Gunmen Shoot Down Two Men and Woman Has Her Throat Cut

[United Press Leased Wire Service.] CLEVELAND, Ohio, March 2.—At least 200 police and detectives were today engaged in a determined search for members of a band of assassins and gunmen, terrorizing the foreign section here. Climaxing a two weeks reign of terror, two men are dying in hospitals today as the result of three attempts at murder within four hours. Blago Siddito, fell in front of his home on Cherry street, with two bullets in his abdomen. Pierced by nine buckshot, I. Saminello fell dying within a block of the Sidditi crime on early later. Mrs. Josephine Murcurio attempted to tell a detective something of the assassins and was silenced by a knife in the hands of her husband.

—Iowa's death rate per 1,000 population during 1913 was 1,008. These figures are based on a report of the number of deaths in the state during the past year, according to the report of Dr. G. H. —Keokuk friends of Attorney John B. Sullivan will be interested to learn that he has decided not to be a candidate again for senator from Polk county. He has served eight years and his refusal to become a candidate again is due to the removal of his partner, Jerry B. Sullivan, to New York City, thereby requiring Mr. Sullivan's time to look after his law business.

—Burlington high school students composing the physics class and the science club, were the guests of the People's Gas and Electric Co. last Saturday, visiting the West Burlington sub-station where electricity is transmitted from the Keokuk dam. W. J. Kyle, the Burlington representative of Stone & Webster, accompanied the classes to the sub-station. The man in charge of the plant showed the different pieces of apparatus and explained the function of each. He showed how the two "feeders," the wires from Keokuk, entered the building and how the power carried by them was put to use by means of the transformers. Only one of these feeders is used at a time, the second one being for an emergency. The watt meter which marked off a zigzag line in red ink on a chart showing the amount of power used every instant by the entire street car system of Burlington, was especially interesting. The wooden poles with which he turned on or off certain parts of the apparatus, also were of interest. The feeders from Keokuk carry 11,000 volts each. Asked if it wasn't lively there during a thunderstorm, he said it was rather, but also that it was considered the safest kind of a place to be under those conditions.

Going to do Some Painting this Spring?

This is a good time to be giving painting a serious thought. It matters much if you give a little time to thorough investigation instead of just going about it hurriedly at the very time when you expect to do it. The kinds of paints that we sell bear close investigation and we want to talk this whole matter over with you now or any other time.
