of all descriptions will be done on the most reasonable terms. Giving my personal attention to this branch of the business, I shall be able to give perfect satisfaction.

WALTHAM WATCHES!

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch users, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects is to decide the question as to the real value of these timekeepers.

More than 400,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch merely pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacturer of any kind in the United States of which this can be said.

These timepieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularly mention:

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fozg's Patent pinion as being the best and faultless.

Hardened and tempered hair-springs, now universally admitted by Watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof cases protecting the movement from dirt, and lessening the necessity of the frequent cleaning necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality ever offered to the public.

To CALIFORNIANS and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade mark of Waltham is guaranteed to be a thoroughly reliable timekeeper.

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.
