RABIES. Though the sight of a dog almost always changes the passive state of hydrophobia in any animal to the active, raging condition; there is one recorded fact which points to the probability that an animal afflicted with this disease was thrown into a violent state at sight of an individual belonging to the particular species from which poison was received.

A man was sawing wood, yesterday afternoon, in a back-yard. He severed two sticks as thick as your wrist, and then went into the house. "Mary," said he to his wife, "my country needs me; there's no use of talking; we've just got to slaughter all these Injuns; no true patriot can be expected to hang around a wood-pile, these days."

"John," said his wife, "if you fight Injuns as well as you saw wood and support your family, it would take one hundred and eighteen like you to capture one squaw, and you'd have to catch her when she had the ague and throw pepper in her eyes." John went back to the wood-pile, wondering who told his wife all about him. -Salt Lake Tribune.
