HOW TO KEEP WELL. Proper food, properly cooked and properly eaten plays a great part in obtaining and keeping perfect health...

There is a great need for the people of this nation for proper instruction in diet. Few people know the right kind of food to eat at the different seasons of the year...

One food expert so employes evolved the following valuable advice which the concern in question issued as a bulletin to the wage earners on its pay rolls...

Blood-making foods are a delusion. All good foods when well digested, make good blood...

Constituting foods—White bread, rice, boiled milk, soup, etc. Laxative foods—Whole wheat bread, fresh vegetables, fruits, corn products, etc.

Avoid extremes of heat and cold in food and drink. Avoid constipation. No storage places for them in the body. Avoid excess.

Second—Fats. Heat producers. Consist of cream cheese, fat meat, butter, olives, nuts, olive oil, etc. Excess fats delay stomach digestion.

Third—Carbohydrates. Energy producers. The most abundant of all food elements. Consist of starchy foods, cereals, bread, macaroni, figs, raisins, dates, fruits, etc.

Fourth—Sugars. Are energy producers as found in fruits but not cane, beet, or maple sugar. Require little or no digestion. All fruits, raisins, dates, figs, etc.

Fifth—Mineral salts. Nerve stimulants and bone builders. Small but important part of human sustenance. Greens, lettuce, cereals, vegetables, fruits in general, spinach and tomatoes rich in iron...

All health means misery; therefore to guard one's own health and to make the community healthy, contribute directly toward the world's happiness. During the first year of President Wilson's administration, there was much anxiety lest he should break down. Of late his health seems to be better, largely because he takes care of himself...
