CHIOAGO, March 27.-About 10 o'clock last night Detective Costello arrested a young woman named Addie Hunt at the residence of her mother, on Shotto street, charged with having robbed Mrs. Hutchinson of \$100 in eash and about \$200 worth of jewelry last Saturday afternoon, when Mrs. Hutchinson was knocked down by the runaway team on State street near Harrison. She was carried into an adjoining drug store, the Hunt woman assisting. While the injured woman was unconscious Miss Hunt seized the portemonaie containing the valuables, representing herself to be Mrs. Hutchinson's daughter, and at once disappeared. A woman named Cora Coleman was arrested on suspicion being guilty person, but is now believed to be innocent of any share in the transaction. The Hunt girl is said to have been kept out of the way since the theft, for the purpose of avoiding arrest. She was brought before Justice Wallace this morning for examination, charged with larceny, but at once took a change of venue to Justice Prindwelle. WAHPETON, Dakota, March 25 .- This morning about 2 o'clock our citizens were thrown into considerable excitement over the fact that Richland county court house was on fire. On approaching the scene of conflagration Sheriff Propper discovered the fire at the south east corner of the court room, and it had spread about twenty feet on the floor. On the opening of the term of court two days since, considerable sawdust was strewn to deaden the sound, and the only reasonable conjecture as to the cause is either a cigar or contents of a pipe were deposited on the floor. Judge Hudson, of Fargo, has just finished a term of court, lasting two days. The murderer Nash had been tried for shooting Newton. THE THOMPSON CASE.

Some New Testimony Introduced-The Evidence Taken Yesterdan.

In the Thompson trial Expert Willis was called to the stand, and testified as to the droppings on the books, and continued his testimony yesterday forenoon. On crossexamination witness, in reply to a ques tion as to the amount of moneys paid over the counter, said that one item of \$2,000 was paid over the counter into the firm by Conger Brothers. There were other items of the same character that he could not specify without referring to the books. As to the relative proportion of cash paid out over the counter and taken in over the counter by Thompson wit-ness could not state. The defense here ness could not state. The defense here attempted to show that Mr. Lovejoy's pecuniary necessities during the period of Thompson's alleged peculations were so great that he would at no time allow the cash to accumulate in Thempson's charge to the extent claimed by the state. The question through which Mr. Hart said that he desired to prove the state of facts was objected to as incompetent and the objec tion sustained.

Wm. Crombie, who has charge of the firm's lumber yard, was the next witness. His testimony varied in no essential par-ticulars from that given on the first trial, it being a recital of his methods in making sales and in his turning over of the pro-ceeds of such sales to the defendant when defendant left the office all the accounts tled. Between the lines of his story there appeared family is left in independent comfort at the eager, heated face of ambition that sacrificed and blighted a life. In this relic of a \$12,000,000 estate the young war governor sat with a faded straw hat over his unkempt hair as he drew aside the veil of the past. He had had a prevision of the end. He had told his charming wife that no estate could stand the strain of such a career; that his business, vast as it was, depended upon credit at his banker's; that he would stand it as long as he could, but that she would find, in the crash that would some day come, that misfortune would cause a secura of her summer friends. He bedeved that a chastening would be beneficial, and that it would bring the family life into its natural atmosphere. He did not think that wife and friends would leave together; he did not dream that he and she would part in a divorce court. He and his bride will probably live at Canonches next summer. But as he went out the other end, I remained in my hiding place, supposing it was a trick of the fox to throw the dog off his track. The dog was puzzled only an instant, and followed the fox on a long circuit this time, but in the course of an hour I saw it again enter one end of the log and out at the marked ability and purity of character, and while we feel that his death is in a peculiar sense our personal loss, we mourn, in common with our fellow citizens of a great nation, the death of that log.'
