Will Hull, Young, Lacey and Perkins tell whether they are fighting under the name of Republican or railroads?

A democrat of Georgia says that the Negro must be disfranchised so that the democrats can be free to lead the democratic party. They cannot vote with the Negro. Then why do some of the negroes want to vote with them?

The leaders of the Democrat party can promise the young men of this country that if they will be good and vote with the party now, some day they may run for vice president with Bryan.

Young Perkins and Lacey showed what little state pride they had when they defeated Mr. Cummins at the National convention. Can they deceive the people and defeat him next winter?

After the committee of colored gentlemen failed in their efforts to convince the delegates at the Democratic National convention, that they should put a plank in their platform that would give the Negro a place to stand, they tried to persuade them to pay their traveling expenses. Had they not been who they were, it would look a little grafty.

Mr. Bryan dare not insult the democrats in the south by asking the northern Negro to vote for his party.

Bryan cannot win without New York, and he can be defeated without it.

If there was a man in Denver at the convention outside of the committee of colored gentlemen, that though the time had come when the negro should vote the democratic ticket, he dare not let it be known.

We believe that not only the people of Iowa, but the fair thinking people of this country will endorse the candidacy of Governor Cummins for United States Senator. It is but fair, the standpatters have Dolliver and it would be the logical thing to do to unite the party and give Mr. Taft a 100,000 majority.

EXAMPLES OF MEDIEVAL ART.

Fine Stained Glass Windows Recently Received at New York.

The two German windows of stained glass among the recent acquisitions belong in period to the early sixteenth century, at the time when medievalism passes over into renaissance. The color is lighter and paler than that of the preceding century and is secondary in importance to the design. In the examples at the museum are certain tints of yellow that began to be used in the middle of the fifteenth century, as taste changed in favor of lighter rooms. The subjects of the windows are St. John and St. Maximine against a background of tapestry and architecture treated so as to appear on the same plane as the figures. The author of the note on the windows in the Museum Bulletin says that the drawing is undoubtedly the work of a painter—and a very good one—that of the Ober-Rhein school, and that as St. Maximine was bishop of Trier, the supposition that the glass is from that source is probably correct. Very fine examples of the same period are those in the nave of Cologne cathedral.—New York Times.
