The Cookerette No. 25 Open.

The Cookerette is a receptacle with walls about two inches thick, having a metal inner lining. These walls are composed of a fibre which is a good non-conductor of heat. The cushion is packed with the same material. If a kettle of boiling hot water or food is deposited in the Cookerette and the cushion is put in place, the heat cannot escape, consequently the water or food remains at the boiling temperature for several hours, and of course anything that is in the water is bound to cook.

Contains one 1-quart granite kettle, with granite cover, one 2-quart granite pudding dish, two or three different articles of food may be cooked in it at the same time; cooks anything that is boiled, stewed, steamed or roasted. Weighs with complete equipment 10 lbs., is 12 inches in diameter and about 12 inches high; is very convenient, attractive in appearance and will last a lifetime. A child can operate it. Regular price \$3.50. MARCH SALE PRICE\$1.95
