

ALL-STARS LOST TO OLYMPIANS

Crack Quincy Team That is to Invade Detroit When National Tournament is Held, Was Defeated.

SCORES WERE GOOD ONES

Harry Cook, Captain of Local Team, Was Star Performer of Evening, Averaging 203 1-3 in Three Games.

The All-Star Quincy bowling team which is to do the National tournament in Detroit in the near future, was defeated by the Olympian team of bowlers last night on the Olympia alleys. The contest was a good one in many ways and was largely attended by bowling enthusiasts. The Keokuk team totaled 2656 while the Quincy men could muster but 2587, or 69 pins less. This match is the third played between the two teams, each having won one on a previous date.

All honors of the evening were carried off by Keokuk bowlers. Standing head and shoulders above the other players was Captain Harry Cook who reeled off an average of 203 1-3 by consistent work. His games were 200, 201 and 209. This average is the best made in tournament play in the city this season.

A low game of 133 pulled Crimmins down somewhat, but otherwise the men went well at all times. Roberts especially did well and had high single game of 221 and an average of 186.

For the visitors Captain O'Brien did the best work, averaging 185 for the three games.

After the match George Loomis, who by the way took part and averaged 173 1-3, entertained the visitors and local bowlers in his inimitable manner.

Olympians.	1	2	3	Avg.
Crimmins	178	133	162	157 2-3
Loomis	170	151	199	173 1-3
Cook	200	201	209	203 1-3
Maas	165	182	148	165
Roberts	221	166	171	186
	934	823	889	

Quincy.	1	2	3	Avg.
O'Brien	194	182	179	185
Wolf	160	158	192	170
Darnaby	161	165	193	166 1-4 2-3
G. Vanderboom	147	155	202	168
J. Vanderboom	168	158	168	164 2-3

For Infants and Children. The Kind You Have Always Bought

Bears the Signature of *Wm. D. Galt*

HAMILTON, ILL.

Mr. and Mrs. Floyd Young are the proud parents of a baby boy, born Friday evening.

Mrs. Alec Casley visited with friends in Carthage a few days last week.

Perry Clark and family have rented the A. Guthrie property on Sixth and Main street and will move into the same next week. Mr. Thompson and family will occupy the house vacated by Mr. Clark.

Miss Mirtle Taylor visited with home folks at La Harpe over Sunday.

Misses Katie and Addie Turner visited their sister, Mrs. Ed. Kennedy in Keokuk Saturday.

The Jolly Rover's club met with Mr. and Mrs. Frank Jackson Monday eve-

The Stomach and How To Cure Its Ills, Free

More thought is being given to the stomach today than to any other organ. Dieting and a hundred other things are suggested, but the fact remains that we have to eat and that in the main we are eating the same food today that has been eaten for hundreds of years. The point, then, is to find a way of remedying an evil when we find it.

TRIALS OF THE NEEDEMS

WANT TO GIVE THEM TO A BEGGAR? DO YOU WANT TO MAKE A BEGGAR OF ME BY GIVING EVERYTHING AWAY? WHY JOHN YOU KNOW YOU NEED THEM YOU NEED A PILL AGAIN.

RESOLVED: THAT CHARITY GENERALLY BEGINS WHEN THE LIVER AND BOWELS ARE RIGHT. MUNTON'S PAW-PAW PILLS KEEP YOU IN GOOD CONDITION. 10 PILLS IN A BOX 10c.

Munton's Paw Paw Pills cure the liver to act by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it.

Refreshments were served and those present report a good time. H. K. Denton has purchased the Len Ruggles property on the corner of Ninth street.

A. J. Brown and wife, of Ferris, are guests of friends and relatives this week.

Cards are out announcing the marriage of Mr. Jesse Hanson and Miss Ressie Simpson.

Joe Powers and wife, of Quincy, are visiting home folks this week.

Mr. and Mrs. Art Huel, of Ferris, are rejoicing over the arrival of a baby girl. Mrs. Huel will be remembered as Miss Jessie Sanders of this city.

Captain George Angel has sold his residence property on Eighth and Hickory streets to Mr. Jas. Cachran, of Elveston. Possession April 1. Consideration \$2,400. It is Mr. Angel's plan to erect a residence some time in the near future near the new lumber yard in the east part of the city.

Brooks Seigfried and family are moving to Quincy this week. Mr. Seigfried has secured a job on the street car line in that city. Mr. Ed. Rose and family will occupy the property vacated by Mr. Seigfried.

Mrs. M. Parsons still continues very ill. The funeral of the late Mrs. M. T. Brown, of Chicago, was held Tuesday. Interment was in Riverside cemetery near this city.

Mrs. Lizzie Waggoner, M. S. Hiram Kinkade and Mrs. Pearl Onlander are in attendance at the Rebekah Grand lodge in Quincy this week.

Harry Warder and family, of Corydon, Iowa, were called here by the serious illness of the lady's brother, Robert Scott, this week.

Mr. Ensign Simpson, of the north-east country, will leave soon for North Dakota, where he will consult a specialist in regard to a cancer on his tongue.

How's This? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

WALDING, KINNAN & MARVIN, Wholesale Druggists, Toledo, O.

Billboards as Nuisances. Tacoma, Wash., has a fight on against the billboard abolition, and through a decision of the city attorney it may win, to the envy of many another place.

Nearly One Hundred at Work. Yesterday there were exactly ninety six men at work, according to the brass checks hanging in the company's office.

The Future. But as to a glance into the future.

HOW THE GREAT DAM WILL LOOK

Monstrous Power Plant Not far From Iowa Shore Will Stand Forth in a Blaze of Glory.

JUST A COMPARISON

It Will be as Big as Estes House If Latter Had Frontage on Main Street of Nearly Six Blocks.

Viewing it from all its angles, glancing optimistically into the future—about three years hence, the Keokuk and Hamilton Water Power dam which will span the Mississippi, looms up as a task for hydraulic engineers and construction engineers that, when accomplished, will prove a wonder to the United States and to the world. Few can imagine the enormity of the construction work that will be embodied in this longest dam in the world; little do the Keokuk people think of how the imposing structure will stand forth for years to come to fill the sack of those who will hold it from the time of its completion.

Yesterday afternoon two newspaper men in company with two gentlemen from the water power offices in this city visited the scene of activities across the river. While the purpose of the visit was to note progress that had been made during the past few weeks and give the readers a few more items that may interest them, yet the afternoon did not pass without a glance into the future and various remarks and predictions made as to the picture which the Mississippi river and the dam would make in 1912, and even the change that would likely be wrought fifty years hence. Before giving these somewhat romantic views, although it must be said they are founded on real facts, it might be well to speak of the general work and progress made by men working on this great enterprise.

Foreigners Scatter. First of all, however, the trip was not without its amusing incidents. After the party had arrived on the scene and had taken a general view of the situation a closer inspection of work being done in excavating for the warehouse was made. Just in the midst of this interesting study of the work one of the foremen hastened forward with the news that a blast was to be made. At least that is what he must have uttered, for in a twinkling the Roumanians, Italians, Mexicans, Americans and a few others of mixed nationality whose names cannot be pronounced or spelled were scattering in all directions. Some descended to behind small trees; while still others went some distance off. One of the newspaper men was about two hundred yards off after the visiting party had taken warning, and followed suit. The detonation of dynamite was soon heard and several cubic feet of frozen earth and hard rock was loosened from its mooring near the crest of the hill. The blast is nothing like the one that will be heard Saturday evening, preparations for which are now being made. Deep holes are being drilled in what will be the floor of the warehouse and these will be filled with dynamite, all to be set off at once.

The most imposing part of the entire dam will be the monstrous power plant. Consider the dimensions 1,400 feet long and 123 feet wide, and from the foundation to the roof 133 feet. It means that the power house would be bigger than the Estes house, if the latter had a frontage on Main street extending from Fifth and Main to between Ninth and Tenth on Main. What a great sight that structure alone will be for summer excursionists going from St. Louis to St. Paul and passing through the lock when it is highly illuminated. Standing forth boldly in the river, reaching far to the north and far to the south, while peeping over Keokuk's highest skyscrapers, the power plant will be one of the most pretentious structures in the country. The sub-structure, which is that part below the surface

line of the water, will be built of massive concrete and will contain more cement than the main spillway of the dam itself. In it will be moulded water passages and water wheels. The superstructure, that above the surface line, will be built of concrete, brick and steel. A large force of skilled electricians will be needed when power is being generated and the work of keeping the electric generators, transformers and switchboards in working order and in repair will alone be a big task. The actual expense of producing the power will be high, for in addition to the payroll there will be the general wear and tear on the machinery. The power house will be brilliantly illuminated at all times during the night, for work will never cease and the tumultuous roar of engines will be heard for some distance up and down the Mississippi. It can be said that by far the most stupendous task of all will be in completing this huge plant. At each end of it will be places through which ice can be guided in cold months, when it freezes above in the lake and floats down or forms within the breaker.

Worth Money. Fifty years from the time of completion of the dam it is argued that the project will be worth many times its value when first completed. This will be caused by the increase in horse power, which is certain to advance quite a figure in a half century. As to the wear and tear on the dam, that will be mostly in the power plant, and will take the form of machinery that will have to be replaced during certain periods. The main spillway of the dam will not be subjected to much wear, although there will be a heavy pressure of water against it at all times. The fact that there will be no current will cause little grinding that might otherwise occur, and for this reason the spillway will stand the attack of centuries. Just above this

part of the dam there will likely be quite an accumulation of sand and deposit necessitating much dredging. If future events and conditions can be truly predicted.

Just above that part of the dam between the river road and the river edge on the Illinois side is a bend in the shore line, thus making quite a tract of land just above the spillway as it ends in the eastern terminus. This will be cleared of trees and shrubbery, according to statements by the water power men. Thus the main tract will not catch the debris that floats down. With this clearance, boats and crafts of a various nature can ply back and forth, landing almost any place on the Illinois shore. A few years from now crafts on this great lake will be about as numerous as any place in the country.

Silver Threads Amongst the Gold. "Darling, I am growing old, silver threads amongst the gold shine upon my brow today, life is fading fast away." Thus runs one of the old, old songs. There is always a note of sadness and regret attached to the coming of gray hair prematurely, as if the hand of time were ruthlessly checking off the pleasant hours of youth and laughter. Remedy a better remedy has been exploited for the natural color but the one that has stood the test of years and proved the most pleasant and reliable, is HAY'S HAIR STRENGTH. This time-tried preparation succeeds where others fail. It is one of these safe and dependable remedies that it is a pleasure to recommend. HAY'S HAIR HEALTH restores gray hair by furnishing to the hair roots, the exact nourishment that they need and gives them new life and vigor. It is not a dye. It works pleasantly and effectively. All reliable druggists sell it for 50c, and a dollar. Booklet containing further information on the "Care of the Hair" will be forwarded for 2c, by the Pacific Hair Specialties Co., 30 Clinton St., Newark, N. J., U. S. A.

"The Pinch of Prosperity"

Have you felt it? You wouldn't mind the high prices of food if your wages advanced with them. It is a good time to cut out expensive foods and try

SHREDDED WHEAT

It is a better substitute for meat than vegetables, because it is rich in muscle-making, brain-building material. It contains more body-building nutriment than meat or eggs. It costs much less, always the same price—always clean—always pure—always wholesome. Your grocer sells it.

Shredded Wheat Biscuit is made of the whole wheat, steam-cooked, shredded and baked in the cleanest, finest food factory in the world. It is ready-cooked, ready-to-serve. Two Shredded Wheat Biscuits heated in the oven to restore crispness, and eaten with a little hot milk, and salted or sweetened to suit the taste, will supply all the energy needed for a half-day's work. If you like it for breakfast, you will like it for any meal in combination with vegetables, baked apples, sliced bananas, stewed prunes or other fruits.

ALL THE "MEAT" OF THE GOLDEN WHEAT

in easy access to the cement, necessitating but a short haul.

Network of Tracks. When the work is further under way it will be unusually interesting. A perfect network of railroad tracks will be found on the company's ground and about a half dozen of dinky engines will be plying back and forth hauling material here, and picking up cars of dumped material there. Nearly everything that goes in the construction of the dam will be transported back and forth by means of this miniature railroad. Already the company is excavating and leveling up the scene of work just a few feet above the O'Hara road.

The heavy machinery that will be used in the construction work will be operated by compressed air and the company has made arrangements for the building of a plant of this kind just a short distance above the eastern terminus of the dam. This is found to be much more convenient than steam in work of this kind and it will be used exclusively in the heavy lifting and other work of a similar nature that will be done.

The ground has been so hard of late that present work is expensive, but it cannot be said that the men are not accomplishing much, especially as to excavating for the eastern terminus of the dam that will occupy that stretch from the present Illinois shore to the river road, which has recently been closed to traffic by the company. Yesterday bedrock could be plainly seen for quite a few feet and progress had been made well toward the river. It may be well to mention at this point that the thousand feet of the dam extending from the present river shore to the road above mentioned will be constructed largely different from the rest and larger part of the main spillway. It will not likely have any passages through which the water can flow, for there will scarcely be any need for them. Thus it can be seen that the lowland below the dam between the river and the river road will not be overflowed. While the eastern terminus of the dam will mark no decorative features of any kind, yet the curves will be of such grace as to dispell any idea of the dam ending abruptly in an Illinois hill.

The Future. But as to a glance into the future.

A Handsome Woman

Every woman may not be handsome, but every woman should keep with care the good points nature has given her. No woman need have sallow skin, dull eye, blotchy complexion, who pays proper attention to her health. Where constipation, liver derangements, blood impurities and other irregularities exist, good complexion, bright eyes and sprightly movements cannot exist. Internal derangements reveal themselves sooner or later on the surface. Headache, dark rings around the eyes, sallow skin, a constant tired feeling—mean that the liver and digestive organs are needing help and correction. Chamberlain's Stomach and Liver Tablets give this necessary help. They work in nature's own way. They do not merely flush the bowels but tone up the liver and stomach to fulfill their proper functions. So mild and gentle do they act that one hardly realizes that they have taken medicine. Chamberlain's Tablets can be relied upon to relieve biliousness, indigestion, constipation and dizziness. Sold everywhere. Price 25 cents.

There is a Difference

Scott's Emulsion is the original Emulsion of Cod Liver Oil and has been the world's standard for 35 years. There are thousands of so-called Emulsions, but they are cheap, worthless imitations and never half as good as the standard. They are like thin milk. Scott's Emulsion is like thick, rich cream. It is a concentrated food-medicine of the most beneficial sort. You can make it thin with milk or water, but don't buy the thin, worthless imitations. ALL DRUGGISTS send the name of paper and this ad. for our beautiful Serravallo Bank and Child's Sketch Book. Each book contains a Good Luck Penny. SCOTT & BOWNE, 409 Pearl St., N. Y.

While They Last
