CANADIAN CANTATRICE.

The Romance of Her Life and the Story of Her Studies.

It happened one Sunday morning that Brignoli, while strolling about the streets of Albany, dropped in at the cathedral to hear the music. The choir were in the midst of a chant, and when to the well-trained ear of the famous tenor there came the tones of one "sweet voice above the rest," Brignoli was not slow to make his way to the organ loft to inquire as to the possessor of the voice which had so charmed him.

"She is my daughter," proudly exclaimed Joseph La Jenness, a French-Canadian music teacher. "Shall I present you?" he continued, recognizing the tenor.

The short acquaintance that followed led Brignoli to recommend a course of foreign study, but that was then impossible for the poor music teacher who had to eke out her small income by singing in the choir and occasionally playing the organ.

Still she was brave and did not despair. By degrees her voice made the choir locally famous and gradually made for herself friends who, recognizing the capabilities of her voice, arranged to send her abroad for study.

In 1868, at the age of eighteen years, she started for Paris, taking with her letters to the bishop of Paris and to the famous tenor Dupres. After studying two years with the latter, she was sent to Lamperti, at Milan, who gave her greeting with:

"Ah! there's a fortune in that little throat!" Hard study with this great maestro gave her absolute command over her rich voice, and when in time she was ready for her debut at Messina, she chose to make her first appearance as Amata in *Scarmaglia*, and give as much as possible to the part, she first visited the scene of the opera, and studied the dress and characteristics of the people.

The name Albani, as many persons fondly suppose, but was given her by Lamperti himself. In 1873 Albani, who had then been three years on the stage, appeared in London, where she added another to her long string of triumphs. Albani's voice is a rich soprano, commanding a company of two octaves, extending up to E flat. As a devout disciple of Lamperti, she disdains trickery, and like a true artist, she sings the opera as the composer wrote them.

In appearance Albani is a brunette, with black hair and eyes. She is below medium size and is slender. Her fondness and admiration for Patti is a matter of long standing; and Patti has always reciprocated it. A devout Catholic, she recites in her native tongue the sweet simplicity which has come down to her through her father, from the dwellers in Arcadia, and yet she is not without a dash of pride in her nature.

Her mother belonged to an aristocratic Scotch family in Montreal, and when the flower of the family fell in love with her French music teacher, elopement and poverty was made her lot. When Albani's star began to be in the ascendant the family expressed its willingness to lend assistance, but the coming prima donna replied with spirit:

"You spared my mother when she most needed your aid. The memory of that treatment compels me now to decline alike your proffered bounty and your hospitality." Albani is now thirty-three years old, having been born in Canada in 1850.

Her first appearance in America was under the management of Sirakosch in 1874, Heilbron, Potentini, Cary, Carpi and Del Puoli being in the troupe. In private life Albani is Madame Ernest Gye (pronounced Jy), and she resides in Boston, who has reached the age of two years, and is now in London.

FIRE THIS MORNING.

The Arcade Hotel in Flames—Damage Heavy.

At 3:50 o'clock this morning a fire broke out in the rear upper portion of the Arcade hotel, on Robert street near Fifth, owned by Capt. T. J. Barney.

Alarm was given and the department was soon on the ground, and by aid of the Hays' truck several streams of water were soon directed upon the fire. It was stubborn however, and difficult to get at, and before it was subdued much damage was done by the flames and by water.

At this hour the fire is under control. A young man named Hitchcock, who boards 522 South Fifth street, while jumping from the platform of a street car, slipped and fell, fracturing his knee cap.

Sergeant Bates arrested a girl yesterday for the larceny of a silk dress. S. D. Rollins' residence, at 701 University avenue southeast, was burned by fire last evening, but the loss was fully covered by insurance.

NORWEGIAN POLITICS.

The Conflict Between the Crown and the Parliament.

A letter in the Spectator from a correspondent gives an account of the conflict between the crown and the storting, about which some alarming rumors, he says, appeared in the foreign newspapers.

The conflict began so far back as 1872, when the storting carried by 80 against 20 a bill inviting the ministers to be present at the meetings of the storting, as is the case in other constitutional countries.

The king refused his sanction, but presented to the next storting a list of several constitutional changes which were considered necessary guarantees to balance the proposed reforms.

The storting next endeavored to obtain its way by means of this provision. The bill was twice more passed, the king again refused his sanction, and "a new struggle" arose, more fierce than any before, and on a quite new and different ground, the nature of the king's veto.

The general opinion now even among conservatives outside the small fraction of the intrinsigents of the extreme right is, that it was a deplorable mistake not to acquiesce in the will of the people on this occasion, and the general indignation found an expression in the famous resolution of June 9, 1881.

In this the storting declared the bill about the ministers' presence at its meetings, to be carried by the legal majority, to be "valid law in the kingdom of Norway." The resolution was met by a firm protest from the crown, and this only considerably widened the gulf between the contending parties.

The crown's claim for an absolute veto has been pushed further. Lately it was employed to frustrate the permanent sitting, the storting appointment of a parliamentary committee, and even some of its financial arrangements.

Besides these leading questions there is on nearly all points a general difference of opinion between the government and the representation. The other reforms of the liberal programme, such as the introduction of juries, a reasonable extension of the right of suffrage, a reorganization of the army on the model of the Swiss system of militia, are all met by an unyielding resistance on the side of the government, and as little regard is paid by the liberals to the guarantees claimed by the crown.

The storting stand at present. The new election have returned to the storting, which was opened on February 2, a more formidable liberal majority than ever, ready to use all the means placed in their hands by the constitution to maintain their will—for instance, the refusing of the budget, already adopted to a great extent in the last storting, and perhaps impeaching the ministers before a parliamentary tribunal.

On the other hand, the king's speech at the adjournment of the last storting, irritating in its rebuk, does not give much promise of reconciliation. What Women Want to Know. A late number of a well known fashion journal says: "Annie of Austria collarets are suitable only for matinee jackets.

Turkish fez caps are worn only as breakfast caps." Apropos of these edicts of fashion, an incident: Seated near a couple of ladies at the Grand the other night, we overheard a portion of their conversation.

Said one:—"You notice that I have on an Annie of Austria collarette?" "Yes," responded the other. "What could you be thinking about, my dear; you know they are only worn at matinees."

"Of course I do, and I feel so mortified. I don't see how I come to make such an awful blunder. What in the world will people think? But I am always doing something dreadful. The other day I went to dinner with my fez cap on. Just think of it, wearing a breakfast cap to dinner! Did you ever hear anything so ridiculous in your life?"

And the other lady avowed that she never had. "Yes," responded the other. "What could you be thinking about, my dear; you know they are only worn at matinees."

MONKEYS' TRICKS.

The tigers of India are fond of monkey meat and the monkeys are not fond of being eaten.

The tigers of India are fond of monkey meat and the monkeys are not fond of being eaten. They, therefore, match their brains against the tiger's cunning and strength in this way: The monkeys drive away tigers and leopards by assembling in all their strength upon the trees beneath which the tiger is lurking; shaking the branches with their might, and pattering down upon them about their would-be devourer such a shower of dry sticks, twigs and leaves, that the latter is forced, with an angry growl, to quit his lair and seek other and quieter quarters.

THE DODDIE FIVE PRESS STATES THAT A SCHOOL-BOY AT THAT PLACE CAUGHT SEVERAL SNOW-BIRDS IN A TRAP, AND AMONG THEM WAS ONE PECULIARLY MARKED. Its right wing was perfectly white and some longer than the left, which was of the usual color. The tail was a bright red and contained only four feathers. He has it now in a cage, and it is quite a curiosity. Its "chirp" is somewhat different from the ordinary snow-bird, but with the above exceptions it retains the same characteristics as those of the ordinary run. Birds of a feather do not always flock together.

A monster shark, called "San Jose Joe," has for many years been the terror of the Pacific coast from San Jose de Guatemala to Punta Arena. He has been so frequently seen that he is as familiar to the mariners of that coast as its most perilous headlands. He is said to be forty feet in length, and is extremely ferocious, human-kind being his favorite prey. In the last few years "Joe" has devoured half-a-dozen men, and some years ago the Guatemalan government offered a reward of \$500 to any one who would kill the devourer. He has been shot a couple of times and harpooned three, but survived these assaults, and still roams his old haunts.

A young man, 19 years of age, was discharged from the Connecticut state prison, who certainly has a full claim to the title of "an unfortunate." Utterly ignorant of his parentage, never having known a home, mother or father, deficient in intellect and moral capacity, his earliest and only memory of childhood as the inmate of an almshouse, his whole life to the present time, he finds himself now a discharged convict, after passing through the various stages of almshouse, juvenile reformatory, reform school, jail, and state prison. What a retrospect! What a prospect!
