

Stomach Trouble Solved

Most stomach troubles are not diseases. The stomach is simply weak. Tired out. The right kind of a tonic is what is needed. A few meals, well digested, will furnish natural strength. That is what a tonic will do for you. It will start the stomach going right. Then the stomach will take care of itself.

PE-RU-NA Good the Year 'Round

Always Ready-to-Take There is no use of writing a new prescription every time a remedy is needed for a weak stomach. No use whatever. The old, well-tried remedy, put up on purpose for such cases, are a great deal better than an off-hand prescription. Peru-na is the remedy that people have relied upon for a great many years. It is ready to take, composed of pure drugs, of uniform strength and composition. Not an experiment. Peru-na is a substantial, household remedy, with forty years of splendid history behind it. In buying Peru-na you take no risk. You know what you are getting.

There were more Cadillacs sold last year than the combined sales of all other makes listing at \$1,900 and over.

In the face of this, you surely will realize how futile it is to expect a high grade car in any other make at anywhere near the Cadillac price.

KEOKUK CADILLAC CO.

Announcement of Candidate Ed. S. Lofton for Mayor

If your vote elects me mayor my entire time will be devoted impartially to the administration of city affairs without fear or favor. I am free to treat every citizen and taxpayer squarely and fairly—to see that value is received for every dollar that is expended—the curtailing of expenses in every department necessary to reduce taxation and running expenses of city affairs—I am not affiliated with any faction or factions whatever. In selecting appointed officers due care will be taken to get the best men possible. With the full understanding that I can truthfully do this, I ask the support of the voters of Keokuk.

ED. S. LOFTON
Candidate for Mayor

POLITICAL ADVERTISEMENT.

Fred Hilpert Jr.

Will appreciate your vote and support at the election March 27th.

In Your Judgment

Certain men will best fill the offices of Mayor and Councilmen and you will vote for those men.

When you insure your property, use the same discretion. Choose the Iowa State Insurance Company (Mutual) of Keokuk, the oldest company in Iowa. Organized over sixty-one years ago by Keokuk men. A home company always interested in home affairs. Telephone now (160) to

The Work In Hand.
New York Times: General Funston does not underestimate the gravity of the task that has been allotted to him; it is desirable that his fellow countrymen should look upon it from his point of view. We must not expect a small band of troopers, light of heart, to sally forth and return quickly with the Chihuahuan murderer securely bound to his horse. On the contrary, we have been compelled to undertake a perilous adventure, and experienced campaigners fully understand how serious it is. As to the number of troops we may have to employ, guessing is not profitable; but we may be sure that it will be a much larger number than the early estimates of 5,000 to 8,000, and it is essential that the commissariat shall be thoroughly organized. Sufficient water for horses and men, sufficient food for both, are as essential to the success of the expedition as its advance guard of aeroplanes. It is likely that if the general situation in Mexico remains about as it is, the troops of General Funston's command will overcome Villa and all his followers, but months may be required for the operation.

To Be Remembered.
Collier's Weekly: Some patriotic easterners blame everything unsatisfactory about the state of the nation on the middle west. And that isn't all. Most of the people who lay upon the middle west the responsibility for American pacifism, for the unpreparedness of the country to maintain its policies or its honor, for the opposition to "preparedness," and for congressional pro-Germanism, are folks who have never crossed the Alleghenies or the Blue Ridge. And yet, in the event of the United States really having a war on its hands, the middle west would furnish the backbone of the necessary American army—just as it furnished the backbone of the federal army in the civil war.

An Obsolete Species.
Sioux Falls Press: Is there a man left in America who is willing to go on record now as contending that the United States has no need of a military establishment?

HILPERT SELLS 600 ACRE FARM

Transaction Is Closed Yesterday Whereby Local Man Disposes of Stock and Grain Farm.

SELLING PRICE \$54,000

The Property Was Known as Old William Mullikin Place and Was Owned by Mr. Hilpert for Nine Years.

A land transaction involving 600 acres of Lee county land was completed yesterday when Fred Hilpert, Jr., sold to B. R. Vandervort of Gregory his large stock and grain farm near Summitville. The land contained 600 acres and was sold at \$90 per acre, or a total of \$54,000 for the entire transaction. The farm which Mr. Hilpert sold yesterday was the second largest farm in Lee county, the O. O. Newberry farm only surpassing it for size. In the sale of this land Mr. Hilpert disposes of the bulk of his Lee county holdings. The farm represents some of the finest land in Lee county. It was known as the old William Mullikin place. Mr. Hilpert acquired it some nine years ago, and has been since in continuous possession of this farm. He has been raising some excellent stock and several fine crops on the land since it has been in his hands. The stock which Mr. Hilpert owns is not included in this purchase. There is a fine newly built house on the farm, which is situated just two miles above Summitville and this side of Mount Clara. There are two big barns and several corn cribs besides several other buildings. B. R. Vandervort of Gregory, who purchased the farm, expects to turn it to stock for the most part. Mr. Gregory has a family and expects to make his home on his newly acquired property. He feels that there will be considerable profit in stock raising, and will devote his entire time to this. This will be his home, although he has some business interests in Alexandria, being director of the new bank there. Mr. Hilpert has made quite a success with this farm. He purchased it nine years ago, at a figure which shows how rapidly Lee county land values have increased since then.

FURNACE IS NOT ALWAYS TO BLAME

Plenty of Times It Is Fireman Who Hasn't Taken Out Ashes or Done Other Needful Things.

WHY THE HEATER BALKS

Drafts Should be Watched and in Stormy Weather These Should be Properly Regulated for the Best Results.

No doubt, you have given your furnace the necessary care and attention these many years, and know just what to do. That is as long as the furnace acts well. But sometimes they seem to have a "bad spell" and then do you know what to do? Are you one who is confident that he knows it all? If not, the following by an expert will prove of interest and may be of value to you. If your furnace does not keep you warm, blame the fireman and not the furnace. Ninety-nine times to one it is his fault. Firing a furnace requires some knowledge of the machine and some understanding of the principles of air control. Fuel has a given quantity of heat units in it always and there are two exits for heat when fuel is burned in a furnace: one is up the chimney and that is where a careless fireman will send it, the other is into the house by means of the radiation of heat through the metal, the warming of air and the flow of warm air into a room with an equal flow of cold air out of a room. Most people in this cold weather think they are saving fuel when they fire up six times a day and leave their drafts on when in fact they are forcing the maximum amount of their fuel up the chimney. They should fill their furnaces as full as they can pile the fuel into it, and then run a slow fire. Slow burning consumes the smoke and gases as fuel and the heat units in the fuel can be used. Rapid or forced draft burning sends the smoke up the chimney before it can be burned and used for heating. And then so few people realize that there is a lifting draft in a chimney. Chimneys usually pull at the fire stronger when the wind is blowing outside and some chimneys have stronger drafts than others so that in stormy weather the heat is sucked up the chimney unless the fireman closes the smoke pipe damper or opens the check in the smoke pipe so as to break the draft which pulls at the fire. Overheated furnaces on stormy nights are often caused by strong draft chimneys forcing the fire even when front drafts are closed. People should always check the draft in their smoke pipes in stormy weather. When burning coke or hard coal a damper which will shut off the draft in the smoke pipe is absolutely essential. Fuel, too, must not only be full up in the fire box but evenly spread all around it without being heaped up or combed in the center. A wide bed of hot fuel gives the most heat. **Keep Ashes From Grate.** It requires air up through the fuel to make it burn and this means that the ashes must always be kept free from under the grate and the solid clinkers that form above the grates must be raked out or else the air can not pass up through the fuel. If the grates of a furnace have heat above and are buried in ashes below they will melt just as the horseshoe melts when the blacksmith buries it deep into hot coals and just as the end of a poker melts when thrust deep into the fire. The under side of the grates must be cooled by air or they will get red hot and bend down out of place. Ashes in the fire box up nearly to the fuel door do no harm if they are loose so as to permit air to pass through them and if free from clinkers actually aid by holding the fire up closer to the top of the furnace. In some furnaces the hot smoke is caused to travel round-about through extra radiators so as to increase the area of heated metal for contact with air. In these furnaces the fireman must be sure that his direct draft damper between the main body of the furnace and the extra radiator is closed or else the hot smoke will go directly into the chimney without passing through the radiator and half the heating efficiency of the furnace will be lost, only half of its radiating surface will be hot. **Air Is the Carrier of Heat.** Furnaces can burn fuel without heating the house if there is anything wrong with the flow of air over the hot furnace and into the house. The burning fuel heats the furnace, the hot furnace heats the air and the warm air should then come up into the rooms to heat the house. You can't pour water into a bottle when it is full and you can't force warm air into a room unless there is some way of getting an equal amount of cold air out. People often telephone for the furnace man when they have placed a trunk over the cold air register and then they wonder why the warm air will not come into that room. Opening a door into the hall in the case of bed rooms often lets the cold air flow over the floor and down the stairway. Some people will allow cold air pipes to be choked up with old rags and people have been known to set fire to their houses by clogging up a warm air pipe with old shirts. The tin pipe becomes overheated where it is choked and the wooden joists ignite. **Never Close Registers on Hot Fire.** This danger is always present when people close their warm air registers and overheat their furnaces. Never

FORMER RESIDENT DIES IN THE WEST

Word Received Here of Demise of Mrs. Bertha Judd, Which Occurred at Denver, Colorado.

AUNT LIVES IN KEOKUK

Decedent Has Several Cousins Here and a Large Number of Friends—Funeral Held Thursday.

Word has been received here of the death of Mrs. Bertha Judd, which occurred at her home in Denver, Colo., on March 7. She will be better remembered as Bertha Schaeffling and she resided here until after her marriage when she went west with her husband, first to Kansas, then to Nebraska and finally to Denver where they had lived for the past twelve or fifteen years. Mrs. Judd is survived by two sisters, one living in Denver and one in New Castle, Penn., and one brother, Louis Schaeffling, Salt Lake City, Utah. There are also three daughters, Mrs. Albert Koehler, Nellie Judd and Mrs. Judd who lived at home and was her mother's faithful companion. Mrs. Barbara Schulz of this city is the only surviving aunt of the decedent, but she had many cousins and friends living in Keokuk and vicinity who have heard of her death with regret. The burial took place in Denver, Colo., on March 9.

A Job to Shun.

Fremont Tribune: It is difficult to understand why Bryan or any other man would want to be chairman of the committee on platform in the next democratic national convention. A platform that "retiterates" the principles of the 1912 convention or that "points with pride" to the fulfillment of the pledges of that platform, might do for humor, but wouldn't serve very well as a campaign document. And how can any platform committee report a platform that omits these time honored planks?

Change of Mind.

Springfield, Mass., Republican: Mr. Roosevelt, in 1912, was for presidential primaries; in 1916 he sees national safety in a deliberative convention.

Thinking Not Necessary.
Cincinnati Enquirer: The average wife doesn't have to think very hard when she is telling her husband what she thinks of him.

DO NOT DELAY

IN MAKING YOUR SELECTION OF YOUR NEW SPRING SUIT, COAT, DRESS, OR WAIST. We have never sold as many ready to wear garments in any spring as we have this season, but fortunately we bought about twice as much as we usually do, so our stock is still very large and we are still maintaining our same low prices. We can save you from 20 to 25 per cent on your ready to wear garments, and even more on suits and dresses. We sell in guaranteed every respect.

Suits

In all wool, all silk, or combination silk and wool, from \$9.75 to \$29.50

Coats

In wool, silk, or combinations, in plain colors or fancies, from \$3.98 to \$19.50.

Dresses

In all wool, all silk, or combination silk and wool, from \$3 to \$18.50.

Skirts

In all wool serges, poplins, gaberdines, checks, stripes and fancy materials, all the newest styles, from \$1.98 to \$6.75.

Waists

In heavy and thin cotton, tubular, stripes, crepe de choin in plain or fancy colors, extra values at \$1.00, \$1.98, \$2.98 to \$3.98.

A Fine Line of Girl's Wash Dresses and Bodices Wash Suits at 49c and 98c each

We have just opened a fine lot of kimono aprons, made of gingham and percale, in stripes, checks and plain colors, all with rickrack trimming. These are 75c values for

We offer special a line of ladies' dress skirts made of all wool serge in navy blue and black, also black and white checks. These are new spring styles and are a great value for

We have just opened a lot of crepe de choin corsets in white and flesh colors, fully trimmed with beautiful insertion. Special value and

\$1.98 each

98c each

Silk Petticoats

We have just put in stock a big line of Taffeta Silk Petticoats in colors, changeables and Dresden patterns. They are worth more than what we marked them, but we bought them at the old prices and will be sold at the old prices—\$2.98, \$3.98, \$4.98. Regular and extra

REMEMBER!

We are getting notices nearly every day of advances in price of silks, wool and cotton. We are still holding our old low prices. BUY NOW!

The Millinery Department

Is especially attractive with its array of the latest modes of women and children's headwear. Besides an almost endless variety of delightful trimmed hats, our stock of untrimmed hat shapes is without parallel in the city. We are pleasing many with their new "Spring Bonnets" and would be more than glad to please you. We still maintain a free expert trimming service, providing the shapes and materials are all purchased in this department.

NOT A PARTICLE OF DANDRUFF OR A FALLING HAIR

SAVE YOUR HAIR! DOUBLE ITS BEAUTY IN JUST A FEW MOMENTS.

25-CENT "DANDERINE" MAKES HAIR THICK, LUSKY, WAVY AND BEAUTIFUL.

Within ten minutes after an application of Danderine you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, fine and downy at first—yes, but really new hair—growing all over the scalp.

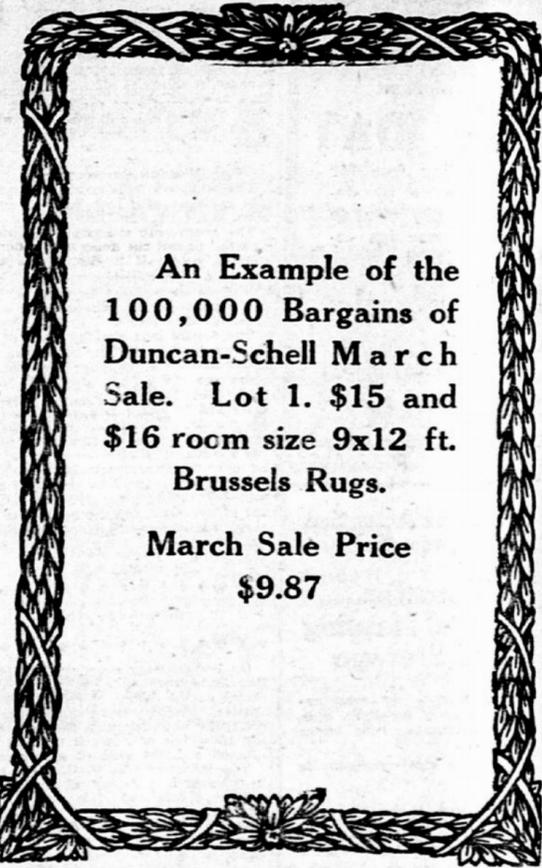

Danderine is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates and strengthens them. Its exhilarating, stimulating and life-producing properties cause the hair to grow long, strong and beautiful.

A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and scraggy. Just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance; an incomparable lustre, softness and luxuriance.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and soft as any—that it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.

close a warm air register when there is a very hot fire in a furnace. Turn the damper in the pipe down near the furnace or open a window. It is dangerous to hold intense heat in tin pipes that have to pass through the floors of a frame building. See to it, too, that the screens placed in either cold air or warm air pipes are not clogged up with lint. They can gather dirt enough to choke the flow of air through the pipe and unless the air flows freely the cold air in a room can not be replaced with warm air from over the furnace.

Moisture Your Heat With Water. Most furnaces nowadays have water pans in the sides of their casings for the evaporation of moisture into the warm air to give moist heat. Whether a house be heated by steam, hot water or warm air it must have moisture added to take the place of the moisture dried by the heat. Furniture will shrink, plaster will crack and throats become sore without moisture. People who have their skin dried by dry heat will take cold easier when they go out of doors.

An Example of the 100,000 Bargains of Duncan-Schell March Sale. Lot 1. \$15 and \$16 room size 9x12 ft. Brussels Rugs.

March Sale Price \$9.87

doors, so look to your water pans. Have them placed half way up from the floor in the side of the furnace casing and fill them twice each week. In the case of steam or hot water radiators hang cans of water over behind them next to the wall. Moist heat at 65 degrees is more comfortable than dry heat at 70 degrees and 120 degrees in Arizona is less severe than 100 degrees in Iowa out of doors. If you have water radiators in the rooms see that the water comes to the top in them. Let the air out of the vents in the radiators frequently or else they will become air bound which will keep the water down half way. Unless the hot water can fill the entire radiator only part of the radiator will be heated to warm the room.

Water in hot water tanks or water radiators is heated in hollow castings in the furnace. See to it that there is always plenty of water in the pipes with their skin dried by dry heat will take cold easier when they go out of doors. No Brains in Thermostats. Thermostats are convenient but like the best of automobiles, they sometimes need adjusting. People too often throw them out of gear with the switch while firing and then forget to put them to work again. The furnace is either overheated or the thermostat is accused of not working. Nothing is fool proof in this world, not even a heating plant. Study your furnace.
