

TORPEDO BOAT IS VISITED BY MANY

U.S.S. Sommers Which Was At Local Wharf Yesterday Proves Considerable Magnet For Local People

IS INTERESTING BOAT

Guns and Jackies Prove Attractive to Small Boys and Hero Worshipers—Made Cruise in Lake Cooper

The U. S. torpedo boat Sommers proved quite an attraction yesterday morning during hours that the boat was open to visitors at the local wharf. The boat was captured by the citizens of the Keokuk, who accepted the invitation of the boat's crew in yesterday's Gate City, and visited the graceful little craft, which was anchored just above the government lock.

The Sommers lay alongside one of the big government barges, and was boarded from the sea wall, a temporary plank having been run from the wall to the barge. On board the boat people were at liberty to go where they pleased, and the members of the crew were painstaking in their efforts to see that everything was explained.

The quarters in the Sommers are below decks, fore and aft. The engines are also below decks. Nearly all of the visitors descended through the narrow hatchway to visit the quarters and the engine room. There was plenty of interest on the deck, too to be seen and to be explained by the "jackies" who belong to the Illinois naval reserve.

Guns Interest Visitors. The Sommers is equipped with four one pound guns. These proved an object of much interest to the visitors, and the crew obligingly explained the mechanism. There were the usual group of hero-worshipping femininity and small boys following the natty uniforms, too. Those who visited the boat about noon had an opportunity to see the cook at work in the galley. This brought back memories of the days when the cook tent at the circus grounds was the big center of attraction.

One question which the visitors invariably asked was that concerning the torpedoes and torpedo tubes. The torpedoes are not shown to the public. They are amidship, however. The torpedoes can not be left on the deck because of the fact that they would take up considerable room, and also that their mechanism is so fine that the least touch by untrained hands would spoil this adjustment. Curious visitors would be certain to move some of the valves or levers.

Torpedoes Move Under Water. The torpedoes when discharged, go straight out over the deck and drop into the water, racing along a short distance below the surface towards the mark aimed at. They are not discharged under water from a boat of the Sommers type. The Sommers presented a graceful

Clears Skin—Stops All Blood Troubles

Goes Right Down to Where the Germs Start From.

The action of S. S. S. the famous blood purifier, is notable in the skin. It is but natural that blood impurities should seek an outlet. Water, gas, oil and nearly all the active products of nature seek the surface. It seems to be a cosmic law. Even our thoughts will undertake to find expression. And so whatever we take into our system will eventually come out changed in form, converted often into some other substance, but constituting always either waste or that which has served its useful purpose and must be eliminated. And the skin is the principal avenue for escape of certain acids or poisons. If the skin and blood be healthy, these wastes pass off as vapor or perspiration. But impure blood loads the skin with eczema, pimples, acne, rheumatism, rash, fever blisters, blood rings and other eruptions. And S. S. S. has been found the very best, safest and most effective remedy to purify the blood and thus restore the skin to clear and attractive health. Get a bottle today of any drug store, but be emphatic. Do not allow anyone to hand you a substitute. Wrapped around the bottle is an interesting circular that tells you how to obtain skillful advice free on any subject concerning the blood.

S. S. S. is prepared only by The Swift Specific Co. 113 Swift Bldg., Atlanta, Ga. Look for this name on the package.

appearance both as she lay at anchor, and during the short cruise she made in Lake Cooper. She is armored, and is painted gray. The boat is long and narrow, and carries one smoke stack and two short masts. It has an extremely pointed bow, and makes 15 knots an hour when going at full speed. The boat is 153 feet long and 18 foot beam. The crew consists of thirty men and two officers. The crew are all members of the Illinois naval reserve, and the Sommers is stationed at Quincy, Ill.

Short Cruise in Lake. Shortly after 1:00 o'clock the Sommers made a short cruise into Lake Cooper, going up above the location of the old middle lock. On the way up, the wind was blowing the smoke directly around her, and the heavy atmosphere caused it to fall on the low side of the boat, almost obscuring it. On the way back, however, the people who had gathered at the park and along the railing at the top of the bluff had an excellent view of the little craft as she swung gracefully down the channel. One of the revenue launches with Major Melza in charge acted as an escort. The boat left early in the afternoon for Quincy. This may be her last trip here this season.

Time Trials For Crews. [United Press Leased Wire Service.] **POUGHKEEPSIE, NEW YORK, June 21.**—Time trials were held today by all of the fire crews that meet here a week from today in the intercollegiate regatta. The eight all showed improvement over their work of last week.

Leland Stanford's crew took the hardest workout of any early today, pulling six miles.

KEOKUK WILL GROW RAPIDLY

Former Iowa Newspaper Man Made An Industrial Prophecy Years Ago That Is Coming True.

KEOKUK IS THE PLACE

Where the Largest Amount of Electrical Power Will Be Used for Manufacturing Purposes—Factories Are Coming

They are watching Keokuk. Editor Stonebraker of the Carrollton (Mo.) Herald in a letter to Mayor S. W. Moorhead recalls a prophecy that he made while editing the Cantril (Ia.) New Era with reference to the development of Keokuk as an industrial center. Editor Stonebraker has been looking over The Gate City and noticing that the factories have begun to locate here takes occasion to recall an editorial prophecy he made with reference to our development and the following letter to Mayor Moorhead will be of interest:

Carrollton, Missouri, June 19. Mr. S. W. Moorhead, Keokuk, Iowa. My Dear Mr. Moorhead: In looking over my exchanges I have noticed from The Gate City that the factories are beginning to move to Keokuk and I am reminded of a prophecy that I made in 1910 when I was editing the New Era, at Cantril, Iowa and you were editor of The Gate City. The editorial from my paper read: "We do not look for the electricity generated from the Keokuk dam to be transmitted great distances for power purposes. It was thought that this would be done when electricity was first generated at Niagara but the general tendency has been for more industries to move near Niagara, than to transmit the power, consequently Keokuk will no doubt become a great manufacturing center providing the proposed plan is successfully executed. Keokuk becoming a manufacturing center would add to the wealth of this section of Iowa very materially. I trust that the factories moving to Keokuk have only made a start and that truly 'Keokuk will become a great manufacturing center.' The field is yours. It appears to me that the opportunity is afforded, and that the dreams of many of our citizens will be realized if they but unite and as a body become fully awake to the situation. Believe me to be your friend. J. W. Stonebraker. Editor Republican-Record.

To Discuss Diseases. **SAN FRANCISCO, June 21.**—Under the leadership of Dr. W. C. Gorras, surgeon general of the U. S. Army, and Dr. W. J. Mayo of Rochester, Minn., the American Medical Association, the largest organization of its kind in the world, today opened its annual convention at the Panama-Pacific exposition. On the third day of

WOMEN CAN HARDLY BELIEVE

How Mrs. Hurley Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Eldon, Mo. — "I was troubled with displacement, inflammation and female weakness. For two years I could not stand on my feet long at a time and I could not walk two blocks without enduring cutting and drawing pains down my right side which increased every month. I have been at that time purple in the face and would walk the floor. I could not lie down or sit still sometimes for a day and a night at a time. I was nervous, and had very little appetite, no ambition, melancholy, and often felt as though I had not a friend in the world. After I had tried most every female remedy without success, my mother-in-law advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and gained in strength every day. I have now no trouble in any way and highly praise your medicine. It advertises itself."—Mrs. S. T. HURLEY, Eldon, Missouri.

Remember, the remedy which did this was Lydia E. Pinkham's Vegetable Compound. For sale everywhere.

It has helped thousands of women who have been troubled with displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, that bearing down feeling, indigestion, and nervous prostration, after all other means have failed. Why don't you try it? Lydia E. Pinkham Medicine Co., Lynn, Mass.

CAVALRY SQUADRON WILL BE EQUIPPED Orders for This Equipment to Go Forward Have Been Sent—Battery Also Getting in Shape. The war department has issued orders for the equipment for a squadron of cavalry for the Iowa National Guard to be sent forward. This was announced at the office of the division of militia affairs last week. It will be paid for out of the special fund of the department to meet the cost of the auxiliary arms of the service. The department is sending sufficient equipment to fit out the squadron for active field service in war time, except as to horses. This includes rifles of the latest pattern, sabers, automatic pistols, saddles and other horse equipment and all paraphernalia. Part of the equipment will be sent from the Rock Island arsenal and sent from Springfield.

VIOLATION OF HONOR SYSTEM Convict Murdered the Warden's Wife and Then Set Fire to the Building. [United Press Leased Wire Service.] **JOLIET, Ill., June 21.**—Cringing in Joliet prison's "solitary cell," long unused under the regime of Warden Edmund M. Allen, institution of whose honor system made the nation gasp, "Chickie Joe" Campbell today walked out denial of any knowledge of the murder of the warden's wife. An all night third degree that was admitted as crueling as any that had been applied to a recalcitrant prisoner since long before the humanitarian policies applied by Warden Allen were put into practice, had failed to shake the huge negro's insistent story of innocence.

While Campbell was being sweated, investigators unearthed clues of the nature of which they would not at first divulge, which led to the segregation of two other prisoners. They are Walter Edwards and George Simpson, both sent here from Chicago. Both are trustees. Prison officials today settled one question that up to early today had been merely a suspicion. This was that the man who beat Mrs. Allen into insensibility, had criminally attacked her before he poured wood alcohol over her night dress and the bedding and then touched a match to it. The body had been badly burned about the legs and torso before convict firemen and prison guards extinguished the fire and stumbled, choking in the smoke filled room. The extent to which the fire had burned gave officials a fairly accurate estimate of the time of the attack. It was set at about 5 or 5:30 Sunday morning. They believed the blaze took at least thirty minutes to eat its way to a push button at the side of the bed, destroy the insulation of the wires and automatically cause the short circuit which sounded the alarm. A blow on the head had rendered Mrs. Allen unconscious. She had been burned to death while in that state. The circumstances on which the authorities base their suspicion of Campbell are admittedly unsupported by any direct evidence. It is merely known that he was the last person known to have been near the former opera star's suite. He had been chosen as Mrs. Allen's personal servant by the warden. His sleeping quarters were a short distance down a corridor. He was found exercising Mrs. Allen's dog behind a greenhouse outside the prison walls. He evinced no excitement when the fire alarm turned out the fire fighters. Captain of the Guards A. J. Clarkson said he had to order Campbell to help the firemen before he would go. Warden Allen was prostrated today. He is said to have intimated to close friends, however, that faith in his honor system, to which his wife enthusiastically subscribed, was not shaken. Members of the state prison commission, however, who are here today for a scheduled meeting, are reported to have said last night that they may recommend a change.

Must Answer for Death. **MARSHALL, Texas, June 21.**—Frank O'Leary was slated to face trial here today for alleged murder growing out of the shooting of William Black, an anti-Catholic lecturer, and

John Rogers, and the wounding of John Copeland Feb. 3, 1915. Black was an ex-priest, who had been delivering lectures against Catholicism. A delegation from a Catholic organization, it is claimed, visited him in his hotel with a view to having him desist. The shooting followed.

WARSAW MAN HURT; PERHAPS FATALY

Acquilla Daugherty Tried to Board Freight At Columbus Junction and Fell Under Car Wheels.

COLUMBUS JUNCTION, Ia., June 21.—Acquilla Daugherty of Warsaw Ill., met with a terrible accident in this city Saturday afternoon, when he attempted to board a freight train enroute to Burlington. After making the bumpers he slipped in some way and fell between the rails. Both legs were run over by the trucks of several cars, completely severing one leg just at the knee and the other at the ankle. The man who also bruised about the head, and bled profusely from one ear. Medical aid was hurriedly summoned, and the man was carried to the city hall, where Physicians Overholt and Hubbard did all they could to alleviate his sufferings and bandaged up his wounds until it was possible to get him to the hospital at Burlington, where he was taken on the early afternoon train.

Daugherty, in company with two companions, who gave their names as Wm. Ringold and Carrol Peidrit, also of Warsaw, came to this city Friday afternoon and spent the remainder of the day and Saturday forenoon with friends connected with the U. S. Cavalry company. After dinner they decided to go south and attempted to board a through freight train, loaded with horses for the European war, when Daugherty fell between the rails and suffered the loss of both limbs. He was unconscious for some time, but regained consciousness and was able to give his name and talk of his family before the terrible shock had begun to cause him much pain. He has a wife and two children, who make their home with his mother Mrs. James Daugherty, at Warsaw. He is also said to be a nephew of N. C. Daugherty, formerly of Peoria.

FIGURE HUMIDITY IN WEATHER REPORT

Government Bureau Will Take Observations in Middle of Day and Include This in Reports. The relative humidity in the middle of the day will hereafter be included in the weather reports furnished daily by the weather bureau to the newspapers, says a Washington dispatch. At present observations of the relative humidity are taken at 8 o'clock in the morning and 8 o'clock in the evening, but at these times the temperature is likely to be much lower and the relative humidity much higher than in the middle of the day. An extra observation of the relative humidity will therefore be taken, probably at 2 p. m. This additional information is expected to be not only of general interest to the public at large, but of practical value in certain branches of manufacturing. The humidity of the atmosphere plays, for example, an important part in cotton spinning, and in many textile mills it is necessary to increase it by artificial means. An observation of the relative humidity at 2 p. m. will indicate much more accurately actual working conditions than figures obtained at the beginning or end of the day.

Domestic Disagreement. **Topaka Capital:** A man may like it pretty well himself, but his wife usually is displeased with his job. **Golf up in the Air.** **SAN FRANCISCO, June 21.**—You can play a complete golf game of eighteen holes, using all the clubs you like, on the roof of a downtown skyscraper here. There are many indoor courses in New York, but San Francisco claims the only real "up in the air" course. The Olympic club is responsible for the unique course and has constructed a fifty foot putting green of real turf on the skyscraper roof. One of the driving nets has also been erected and owing to the series of pockets of the net a complete eighteen hole game may be played and the result of strokes made with all clubs determined theoretically. Professionals declare practice on a course of this kind to be more beneficial for a beginner than real play over a regulation course.

Inspirational Talks. **CHICAGO, June 21.**—The real work of the eleventh annual convention of the Associated Advertising Clubs of the World was begun here today. From the representation at the meeting this forenoon, fears entertained that the European conflict would affect the sessions were dispelled. Clubs from every country which has organizations were represented in the gathering. The initial session was devoted to speeches and addresses of welcome by city officials and leaders in local advertising circles. New business was taken up immediately after the speeches. This afternoon the sessions were devoted to "inspirational work." Three "inspirational addresses" were on the program. They were: "Commerce and Christianity," "Building and Industrial Conscience," and "Education and Business, or the Influence of Education Upon Business Morality." Speakers on those subjects respectively, were Bishop Warren A. Candler of Emory university, Atlanta; Henry D. Estabrook, New York; and an impromptu speaker. The afternoon's program also called

If you don't like hard work, do your washing and cleaning with

FELS-NAPHTHA soap.

Washes everything in cool or lukewarm water, takes out most spots and stains.
