AROUND THE WORLD IN SIXTY DAYS.

QUICKEST MAIL EVER KNOWN

Cunarder Umbria Sails Today With Mail Matter That Left Australia October 14—Distance to London 15,285 Miles.

(By Associated Press.)

New York, Nov. 9.—When the Cunard liner Umbria sails this morning she will carry a batch of mail matter that arrived in San Francisco on last Monday on the steamer Ventura from Sydney and Auckland.

It will be the speediest mail delivery ever accomplished in the world—more than half way around the globe, by steam at sea and steam on land, and steam at sea again—in less than 30 days. The New York Central railroad will deliver the mail bag—which includes several bags—on board the Cunarder within five minutes of her sailing time this morning, and the steaming will have the letters in the London postoffice on the morning of November 16. It will beat the action of Phineas Fog by 20 days.

Left Australia October 14. The Ventura left Melbourne, Australia, on October 14, bound for San Francisco, by way of Sydney, Auckland, and Honolulu. From Melbourne to San Francisco the distance is about 9200 miles. The Ventura stopped at each of these ports. She arrived at Sydney late on the 15th, and her average speed was about 400 knots in the 24 hours.

From Sydney it took her three days to Auckland, and from Auckland to Hawaii 11 days. Her passage from Honolulu to the Golden Gate was exceptionally speedy, although it did not break the high record. The Ventura anchored in American waters on the morning of November 4.

The mail bags were brought ashore and placed on the regular mail trains of the Southern Pacific, and then run over the Union Pacific, the Burlington and the Lake Shore, and then to the New York Central.

Feat of September 7.

The first feat of this sort was on November 7. The run was made over the Central Pacific and the mail was put on board the Campana on that date and delivered in the London postoffice and made ready for distribution on the morning of September 14.

This run was not like that which will be finished this morning. A special train was run on the Lake Shore road from Chicago to Toledo and ripped over the rails at 60 miles an hour, overtaking the fast mail, which had left two hours before.

Today's mail will be by regular transcontinental mail trains.

The extreme distance from Melbourne

to London by way of San Francisco and New York is 15,285 miles.

Nearly 11,000 miles of the new route between England and its far-away colony are covered by American ships and railway trains.

The beating of the last record of 31½ days will prove that mail can be taken through New York more quickly than through the Suez canal, and much more quickly than by the all-water route.

DISCUSS EDUCATION PLANS.

Efforts for Spread of Learning Among Both Races of the South.

(By Associated Press.)

New York, Nov. 9.—A conservative plan for the promulgation of education of both the white and negro races was enunciated at the dinner given by Robert C. Ogden to the Southern Educational board last night.

The central idea of the scheme is that energetic efforts shall be instituted in the South at once for the spread of educational propaganda among the people of that section. The purpose will be to interest the Southern people of both races in education to instill into minds not possessing a zeal for knowledge.

The carrying out of the designs of this new organization is planned to expend the sum of \$40,000 annually for two years. The guiding hand in all of this work is to be J. L. McCurry, for a long time connected with the work of education in the South. Mr. McCurry is to be the general agent of the board.

Closely associated with him will be the Rev. Dr. C. M. Dabney. Dr. Dabney will be known as the chief of the bureau of information, investigation and the librarian. He will maintain at Knoxville, Tenn., a bureau of information and literature, from which will be sent out a vast quantity of matter concerning the purpose in hand.

The field directors of the scheme are to be Rev. Dr. H. B. Fyfe of Hampton, Va., Dr. C. D. McIvor of Greensborough, N. C., and Dr. E. A. Alderman of New Orleans.

Associated with them will be Booker T. Washington of Tuskegee, Ala., and Dr. G. S. Dickerman of New Haven, Conn., associate field agents. The Southern Educational board will have the assistance in the work of Albert Shaw, William H. Baldwin, Jr., and Dr. Walter H. Page.

ROBINSON VS. ROBINSON.

Judge Jesune Declares California Divorce Invalid in England.

(By Associated Press.)

New York, Nov. 9.—A case involving the question of validity of American divorce under English law has been heard by Sir Francis Jesune in the divorce court. It was the case of Robinson vs. Robinson.

Petition was made by Ethel Gertrude Robinson, otherwise Strickland, that her marriage with Edward Ernest Robinson should be declared invalid.

Attorney W. A. Barnard said the petitioner went through the form of marriage with the respondent on May 2, 1893, in Christ church, Westminster. The respondent left his wife in 1898, and inquired then made showed that he had been married in 1878 to a Miss Hawtree, in Hampton church.

In 1879 he went to America and stayed there with his wife until 1883, when he returned to England. He remained in England until down to the time when he went through the ceremony of marriage with the petitioner. In 1887 the first marriage was dissolved by the superior court in the state of California.

The judge declared that it was clear that the divorce granted in the state of California was not valid under the laws of England. Had it been granted while the respondent domiciled in America, it would have been binding. There was no doubt that the second marriage was not a valid marriage, and the judge granted a declaration to that effect, with costs for the judgment of the petitioner accordingly.

ENJOINS CLOTHING UNION.

Federal Judge Kohlsaat Attempts to Protect Business House.

(By Associated Press.)

Chicago, Nov. 9.—Judge Kohlsaat in the United States circuit court has issued an injunction against the Custom Clothing Makers' union and its officers and members, restraining them from in any way attempting to injure or interfere with a Cincinnati clothing firm. The firm asked that the union be restrained from issuing circulars stating that the concern was unfair to organized labor. The order forbids the officers of the union to notify by means of letters, telegraph or phone any retailers, dealers in clothing or labor unions that the company has to allow its employees to organize or adopt the union label. The injunction, labor leaders say, is the first of the kind issued, as it is directed against the boycott instead of picketing.

"My face is my fortune, sir," she said. "That's very plain," said he.

DISORDER RAMPANT

BUTCHERY, VIOLENCE AND CORRUPTION IN TURKEY.

SULTAN IN EPILEPTIC FURY.

French Invasion and Seizure of Mitylene Discloses the Weakness, Waste and Lawlessness of Turkish Despotism.

(By Associated Press.)

New York, Nov. 9.—The sultan's yielding to the French demands brings out the full gravity of the possibilities of the effect of the French seizure of Mitylene upon the crumbling edifice of Turkish despotism, says a Constantinople correspondent.

The whole of European Turkey is seething with disorder. In Armenia, the annual butcheries have been in full swing for the past three months and in the remainder of the empire there is the perennial violence, corruption, waste and lawlessness.

From the army down to the magistracy every part of the machine of government is in a hopeless condition.

In the opinion of the diplomatic body at Constantinople, any attempt at patching things will be merely futile effort.

The news of the French intervention was suppressed at Constantinople for three days, but the sultan's cabinet being in constant session showed that a serious crisis had arisen.

The sultan has been in a condition of epileptic fury and his ministers, who live in perpetual terror of their lives at his hands, were helpless and afraid to do or suggest anything.

It is believed in Constantinople that Russia is behind France in this business and it is felt that the present trouble is inevitably destined to lead to developments in the Eastern question in which England will be powerless to make her influence felt.

WESTERN FOOTBALL.

Big Crowd Will Witness California-Stanford Game Today.

(By Associated Press.)

San Francisco, Nov. 9.—The annual intercollegiate football match between the Universities of California and Stanford, to be played this afternoon at Recreation park, will probably be witnessed by 12,000 or more people.

Enthusiasm runs high among the friends of the rival institutions, and the rooters will be much in evidence. Stanford is the favorite, as its team is in splendid condition and averages 15 pounds more to the man than the California eleven.

According to the coaches, Stanford's tactics will be short, insistent, hammering plays, and long, accurately placed kicks, with probably tries at place kicks from the field. The men have orders to play ball, sparing neither themselves nor their opponents.

California's style of play will be the occasional thrilling end run, the chance fake and the surprise, long-range punts and attempts at goals from places, kicks along, with frequent tries at kicking the ball away over the line and forcing Stanford to come out to the 25-yard line and take a free kick and practically return the ball to California by the play.

Airships Will Race.

(By Associated Press.)

New York, Nov. 9.—France has long held the lead in automobile racing and seems determined to keep in the front rank of ballooning and sub-marine boat building, says a Paris correspondent. With a view to encouraging these decided novel forms of sport the Auto-Velo announces that next season, at Tronville, races for airships and submarine boats will be held.

WILL INSURE PEACE.

Wall Street Looks for Settlement of Railroad Differences.

(By Associated Press.)

New York, Nov. 9.—The conviction has crystallized in Wall Street that an agreement will be arrived at which will insure peace between the contestants in the Northwestern territory and will untie the hands of capitalists who have been obliged to lock up enormous capital in the struggle for control of Northern Pacific and the Burlington.

Reports of great activity in iron and steel, of large percentage increases in railroad gross earnings for the fourth week in October and continued heavy traffic and of good trade in general helped rising prices.

Large receipts of Australian and Kiowa gold have offset withdrawals for

export, and treasury bond redemption have kept pace with the government surplus, thus keeping in abeyance any anxiety over the money market.

The activity has greatly increased both in stocks and bonds and prices have risen.

Cattle for Deer Lodge Valley. Anaconda, Nov. 9.—Several hundred head of young cattle from the Georgetown flat ranges passed through town this morning and were driven to winter quarters in Deer Lodge valley. They belonged to Angus Smith. Other stock is being brought in from Big Hole Basin to be wintered in the valley.

FIND LOST MINES

CELEBRATED TAYAPA WORKINGS OF MEXICO REDISCOVERED.

PRODUCED EIGHTY MILLIONS

Returning Explorers From Northwest Mexico Assert That They Found Famous Ore Producer of the Seventeenth Century.

(By Associated Press.)

Tucson, Ariz., Nov. 9.—A special from Guaymas, Mexico, says the lost Tayapa mines, celebrated in Spanish annals as having produced \$80,000,000 in silver and gold in the seventeenth century, which are described on Spanish maps as being situated in Northwestern Mexico, about 50 leagues from the sea near Dos Pillares, have been found.

As far back as 1859, Robert L. D'Aumalle, a celebrated French expert, declared the location of the Cienegueta in the Sahuria district, Sonora, to be identical with the lost Tayapa.

The Spanish owners are said to have been murdered by their Indian slaves near the close of the seventeenth century and no one was allowed to enter thereafter on one was allowed to enter that region.

Explorers who have recently returned from Cienegueta report having discovered the old stone prisons, old smelters, and also stupendous works accomplished by the ancients.

MARYLAND BEAGLES WIN.

C. B. Brook's Pack Victors in National Challenge Cup at Club Trials.

(By Associated Press.)

New York, Nov. 9.—Maryland carried away the leading prize of the National Beagle club trials at Wheatley hills, L. I., through the cleverness of the pack belonging to Charles F. Brooke of Sandy Springs.

His Bridget B., Bessie B., Bonnie B. and Cycly B. were the victors in the national challenge cup class for dogs showing ability in the field and conformation and general levelness on the bench.

In scoring a victory Mr. Brooke's dogs incidentally defeated a pack owned by W. G. Rockefeller. If they had won he would have gained the cup, as his absolute property.

Four of these beagles—Bridget B., Bonnie B., Bessie B. and Birdie B.—also won the class for dogs of both sexes under 13 inches.

The Rock Ridge kennel's Hedgewood, Lily, Blanche and Dorsey's Pilot, finished first in the class for both sexes up to 15 inches.

The derby class for dogs of both sexes, whelped since January, 1900, was won by D. S. Somers' Florist.

CARNEGIE AT BROOKLYN.

Will Model Pittsburg Polytechnic on Plan of Pratt Institute.

(By Associated Press.)

New York, Nov. 9.—Andrew Carnegie intends to model the new Pittsburg Institute for manual training close upon the lines of Pratt Institute, Brooklyn, and he has just visited that institution, spending two hours in a study of the methods of its teaching. Afterward he told E. P. Pratt, the head

of the school, that he was very much pleased with what he had seen and that his purpose was to investigate the Brooklyn school so that he might the more intelligently consider the reports of the committee of experts who are to outline the work to be done in Pittsburg.

Mr. Carnegie's next gift to Pittsburg will be the great Mechanical school, plans for which he has had in mind for some time, and which he has laid before an expert committee. His investigations of the subject of technical instruction has taken some time and it was in this line that he went to the Brooklyn school.

CODY WILL CELEBRATE.

Wyoming Town to Hold Jollification Over Advent of Railroad.

Billings, Nov. 9.—A celebration will be held in Cody, Wyo., next Tuesday, to commemorate the advent of the new branch of the Burlington railroad. J. H. Peake, editor of the Cody Enterprise, has sent word to Hon. John D. Losekamp of Billings, to interest the merchants of his city in an effort to get them to be present on the occasion and bring the Billings band. Arrangements are being made to get the Burlington to run a special train, in which event a good delegation will go from this city.

The event will be made one of great importance to the people of this section and of Wyoming. There is to be plenty of amusement: Fire works, grand ball, etc. A large party of distinguished visitors will be present from the East headed by Col. W. F. Cody, better known as "Buffalo Bill."

YELLEK'S

Extraordinary Offer

To the Sick and Afflicted

This celebrated surgeon and greatest living specialist for the cure of all long-standing and chronic diseases makes an offer unparalleled by any physician of medical institute in this country.

Free Until November 10th

All who call before and on Nov. 10, will be treated until cured. No charges except for the necessary medicines. The intent of this offer is to convince the skeptical public that Dr. Yellek is not a traveling doctor, faker or anything else that jealousy would have you believe, but that he has done and can do all he claims. Dr. Yellek's ambition is to have the largest and most successful practice of any physician in this section of the country.

His patients say they have not words to express the gratitude, and never before had medicines to produce such marvelous change in so short a time. This fact alone gives him ample encouragement. His examinations are not mere fancies of the imagination, but only the reward which is sure to follow true merit.

Chronic Diseases

Yellek treats no acute diseases, but makes an entire specialty of chronic diseases. Cases given up by other doctors and pronounced incurable he most desires to cure. Yellek has treated over 12,000 cases in America in the last two years, many of which had been given up as incurable. Some were blind, others deaf and a large number were invalids for life. Now they see and hear and are all on the high road to health.

Yellek is surrounded by a fine collection of instruments for examination and treating all chronic diseases of the head, face, ear, nose, throat, heart, lungs, stomach, liver, kidney, bladder skin, brain and nervous system cancers, tumors, piles, old sores, fits, paralysis, neuralgia, rheumatism, dropsy, gout, sick headache, debility, depression of spirits, diseases of children, hereditary and congenital diseases, and, in fact, all long-standing and chronic diseases. All surgical operations performed.

Special attention is given to diseases of the eye, ear, nose and throat. Yellek will introduce his painless and wonderful methods of straightening cross eyes, removing cataracts and all other surgical diseases of the eyes; errors of refraction corrected, etc.
