

BEE HIVE

A Cheerful Call to Christmas Buyers

Beautiful gifts never so good, never so cheap. Now ready. Buy your presents early and avoid the rush. Our bright line of toys, dolls, books, pictures, china, fancy goods is ready for inspection. Right to the front as usual of all competition. Popular presents at popular prices. Holiday sale.

Everybody Welcome

SANTA CLAUS HEADQUARTERS

AMUSING NEW CUDGEL GAME.

Here is a new game which is causing a great deal of amusement at social gatherings in Europe. Two boys, or young men, are blind-folded and in the right hand of each is placed a stout roll of paper in the form of a club or cudgel. The players then have to lie down on the carpet and to grasp each other by the left hand. Thereupon the fun begins. One of the players asks the other: "Are you there?" When the answer "Yes" comes he raises his right hand and strives to hit with his cudgel the spot where, from the sound

of the voice, he supposes the other player's head to be. The other player, however, is at perfect liberty to move his head after he has answered "Yes," and the result is that in nine cases out of 10 the blow misses his head and falls on his shoulders or some other part of his body. In that case it is his turn to retaliate, and so the game goes on indefinitely, the sole object of the player who asks the question being to strike the other player's head and that of the player who answers to save his head from being struck.—New York Herald.

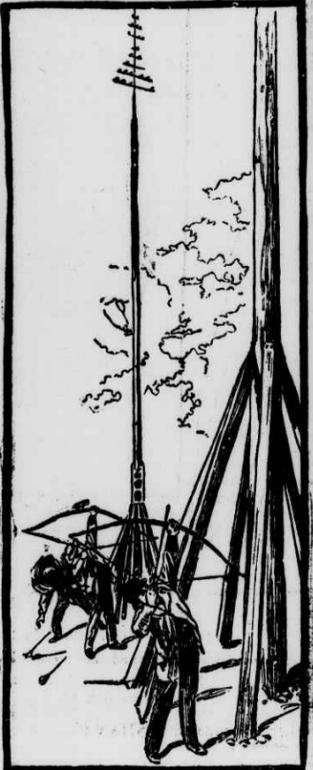

Journalism in France.
Every Frenchman is said to be, or to have been, a journalist, and a recent census of the French press would seem to bear this out. Paris can boast just now of nearly 3000 journals, of which 42 were started in 1900. The dailies number 140, the weeklies 781, and the monthlies 933. In the provinces there are 3249, or 182 fewer than at the census of the preceding year. The patriarch of all is the Gazette de France, which was founded in 1631. As regards the number of Paris dailies, it should be mentioned that some of the 140 exist only in title, for in several instances the same matter is utilized under different names.—Athenaeum.

A New Food.
Horse chestnuts contain about 27 per

cent of albumen, this remarkable proportion being greater than is found in any cultivated plants, but their bitter taste, due to the presence of about 10 per cent of bitter resin, has condemned them as unfit for food. By extracting the bitter principle R. Fluge of Hanover claims to have made useful another waste material. After partial roasting to loosen the shells, the kernels are removed and pulverized and the powder is placed in a tight percolator with alcohol for about a week. To extract the bitter completely it may be necessary to replace the fluid with fresh solvent. The alcohol dissolves the resin, leaving a pleasant and nutritious meal, which contains all the albumen and starch of the chestnuts, and is a valuable food. The spirit is purified by distillation and used repeatedly.

AERIAL ARCHERY GAME.

Shooting at artificial birds with bows and arrows is a new sport. The target in such cases is at the top of a pole, which is about 90 feet in height, and it is composed of a series of small wooden birds, into which feathers have been deftly stuck and which are securely fitted into a rack or frame. One of the birds is a little higher than the others and is known as the cock. The aim of the archers is to dislodge all the birds, and when this is done the rack is let down to the ground and a new target is placed in it. In order to become skilled at this sport long practice and exceptional keenness of sight are necessary. Moreover, as the birds are fastened very firmly in the rack, unusually strong bows must be used to dislodge them, and such bows can only be handled by men of considerable strength. The arrows used for this purpose, instead of terminating in a point in the ordinary manner, have at the end a piece of horn shaped like a bullet. While the game is going on a man collects the arrows that have fallen, and in order to protect himself from being in-

jured by those in the air, he wears an immense hat, made of wickerwork, the brim of which is an admirable safeguard for his head, shoulders and back. It is estimated that in France alone there are 30,000 men who practice archery and who belong to societies devoted to this sport. These societies hold a tournament every year, at which handsome prizes are offered in competition. Archers from all parts of the country attend on such occasions, and while some display their skill in shooting at the ordinary target, others elicit admiration by the skill with which they knock from their pedestals artificial birds that are 90 feet up in the air. Indeed, no archer at any of these tournaments wins more admiration than the man who dislodges the topmost bird, the cock, from his lofty perch.—New York Herald.

Grain From Semi-Arid Region.

Emmer is the name of a species of wheat which the department of agriculture is recommending for introduction in this country, particularly for cultivation in the semi-arid regions of the West. The seeds are being obtained from Russia, where several provinces raise large quantities of this grain. In Abyssinia several varieties are grown at an altitude of 5000 to 9000 feet. Almost all varieties of emmer are drought-resistant and equally winter hardy. The uses of emmer are yet in an experimental stage in this country, but the indications so far are that it will become a regular and valuable crop for stock feeding. Emmer is being used extensively at the agricultural experiment stations for improving ordinary wheat. General vigor and hardiness are exhibited in resistance to fungus attacks, drought resistance, increased fertility of the head, non-shattering, stiffness of straw and increase of gluten of the grain.

Clearing the Wine.

Certain improvements have been introduced in champagne manufacture, says the Scientific American. As is well known, the wine is bottled, and placed in racks in an inclined position. The bottles are turned regularly, the idea being to cause all the impurities in the wine to reach the cork. The old cork is finally removed at a certain stage of the process in order that the final liquoring and corking may be done. Formerly it was the universal practice in the momentary removal of the cork to allow the deposit to be sprayed out by the pressure of the gas with just enough of the contents of the bottle to remove the substance, which would be cloudy, and damage the wine. Of late years an ingenious freezing machine has been introduced to freeze solid a thin wedge next the cork of just the needed thickness to remove all that need not remain. This reduces the waste of wine considerably.

Saving About Bread Crumbs.

In the days when the "bread-loaf" was dear, careful mothers had a set of thrifty sayings which are seldom heard in this time of the big, cheap loaf. Crumbs were regularly swept up and kept for some useful purpose. If a child threw crumbs into the fire, the old-fashioned mother lifted a warning finger and said: "If you throw crumbs in the fire, you are feeding the devil." Children were told that the better part of a loaf was the crust, and when a child was sent to the shop for bread, the order was to ask for "a crusty loaf." If a child left its crust, came the warning: "Yes, my lady for my lady, you'll want for a loaf some day. You'll find hunger's a sharp thorn."—Notes and Queries.

Waitin' for Christmas.

I'm waitin' fer th' holidays; somehow it seems ter me
They's lots more joy in Christmas now
'an' whut they used ter be;
Th' sunshin' seems lots brighter, th' skies a deeper blue
Than any o' th' Christmuses 'at us old fellers knew
When we wuz harum-scarum kids, an' laid awake all night,
An' went 'tiptoein' down th' hall afore it skerced was light,
An' ketchin' poor dad a ramblin' round an lookin' almost froze,
An' paddlin' bar-foot cross th' floor an' wigglin' of th' toes.
Now standin' stork-like, with one foot raised off th' cold, cold floor,
An' lookin' fer th' whiskers 'at he wore th' year before,
So's he could play at Santa Claus an' fool us fellers, My!
How us kids sneaked back a-snickerin' till we was like ter die,
An' crawled back inter bed ag'in, a-waitin' fer the yell,
Th' "Whoa! now! you o' reindeers!" an' jinglin' o' th' bells
'At told us all was ready; an' nuts, an' cake, an' things
Riz up afore our vision, till we went down stairs on wings!
An' dad he looked so happy, an' mother smilin' so—
My! but they was a happy pair! Them days we didn't know
Whut Christmas day could mean ter them, but now I guess we do,
Since we've got youngsters o' our own, o' feller, me an' you;
An' so th' world's lots brighter now; they's somethin' in th' shine
O' eyes a-lookin' in your face, an' eyes 'at look in mine.
An' in our hearts th' kin' o' love 'at makes a feller glad!
Till we're as happy now, I guess, as mother was, an' dad.
—Houston Post.

HEROIC.
Miss Dramatic—I would so like to marry a real hero!
Mr. Cynic—You seem to understand the qualities necessary to the person who would become your husband.

DR. CHUNG'S celebrated Herb Sanitarium. Guarantees to cure all diseases by means of his famous Chinese medicines, never before introduced into this country. He has cured thousands, and can cure you. Advice free. 9 W. Galena St., Butte, Mont.
