VOTES TOMORROW WILL TELL STORY

Mayor and Councilmen Will be Chosen at the Polls—Question Is Who Will Win.

TWO SPECIAL ISSUES

Bond Issue and City Limits Extension Plan Both Are to be Put Up to the Voters.

City Election Monday. Polls open—7 o'clock in the morning. Polls close—7 o'clock in the evening. Candidates for mayor—Dr. S. W. Moorhead and Rev. J. F. Sanders. Vote for one. Candidates for council—J. A. M. Collins, T. J. Hickey, Fred H. Overton, F. T. F. Schmidt. Vote for two. Proposed bond issue of \$50,000 to be voted for at regular polling places. Vote at Rolla engine house on extension of city limits question. Returns at Gate City office.

The candidates for mayor and council finished their campaign last night. Today is the day of rest in the battle, the breathing space before the final clash. Tomorrow the battle will be on in earnest at the polls. At this time, the result may rightly be said to be doubtful. The "dope" on this election is sadly wanting, and what there is of it is badly warped. The polling places for this election tomorrow are as follows: First precinct—625 Main street. Second precinct—30 South Third. Third precinct—George Washington school, 125 North Ninth street. Fourth precinct—1015 South Fifth street. Fifth precinct—1317 Main street. Sixth precinct—1206 Johnson street. Seventh precinct—Keokuk Electric company's barn, 1901 Bank street.

Heavy Vote Expected.

From all indications the vote tomorrow will be a heavy one. The primary vote was above the average and it is predicted that there will be a larger vote at the polls tomorrow than two weeks ago. The candidates and their organizations have been drumming up all voters not registered two weeks ago, and heavy voting is to be the order of things tomorrow. That the vote of 3,731 two years ago will be overshadowed by a thousand is the prediction of many of the candidates.

In the race two years ago, Elder with 1,564 votes, beat Lofton with 1,338. Gray for commissioner headed the list with 2,003 votes. Hickey came second with 1,844 and Diamond polled 1,450, while Schmidt was defeated, too, receiving only 1,702 votes.

Gate City's Returns.

The Gate City will receive returns and will be headquarters for the citizens, who want to get the latest news from the polls. The Gate City's service at the primary was appreciated and a big crowd is anticipated Monday night.

Special Issues Up.

The race for the council completely

It's Great to "Do Things"

But the doing power of both brain and body depends largely upon the right kind of food.

There are certain elements in the field grains that Nature uses to build a strong working body and brain.

Grape-Nuts

Food

Made of wheat and barley, contains all these strength-making elements—including the vital mineral salts (Phosphate of Potash, etc.) particularly for the nerve centres and brain.

Grape-Nuts food tastes delicious, is easily digested and its power is proven by trial.

All Hidden Parts Revealed at the Show

You have read over and over how R. E. Olds builds cars. Of the costly parts, of his radical tests—of the utter exactness and the over-capacity.

You have heard of his extremes in the hidden parts, which add one-fourth to the necessary cost of each car.

Now you can see them. We exhibit an open chassis at the show. And every important gear and bearing is there for examination.

You will be amazed to see the parts that are used in every Reo the Fifth.

Our 10,000-Mile Test

This is the Reo rule for strength: Build each part as strong as it need be, then add 50 per cent as a margin of safety.

And that rule is always followed. Reo the Fifth has a 35-horse-power engine, but all tests are made to meet 50-horse-power requirements.

Then, in building this car, we have for years kept test cars on the road. They are run by relays of drivers night and day on rough roads—up to 10,000 miles. After those weeks of reckless driving we take the car apart and inspect it.

The requirement is that every vital part, after that rough usage, shall remain about like new. Each part is made to do that.

To insure this staunchness in every car, all steel is made to formula, and each lot is analyzed twice.

We devote a whole building to tests and analyses. There are crushing machines for testing gears. There are machines and methods for putting every part to the most radical tests we know.

It Stays New

The result of all this is a car that stays new. It saves trouble, repairs and upkeep.

We are building these cars—as we always have—for what men will say five years after buying.

More and more men want cars built like that—cars which they buy to keep. There is

never a spring when the demand for this car is not twice the factory output.

Our New Body

This season's model has the streamline body and many new ideas in equipment. It is the handsomest car that ever went from this factory.

It comes completely equipped—with electric starter and lights—for \$220 less than last year. That saving has been made by confining our output for years to this one chassis.

Come and see this example of an honest car, built by a man who has spent 27 years in building cars better and better.

Drapery Fabrics that love the sunshine

You can have beautifully colored window draperies and upholsteries without fear of the fabrics fading.

Orinoka Guaranteed Sunfast Fabrics are guaranteed to withstand any amount of sunshine and washing without losing their freshness of color in the least.

They have all the charm and tone of costly fabrics that will not last so long, yet Orinoka Fabrics are wonderfully inexpensive. We are showing a comprehensive assortment of weaves and patterns that are suited to every room in your home and any color scheme.

Consult us on matters concerning home decoration. We can co-operate with you in securing a tasteful, harmonious effect.

COL. S. S. M'CLURE'S LECTURE TODAY

An Able Lecture by a Man of Great Ability and Record and an Important Subject.

Every voter and citizen in Keokuk ought to hear Colonel Samuel S. McClure, editor of McClure's magazine, lecture in the Grand opera house this afternoon at three o'clock. However, this will be impossible as the seating capacity of the opera house is limited to 1,064 seats including the parquet, balcony and gallery. The main floor and boxes on this floor have been reserved, or about 30 percent of the seating capacity. These seats were placed on sale at the Grand office at 15 and 25 cents. The object in making these reservations is to assist the committee in meeting the expense of bringing Mr. McClure to our city, and not for the purpose of making money on the lecture. Ordinarily the admission fee to lectures of this type and character is one dollar. The doors will open at 2:30 o'clock, and men and women are invited to be present. There is no admission fee, and seats are free in 70 percent of the house. The male quartette composed of Messrs. Hulson, Hayden, McFarland and Hulson will sing.

His Lecture.

Speaking in an indirect way, the lecture on government which Col. McClure will deliver in this city is probably one of the most expensive lectures which has ever been prepared.

Mr. McClure has been studying the subject of government and getting his knowledge from first-hand investigations for the past ten years. He has visited the best governed cities or every civilized land and has watched the progress of national governments in much the same way.

In addition to that he has had a trained staff of investigators at work during the greater part of the ten years which he has given to this world study of rulership. And in that time he has caused the magazine of which he was the founder to spend hundreds of thousands of dollars in the gathering of data and the sending of special writers to various parts of the earth on missions of investigation. Mr. McClure has had, therefore, all of his own experiences to draw from as well as the enormous amount of data in the offices of the magazine at his disposal in preparing his lecture.

Safe to Bet on.

Pittsburgh Dispatch: One sure pointer about the stock market is that if you keep at it long enough you'll lose your money. A man might make a safety bet on that certainty and be sure of having something left—if he could get a taker.

PERSONALS.

Mrs. Ida Wood Selman of Bloomfield arrived in the city Friday evening and is spending a few days visiting her parents and other relatives and friends.

C. R. Joy has returned from a business trip to New York City.

Ralph Kiroh has gone to Kahoka to spend the school vacation with relatives.

Mrs. C. F. Skirvin and son, Junior, are visiting Mrs. Skirvin's mother in Creston.

Misses Martha and Caroline Baldwin are at home after a month's visit in the east.

Miss Dalia C. Concaunon left for St. Louis this morning to visit with friends.

The friends and relatives who came to the city to attend the funeral of the late Mrs. J. A. Scroggs have returned to their homes. Mr. H. T.

Cleaver of Denver, Colo.; Mr. and Mrs. C. Hain and Miss Eleanor Hain of Kansas City, were the guests of Mrs. Wm. A. Brownell. Messrs. Cleaver and Joseph Scroggs were guests of Mr. and Mrs. H. W. Upham. Mr. and Mrs. Gehle of Kansas City were guests of Mr. and Mrs. E. Ross Baker.

Miss Katherine Martin, director of kindergarten training of the University of Chicago, is spending her vacation in the city with her mother, Mrs. M. A. Martin.

Effect of Early Environment.

Boston Transcript: The Mississippi chicken that was hatched the other day wearing a fur coat instead of feathers may have been born in Dixie, but the chances are that one of its ancestors was a carpet-bagger from New Hampshire.

BUY VAUDEVILLE THEATRE CIRCUIT

Marcus Loew Pays Million and a Half For a Bunch of Opera Houses.

[United Press Leased Wire Service.] KANSAS CITY, Mo., March 28.—Marcus Loew, today owns the Sullivan and Considine circuit of vaudeville theatres covering the entire central west and reaching to Vancouver and Victoria in the northwest and down the Pacific coast to San Diego. The deal was consummated here. The circuit was sold for a little more than \$3,000,000.

Mr. Loew bought the Sullivan and Considine (Inc.) Empress theatres in the northwest, a chain of sixteen, and a controlling interest Sullivan and Considine had in the United Theatres company of Chicago, operating a chain of twelve theatres in the middle west. Of the purchase price Emanuel Blumenthal, who represented the Sullivan interests in the transaction, said one and one-half million was paid for the good will and the remainder for various theatre properties, buildings, fixtures, leases and lands as fixed at the

last appraisal.

Of the theatres transferred, a few are now closed, but will be re-opened soon. The list as furnished by Blumenthal shows Loew acquired theatres in the following cities: Kansas City, Ft. Wayne, Ind., Cincinnati, Milwaukee, Minneapolis, St. Paul, Duluth, Portland, Oregon, San Francisco, Denver, Winnipeg, Seattle, Calgary, Spokane, Butte, Vancouver, Victoria, B. C., Tacoma, Sacramento, Los Angeles, Salt Lake City, Philadelphia, Baltimore, Cleveland and Detroit.

Interested with Loew in the deal was the firm of Jones, Linick and Schaefer, of Chicago, operating a string of twelve theatres in or near Chicago.

Heading for the Finish.

Washington Star: By the time English bishops agree to cut out the word "obey," the militants will have arrived at the point where they'll want to cut out the whole ceremony.

Works Both Ways.

Possibly, as the saw says, faint heart never won fair lady. But, on the other hand, it may have kept a man from getting away.—Athens Globe.
