

LEADING LADY WAS SEEN TWICE

Appeared at Dodge's Last Evening as Well as at the Grand in the Play, "The House of a Thousand Candles."

WINNING A WIDOW

Was the Charming Picture Which Was Shown on the Screen Last Evening and Delighted Hundreds.

Miss Louise Glaum, the charming little actress that took the part of Gladys Armstrong, the scholar, at St. Agatha's in "The House of a Thousand Candles" at the Grand, last night, was also on the program at Dodge's theatre in the Selig Comedy picture "Winning a Widow."

When Miss Glaum came from the hotel yesterday morning and passed Dodge's theatre she noticed the program on the window and made herself known at the office of the theatre, and said she believed she had worked in one of the pictures on the program. Manager Abell ran the picture of the Winning Widow and the leading lady in the picture play was no other than Miss Glaum. The little actress sat and watched her own self and was delighted with the picture.

Miss Glaum worked for the Selig Company during the summer months and as the actors very seldom see the picture this was her first opportunity to see herself on the screen. In describing the work she said they often have to rehearse one scene for several days and they can only take the pictures when the sun is shining. Most of the pictures are taken in Selig's plant in the heart of Chicago but often the company is taken out to the lakes where they camp until the picture is completed.

From Miss Glaum's description of the work it must be very interesting and she says that during the summer months many of the best performers take up the work as an outing, the picture of The Stampede that is to be shown tonight was taken on the celebrated 101 ranch in Oklahoma and Miss Glaum said she regretted that she could not go with the performers to the ranch where the picture was taken.

BABIES BENEFIT BY NEW SKIN DISCOVERY

Stops Itching Immediately, Soothes and Comforts the Little Ones.

A demonstration of the efficacy and entire harmlessness of poslam, the new skin discovery, is afforded when it is applied to the tender skin of infants who are tortured with rashes, chafings, scaly and crusted humors and other skin aggravations. Its effect is soothing, the itching stops at once, the skin heals and is quickly restored to normal condition.

In the various forms of skin troubles in both infants and adults, poslam produces beneficial results from the first application. Eczema, acne, herpes, rash, tetter, etc., yield readily to its remarkable curative properties. Occasional applications will quickly banish pimples, blotches and complexion blemishes and will relieve and cure itching feet, scaly scalp, humors, etc.

Poslam can be had for fifty cents at any reliable druggist's particularly Wilkinson & Co., who make a specialty of it. Or the Emergency Laboratories, No. 32 West 25th Street, New York City, will send a trial supply free by mail to any one who will write for it. This is sufficient to show results in twenty-four hours.

ARE WORTH ONE CENT APIECE.

Seeds of the Ginseng, Command That Price and They Are Scarce at That.

Ginseng seeds are worth one cent apiece or from eighty to one hundred dollars a pound. Dried root is worth \$6.25 a pound.

When first growing from the seed the ginseng plants have two forks or stalks and one leaf on each stalk. The second year it adds another leaf on each part and the third year the plant grows in three parts with three leaves on each part and this year a seed ball forms.

This grows direct from the main stalk of the plant and from four to five inches above the foliage. The average plant, says a writer in Outing, produces from fifty to sixty seeds, and sometimes goes as high as 100 seeds. Wild plants yield better than cultivated.

The fourth and fifth years one leaf is added to each stalk. The fifth year the plant is full grown, having three forks and five leaves to each stalk. It grows from one to two feet in height; sometimes as high as 27 inches. The leaves are broad and flat, about four inches long and two inches wide when full grown, with scalloped edges.

It takes five years to grow the root to germinate for market and 18 months to seed the seed for growth. There is more cultivated root now on the market than wild. The plants are found on high, dry land in the woods and never in swampy places.

INVITATION TO HUMANE SOCIETY

Local Organization Invited to Send Delegates to National Convention to be Held at St. Paul and Minneapolis.

PRESIDENT MAY GO

Interesting Statistics Furnished Showing the Work Which Was Done Last Year—This Week's Report.

The invitations to attend the meeting of the American Humane Society have been issued and President Wilkinson of the local organization has received one asking anyone interested in the prevention of cruelty to children and animals to be present. This meeting will be held on the dates, October 5-6-7 at St. Paul and Minneapolis.

In the announcement which comprises a sheet and a half of type written paper is set forth what will be done at the gathering. It seems that the principal thing which will be discussed is how to make the work of the society more definite and practicable. With this view in mind papers will be read on the subject by competent workers and the delegates will no doubt receive a vast amount of knowledge therefrom which will aid them materially.

A separate leaflet enclosed in the letter gives a complete list of officers of the national body together with information which will tend to make it easy for the visitors to find suitable places while in the city. A few statistics are also given showing the result of the work done last year. It shows that last year, 255 societies out of 411 reported that 166,264 cases involving cruelty to children, and 762,904 cases, in which animals were mistreated, were attended to. Out of 32,094 prosecutions 26,015 convictions resulted, showing that much good has been accomplished.

President May Go.

It is not known whether or not there will be a delegate from Keokuk attend the meeting. President Wilkinson says that he will go if he possibly can get away although he cannot make any definite plans. He is very desirous of attending as he realizes that it would be of great benefit to him in conducting the work undertaken by the local club. George Tucker is another who as signified his eagerness to be present at the gathering and he may possibly get away. So far as is known these are the only two men who are thinking of being in attendance.

Four Cases Last Week.

During the past week four cases have been attended to locally, two dealing with children and an equal number with horses. The former are being carefully investigated while the latter have already been attended to. There has not been a week since the organization of the local order that at least a few cases have not been attended to and so it can readily be seen that the society is a good thing and important to the welfare of the city.

Pellagra a Disgrace. Jacksonville Courier: Dr. Cook and Dr. Zeller will go down in history as two of the world's greatest explorers and discoverers. Cook's feat in reaching the north pole possibly has eclipsed Dr. Zeller's wonderful work in discovering and bringing to light pellagra at the Bartonville state insane hospital. Had it not been for the investigations of Dr. Zeller it might never have been known that there was a case of pellagra north of Mason and Dixon's line. As it is, almost anybody is likely to be honored by having the disease, which appears to be a cross between scurvy and sunburn, with fatal results where the malnutrition is as pronounced as that of many patients in state institutions throughout the land. Nobody ever heard of a well fed, well cared for person contracting pellagra. It is an ailment of impoverished physical condition and throughout the south is confined almost exclusively to insane hospitals and other institutions where effort is made to bring the patient down to the last mouthful which will sustain life in order that "economy" may mark the administration of those in charge. In the eyes of some people, pellagra is a disgrace to the state where it shows itself among the wards under the care of the commonwealth.
