Nodd—"Awfully sorry to hear your house burned down. Did you save anything?" Todd—"Oh, yes. After some very lively work we managed to get out all the things we didn't want."

One of the features of the Paris motor show is an absolutely noiseless car. Persons in the neighborhood of one of these will not know there was a car within a mile until they wake up in the hospital.

We do not charge that the weather bureau is corrupt like the postoffice department, but a great deal of inferior weather is peddled on the people, who pay a good price for a high-class article.

"What distinguished foreigner asked the Americans in the revolution?" asked the teacher of the juvenile class. "God," promptly answered a small pupil who had been to Sunday school.

"Well, Snowball," said the patron to the ducky waiter, "how did you ever come by a name like that?" "Well, sah, I was born in Chicago. Reckon you never seen a Chicago snowball, sah?"

Best in the World. Estherville, Ia., Feb. 1st.—Mr. George J. Barber of this place says:

"Dodd's Kidney Pills are the best medicine in the world. There is nothing as good. I had been sick for over 15 years with kidney disease which finally turned into Bright's Disease. I was treated by Doctors in Chicago but they didn't do me any good. The best Doctor in Estherville treated me for five years with no better success. I heard of Dodd's Kidney Pills and made up my mind to give them a trial. I am very thankful to be able to say that they cured me completely and I think they are the best medicine in the world."

The honest, earnest, straightforward exposure of real living men and women are the only material used in advertising Dodd's Kidney Pills. One such testimony is worth more than a thousand unsupported claims. The people who have used Dodd's Kidney Pills are those whose evidence is worth consideration and surely nothing can be more convincing than a statement like Mr. Barber's. There are thousands of others just as strong.

No woman ever admits outside the divorce court that she drew a material blank.

"I hear you're dissatisfied with your doctor's bill." "Yes, I don't think he is entitled to two hundred and fifty dollars for that operation." "Why not?" "Because if he was more, he'd claim more."

Howes—"Don't like this cold weather, eh? Why only last summer you were complaining of the heat." Barnes—"Not of the heat itself, but rather of its untimeliness. It would be all right if reserved for such weather as this."

Wife—"There was a man around to wife selling his brass burglar alarm bells to put on the front of the house so I ordered one." Husband—"What you know we haven't anything worth stealing." Wife—"I know, but it will make the neighbors think we have."

"De trouble with dat man," said Erasmus Pinkley, "is dat he's too ambitious." "But he won't work," answered Miss Miami Brown. "No. He's one of dese people dat would rather imagine hisself rich in an automobile dan git down to business and push a wheelbarrow."

"Turpin—Come with me to the zoo. Jenks—No, thank you; I'll stay at home. My eldest daughter does the kangaroo walk, my second daughter talks like a parrot, my son laughs like a hyena, my wife watches me like a hawk, my cook is as cross as a bear, and my mother-in-law says I'm an old girl." "Then I go anywhere I want a change."

DIDN'T BELIEVE

That Coffee Was the Real Trouble.

Some people flounder around and take everything that's recommended to them but finally find out that coffee is the real cause of their troubles. An Oregon man says:

"For 25 years I was troubled with my stomach. I was a steady coffee drinker but didn't suspect that as the cause. I doctored with good doctors and got no help, then I took almost anything which someone else had been cured with but to no good. I was very bad last summer and could not work at times."

"On December 2, 1902, I was taken so bad the Doctor said I could not live over twenty-four hours at the most and I made all preparations to die. I could hardly eat anything, everything distressed me and I was weak and sick all over. When in that condition coffee was abandoned and I was put on Postum, the change in my feelings came quickly after the drink that was poisoning me was removed."

The pain and sickness fell away from me and I began to get well day by day so I stuck to it until now I am well and strong again, can eat heartily with no headache, heart trouble or the awful sickness of the old coffee days. I drink all I wish of Postum without any harm and enjoy it immensely."

"This seems like a wonderfully strong story but I would refer you to the First National Bank, The Trust Banking Co., or any merchant of Grant's Pass, Ore., in regard to my standing and I will send a sworn statement of this if you wish. You can also use my name." Name given by Postum Co., Battle Creek, Mich.

Still there are many who persistently fool themselves by saying "Coffee don't hurt me" a few days' trial of Postum in its place will tell the truth and many times save life.

"Look for the little book 'The Road to Wellville' in each package."

50 Years of Success

This is our record. From a small beginning we have grown until our factories now cover many acres. Many of our machines sold forty to fifty years ago are still giving their users faithful service. Of anything more convincing of their merits and durability? Did you ever hear of any other machine with such a record? Note a few of the many superior points of the Wheeler & Wilson No. 9 Sewing Machine. The Rotary Hook displaces the old out-of-date, unmechanical and troublesome shuttle. The Frictionless ball bearings and perfect mechanism enable it to be operated with one-third less exertion than is required by ordinary machines. It sews three yards of goods while a shuttle machine sews two. It makes the most elastic and most perfect stitch whether sewing light or heavy goods. With our superior attachments the greatest variety of work is possible. Do not make the mistake of buying a sewing machine until you have given the Wheeler & Wilson No. 9 a trial.

The Dangers of Fox Hunting. Crowds "go hunting," but few ride to bounds, so statistics are absolutely useless. Of the thrusters—the ones who come to grief least—are the sportsmen who keep their eye on the leading hound and try to land on his tail every time. The golden rule is: Throw your heart over first, and then you and your horse are certain to be in the same field. It is love money which you get killed first—London Daily Mail.

Peculiar Highland Remedies.

A popular Highland remedy for both consumption and general debility was what is known as such an cabar ("the juice of deer's horns"). These were gathered in the hills when the animals cast them in the springtime. They were boiled for some hours and the juice thus obtained bottled, after being strained. Candy sugar and whisky are usually added to it now-days. Crabs' shells pulverized, and eaten on bread and butter, were used for consumption, asthma and whooping cough in the Hebrides.

New Chemical Compound.

A Russian chemist has discovered a new aluminio-thermic compound and named it thermite. When fired by the application of a bit of magnesium tape this compound burns fiercely, generating a heat equivalent to that of the electric arc. The fused combination is hot enough to burn a hole with clean edges through an iron plate of any thickness, according to the amount of thermite burned, without heating the plate, except at the point of perforation.

Terrible Affair.

Some beast in human form wadded Doc Skinner's office keyhole full of wet paper and then telephoned him to hurry out to old Bill Jennings and bleed him. When Doc went to his office to get his tools, of course the paper was frozen and he couldn't get the key in. This is the second time this thing has happened.—McCordsville (Ohio) Exhumer.

Strange Use of a Suicide's Skull.

A rather gruesome Highland practice for treating epilepsy is the drinking out of a suicide's skull. In a certain churchyard there is a suicide's skull lying perdu, the exact whereabouts being known only to one or two privileged individuals. It is invariably sent for when a case of epilepsy occurs.

What Children Should Learn.

Habits acquired in childhood are the ones that stick through life. So it is important that little ones should be taught habits of neatness, helpfulness and cleanliness about their belongings. It is certainly essential for a girl and will not do a boy any harm nor make him one whit less manly.

Smallpox as "The Good Wife."

To this day smallpox is alluded to in the outer islands of the Hebrides as "the good wife" ("the good wife"), a form of euphemism, the idea of which is that, in order to escape the ban of the disease, it should be spoken of respectfully.—Caledonian Medical Journal.

Pipe Smoking in Cold Weather.

There is more smoking of pipes done in cold weather than at any other time, and, excluding the vacation season, there are more pipes and smoking tobacco sold during the cold weather than during the temperate and heated spells.—Tobacco Trade Review.

Elephants Nurse Infants.

In Slam some of the women trust their children to the care of elephant nurses, and it is said that the trust is never betrayed. The babies play about the huge feet of the elephants, who are very careful never to hurt their little charges.

Target Practice Cartridge.

A new cartridge for target practice by marine, especially for ranges of about twenty-five yards, has been devised. The bullet will weigh seven-eighths grain, and will be .31 inch diameter, or a diameter of .002 inch greater than the bore of the rifle. Three grains of smokeless powder will be used, and with the experiments which have been attained at twenty-five yards.

Markings of the Moon.

Probably even in prehistoric times men have noticed the face of the "man in the moon." Plutarch noticed it and even wrote a whole book about the face in the moon. But besides this, many other objects are supposed to be visible. The dark markings on the surface are likened by the Chinese to a monkey pounding rice. In India they are said to resemble a rabbit.

Plant Food in Soil.

A recent bulletin of the department of agriculture says: "It appears that practically all soils contain sufficient plant food for good crop yield; that this supply will be indefinitely maintained, and that this actual yield of plants adapted to the soil depends mainly, under favorable conditions, upon the cultural methods and suitable crop rotation."

Browning's Pretty Compliment.

As all the world knows, the relation between Tennyson and Browning was one of friendship and mutual admiration. Once in Browning's presence the question whether Tennyson was open to the charge of plagiarism was started. "Tennyson suspected of plagiarism?" he exclaimed. "Why, you might as well suspect the Rothschilds of picking pockets!"

American Railway Equipment.

American railway locomotives to the number of eighty-seven were purchased by the New Zealand government two years ago, and are now in operation throughout the colony, and are giving general satisfaction. American passenger coaches are also pretty generally used, while freight vans, road wagons, etc., of American manufacture are also in use.

Gen. Gordon in Battle.

It has been said of the late Gen. Gordon "he was the shining scimitar which the war god wielded when he cleft his enemies; he dressed for battle as others would dress for a ball, and when the boys saw his clean gauntlets and shining epaulets they ate all their rations lest they should die before they had a chance to finish them."

Bridge Over the Zambesi.

It is reported from Rhodesia that work on the bridge which is to span the Zambesi river near the famous Victoria falls, will be begun soon. The bridge will be of one span, 600 feet in length, and will cross the Zambesi some 400 feet above the water over a narrow gorge through which the river flows at that point.

Children Ride Free.

Car fare is not needed by school children in Victoria, Australia. They are carried in street cars to and from school free of charge.

STORIES.

Recently a fellow with a patent air brake caught James Keene, the financier, in a corner. "Mr. Keene, this is a wonderful thing. My special con- tinuance, as you perceive, will keep the air in. Don't you think the market will snap at it?" "Young man," answered Keene, "it may be all you say. But what the market wants is not something to keep air in, but something to keep water out."

Senator Tillman tells of a South Carolina trial in which the prisoner, accused of burglary was cleared by a strong alibi, amply supported by witnesses. After the trial the judge congratulated the friends who were congratulating the successful lawyer and said: "That was an excellent alibi you proved." "Yes," said the lawyer, "it was exactly the best of four that were offered to me."

While stories were going the rounds at the Lambs' club, one night Francis Wilson contributed one of a leading man of a theatrical company U that had become stranded at Saginaw. The leading man installed himself at a hotel, and lived a precarious life, while waiting for remittances. One morning he rang the bell in his room for half an hour. Nobody answered. Then he went out in the hall, leaned over the railing, and called: "Boy! Oh, boy!" "What is it?" snarled a bell-boy from the lobby beneath. "Have you seen anything of my laundry?" "Aw, g'wan!" said the boy; "you ain't had but one shirt since you been here." "That," said the actor with great dignity, "is the one to which I refer."

The following remarkable essay on the horse is said to be from the pen of an Indian student: "The horse is a very noble quadruped, but when he is angry he will not do so. He is ridden on the spinal cord by the bridle, and sadly the driver places his foots on the stirrups and divides his lower limbs across the saddle and drives the animal to the meadow. He has four legs; two are on the front side and two are afterward. These are the weapons which he extends, these defends himself by extending these towards his foe, but this he does only when he is in an aggravating mood. There is no animal like the horse. No sooner they see their guardian or master than they always cry for food, but it is always at the morning time. They have got tails, but not so long as the cow and such other like animals."

To the housewife who has not yet become acquainted with the new things of everyday use in the market, and who is reasonably satisfied with the old, we would suggest that a trial of DeLance Cold Water Starch be made at once. Not alone because it is guaranteed by the manufacturers to be superior to any other brand, but because each 10c package contains 16 ozs., while all the other kinds contain but 12 ozs. It is safe to say that the lady who once uses DeLance Starch will use no other. Quality and quantity must win.

Some men would be witty if they knew how to be brief.

CONSTANT ACHING.

Back aches all the time. Spoils your appetite; wears the body; worries the mind. Kidneys cause it all, and Doan's Kidney Pills relieve and cure it. H. B. McCarver, of 501 Cherry St., Portland, Oregon, inspector of freight for the Trans-Continental Co., says: "I used Doan's Kidney Pills for a back ache and other symptoms of kidney trouble which had annoyed me for months. I think a cold was responsible for the whole trouble. It seemed to settle in my kidneys. Doan's Kidney Pills rooted it out. It is several months since I used them, and up to date there has been no recurrence of the trouble."
