It is to be regret-

AN ARGUMENT FOR CREMATION. The recent outbreak of cholers in Egypt in villages that had escaped the scourge at the time of its prevalence earlier in the season, is one of the strongest arguments vet adduced in favor of the cremation of the bodies of the dead. The villages were remarkable for their exceptional cleanliness, and although the disease was raging all around them they escaped unscathed It was not until more than a month after the subsidence of the plague elsewhere that it broke out in these villages, and is now decimating the population at a fearful

The cause of this singular phenomenon was at first a mystery, but has now been fully explained. Not far from the river from which the people drew their water supply a cemetery is located in which were interied the remains of the victims of the cholera who died in Cairo and the surrounding country. The infiltration from these graves into the river impregnated the water with disease, and hundreds of those who drank it have already died, while the disease is still raging. This is not an exceptional case. In scores of instances epidemics of every sort can be traced directly to cause. The decaying bodies that fill the earth in the vicinity of all our large cities necessarily foul all water in the vicinity,

running streams are rendered impure and their water unfit for domestic uses. Not only that, but the air is filled with poisor s that, though perhaps not plainly percepti ble, are inhaled into the lungs and permeate the whole system, producing disease and death. Cholers, small-pox, diphtheria, scarlet and typhoid fevers are all propagated by this means, and unless some remedy is devised it will not be long before these diseases become and continue epidemic throughout the greater part of the country.

Cremation appears to be the only avail able and common sense remedy. Fire is a great purifier, and destroys the germs of all disease. The prejudice against this manner of disposing of the dead is rapidly disappearing, and when it comes to b generally understood that it is conducive to the public health that it be put in igeneral practice, it will disappear altogether. There should be a crematory in the vicinity of all large cities, and there is no reason to doubt that through familiarity with the process the public will soon become as reconciled to the furnace as they now are to the cemetery. Of the two methods-burial and burning-the letter is certainly less repulsive to thinking people. Nothing can be more revolting than to consign the body of a loved one to the grave, there to lie and rot and to be devoured by foul and loathsome worms, which leave nothing behind bat bare and bleached bones and a grinning

Taking them aboard they proceeded to the house of John Burke, a laborer, where a serious altercation had occurred, and found the door barricaded by Burke and his brother Patrick Barke and another laborer named Coleman McGeary, who were assisted in their attempts to pre vent an entrance by the women folks who

were fully as determined as the men.
Succeeding at last in gaining admittance they arrested the males amid the wrecks of cents per bushel more for wheat than a regular old country scrimmage, and conveyed them with the wounded parties to the city hall, where Pat Gannon especially was a sight to see, his head being turbaned in old shawls to stop the flow of This is retributive justice. "Mr. MacCarthy," said Mr. Bierman with so strong an accent on the prefix Mr. that the absence of "captain' was painfully noticable, "is either an ignoramus or an ass, perhaps both, and now let me take this opportunity to set at rest the foolish stories stated about me. Somebody wrote from Willmar that I was born near the line in Denmark and that my father was a Ger man brewer. In the year 1418 my ancestor came from Germany to Christiana, the capital of Norway and settled there. There my people have resided through successive generations and there I was born. There never was one of our family engaged in the brewing business, though for that matter I cannot see that that would have any bearing in American politics. Twenty-one years ago I came to this country and enof that turn and a local school in Chris tiana having been endowed by my graud-father; but farming was the field that had the most promising opening when the civil war was over and to farming I went, and have continued at it except when called upon to serve the people in an official capacity. As for being in sympathy with the so-called "king's party" in Norway, that is a party, as it now stands, of very recent organization, and I having imbibed the air of American liberty and fought for it in the army certainly cannot be said to have sympathy for royalty. On the contrary my sympathies are with the people's party in either America, Norway or Ireland. I think I have said enough to confute the argument of this mimic soldier, Mr. MacCarthy."

> Bubbard and the Pine Ring. [Special Telegram to the Globe.]

Chookston, Minn., Oct. 25 .- I have held my peace in this campaign because I hought it unnecessary to say anything Things seemed so one-sided, and seemed to be going so steadily one way-towards Biermann, that the opposition were entitled to slight consideration. There has been a change though. The Republicans have taken the alarm and seek to divert the Biermann boom by violently attacking Mr. Biermann's character. Now turn about is fair play. While the goody-goody Republican organs are reverently salaam ing before the "virtuous and upright Goy. Hubbard" and declaring his administra tion undefiled, etc., the publie should be made aware of some of his official acts which hardly have the

color of either honesty or justice.
You will remember that about the 25th of last August there was published in the GLOBE and other St. Paul papers a letter written by Governor Hubbard to the department of the interior at Washington ecommending that all the Indians on the various reservations in the northern part of the state be removed to the White Earth reservation. This especially referred to the Red Lake band. The letter excited no comment at the time except among the in-itiated few, of which I happen to be one.

Now for the explanation.

The land now held by the Red Lake Indians includes some of the finest pinelands in the state. If the redskins are removed what becomes of their valuable lands? They are thrown open to settlement by the United States government. Now, Mr. Editor there is not a man, woman or child in the state that does not know how pine lands are gobbled up in this state. Thundering Gordon, himself an operator and initiated in the methods, has recently made a charming expose of them in the GLORE Gordon told us there is a gigantic pine land ring in Minnesota and named the We all know them in this part of the country. They have been operating here, stealing pine off this Red Lake In-dian reservation, and when Father Tomadian reservation, and when Father Tolhazin, a missionary among that band, went to Washington to protest he was coldly ignored, and on his return ejected by orders from the Interior de-

the partment, for pine ring has influence with that most corrupt of all our departments—the laterior and

Congressman Washburn needs only to say the word to have it all his own way. I have, I think, disclosed who would be benefitted if the Red Lake Indian reservation, so long coveted by the pine land ring. were thrown open to pre emption, public sale and all other devices for acquiring valuable property for a moiety of its worth. Now why should Gov. Hubbard seek to be of service to these public thieves? When Windom was ousted (partly through Hubbard's efforts) the ring lost an efficient ally. They were dejected and downcast, aye even eager to wreak vengeance on the instruments of the defeat. Hubbard's nomination gave them the first opportunity and they were disposed to avail themselves of it They manifested no enthusiasm toward him, and in some quarters began plotting against them. Then Charley Gilman came to his rescue. Charley was on the inside. are only enlisting recruits and getting our Hubbard was shown where he could curry favor with this powerful ring. The resul we know. Now do the organs of Hubbard dare deny these statements? We will see.

> Sabin Called to the Front. WINONA, Oct. 23, 1883.

To the Editor of the Globe.

Some time since I sent an article to the GLOBE from Fillmore county. The Re publican papers throughout the state have made a good deal of ridicule out of it. One asks, "Who is the lunatic Erikson?" I will say to all that I am a traveling man, well known among commercial men on the road, and that if I was to make another statement to-day I would make it much stronger. I think that even Mr. Sabin will now concede Mr. Biermann elected. A great many Scandinavians feel very sorry for Mr. Sabin. He thinks, no donbt that he is the Republican party of Minne sota; "the Democratic candidate amounts to nothing." If Mr. Sabin wants his the fact that if I am elected by their assistance, that they will forever afterward stead of three thousand majority, let him come to the front now. I, for my part, cannot see where Mr. Hubbard is going to get his votes; everything has now been in his behalf. All the Norsk newspapers have been bribed, men and boys are hired for money to work, and Hubbard literature is sent by the ton, but "no go he." Nothing short of Mr. Sabin himself will bave any effect on them. He has done so much for the Norsks that they feel under great obligations to him. Now Mr. Sabin for heaven's name, come out at once and rescue your friend. This will be your last warning; you will not hear from me again until after the 6th of November, so if you fail don't blame me. But how is old Fill-more to-day? You better see about it Mr. Sabin. Erikson.

To the Editor of the Globe. HASTINGS, Minn., Oct. 27, 1883. From a communication in one of the morning papers of this date, the public is notified of the withdrawal of Capt. C. M. McCarthy from the Democratic party. Just on the eve of the election this action on the part of the Captain might have been destructive to the hopes of those whom he has deserted, but thus far the world moves and "the watch fires of liberty" burn with their accustomed brightness. (Special Correspondence of the Globe.) MONTEVIDEO, Oct. 25 .- J. W. Arctander, whom rumor says is to have the next vacant judgeship in this state, spoke here last Tuesday evening in the interests of Governor Hubbard (probably paying thereby for the expected promotion). Arc tander in his speech said Governor Hubbard was entitled to our support because he smashed the rings in this state, especially the Windom ring. Now, I am a Viadom man and am very glad to learn that Hubbard though seemingly quiescent took an active part in defeating Mr. Windom' election and overthrowing the decis-ion of the party caucus. Since he opposed Windom I stand ready to oppose him, and since he sanctioned bolting the nominee of the caucus, I feel as if I had the right to bolt his nomination, especially since the convention that nominated him and was controlled in his interests refused to rebuke the caucus bolters. Col. Hicks, of Minneapolis, said in that convention that it was a dangerous precedent and now since we have found that Windom was knifed in the derk by Hubbard, I am satisfied that thousands of Mr. Windom's friends will follow my example and decline to vote for

> THE BURRITT BRUTE RE-ARRESTED. [Special Telegram to the Globe.]

ROCKFORD, Ill., Oct. 28 .- John Sullivan, better known as the "Burritt Brute," who escaped from jail in this city in September, 1882, has just been captured at Salmon Falls, N. H., and Sheriff Hutchins is now bringing him back. His crime was one of the most revolting ever committed in this county. On Sunday night, April 16, 1882, he accompanied Stella Andrews home from the Barritt church. Her parents returned somewhat later and were horrified when they came the prostrate and apparently lifeless body of their daughter, just inside the door of the farmhouse. Twenty-two gaping wounds were counted upon her person, and on her head was discovered a dreadful imprint. A battered hat and knife, with which the butchery had been performed, were found outside the door. All the surroundings were covered with clotted gore, and on her face traces of the bloody hands of the assassin were discerned. One of the girl's palms was cut wide open by grasping the knife in a vain attempt to save herself. For a year she had been keeping Sullivan's company, and he had made proposals of marriage. The town of Burritt was in the wildest excitement over the affair, and had the brute been caught his neck would surely have been encircled. As it was, however ne was not captured until the morning of the 19th, when he was found in the hay-mow of Marshall Potter. He had laid in the hay three days without a mouthful of food and was half crazed with the fear of discovery and punishment. By exercising are the prisoner was finally lodged in jail safely, though many dire threats against his life were uttered by the indignant farmers. Sullivan would not tell why he had committed the assault, and in fact refused to talk at all. The injured girl recovered in a measure but to this day is not the same person she was. A GIRL'S DETERMINED SUICIDE. Boston, Oct. 28 .- A strange suicide occurred at West Newton yesterday, caused, probably, by mental aberration. The victim was Mabel Stone, aged seventeen years, the adopted daughter of Joseph Stone, a retired banker and broker, and a pupil of the high school. While in the presence of the housekeeper she began to behave in a very strange manner. The housekeeper discovered that she had a revolver in her hand, and after a struggle succeeded in getting possession of the weapon. She then went for assistance, and while she was gone the girl rushed up stairs and went into a closet, followed by a seamstress. In the closet was another revolver, which Mabel secured. The seam-stress seized her and made an effort to get

A Salutary Lesson.

[New York Cor. Hartford Times.] The principal of one of the most fashionable schools in New York will not permit her pupils to wear a dress of any material save wool or cotton—the former in winter, the latter in milder weather, if they choose. A girl wearing a velvet suit one day was sent home with a message that her dress must be changed to one adapted for school wear. The mother of the girl returned with a reply that it was a last year's suit which must be ntilized or it would be outgrown. The teacher was inflexible. She sa room was no place for cast off finery; that the moral effect was bad and the final result worse than the present loss. The lesson was a salutary one
