WALTHAM WATCHES.

THE extensive use of these watches for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these timekeepers.

More than 400,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enables them to produce watches at a price which renders competition futile, and those who buy any other watch necessarily pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold pieces before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularly mention the invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company who having had the refusal of all other contrivances, adopted Fogg's Patent pinion as being the best and faultless.

Harden and tempered hair-springs, now universally admitted by Watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust proof caps protecting the movement from dust, and lessening the necessity of the frequent cleaning necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public.

To CALIFORNIANS and others living in portions of the United States, where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade mark of Waltham is guaranteed to be a thoroughly reliable timekeeper.

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. E. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

Caution!—Since our Oroide Watches have attained so high a reputation, and the demand for them has greatly increased, many persons are offering common and worthless watches for sale, representing them to be Oroide Watches, in some instances stating that they are our Agents. We will state most positively that we employ no Agents, and that no one else does or can make Oroide; consequently these representations are false. The genuine Oroide Watches can only be obtained by ordering directly from us, or writing
