to Nuuanu avenue. They adopted the report of the committee which recommended this route, which likewise had been recommended previously by the city planning commission. It is the one which the Oahu Country Club has been fighting bitterly ever since its suggestion by the Punui residents, some six months ago.

Not all the supervisors approve the route, however. F. M. Hatch and Robert Horner voted against it last night. Mayor Lane was not present. Dan Logan and Ben Hollinger, who had expressed doubt concerning its advisability and at a former session voted with the majority to table the favorable committee report, explained their reasons for altering their position.

Hollinger For Fair Play

Hollinger said he still questions whether Circle Drive can be put through as an actual improvement, but thought it would be only fair to the citizens of the district to give the project a test. Logan said he had desired to know more definitely whether the alternate route as proposed by the Country Club members, would be practical.

He was satisfied on this point last night by a verbal report from City Engineer Collins, who asserted that the alternative route, while feasible, "would be much more expensive" than Circle Drive. Collins would not go on record with figures, having made no estimate of the proposed route mauka of Circle Drive. He had estimated roughly that Circle Drive would cost approximately \$25,000.

Other Route Not Feasible

The route suggested by the Country Club, which would leave its own grounds and the privacy of its golf links intact, would take the road across a deep gulch, that would require much fill, and as the bottom of the gulch is composed of swampy land this would have to be drained, said Collins. Moreover, the land to be acquired for it is more expensive than that along the line of Circle Drive.

The discussion was enlivened by a jilt between Supervisor Horner and George McKinlay, a Punui resident, and a bit of sarcastic oratory by attorney Philip J. Weaver, a Punui proponent. Weaver wanted to know why the alternative route had never been put before the city planning commission. McKinlay, who had just finished a speech against it, remarked that the route was so foolish no one had thought of proposing it before sensible persons.

Horne referred that he was taking the word of no one man that it was foolish. Weaver said he thought experts should be listened to. The city planning commission, recognized experts in this sort of thing, had recommended Circle Drive.

Gentle Slam At Golfers

"Because certain gentlemen want to strike their little golf balls from a certain tee, is no reason why the improvements in a certain considerable portion of Honolulu should be held up or let go by the board entirely," he said.

Horne still insisting that the commission's opinion concerning the alternative route had never been sought. Weaver replied that, admitting this to be a fact, the plan would be thrown out on the showing made by the city engineers. It would be impractical financially, he declared.

When the vote was announced finally, showing that the favorable report on Circle Drive was adopted, John F. G. Stokes started some mild applause. Supervisor Horner called out:

"That's all right; you haven't got Circle Drive yet."

"But they're nearer to it than they ever were before," Larsen answered.

CHAMBER OF COMMERCE TO PAY CARNIVAL DEBT

A resolution was adopted by the directors of the chamber of commerce yesterday afternoon to pay up in full the amount made upon shares held by the chamber in the Mid-Pacific Carnival, Ltd. The chamber has 600 shares, on which the sum of \$300 is due as assessments.

Treasurer J. F. O. Higgins suggested that it would be best to pay the amount, as many firms are doing.

"Merchants are paying their assessments in full," he said, "and I think that this body should do the same."

It was unanimously voted that the amount be paid.

GRAMP COLIC

No case of suffering from cramps in the stomach, or intestinal pains, Chamberlain's Colic, Cholera and Diarrhoea Remedy never fails to relieve the most severe cases. Get it today, there will be no time to send for it after the attack comes on. For sale by all druggists. Benson Smith & Co., agents for Hawaii.

ORIENTAL DELICATE TO SOLVE

'Neighborhood Without Brotherhood Is Hell,' Says Reverend Mr. Fry in Mainland

"A treaty may be only a scrap of paper, but all the while the world is being forced together into one great neighborhood, and neighborhood without brotherhood is hell," said Rev. William H. Fry, superintendent of Methodist Episcopal missions in Hawaii, recently, speaking before a large congregation in the Vincent Methodist Episcopal Church of Spokane, Washington.

Mr. Fry, according to a newspaper of that city, discussed the problems arising out of the contact between the Oriental and white races. In matters of immigration, he said, Hawaii is the experimental station of the United States, and Honolulu is the laboratory in which the solution is being worked out.

"There is no spot on earth where class line counts for less than in the islands," he continued. "The marvel to the newcomer is the ease and grace with which people of all races mingle in social and commercial life. We are really teaching a lesson in world neighborliness. I am not suggesting that we take all the Chinese, Japanese and Filipinos and make Americans of them. The task would be an impossible one, for the reason that they do not want to be Americans, and would not make good Americans even if they did want to be."

"Our government has need to move with exceeding care upon matters of Oriental immigration. The religions of the east and the west will not mix any more than will oil and water. But this does not state all the difference between us. The relationship between male and female, husband and wife, parent and child, the individual and the state suggest matters of grave concern to be considered in the possible citizenship of those who come to our western gateway and seek admission."

"We ought to put our own house in order before adding more disorder to it. What about the multitude of men who have ceased to live for others? What about the poorly fed, the poorly paid and the Christless rich, the supinely indifferent and the multitude who in the hour of their affliction have turned their back upon the church and closed their heart to the cry of the needy?"

"We can best serve the Oriental by keeping him where he is and presenting to him the ideals that have made possible our great heritage as an American people. Let each preserve the genuine and characteristic of his own race and country, but God forbid that we should ever lose the reality of brotherhood."

"Let us not forget that this problem is at all times very real for Honolulu is an American city just as much as Spokane is, and the Territory of Hawaii is American soil just as surely as the State of Washington is."

The first missionaries landed in Hawaii in 1819, he said, sixteen years before Jason Lee or Marcus Whitman discovered Oregon, and twenty-nine years before the discovery of gold in California.

"We can boast of having the first newspaper west of the Rocky Mountains," he continued. "The people of California used to send their children to Hawaii to school long before they had an adequate school system of their own. We had the first college, the first public school, the first court of justice in the established world. The pioneer crossed the Rocky Mountains, Hawaii had established charitable and religious institutions and a Christian citizenship."

POSITIONS ARE SCARCE IN HAWAIIAN ISLANDS

Itinerant Workman Stands Small Chance of Getting Employment

Two men recently from the mainland applied yesterday to Secretary Brown of the Chamber of Commerce for jobs. They could not be accommodated.

"I wish we could make folk in the States realize that Hawaii is too far distant from the Coast for any man to venture down here in search of a job unless he has sufficient means to remain a number of weeks and secure his return transportation. This is a small community and work, particularly for those unskilled in special lines, is not to be picked up easily."

"Even skilled workmen need time to find jobs and may be unfortunate. When trained or professional service is needed our firms send to the States and get it, and do not wait for some man to come to their doors and ask for it. The result is that most of the desirable positions always are filled and the itinerant workman stands small chance of getting the kind of berth he is looking for."

JAPANESE STUDENT ALLEGED BURGLAR

D. Y. Park, a Japanese student of the McKinley High school, yesterday afternoon confessed to the captain of detectives, it is said, that he had stolen three typewriters from the stenographers' classroom of the school about three weeks ago, shortly after he was arrested. He was charged on two counts with burglary in the first degree, and will be arraigned in the police court this morning.

YAKU INDIANS RESUME WAR PATH

Prove More Than Match For Mexican Soldiers of De Facto Government

Trick Troops, Raid Towns and Carry Off Girls and Cattle As Booty

COMMITTEE APPOINTED TO WORK OUT DETAILS

Bishop Estate Donates Fifty Acres For Site; \$15,000. of \$30,000 Needed, Assured

(Special By Mutual Wireless) HILA, July 14.—A great regular army and militia post at the Volcano of Kilauea is going to become a fact if hard work by the Hilo citizens back of the idea can do the trick.

The board of trade of Hilo today adopted without a dissenting voice, a resolution to establish a national guard camp and field maneuver grounds, and a vacation and health-recruiting station for the regular army men in garrison in the Territory, on the slopes of Hawaii's great Volcano.

The estimated cost of the station, declared Mr. Thurston in an address he made to the board of trade on the project, is \$30,000. Of this, half, or approximately \$15,000, has already been assured, added the speaker.

The Bishop Estate had come to the assistance of the plan by promising to donate a tract of fifty acres at the site, selected by the originators of the idea, acting in conjunction with Brig. Gen. R. K. Evans, commanding the Hawaiian Department, and Brig. Gen. Samuel L. Johnson, adjutant-general of the Territory.

Mr. Thurston's address was enthusiastically received by the board of trade, and heartily endorsed, and a committee was at once appointed to begin the work of canvassing for funds to complete the amount needed to make of the post a reality instead of a hope.

In his address, Mr. Thurston pointed out that as well as an appropriation, either territorial or national, for such a post it would be necessary for the people of the Territory, if they wished to see the station established, to contribute to the fund for that purpose. He said that the proposed site for the post is mauka of the Kau road, on the low bluff above the rock quarry, on the Meana side of the first flying lead from the Volcano House, and about a mile distant from that place.

This location, the speaker added, is a rolling plain, easily cleared and of sufficient proportions for the purpose of the station. The view, he said, is wonderful, as Kilauea-iki, the Volcano House and Mauna Loa are all visible.

In opening his address Mr. Thurston said that he has a precedent in the Philippines for his plan. There the government, at a post of more than \$1,000,000, had established the post at Baguio, in the hills, sixty miles from Manila.

Hawaii Also Needs Post
"That the Territory of Hawaii needs such a post as much as the Philippines was another point he made. He declared that there was much discontent and restlessness among the soldiers stationed on Oahu, due largely to the "deadly monotony" of the life they are forced to live there, and that "the human beings like the rest of us" soldiers need change and amusement and rest to keep them in good trim for their work."

In speaking of the need of the national guard of the Islands for such a camp, Mr. Thurston said that the militia has grown to such proportions in the last few months that its training has become a serious matter, and some central drilling and maneuvering point has become of great importance to the future efficiency of the guard.

There are now in the guard he said, a machine gun company, a cavalry troop, and a volunteer company of infantry on the Island of Hawaii alone numbering approximately 1600 men, more than a full regiment, and presupposing a regimental organization that would knit the men into one compact fighting mass.

Training Is Very Essential
The training for such an organization, he went on to say, cannot be adequately accomplished unless there is a place in which it can, from time to time, assemble for drills and the maneuvers incident to field work.

MERCENARIES OF HILO UNANIMOUSLY FAVOR VOLCANO ARMY POST

Board of Trade Gets Behind Health Station For Regulars and National Guard

COMMITTEE APPOINTED TO WORK OUT DETAILS

Bishop Estate Donates Fifty Acres For Site; \$15,000. of \$30,000 Needed, Assured

(Special By Mutual Wireless) HILA, July 14.—A great regular army and militia post at the Volcano of Kilauea is going to become a fact if hard work by the Hilo citizens back of the idea can do the trick.

The board of trade of Hilo today adopted without a dissenting voice, a resolution to establish a national guard camp and field maneuver grounds, and a vacation and health-recruiting station for the regular army men in garrison in the Territory, on the slopes of Hawaii's great Volcano.

KARAOI HARBOR BID IS HELD UP

Commissioner McCarthy Objects To Work On Ground That Territory Does Not Benefit

The sole bid on the contract for dredging work in Karaoi harbor, tendered by the Kahului Railroad Company, was held up by the board of harbor commissioners at a called meeting yesterday until the meeting of the board to be held in the Capitol next Monday.

The tender which was for thirty cents a cubic yard, was objected to by Commissioner McCarthy, on the ground that the Territory would get but little if any benefit from the work, as the wharf at that port paid no revenue to the public coffers. His attitude was opposed by Commissioner Church, but in the absence of Mr. McClellan, the only other member of the board now in the Territory, and following the refusal of W. C. Woodward, acting superintendent of public works, to take any action in McClellan's absence, the matter was allowed to go over for a few days.

The board granted permission to Jack Edwardson, secretary of the local branch of the Seaman's Union, to borrow a number of pictures showing the dangers and difficulties of the landing piers in the Territory. The union wants the photographs to use in opposing the application of the Inter-Island Steam Navigation Company to be exempted from the operation of the so-called "bont clause" of the Seaman's Act.

Bills and routine matters were disposed of by the board.

CUSTOMS OFFICERS RAID OPIUM 'JOINT'

Find Pipes and Drug Laid Out Before Bunks For Expected Smokers

An openly run opium joint, in which it is alleged, dozens of Iwilei, add to a large and regular patronage, was raided yesterday morning by a squad of custom inspectors headed by Wray Taylor, deputy collector. Chang Sui Pa, a Chinese, was arrested as proprietor, and \$600 worth of opium was seized.

The den which is situated in a tenement house on Beretaria street near Hives, has long been suspected by the custom officials, and acting upon a tip yesterday, prepared with a search warrant, the raid was made.

When the officers affected an entrance, an examination of the rooms disclosed a well prepared 'hoop' joint. Banks arranged in orderly system lined the sides of the two spacious rooms, used by smokers.

The opium, a supply of which was laid out before several pipes, for expectant afternoon customers, greeted the officers' eyes. A further search disclosed several tins, half full, and several horns, with the opium mixed ready to be rolled into pills. That the joint has long been a rushing business was evident from the amount of yen shek, which is the remains of smoked opium, that was found in a large bowl lying in a conspicuous place.

One person who evidently had been lying in the joint all night, was stretched out on one of the bunks. The custom inspectors in their recent work of clearing up the rushing business, have practically checked the once flourishing business of the dreadful habit. Chang Sui Pa will be given a hearing before United States Commissioner Curry this afternoon.

TOURIST BUSINESS HAS FINE PROSPECTS

J. Walter Scott, San Francisco representative of the promotion committee, has written to A. P. Taylor, secretary of the committee, saying that indications in the city on the Coast point to a permanent Hawaiian service by the Great Northern when she resumes her run next fall.

Various conversations, with the officials of the Great Northern Pacific Steamship Company in San Francisco are the basis upon which Mr. Scott makes his prediction. He is also of the opinion that there is going to be a traffic sufficient to warrant the officials of the line putting the big steamer on this run indefinitely.

Trade Manager Jackson of the company has also written to Taylor, saying that he is confident of being able to work up a big excursion from Los Angeles on the first trip of the Great Northern here in the fall. The publicity that the Islands are receiving in the mainland is helping very considerably in interesting people and making them anxious to visit the Paradise of the Pacific.

COAST DEFENSE FORCE WILL BE STRENGTHENED

With the arrival of the transport Sheridan tomorrow, the Coast Defense of Oahu will be strengthened by the addition of the Second and 125th companies, Coast Artillery Corps. These organizations were ordered to Hawaii several months ago. Each company has one hundred and one men. The Second Company will go to Fort Ruger for station and the 125th Company will go to Fort Kamehameha. Both organizations have been stationed on the Atlatl Coast practically ever since their organization.

LOTHROP WITHINGTON ARRIVES WITH BRIDE

Young Couple Were Married in Bay State in June

On a honeymoon trip to the Isles of Peace, Lothrop Withington, son of D. L. Withington, arrived in the Mauna last evening with his bride, who was Miss Katharine Carleton Whipple, daughter of Sherman L. Whipple of Boston and Brookline. They will remain here for several weeks before returning to Brookline where they will make their home.

They were married in Plymouth, June 24, and the ceremony was performed in Chilton Chapel, situated on an estate known as "The Forges," where Mr. Whipple makes his summer home.

Rev. Carroll Perry of St. Paul's Church in Brookline was the officiating clergyman. The bride was given in marriage by her father.

Miss Dorothy Whipple, an older sister of the bride, was maid of honor. The bridesmaids were Miss Eleanor Sprague, the younger daughter of Mrs. Edward D. Brandegee; Miss Jean C. Lawson, daughter of Thomas W. Lawson; Miss Lorraine A. Sikel of New York; Miss Catherine M. Welling of Corning, N. Y.; and Miss Allison McEldowney of Pittsburgh.

Elizabeth, Mary and Constance Clough of Manchester, New Hampshire, cousins of the bride, were the flower girls. The groom, who is the son of Mr. and Mrs. David Withington of Honolulu, was attended by his brother, Frederick Burnham Withington of the Harvard class of 1915.

The grooms were Sherman L. Whipple, Jr., brother of the bride; Richard Fred of Brookline, Harvard, '11; Richard Wigglesworth of Milton, Harvard, '13; Robert Fisher of Newton, Harvard, '11; William J. Bingham of Methuen, Harvard, '16; Stanley B. Penhock of Syracuse, Harvard, '15, and Arthur Beane of Cambridge, Harvard, '11.

AUTO FALLS INTO EXTINGUISHED CRATER

Machine Smashed To Pieces, But Whether It Carried Death Is Unknown

According to a wireless message from Hilo yesterday, an appalling automobile accident may have taken place on the auto road to the crater of Halemauau, which road circuits Kilauea-iki. An auto, smashed to pieces, was found at the bottom of Kilauea-iki, evidently having fallen from the road above. The road passes at some points quite close to the edge of the old crater, which is a hole 740 feet deep, with precipitous sides. The road, however, is far enough from the edge, and there is such protection of fences that nothing or an accident to a machine, could cause one to go over. Once over the edge the machine would drop so that it would be utterly smashed and its occupants probably dead before the floor of the long extinct crater was reached.

The car is said to have been identified as one which was stolen from Oahu. A search is being made at the bottom of the crater for the bodies of the driver and occupants, who must have fallen or been instantaneously killed in the car when it went over the brink.

The car was stolen, however, three weeks ago, and there have been no reports of anyone missing. Hence there is a theory that it may have been sent into the crater with no occupants aboard, by thieves who had stolen it for a joy ride.

INFORMATION WANTED OF ALFRED K. HITNER

'Chief of Police' Pays No Attention To Inquiry

The bureau of vital statistics of the board of health has been asked to locate Alfred K. Hitner, who came here in 1908 with the fleet.

In a letter addressed to the bureau by Mrs. N. B. Foster, 806 Schrader street, San Francisco, the whereabouts of Hitner is sought. This is a copy of the letter:

"Have you in your office any record of either the marriage or death of Alfred K. Hitner. He went to Honolulu with the fleet, I believe in 1908, and since that time we have had no word from him. For his little girl's sake, I want to know that. I have in my possession some articles belonging to him, and as I am along in years I wish him to have them if he is living. More than a year ago I wrote to the chief of police in regard to this matter, sending return postage, also my address on the outside of the envelope. No answer was made to it."

The bureau has been unable to locate Hitner.

PARK IS OPPOSED BY BISHOP ESTATE

Will Fight Project Unless Boundaries of Reserve Are Settled Satisfactorily

CHAMBER OF COMMERCE FAVORS UNDERSTANDING

Conference To Be Held With Governor in Hope of Reaching Agreement

That the Bishop Estate will fight any further legislation in favor of the Kilauea National Park unless there is an arrangement regarding boundaries, more satisfactory to the estate than appears in the bill, which Congress passed for the creation of the park, was the statement made yesterday at a meeting of the directors of the chamber of commerce. After a good deal of discussion, President George W. Smith was asked to accept the bill, in a conference with the Governor and representatives of the Bishop Estate, and try to settle the boundary questions.

T. H. Petrie suggested that the matter was really one between the Bishop Estate and the federal government, and said he did not see why the chamber should take part.

Governor Appoints Conference
It was reported by Secretary Raymond C. Brown that Governor Pinkham had named A. F. Judd as conferee for the government.

"I don't see why we should support or oppose the Bishop Estate or any other owners, in a controversy over boundaries," said Petrie.

Joseph E. Shedy said that the Bishop Estate had requested that the chamber help in a friendly settlement of the difficulty, and E. J. Spaulding then made a motion that President Smith be delegated to confer with the Bishop Estate and the Governor, in an effort to settle the matter.

President Smith called upon A. Lewis, as a lawyer, for an expression of opinion as to what would be the status of the chamber, if it made an appearance in the prospective controversy, as a mediating friend of both sides.

"Considering that the agitation for a park at Kilauea has been a public matter," said Mr. Lewis, "and as long as we have been requested to assist in establishing boundaries, perhaps we should do so."

Private Interests Concerned
"The park has already been established by act of congress. There is no appropriation carried by the bill establishing the park. When it becomes necessary for congress to appropriate for the actual establishment of the park it will be legally necessary to satisfy all private owners, including the Bishop Estate, whose property is affected. In taking part in an effort to arbitrate and settle differences we do not take the side either of the government, of the Bishop Estate or of any other property owner."

Secretary Brown said he had information that the Bishop Estate would protest against the park bill, unless there were some changes in the boundaries. It appears that the bill as passed takes in a lot of the Bishop Estate which the estate does not want to lose, and which it claims is not needed for the park.

Mr. Petrie repeated his argument that he couldn't see why the chamber should go into the matter.

Spaulding Amends Motion
Mr. Spaulding amended his motion by adding a provision that the chamber's action in the matter should be entirely in the public interest, the park being a public matter. With this amendment, the motion carried.

"Governor Pinkham informed me," said Secretary Brown, "that he would be very glad to have a representative of the chamber confer with him and the representatives of the Bishop Estate regarding the boundary."

A very large part of the area set aside by the act of congress establishing Kilauea National Park, is Bishop Estate land. In fact the Bishop Estate property includes about half of the center of Kilauea. The idea of the conference with the Governor, the chamber of commerce and the representatives of the estate, is to reach a boundary agreement so that there will be no contest in Washington when the matter of an appropriation for the park is brought up.

ORDER SOUNDS KNELL TO SMOKING OF OPIUM

Another discouragement confronts the opium-users. Marshal J. J. Smiddy can now go out armed with a search warrant and break into a place where he suspects opium is being smoked.
