

Duncan-Schell Furniture Company's 22d Annual March Sale

**Begins
Monday, Feb. 28**

**and continues
through
March**

Duncan-Schell Special

Absolutely Finest High Grade Automatic Lift and Drop Head machine made. The best sewing machine that skill can produce. It is ball bearing and the superior of any machines sold at \$50 and \$60.

On this page we illustrate Duncan-Schell Special equipped with the latest improved Automatic Lifting device. This device is simple in construction, cannot get out of order, but is very strong and durable. By raising the lid the head is lifted automatically into position ready for sewing; in the same manner the head is lowered automatically by folding the head over the foot, so that in raising or lowering the head, it is not necessary to touch it at all.

This newly patented automatic lift is found only on our Duncan-Schell Special. Automatic Lift and Drop Head Machine. The lifting device is so constructed as to distribute the weight upon the working parts and relieve the feet almost entirely of any strain. As a result, but little wear is required on the part of the operator to raise and lower the head. All parts of the lifting device are made of the best quality tool steel, and being simple in construction, without springs or complicated parts, the device is practically indestructible.

We put the special head, the highest arm, lightest running and without question the highest sewing machine heads made, regardless of price or name, on our Automatic Lift Drop Head Cabinet.

Duncan-Schell Special has an extra high arm and unusually large and strong operating parts, making it especially desirable, not only for house hold and domestic work, but also for dressmakers, tailors and all others who require sewing machines of the highest grade, capable of doing the highest range of work from extreme heavy to extreme light, both fancy and simple sewing, and which will stand the wear and tear of constant use. The operation of our Duncan-Schell head on any weight or thickness of material with all grades of cotton and silk thread is perfect, rapid and easy. On this machine the thread will not break, even though the machine is turned in the wrong direction. Everyone who has used a sewing machine and experienced the annoyance of breaking the thread when accidentally turning the wheel the wrong way will appreciate this valuable feature.

Design of Head.—This head is made and shaped with a view to the most perfect operation of the various parts and yet not neglecting those perfect lines that make the handsomest, most roomy and most shapely high arm sewing machine head possible to construct.

If after using this machine one year you are not satisfied with same we refund the money.

Duncan-Schell Special, Five Drawer, Drop Head Automatic Life for this sale \$23.50
The above price does not include accessories. We furnish a complete set at no additional.

No. 25. Order by Number.

Cut of Victor Machine Case
