**BECAUSE** it is the only refrigerator insulated with Granulated Cork, which, according to all scientific tests, transmits a less number of units of heat than any other.

**BECAUSE** there are no mitered joints in base or top to open up, or corner blocks to split apart or fall off.

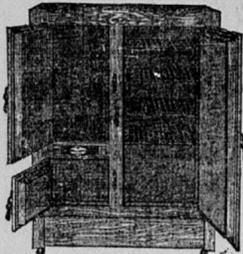

**BECAUSE** the front, bottom and back of ice chamber is made of one solid piece of galvanized iron, to which the

ends are double seamed, and the joints soldered on under side, making a perfect water-tight joint.

**BECAUSE** the trap used on this refrigerator is our own patented design and is far superior to anything used for this purpose, as it is so made that it cannot lose off, neither can it get out of place.

**BECAUSE** the bottom of provision chamber is placed 3/4 inch below the door, which prevents anything spilled therein to flow out of door onto floor.

**BECAUSE** it is the only refrigerator having trough in bottom of provision chamber, which permits us to place trap in front where it can be easily looked after, and which also acts as a purifier by the water absorbing any impure odors and carries same out through trap.

**BECAUSE** the perfect circulation of air prevents any condensation in the provision chamber and air flows. The price you pay today for a refrigerator is but a small part of the price you will pay in a lifetime of the refrigerator for ice.
