

HUNTING LICENSES FOR LOCAL WOMEN

County Auditor Issues Permits to Four From This City Who Wish to Carry Gun This Fall.

NEW RECORDS ARE MADE

Since Fall Season Opened, Thirty-six Were Issued in One Day From Auditor Meyer's Office.

Four Keokuk women have taken out hunting licenses. Six in Lee county have permission to hunt, the other two being from Fort Madison and West Point. The local women who have purchased licenses are: Mrs. Ruth Pechstein, Miss Blanche Burns, Mrs. F. C. Wiseman and Mrs. Neva Sutton. Mrs. William Pogge and Mrs. J. W. Philpott of Fort Madison are the other two feminine nimrods.

Mrs. Neva Sutton has taken out her hunting license annually for a number of years.

The Fort Madison Gem City says of the applications for hunting licenses which have been made since the first of July:

Since the opening of the 1914-15 issue of hunters' licenses in Lee county on July 1, six feminine toters of guns have secured licenses from the office of the county recorder here, according to records on the books of County Auditor A. P. Meyer. Up to ten o'clock today, the total issue since July 1 had reached 323.

Mrs. J. W. Philpott, wife of Dr. J. W. Philpott, is the only Fort Madison woman who has been granted a license from the office here. West Point claims one huntress and the rest are from Keokuk.

Wednesday set another high water mark in the issue of licenses for hunting from the auditor's office. Thirty-six permits were issued during the day, this number jumping far ahead of the record of 22 set on the day before the opening of the duck and squirrel season.

Up to ten o'clock this morning, nineteen licenses had been called for and filled out.

Despondency. Is often caused by indigestion and constipation, and quickly disappears when Chamberlain's Tablets are taken. For sale by all dealers.—Advertisement.

Kaiser Killed 4,006.

BERLIN, Sept. 4.—(By mail.)—Kaiser Wilhelm's "hunting string" for 1913 was made public recently by the staccato attached to the office of his "master of the hunt," whose business it is to keep accurate track of what the kaiser hits and who can be trusted not to keep private score of the "misses."

The kaiser shot 4,006 head of game last year. The score, includes 73 deer, 3,185 pheasants, 73 partridges, 111 fox, 17 hare, 411 rabbits and 63 wild hogs. This brings his grand total score to 73,308 head of game, of which 23,746 were deer, 44,086 were pheasants, 18,025 hare, 3,178 rabbits, 3 bear, 3 turkeys, 95 grouse, 963 partridges, 170 ducks, 3,252 wild swans, and 3 reindeer.

Severe Blood Troubles Vanish

With Magic Effect, Great Remedy Makes Disease Disappear.

At almost any drug store you may obtain E. S. S., the famous blood purifier, and you then have the vegetable wizard that makes all blood troubles vanish. Your stomach takes kindly to E. S. S. It rushes into your blood, is a purifying wave, makes the liver, kidneys, bladder and skin work in harmony; stops accumulations that cause rheumatism, catarrh, swollen glands, sore throat and skin eruptions. Just as food makes blood, so does E. S. S. follow the process of digestion to stimulate natural secretions to protect us against the ravages of disease germs. We are well aware of the fact that these germs are apt to be latent within us to break forth in violent eruptions of the skin whenever the system is in a low state of resistance. And it is to both prevent these eruptions or to get rid of them that Nature gave us such an ally as E. S. S. It is purely vegetable, contains no mercury, and yet it overcomes those serious troubles for which mercury has been employed for ages. In every community are people who know this to be true. They owe to E. S. S. their recovery. Get a bottle today. Before all substitutes. Read the folder around the bottle that tells of the wonderful work being done by the medical department in assisting users of E. S. S. For a special book on blood troubles address The Swift Specific Co., 51 Swift Bldg., Atlanta, Ga.

THE NEW POPE OF NOBLE BIRTH

Cardinal Della Chiesa Who Was Elected Pontiff, Comes From One of Italy's Great Families.

IS DEEPLY RELIGIOUS

Lived in Meagre Quarters and So Simply Dressed That He Was Mistaken for Poor Priest.

[By Henry Wood, United Press Staff Correspondent.]

ROME, Sept. 4.—From peasantry to nobility, the Fisherman's ring has passed, in the election of Cardinal Della Chiesa as pope, succeeding his holiness Pope Pius X. Pope Benedict XV as the archbishop of Bologna shall henceforth be known, comes of a noble family. His father had the title of marchese and though the son also enjoyed the title he never used it and found his greatest pleasure in administering to the poor and needy.

Pope Benedict XV is physically the smallest man ever elected to the throne of St. Peter. He is very near sighted and wears glasses. The mind which will direct the affairs of the church in the coming years is such as commanded the admiration and respect of the famous Cardinal Rampolla, secretary of state during the pontificate. A brother of the new pope is a retired admiral of the Italian navy. Another is a retired captain, but as his brothers gave their lives to Italy so did Chiesa consecrate himself to the church. As an example of his deep religious nature, in Rome he walked daily to celebrate the 5 o'clock mass. So simple was he dressed he often was mistaken on the street for a poor priest seeking charity. Instead of living as he might have as under secretary of state, he occupied poor and meagre apartments that he might devote his income toward charity. When he was appointed arch bishop of Bologna his new parishioners presented him with an auto. The archbishop accepted the motor car but in doing so declared that he would use it only for the benefit of the poor and he would ride in the auto only on missions of charity and in attendance to his parish duties.

Cardinal Della Chiesa had little idea that he would be the next head of the church when he came to Rome for the conclave.

BORDEAUX WAS CAPITAL ONCE BEFORE

French Moved Their Seat of Government to That City to Escape Prussians.

[United Press Leased Wire Service.] LONDON, Sept. 4.—The transfer of the French seat of government from Paris to Bordeaux makes that city the capital of the nation for a second time. Shortly after the founding of the third republic the government moved to Tours in 1871. When the Prussians moved on Tours the government moved to Bordeaux.

Bordeaux is 389 miles southwest of Paris and has a population of 240,000. It is located on the west bank of the Garonne, sixty miles inland, and is in the center of the Medoo wine growing district.

During the terrible days of the French revolution Bordeaux suffered almost as much as Paris. It was the headquarters of the Girondists at that time. It was also at Bordeaux that the proclamation of Napoleon's de-thronement was decided upon by the last assembly meeting held there before the government went back to Paris. Bordeaux is the third port of France in commercial importance. The great harbor there is capable of containing 1,000 ships of any size. Large ocean steamers can ascend the Garonne to the city at high tide. Vessels of 600 tons can ascend at all tides. It would be easy to land English troops in the city. Bordeaux's university is attended by over 2,000 students and has a library of over 200,000 volumes. There are a series of forts on either bank of the Garonne river leading to Bordeaux and there are ring fortifications of minor importance at the outskirts of the city. While an armed force of size could easily take the town, it is improbable that the Germans could send such a force that distance and maintain a line of communication.

in Flooded China. SAN FRANCISCO, Sept. 4.—Thousands are dying daily of starvation in the recently flooded West river valley, above Canton, China, according to arrivals here from Hong Kong, the English settlement at the mouth of the river. The valley's population is so dense, they said, that it is on short rations even during seasons of good crops, and a shortage means simply that a corresponding number of people must die of hunger. In the present case, it was said, the loss was practically total, and but relief from the

Zephyr's Sanisac

The Greatest Sanitary Precaution in Over Two Thousand Years of Milling

NOT SINCE the days when the oxen of Ancient Egypt tediously trod the wheat; or the hand-mill was used to beat out the grain on the old threshing floor, on down to the modern engine-driven, self-feeding, wind-stacking thrasher of today;

Not since the days when the Egyptian maid-servant crushed and powdered the golden grain into coarse flour, in her crude stone mortar; or the great-grandfather of modern milling ground his grain 'tween the old mill stones; on down to the most up-to-date roller mills of today—sanitary in every detail, has there ever been introduced or adopted such a sanitary milling precaution as we have given to the world in **Zephyr's Sanisac**—

A dust-proof, dirt-proof sanitary flour sack, guaranteed to carry the flour from the sanitary mill unsoiled, untainted and undefiled throughout its numerous and devious trails of travel, until it finally reaches the kitchen of the remotest consumer.

THE PURITY PROTECTED.

Before the use of **Zephyr's Sanisac** for **ZEPHYR FLOUR** all the precautions that could be taken to produce flour, by the most scrupulous sanitary methods, which advanced sanitary science could suggest, were overcome or rendered ineffective for the lack of a sanitary sack in which to pack the flour for transportation.

No matter how pure the flour when it is packed into the ordinary sack, before it reaches the consumer it may be contaminated in a hundred different ways.

THE LAST SANITARY LINK.

But **Zephyr's Sanisac** overcomes all this, and completes the chain of wise precautions developed to insure purity. It is the last link, the long-sought essential, that makes all the sanitary processes practiced in the manufacture of **ZEPHYR FLOUR** effective.

It was because of the faults of the ordinary flour sack that the millers of **Zephyr's Sanisac**—the Flour that's Tested in the Mill Every Hour—long ago began a series of scientific experiments to find the perfect flour sack. We have not been content

merely to produce a flour, every pound of which must conform to our rigid, unvarying standard of purity and excellence, but we were determined that our flour should reach the consumer with all its excellence and purity intact.

Zephyr's Sanisac the dust-proof, leak-proof, sanitary flour sack solved the problem for us—the same problem that has confronted the milling industry since the days of the Egyptians.

HOW THE SACK IS MADE.

What is **Zephyr's Sanisac**?—It's a combination cloth-and-paper sack, the two materials ingeniously joined together. The base of cloth is lined with a thin film of very tough blue—fast-color—sanitary paper, firmly calendered into the fabric while passing under heavy pressure, between heated rollers. The sack made of this paper-lined cloth, is non-porous—absolutely dust and dirt proof, and it is impervious to the moisture of the air. It is also light-proof.

Therefore, **Zephyr's Sanisac** is completely protected from all contaminating outside influences. It comes to the consumer pure, in perfect sanitary condition, and it may be kept in the **Sanisac** in the same condition until entirely used up by keeping the sack closed.

Dust or dirt cannot sift through into the **Sanisac** neither can the flour sift out. This feature means a material saving of flour—because it does not waste in the handling between the mill and your kitchen.

THE TEA TOWEL FEATURE.

When the **Sanisac** is empty it may be easily converted into a tea towel by simply ripping the sack and soaking it in water until the film of paper detaches itself from the cloth.

You will be delighted with **ZEPHYR FLOUR**—"the Flour that's Tested in the Mill Every Hour"—and you will be more than delighted with **Zephyr's Sanisac**—a combination of goodness and protection, such as you have never known before. Try a sack—it is guaranteed to you.

outside, which though large, has been inadequate to meet the frightful conditions, vast districts would be nearly depopulated.

Socialist Soldier.

BERLIN, Sept. 4. (By mail.)—Three years in prison was the sentence imposed upon a private soldier named Fischer by the military court of the third army corps for having expressed just before the outbreak of hostilities the opinion that in the event of war the socialists in the army would shoot their own officers. Herr von Lengerke, a former soldier, testified that while riding in one of the suburban trains, Fischer had expressed himself in this way and further had declared that a large percentage of the soldiers in the Prussian army were socialists. Herr von Lengerke called the attention of the commander of the regiment to the conversation he had had with one of his soldiers whom he claimed he did not know but whom he described as having "red hair." All the red headed men in the regiment were lined up and Herr von Lengerke picked out Fischer.

Praises This Remedy for Lung Trouble

Many people are led to believe that Lung Trouble is a disease which cannot be conquered. This is wrong, as many have fully recovered their health. A change of climate has helped some, but many more have been restored to health by breathing the freshest air, eating well-cooked, wholesome food, being temperate in their habits and adding the tonic qualities of Eckman's Alternative, a medicine for Throat and Lung Troubles. Investigate this case:—

Bowling Green, Ky., R. No. 4. "Gentlemen: The spring of 1908 I had a severe cough for six months. I tried all the medicine that my doctors recommended to me, but no results came for the better. I had night sweats, and would cough and spit until I got so weak I could hardly do anything. But at last, James Deering, of Glasgow Junction, insisted that I try your medicine. In one week's time there was quite an improvement in my condition, and after I had taken several bottles I felt as well as ever in my life. I firmly believe that Eckman's Alternative will relieve any case of lung trouble if taken before the last stage is reached.

(Above abbreviated; more on request.)

Eckman's Alternative has been proven by many years' test to be most efficacious for severe Throat and Lung Affections, Bronchitis, Bronchial Asthma, Stomach Colds and in unbuilding the system. Contains no narcotics, poisons or habit-forming drugs. Ask for booklet, telling of recoveries, and write to Eckman Laboratory, Philadelphia, Pa., for evidence. For sale by all leading druggists.

Price \$1 and \$2 a bottle.

DEATH KNELL IS RUNG FOR STRAWS

Summer Hats are Discarded by Most People—Some Want 15 Days of Grace.

Funeral pyres have been alighted all over Keokuk. Friend Father has consigned his straw "pile" hinged with yellow as a result of summer's weathering, to the ash-barrel or flame. But few hats have survived the passing of Sept. 1.

CUPID AT HELM ON STEAMER DUBUQUE

Young Widow and Chance Acquaintance Are Married at Quincy on Wednesday Evening.

Quincy Herald: A wedding ceremony was performed Wednesday evening at 8:30 o'clock in the office of the county clerk, Justice of the Peace E. J. Bonney officiating. Arnold A. Leonard and Mrs. Margery L. Baker, both of St. Louis, were the happy couple. The wedding was the culmination of a pretty romance, which had its beginning on the steamer Dubuque. The couple were among the passengers of the boat which arrived here at 8:00 o'clock. The acquaintance of the two soon ripened into love. Mr. Leonard proposed and Mrs. Baker accepted. Both were taking their vacation trip and it was only natural that after they found each other such agreeable company they were willing to become companions for life. Accompanied by two obliging fellow passengers, Mr. Leonard and Mrs. Baker, when the boat landed, immediately went to the court house. Although the county clerk's office was closed, the officials are obliging and always willing to aid Cupid. The license was soon issued, and Judge Bonney, who was summoned, did the rest. And then the happy couple went on their rejoicing, their vacation trip transformed into a honeymoon.

Suicide Rate High.

BERLIN, Sept. 4.—(By mail.)—Just before the war there were more suicides in the German army among enlisted men than in that of any other country in the world, except Austria-Hungary, according to Herr Pinkau, socialist member of the reichstag, in an article in a Chemnitz paper. He alleges that in the past forty years 10,815 German soldiers have committed suicide and 2,655 attempted suicide. The recent average has been 160 a year.

Guardman Killed by Corpses.

GENEVA, Sept. 4.—Killed by a corpse, was the fate of a gendarme in a forest near the village of Wildegg. Coming upon the body of a man who had committed suicide, the gendarme found that the right hand still tightly clasped a revolver. When he attempted to release the dead man's finger from the trigger the weapon was discharged and the bullet pierced his chest. He died in a hospital a few hours later.

A Chance to Worry.

Watertown Public Opinion: The pessimist should not despair. There is the frost worry still open to him.
