

Daily Globe.

BY H. P. HALL. NO. 17, WABASHA STREET, ST. PAUL. Terms of Subscription to the Daily Globe...

THE SUNDAY GLOBE. The Globe will be furnished every day in the week to city subscribers at 85 cents per month...

THE WEEKLY GLOBE. The Weekly Globe is a mammoth sheet, exactly double the size of the Daily. It is just the paper for the farmer, containing in addition to all the current news...

Daily Globe Advertising Rates. Fourth Page 5 cents per line every insertion. Third Page 5 cents per line for the first week...

Special Local Notices. The Globe offers no space, but proposes to charge for the last day will be the same as for the first, no matter how many insertions are made...

MINNEAPOLIS OFFICE, 213 Hennepin Avenue, up stairs. The Globe counting room will be open on Sun day from 6 a. m. to 8 a. m. From 11:30 a. m. to 1 p. m., and from 7 p. m. to 9 p. m.

ST. PAUL, SATURDAY, APRIL 13, 1878. ADVICE is very cheap and with all the cords of suggestions which have been kindly showered on the immigration board...

RAMSEY interviews on the Congressional question is in favor of Stewart. The old icon is playing it low down in behalf of the "Sacred Cow."

One would suppose from reading interviews with St. Paul and Minneapolis politicians, that the entire third Congressional district was covered by those two cities.

The Illinois Democracy have promulgated a platform which, in most respects, is a commendable document. It endorses the silver bill, and demands the unconditional repeal of the resumption act.

With its usual inaccuracy the Pioneer Press yesterday morning said the Illinois Democratic State convention seems to have been a dumb show, as resolutions are concerned.

Poon old Tweed is dead. Though a colossal thief, his ignoble death in jail can but excite pity. The whole New York ring of thieves should have been consigned to the penitentiary for the longest term which the law would admit.

Meeting of the Inmate Asylum Trustees at Rochester. Rev. Kerr Belloc in Secretary. [Correspondence of the Globe.]

ROCHESTER, April 12.—The board of trustees of the insane asylum met at Rochester on Wednesday. There were present Rev. A. H. Kerr, L. Fletcher, F. Talbot, C. T. Brown, W. Schimmel and B. Denel.

THE PORT SNELLING BRIDGE. Hon. James Smith stated the law touching the rights of the United States government over rivers running within the limits of a State.

Now, because the United States government once owned the Fort Snelling reservation, and sold it, reserving as a gift from Minnesota, out of eight thousand acres of land, less than one thousand for a temporary military post within the State jurisdiction of Minnesota, it is claimed that it is unsafe for the people of Ramsey county to build a bridge without obtaining the consent of Congress.

Department of Dakota. The following special orders were issued from Headquarters Department of Dakota, this city: Second Lieutenant P. P. Walker, seventh Infantry, will report in person to the commanding officer Fort Snelling, for duty with recruits for posts in Montana Territory.

First Lieutenant J. C. Ayres, Ordnance Department, will proceed to Fort Stevenson on public business; and, on completion thereof, will return to his station at Fort Abraham Lincoln.

W. T. Sherman, general, executed a round dangle. Mrs. Sherman, the contrary notwithstanding, when he heard that Senator Thurman had introduced a bill for the relief of Colonel Tom Worthington.

Murat Couldn't Stay Behind Mrs. H. NEW YORK, April 12.—Mr. Murat Halstead yesterday accompanied Mrs. Halstead and daughter and son down the bay in the steamer Halstead. He embarked at the last moment to sail with them instead of going over two months later as he had intended.

THE BRIDGE OF SIZE. Contemplating It on Paper.—Mr. Sewall Catechized. [Continued from yesterday.]

An adjourned meeting of the Fort Snelling bridge commission was held yesterday morning in the office of the county auditor. A full board was present, Ald. Dawson presiding.

Engineer Sewall's dimension line plan and profiles, referred to and described in yesterday's Globe, having been unrolled upon the table, the secretary read the minutes of the previous meeting of the board, which were approved.

The secretary then read a letter from Engineer Sewall, which accompanied his drawings. Omitting the parts of the communication directly referring to, and technically descriptive of the plans, the report is as follows:

"The location should be at the narrowest place that the officers in charge of the fort will approve. The center line would be at the ferry, and run through the fort. It has not been surveyed, but would be 100 feet shorter than any of the lines shown (upon the plans)."

"The width of the valley increases from the 1,200 feet at Gen. Terry's. 'The cost of the bridge will be in proportion to its length. The foundation is coarse gravel, which we could not penetrate with an iron rod more than sixteen feet; nearly the same at St. Paul."

Letters were read from Senator McMillan and Representative Stewart saying that they had called upon the secretary of war in reference to securing aid from the government for the bridge. They found that the matter had been referred to Quartermaster General Meigs, and Chief of Engineers Humphreys, and that they had in turn referred it to Gen. Sheridan, and he had laid the whole matter before Gen. Terry, and upon a certain report would depend the question of government aid.

We cannot add to it, except to say, that the proposed bridge will and can never impede navigation, as its altitude will be such as to allow all steamboats to pass under, and especially, if loaded with the constitutional and general lawyers of Ramsey county.

Gen. Lesh and Dr. Stewart. Dr. Stewart has expressed himself in favor of Dr. Lesh for re-election to Congress. Gen. Lesh, being the Chairman of the Republican County Committee, must be presumed officially to speak the sentiments of the Republican party of Ramsey county.

Therefore, it was a superfluous work to interview, Col. Drake, Col. Upham, Mr. Hamilton, Gen. Marshall, or Alexander Ramsey. Gen. Lesh settles the matter.

Hence, we cannot appreciate why Charley Clark, who holds an office in the gift of Dr. Stewart, should become so much excited as to declare that under all circumstances he will support a Hennepin county man, had we, in utter ignorance, had supposed that this district was a unit in interest. St. Paul has no interest in the prospect, no material business not in common with the commonwealth of Minnesota.

"The tides of population are filling the inexhaustible lands of the State with the great wealth of industry and labor, and honest and happy homes. Minnesota has no antagonisms of locality. The people of the State are bound together in one commonwealth of self-interest. The unlimited bounty of the soil welcomes to a feast of plenty all who come here to find homes and prosperity.

It matters not who shall be the member of Congress, if he be a true and an honest representative of these increasing interests of citizens, of immigrants, of westward civilization.

Therefore if Gen. Lesh has settled the matter for the Republican party, the Globe may be allowed to suggest the possibility and probability, that the Democrats of the district may, in order to relieve the Republicans of their various conflicts, resolve that a Democrat might do as much good in Congress as Gen. Lesh.

ON THEIR MUSCLE. But They Don't Want It in the Paper—Hence We Don't Print It. [Correspondence of the Globe.]

OWATONNA, April 12, 1878.—I notice in today's Pioneer Press a somewhat mixed account of a little salmon row which took place here Thursday evening. In order that the readers of the Globe may have a true version of the matter as possible, I pen a few lines embracing the facts as near as they can be learned.

Mr. T. B. Gault, local agent of the Chicago, Milwaukee & St. Paul road, and his brother-in-law, Mr. Dyer, started out during the day for a little spree. About 6 p. m. they brought up at P. Mullinger's saloon and called for drinks, for which the waiter gained entrance through the saloon proper, and they went around to the rear where Mr. Mullinger's family reside, and knocked at the door. Receiving no answer, they proceeded to force the door, and Mullinger and the bartender appeared upon the scene. It was then that the free fight took place, in which Gault and Dyer came out second best. Dyer was conveyed to the lockup and Gault to his home.

A physics was summoned, but no serious bruises or cuts were found, the P. P. to the contrary notwithstanding. Mr. Mullinger went out on a warrant for the arrest of Gault for maliciously breaking into his house. The Gaults were taken to jail yesterday, but as Gault laid up, the case was postponed until this afternoon. It is reported that Gault is trying to settle the affair and has offered a considerable sum to have it hushed. His greatest fear is that he will find his name in the paper. "The sober Mr. Gault is a perfect gentleman and good business man, but when under the influence of liquor is very abusive, and usually tries traveling on his muscle, but this time, for once, he carried his match, probably, a little more respectfully."

ROCHESTER ASYLUM. Meeting of the Inmate Asylum Trustees at Rochester. Rev. Kerr Belloc in Secretary. [Correspondence of the Globe.]

ROCHESTER, April 12.—The board of trustees of the insane asylum met at Rochester on Wednesday. There were present Rev. A. H. Kerr, L. Fletcher, F. Talbot, C. T. Brown, W. Schimmel and B. Denel. Dr. Bartlett of the St. Peter asylum, was one of the party also. The board were met at the Cook House, Mayor Williams, Senator McKinnon, Ald. Brooks, Rev. Mr. Rice, W. A. Hurbit and others. At about two o'clock carriages were provided and the party paid a visit to the asylum, and made a thorough inspection of the buildings. This occupied about two hours, and upon their return to the Cook House the board retired to a private parlor and had a consultation, to which no outsider was admitted. The board was pleased with the report telegraphed to Mr. Bohm of Winona, for the plans of the building, and received a reply that the plans were in Minneapolis. A committee was appointed to consult with Pillsbury in regard to obtaining the amount of money appropriated by the Legislature, of which committee Hon. B. Denel is a member. Action was also taken by appointing H. Loomis to take charge of the board, to meet next session of the board. The meeting was prolonged for nearly two hours, but no particular business transacted, except as above stated, could not be learned, as the Rev. Kerr appeared to think the public had no special interest in the matter.

On Thursday morning the board proceeded a surveyor and returned to the asylum to take certain levels and measurements in reference to drainage and water supply. It was ascertained that the fall was 17 feet from the basement to the brook on the north side of the lot. The board desire to secure the appropriation so that the necessary alterations can be proceeded with at once, so that the hospital may be in readiness for occupancy this fall. The board was pleased with the location, and with the building itself, and will leave for their homes to-day at noon.

The character of the alterations is not yet determined upon, as the members desire to consult the plans which are, as before stated, in Minneapolis.

Nothing further could be learned from the members of the board.

Department of Dakota. The following special orders were issued from Headquarters Department of Dakota, this city: Second Lieutenant P. P. Walker, seventh Infantry, will report in person to the commanding officer Fort Snelling, for duty with recruits for posts in Montana Territory.

First Lieutenant J. C. Ayres, Ordnance Department, will proceed to Fort Stevenson on public business; and, on completion thereof, will return to his station at Fort Abraham Lincoln.

W. T. Sherman, Substence Department, will be ordered from Sioux City to Yankton on public business; and, on completion thereof, will return to Sioux City.

Mr. Smith has in an exhaustive letter stated the whole proposition and the law.

SUPREME COURT.

DECISION OF CASE FILED YESTERDAY.

Ann Shriver respondent, vs. The Sioux City and St. Paul Railroad Company appellants. SYLLABUS.

A witness accustomed to packing marble slabs for transportation may be asked whether in his opinion a certain mode of packing for transportation was proper, though an owner who improperly packs goods for transportation by a common carrier, cannot recover for injuries to the goods to which the improper packing contributes, he may recover for injuries happening independently of the defect in packing.

A common carrier of goods cannot by contract exonerate himself from liability for loss or injury to goods happening through his negligence, or that of his agents, nor limit his liability to injuries caused by gross negligence, where there is a contract limiting the liability of a common carrier of goods the burden is on the carrier to show no injury or to show from what cause a loss or injury occurred.

The Secretary—Can you give us an estimate of the cost of the bridge? Mr. S.—I can, and should like to make them most carefully.

The Secretary—I suggest we regularly employ two engineers, who will have to consult with the contractor, and very careful estimates. Mr. S.—That will cost money.

The Secretary—The use of a preliminary estimate is to enable us to arrive at a decision as to the cost of the bridge. If the preliminary estimate might not prove correct, and it would be well done if it came within 10 per cent. of the actual cost. Bidders for the contract will probably vary as much as 20 per cent. Mr. S.—Supposing a close estimate is made, can we not then advertise for the construction of the piers?

The Chair—There are many different characters of bridges, and much of the engineering talent of the country has been exclusively devoted to bridge construction. Among all these varieties we shall have to decide which to adopt.

The Secretary—The first thing we want is consulting engineers. Then, if his estimates show the expenses would make the matter hopeless, let us drop it.

The Chair—If the estimates showed that the bridge would cost Ramsey county \$100,000, I should favor it. Mr. S.—If the estimates showed it would cost \$120,000, it might not cost that much.

The Secretary—No engineer will risk his reputation by making his estimate too low. The Chair—Engineers cannot always tell what a thing will cost. Contractors differed in their bids for work from 25 to 100 per cent.

Mr. S.—The estimate ought to be within 20 per cent. of the actual cost. By corresponding, etc., they ought to come even closer than that.

The Chair—Bridge companies will occasionally build for very low figures. The Secretary—Before we advertise we will have to specify what we want.

The Secretary—We must have plans before we advertise. Mr. Thornton—Will it not require two more men on the No. 4 line than the others below?

Mr. S.—The cost of the bridging increases with the length. Mr. Knapp—What is the length of the longest bridge in the city?

Mr. S.—About 1,200 feet; the shortest is about 1,000 feet. The Secretary—I press my motion. Mr. Sewall here withdrew from the room.

Mr. L.—If we elect an engineer, how much will he require? The Secretary was here all impatience to ride the secret goat, so his motion to go into a recess was not carried.

The Chair, bearing on the three fair pushers—Either you can withdraw, gentlemen, or we will vacate. The reporters, being in the minority, honorably withdrew.

The Commission, rid of the peckiness of news, expended wind and time in secret confab, but failed to agree in their object of secrecy, the election of an engineer.

CASUALTIES. DAMAGING WINDS. PORT HURON, Mich., April 12.—The barge Vanderbilt, owned by Watson of Buffalo, arrived here yesterday at 7:30 a. m., dismasted and jib boom gone; the fore and main carried away below the track and the mizzen gone at the deck. Capt. Mullen states that when three miles to the south of Sheboygan light, the wind blowing very hard and puffing land, the wind blowing very hard and puffing spars went by the board. The tug Mocking Bird was about a mile in advance with four vessels in tow, which she let go and went to her assistance. She will be towed to Buffalo, where she will receive repairs. Capt. Mullen also states that there was not a puff of wind from the north, and that there was more or less damage. The Pensacola lost one gaff and two jibs in the same breeze.

MISCELLANEOUS. WHEELING, W. Va., April 12.—Wednesday night a skiff containing six young men of Martin's ferry capsized in the river just above this city. Frank McKim, Herbert B. W. and others were rescued. The others were saved—James Greer, one of the party, rescuing Thomas Jordan.

LONDON, April 12.—The steamer Childwall Hall, wrecked at Sagres, Portugal, had crew forty-five and sixty passengers. The fate of twenty-six is unknown. The remainder were saved.

CINCINNATI, April 12.—At Zanesville, O., last evening Hall's planning mill, the United States hotel and several buildings were burned. Loss \$10,000; uninsured.

Sherman's Latest Pivotee. [Washington Capital.] W. T. Sherman, general, executed a round dangle. Mrs. Sherman, the contrary notwithstanding, when he heard that Senator Thurman had introduced a bill for the relief of Colonel Tom Worthington.

The others were saved—James Greer, one of the party, rescuing Thomas Jordan. LONDON, April 12.—The steamer Childwall Hall, wrecked at Sagres, Portugal, had crew forty-five and sixty passengers. The fate of twenty-six is unknown. The remainder were saved.
