The Branch Line to the Yellowstone National Park has its terminal point here, and all the immense travel for that famous resort is compelled to stop here from a few hours' time to a number of days. The principal shops of the railroad company between Brainerd and the Pacific Ocean are now being built here. They will give employment to probably 1000 men. Pine timber is plenty in the surrounding country, and various sawmills in the immediate vicinity of the tewn furnish work for hosts of employes. The valleys of the Yellowstone, Shields and Smith rivers are vast and very rich in agricultural resources, and are well settled. Their trade is entirely tributary to Livingston, while magnificent cattle ranches abound in every direction; vast mines of true hituminous coal, which can be coked for 1½ conts per ton; also rich iron mines are within two to four miles from town, and are being worked. The gold placer mines of Emigrant Gulch, Bear tuminous coal, which can be coked for 1% cants per ton; also rich iron mines are within two to four miles from town, and are being worked. The gold placer mines of Emigrant Gulch, Bear Crevice, Mill Creek, and Eight-Mile Creek, are ingston, directly tributary to it. and are being actively worked. That wonderfully rich quarts country, silver and gold, known as the Clark's Fork District, is south of town, and Livingston is the headquarters and outfitting point. Immense deposits of limestone, sandstone, clay and fine brick clay, are but two miles distant, and the manufacture of lime is already an important industry, this being the first point after leaving Due luth on the east, 1,000 miles, where lime rock is found. There are some 200 buildings in cours of construction. The Park Addition on which the new \$17,000 school house is expected to be built is the most desirable recidence property in town, while the Palace Addition contains the chespest business property offered for sale—the tendency of basiness and business improvements being largely in that direction. There are two banks, the First National and a private bank; two newspapers, one daily and one weekly. A smelt ing and reduction company is also in process of formation, to be located here. There are many chances for business enterprises of various kinds. Like all new countries, the opportunities for profitable employment are very good and workmen as well as men of capital will find plenty of chances in and around the town. Livingston is less than a year old, yet it is probably the second largest city in Montana: It is not surprising when one considers that agriculture alone has made Fargo; the Northern Pacific company's railroad shops, Brainerd; summer visitors, Saratoga; immer, Eau Claire; silver and gold mines, Denver; cattle Kansas City; iron and coal, Pitteburg; that a combination of all of these factors as is found here should, within the next five years make this point a city of at least 50,000 people. The prediction may seem a wild one, but we have y
