POLITICAL MEETINGS.

ION. IGNATIUS DONNELLY will address his fellow citizens at the following places: Glenwood, Tuesday, Oct. 15.

Down with Washburn and the swindling brass knuckles. The swindling "testers" are a test of the honesty of Bill Washburn and the Minneapolisians who ring around though they are not fair tests of the quality of what.

"PERHAPS we should be thankful that matters are not worse," is the comfort extracted by the New York Times from a calm survey of the results of last week's elections.

A MYSTERY surrounds the fate of one of the victims of the mob at Mount Vernon, Indiana. A great variety of horrible stories in connection with him are afloat, but none of them appear to be based on anything but rumor.

The truth is, that the Congressional outlook is gloomy. We fight, not with the expectation of securing a Republican majority in the next House, but to acquire a minority sufficiently powerful to hold the combined Democrats and Greenbacks in check, and to strengthen the conservative element in the Senate.

It is due to T. S. White to call special attention to his statement in the Chamber of Commerce relative to his action on the wheat committee. He was not notified of his appointment to fill the vacancy until Friday, and Mr. Pascal Smith drew up a document which he urged Mr. White to sign, in order to comply with the request of the Chamber for a report.

ONE result of the munificence of the North towards the fever-stricken South is not at all gratifying. It seems that large numbers of negroes, who will not work unless their necessities compel them, are deserting the plantations and flocking to the relief depots in the cities, where they are clamoring for rations and threaten violence in case their demands are not complied with.

HERE is another specimen of the folly of Sherman's financial policy. The payment of thirty millions of gold by the syndicate for the 4 1/2 per cent. bonds has caused a large speculation in gold in New York, and a rise in the premium sufficient to unsettle values in a large quantity of money.

THE relations between Russia and Turkey appear to grow more threatening daily. A Constantinople dispatch says that the Russians have recommended their march on

Adrianople, and great alarm is felt in consequence. The difficulty seems to be as to the conclusion of a treaty supplementary to that of San Stefano, the Russians insisting upon the insertion therein of article 26 of the treaty of San Stefano.

REPUBLICAN CAMPAIGNING IN LOUISIANA.

The methods employed by the Republican party to keep control of the colored voters of the South are again brought into startling prominence by the unprovoked murder of Capt. John G. Peck in Tennessee parish, Louisiana, a day or two since. The Republicans, it seems, have been endeavoring to create race prejudices between the whites and the blacks in that vicinity, that they might better manipulate and consolidate the colored vote for their member of Congress.

THE CHAMBER OF COMMERCE.

This is the opportunity for St. Paul. Her Chamber of Commerce should not be so blind as to be unable to see that this city must stand by the producer in the contrary now in progress. Business is already becoming paralyzed. If farmers sell their wheat they are swindled on grade so that they do not, in many cases, receive the cost of production, and of course have nothing to pay debts or make new purchases.

No. 1 grade. Here went three of these accounts little jokers giving different weights. If human ingenuity cannot do any better than that it would be well to give that element a rest.

ONE of the most gratifying signs of the times is the revival of all forms of business and industry. After a careful review of the situation in that city the Chicago Tribune comes to the conclusion that never before has the demand for labor been as nearly equal to the supply as at the present time.
