

Grand PLANTATION NEWS

HONOLULU CONCERN HAS BIG CONTRACTS

Honolulu Iron Works Will Look After Mills Producing Third of Cuban Crop

And Will Build Three Factories As Large As Puenene

As evidence of the great activity in sugar circles at this time in the United States and Cuba, the following information from a New York correspondent may be of interest:

Twelve new cane sugar factories of various capacities are being built in Cuba this year, and about the same number of new beet sugar factories have been contracted for to be finished this year and next, for the American beet sugar industry.

The 2000 tons capacity factory which the Honolulu Iron Works Company is at present building at Tacajo, Cuba, was contracted for in February of this year. The first preparations for the foundations took place the end of July, and if shipping conditions do not prevent, this factory will be in operation in January, 1917. Shipping of machinery, however, to Cuba and elsewhere at the present time is exceedingly difficult.

A large number of railroad cars are loaded with machinery for Cuba at Key West, where there is, so far, only one ferryboat to transport them at the rate of twenty-six cars per day to Havana. The congestion on freight in Havana is quite considerable and leads to serious delays in getting the material to the various plantations. Rush work is the order of the day, and the cost of machinery seems to be the least consideration.

All of the principal machine shops making sugar machinery in the United States, and for that matter, machine shops particularly making electrical machinery, are running to the very full capacity night and day. Large shops building sugar mills, for instance, are booked to October next year; shops building evaporators, vacuum pans, and this class of machinery, will not take orders for delivery before next July or August, and it seems to be impossible to get promise of delivery on electrical machinery in less than ten to twelve months from date of order.

The capacity of these large shops are regulated entirely by the capacity of the large machine tools in use, and most of these shops are running three shifts of machinery per day. It is impossible to say how long these conditions will last, but indications are that things will be worse rather than better during the coming year.

In addition to the work previously in hand the New York office of the Honolulu Iron Works Company has ordered for engineering and reconstruction work for a large number of plantations in Cuba under the control of the Czarinkov-Bionda Company, and the Cuba Cane Sugar Corporation. These plantations will later take care of from one-fourth to one-third of the entire Cuban crop.

The Honolulu Iron Works Company has just signed a contract in New York for building a large modern sugar factory with an initial capacity of 2000 tons cane, but to be arranged for a capacity of 4000 tons cane per day, for La Romana Central, Incorporated, in San Domingo, the factory to start grinding the end of 1918. This is an American concern throughout, and the president of this company is also president of the Guanoque Central in Porto Rico.

Many Men Employed
In order to cope efficiently with all the work in hand, the Honolulu Iron Works Company has for some time now had an office establishment in Havana. Here, as well as in the New York office, this company employs a large number of draftsmen and engineers. Bonafide inquiries have been received for three more large sugar factories (not for Cuba, however), and it is intended that these have larger capacities than any of the Hawaiian factories, excepting Puenene.

There is a great demand for sugar factories this year in the United States and Cuba, and the trade supplying these requirements is taxed to its utmost.

HAWAIIAN PINEAPPLE CO.'S WINTER PACK SMALL

The winter pack of the Hawaiian Pineapple Company will run between 50,000 and 75,000 cases, James D. Dole, president of the company, said yesterday. "The demand for all kinds of fruits has been exceptionally heavy this autumn and pineapples are no exception. Sales have been very satisfactory. We have shipped over a million cases and have practically cleaned up our 1916 pack."

Hutchinson Improvements

Hutchinson mill is to have a complete new set of centrifugals to replace the old better. This mill will continue grinding 1916 crop cane until January, C. Brewer & Co. stated yesterday.

Sugar in Spain

The sowings of beets in Spain are estimated at 60,000 acres, with a yield of 503,000 tons of beets and about 80,000 tons of sugar.

LOUISIANA CROP SELLING RAPIDLY

Willett & Gray's Weekly Resume of World's Trade In Sugar

Sales of raw sugar at New York during the week ending November 16 were 500 tons (Cubans in store and 10,500 bags immediate clearance.

Stocks in the United States and Cuba together were 169,657 tons, against 179,919 tons last week and 1,63,011 tons last year, a decrease of 108,956 tons from last year.

Willett & Gray stated in their report that the market closed steady. The close of the market was influenced by cables reporting rains in Cuba, by reports that the recent cold wave had damaged a small part of the cane crop in Louisiana, and had also caused a part of the beet crop in Colorado and Utah to be frozen in the ground. Later advices from the South and West minimize the damage done by the cold weather.

Louisiana Crop Moves
The New Orleans market has been fairly active at the basis of 6 cents delivered at New Orleans, and some 10,000 tons have been sold at this basis. The first shipment worth was made this week by the S. S. Marianne, carrying 30,000 bags and destined Boston.

United States Atlantic ports stocks show a slight decrease, the total stocks being 62,112 tons, against 59,999 tons last week. The receipts were 43,173 tons and exports 41,000 tons.

London cables say that immediate legislation is indicated to further restrict sugar consumption.

Cuban News
Exports of the past week were 15,266 tons, all destined to the United States Atlantic ports. These figures are small and are less than half of those of last week. Stocks in Cuba are reduced to 97,274 tons, against 119,268 tons last year.

Weather in the island is still unsettled, although conditions are improving. We have a special cable reporting that the rains during the week have been of variable intensity in the different parts of the island.

Some of this year's Mauritius crop sold under contract to the British royal commission is to be shipped under an arrangement between the British and French governments to France. This affords the Mauritius growers an opportunity to introduce their product on the French markets.

Java Exports
Special cables from Batavia reports exports from Java during the month of October of 74,000 tons to Europe, 3000 tons to Port Said for orders and 66,000 tons to Asiatic ports; a total of 148,000 tons. In October last year 23,768 tons were shipped to Europe and 206,365 tons in October, 1914.

Since the beginning of the 1916-17 crop in April this year there have been shipped to Europe 530,000 tons, while during the corresponding periods of the two preceding years there were shipped 332,221 tons and 447,983 tons respectively. Total shipments since start of crop to end of October in all countries compare, 956,000 tons in 1916, 807,922 tons in 1915 and 870,331 tons in 1914.

Refined
The export demand has been principally for new crop deliveries, and some 2900 tons have been placed for European countries at around 5.33 cents for February-March shipments. The price asked for prompt shipments is 6.30 cents to 6.40 cents in bond.

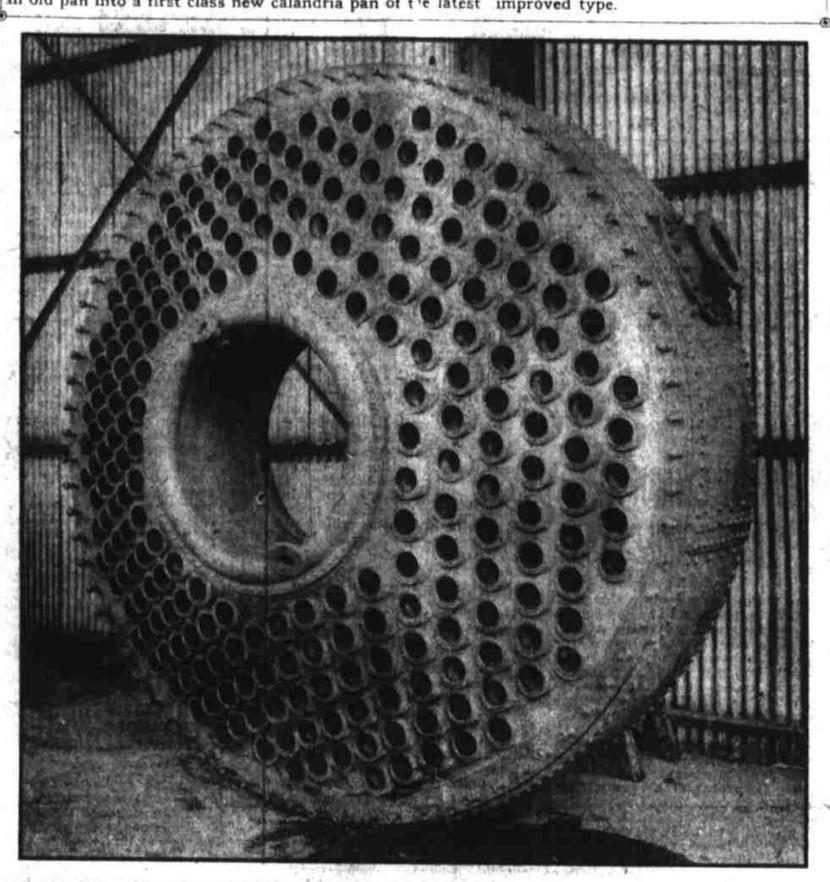

Domestic beet granulated is quoted at 7.30 cents for territory up to Buffalo and Pittsburgh. It was expected that this week would see these sugars offtaken, but thus far this has not been the case. Advisers from Detroit state that the far western beets are in freer supply, but that Michigan and Ohio shipments are still backward.

LARGER COFFEE CROPS FROM BUDDED TREES

The average yield of coffee per acre can undoubtedly be increased by selection of the best seed from the trees yielding the largest crops. Work along this line is now under way at Butternut, Java, where it has been found that coffee trees can be readily budded and grafted. As a starter, records were kept of the crop borne by individual trees in a large orchard. It was found that there is wider variation in yields than the casual observer would suppose. Budds taken from trees yielding more than the average set in one-year-old seedlings, perpetuated this good bearing capacity in the new crop. The first crop from the budded seedlings was larger, and one year earlier than the crop from seedlings not budded.

In grafting or budding coffee the same rules apply as when working with other tropical, evergreen trees. The time to bud is at the beginning of a "dush," when new shoots are about to be thrown out. Tropical trees grow by jerks and not by seasons. In more scientific language there is a periodicity in the growth. This is particularly noticeable in mango trees. Coffee has similar habits, growing by fits and starts. The time to bud is at the beginning of a dush.

A year ago Kahuku Plantation Company installed a calandria vacuum pan. It has done such good work that the company is now adding a calandria to one of their old pans. The calandria is ten feet inside diameter, with 540 feet of heating surface and has sufficient capacity to develop a trike of fifteen tons of dry sugar. The copper tubes, four inches in diameter, are two feet four inches long. This installation, built in the machine shops of Cattoh, Neill & Co., will convert an old pan into a first class new calandria pan of the latest improved type.

LIBBY PINEAPPLES ALL SHIPPED

Libby, McNeill & Libby reported yesterday that practically all their 1916 pack of pineapples has left the Islands and is now assembled in the company's warehouses at distribution centers.

Their winter crop will be small, estimated at about 2000 tons of finished product. Notice has been given by the interstate commerce commission that the freight rates on all canned goods including pineapples, will be advanced January 1.

Whole prices for this product are somewhat higher than a year ago, the higher cost of tin, sugar and other supplies and advancing freight rates have all combined to reduce the profits on the industry this season. The pineapple pickers are still working on an uncomfortably close margin, an official of this company stated yesterday.

Cuban Crop

Government weather report for the week ending November 1, 1916.—Rainfall.—Continued rainfall occurred during the week all over the island except in the extreme eastern and western parts. They were very heavy in Santa Clara, causing floods and the overflowing of rivers and streams. These conditions put a stop to all field work. Rainfall at Observatory 3.87 inches.

The weather conditions were favorable for the cane, except that as noted above all field work was stopped owing to the rains. The condition of the cane is excellent and reports from Eastern Remedios state that the cane is showing signs of maturity.

Porto Rico Weather

Reports from Porto Rico November 4 were that excess of moisture, especially in the eastern and southern parts of the island, is lowering the sugar content in the cane as well as making necessary cultivation difficult or impossible. Temperatures averaged somewhat higher than normal for the time of year, although no unusual extremes were reported. Evaporation at San Juan for the week was 1.937 inches.

At Hakalau

Two 600 h.p. Sterling boilers, the largest ever installed in Hawaii, have been placed at Hakalau, C. Brewer & Co. stated yesterday. A new boiler house has been erected, and the roof of the mill has been raised and an overhead travelling crane installed.

Pahala Mill

Hawaiian Agricultural is still at work on its 1916 crop and may not finish its harvest until early in December. C. Brewer & Co. stated yesterday that the mill is to have a new 25-ton vacuum pan, eight 40-inch centrifugals, and a press evaporator.

MORE MELONS CUT—AS CHRISTMAS GIFTS

Listed Stocks Quiet While Bears Raid Engels Copper

Five companies announced extra dividends yesterday amounting to \$435,000, for December. These were Hawaiian Sugar, 50 cents a share, \$75,000; payable December 15; Hawaiian Agricultural 6 per cent, \$120,000; December 20; Honouliuli, 5 per cent, \$22,500; December 25; Oahu, 12 per cent, December 20, \$180,000; and Pepeekeo, 5 per cent, \$57,500, December 15.

Business was dull on the exchange, total sales amounting to 1185 shares. Ewa and Honolulu gained a half and Oahu an eighth, Oahu and Pepeekeo were unchanged.

Rubber quotations were three cents higher, Singapore sales at 65.50 and New York 71.00.

Listed shares were active, sales reported being 750 Montana at 52 1/2, 14,000 at 55, and 10,500 at 57 1/2; 500 Mountain King, 55 cents; 250 Honolulu Oil at 4.45; 100 Engels Copper at 3.54; 500 at 4.45, 50 at 4.40, 50 at 4.35, 150 at 4.10 and 500 at 4.15.

Gold and silver prices were: Honolulu Gold, 1.35-3.77; California Hawaiian, 14 cents asked; Engels Copper, 4.37 1/2; 1.05; Mountain King, 50-55 cents; Tip (per day, 7 cents bid) and Montana Bing (bid, 55-60 cents).

TO GET FULL VALUE FROM ENGINE AND FUEL

R. E. Mathat, in a recent number of Power, gives the results of investigation of the influence of compression in internal-combustion engines. It is shown that within certain limits neither the amount of compression nor the heat value of the fuel affects the output of the engine, although the former does affect the economy.

Tables of data from actual practice covering over 600 tests on about forty different makes of internal-combustion engines are included, showing the proper mixture and compressions to be used with different fuels in order to attain the best results. Engineers interested in getting the highest efficiency out of their oils and engines ought to look over the recent files of Power, this magazine being largely devoted to technical discussions of interesting phases of power development.

To Grind Next Week

Pioneer mill begins grinding the first week in December, and Oahu Sugar Company will follow in a few days, H. Hatfield & Co. stated yesterday.

Weeds A-Plenty

Hawaiian Commercial and Sugar Company is at present turning out 1000 tons of sugar per week, Alexander & Baldwin stated yesterday. The recent lowering weather has brought out a plentiful crop of weeds, increasing the number of men that must be employed a cultivation.

At Waimanalo

Waimanalo mill is putting in a new vacuum pan with a capacity of fifteen tons.

CUTICURA CURED TWO BROTHERS

One had Face Covered with Itching Eruption—Eyesight was Affected—Raw, Itching Humor Spread Over the Other from Head to Feet in a Single Day—Dreadful

SKIN-TORTURES YIELD TO EASY TREATMENT

"In 1907 my face broke out in a mass of itching sores which finally affected my eyesight. I tried several highly recommended salves that cost one dollar an ounce, but to no avail. A friend of mine urged me to try Cuticura Soap and Cuticura Ointment as he was sure of good results from his own experience. I used Cuticura Ointment for about six weeks after washing thoroughly with the Cuticura Soap. My face is in perfect health now which I owe to the Cuticura Remedies. I shall always stand by them as one of the greatest blessings to the suffering thousands." Arthur D. Grady, 532 Devoe St., Brooklyn, N. Y. Apr. 9, 1908.

"In the middle of the night of March 30th I woke up with a burning itch in my two hands and I felt as if I could pull them apart. In the morning the itching had got to my chest and during that day it spread all over my body. I was red and raw from the top of my head to the soles of my feet and I was in continual agony from the itching. I could neither lie down nor sit up. I happened to see about Cuticura Remedies and I thought I would give them a trial. I took a good bath with the Cuticura Soap and used the Cuticura Ointment. I put it on from my head down to my feet, and then went to bed. On the first of April I felt like a new man. The itching was almost gone. I continued with the Cuticura Soap and Ointment and during that day the itching completely left me." Frank Geidrey, 223 E. 43rd St., New York City, Apr. 27, '09.
