Cholly—You look comfortable, Tom.
Tom—Yes, just had fine breakfast at the restaurant. Pipes burst at my house, and all hands had to come down town for breakfast.
Cholly—Pipes burst in my house too; but we all had a nice, quick breakfast, cooked on the gas range.

Atchison, Topeka and Santa Fe Railway
Through line from Denver to Kansas City, St. Joseph, Atchison, Chicago, Galveston, City of Mexico and mining camps of New Mexico and Arizona.

WILL BUILD CARS
NEW INDUSTRY WHICH WILL PROVE BENEFICIAL.
LARGE FACTORY FOR TACOMA

Will Supply the Markets of the Orient
To Be Constructed of Washington Fir—Not Enough Cars.

"We are going to have a new industry in Tacoma," said J. B. Sawyer of that city at the Finlen last evening.
"Plans are now under way for the erection of a freight car factory, with a capacity of from eight to ten cars per day, and employing from 250 to 300 skilled workmen.

"Twenty-five thousand dollars of the stock was subscribed and a committee was appointed to solicit further subscriptions and perfect the organization of the company.

"These men have all investigated the merits of the proposition and are confident that it will prove a success. A large portion of the stock will be taken by Tacoma business men, but Eastern capitalists have already evinced an interest in the project and a considerable portion will probably be placed in the financial centers.

Cheap Raw Material.
"Of the great advantages which the new factory will have over Eastern factories will be the cheapness of the raw material. All the lumber used in the construction of cars will be Washington fir, which has proven to be best adapted for that purpose.

"Instead of shipping this lumber East, building the car there and hauling it back empty, the car built here may be loaded and sent East, thereby paying its own transportation to destination.

"An extensive market for railway cars is offered in the Orient. Japan is placing orders with Eastern car works, the cars being shipped in knocked-down form. With these manufactured in Tacoma the cost of the rail haul will be saved and Eastern firms will be unable to compete for the Oriental trade.

Not Enough Cars.
"Of several years all the leading roads in the United States have suffered from a shortage of cars. All the Eastern works now have orders on hand which they cannot fill as rapidly as the railroads would like.

"The cars built for use in the West are brought out empty, the great volume of freight being from the west to the east. When the cars are built here they will be loaded with lumber, and thus a double purpose will be served. It is said by railroad men that a new car is worth \$40 more in Tacoma than in Detroit."

GRANITE COUNTY REPORT.
Resources and Liabilities Given in Annual Statement.

The annual statement of the county clerk of Granite county has been received by County Clerk and Recorder Weston. It contains statistics of Granite county for the year of 1901.

ORATORS OF YOUTH
HIGH SCHOOL GRADUATES TELL OF THEIR IDEALS.

WHAT INSPIRED GENE FIELD
Influence of New England on the Religion of the World—The Legends of the Rhine—England's Grand Old Man.

"What gives Field's poems of child-life their unequalled hold on the popular heart is their simplicity, warmth and genuineness," said Miss Mead Davidson, one of the sweet girl graduates of the high school class at yesterday afternoon's exercises at the Auditorium.

"Eugene Field's fame as an author rests on his printed books, and will endure as surely as the basis of his art was true, his method severely simple and his spirit gentle and pure. He was forever scanning what lies hidden within the folds of the heart of childhood. He knew children through and through, because he studied them from themselves and not from books.

Church and School.
The "Influence of New England," was the topic of Miss Marion Nichols. She said in part:
"Of the first thing that the Pilgrim thought of after making a place of shelter for his family was the building of a church. This shows his religious spirit, which not only had great influence upon the religion of the United States, but upon the religion of the whole world.

"His next thought was the building of a schoolhouse. The desire for education has always been one of the distinguishing traits of the New Englander. This one trait has perhaps done more to influence the United States than any other. This education of which New England is so proud has produced many learned men, many men who have had much to do with the shaping of our nation."

LARGE ATTENDANCE
NUMBER OF SCHOLARS ATTENDING SCHOOLS INCREASING.

WILL REBUILD HOBART SCHOOL
Hobart Pupils Will Be Sent to Lincoln School Temporarily—Principals Must Not Reprimand Teachers Before Pupils.

At the school trustees meeting last evening School Superintendent Young presented his monthly report for January. The number of scholars enrolled in the schools of the Butte district is 6839. The enrollment shows an increase over the preceding month of 167 pupils. The percentage of attendance is 96, very satisfactory, and the percentage of punctuality is 99, almost perfect. The number of boys enrolled the past month was 3389, and the number of girls enrolled was 3461.

Superintendent Young stated to the board that 50 or 60 cases of truancy had been investigated during the month by the truant officer, and that the attendance at the school had been increased by the investigations.
The board has decided upon a plan to accommodate the pupils of the Hobart school, which was burned down recently. They will receive tuition at the Lincoln school till a temporary building for them can be erected on the site of the burned building. Superintendent Young suggested that the pupils at the Lincoln school be taught there in the forenoon and the Hobart school pupils taught there in the afternoon. The suggestion was adopted.

To Rebuild Hobart School.
The Lincoln school scholars will attend the school between 9 a. m. and 12:15 p. m. The Hobart school pupils will attend between 1 and 4:15 p. m.
It has been the intention of the trustees to build a new school on the site occupied by the old Hobart building, and this work will be begun about the first of April it is thought. In the meantime a temporary building to cost about \$1600 will be erected as soon as the weather permits building to be commenced. The insurance on the burned structure and its contents was \$3000, about three-fourths of their value.
The commercial course at the high school will be opened next Monday. The eclectic system of short hand will be a study taught in the course.
The supply committee was empowered last evening to purchase the text books necessary to run the course.

On Carpet in Future.
The superintendent of schools was instructed to notify the principals of the various schools of the district that the reprimanding of subordinate teachers in the presence of pupils will not be tolerated by the board.

Complaints against several principals had been received. Trustee White told the board, and he was in favor of dismissing a principal who should reprimand a teacher in the presence of pupils. The teachers' pay roll, amounting to \$14,228.95, was ordered paid. Bills to the amount of \$3,073.40 were also ordered paid.

Permission was granted the graduating class of the eighth grade to use its room and the hall of the high school building to hold a reception next Friday evening.

FAIR AND WARMER
THAT IS THE WEATHER FORECAST FOR MONTANA TODAY.

END OF FRIGID SEASON IN SIGHT
Fair Weather Flag Flies Above Whar-ton Bureau—Cold During the Morning Hours—Below Zero in Many Places.

The white flag of peace and fair weather flies above the Whar-ton weather bureau. It went up early this morning and gave out the best climatic news that Butte has received for some time. Above it floated the black triangular flag, indicative of a rising temperature. The signals mean that it will be fair and warmer. Possibly it might go up to zero.
"The cold wave has lasted long enough," said Mr. Whar-ton this morning. "I intend to break it up. Even the coal men are kicking. They say they cannot get enough fuel to supply the demand. As long as this cold snap was arranged for their benefit, and they do not appreciate it, I propose to declare it all off and have ordered a new brand of weather for Butte of the banana belt kind."
Then he ran up the fair weather flag.
It was bitter cold again early this morning. At 8 o'clock the government thermometer registered 18 below. At Columbia Gardens it was 25, on the flat 30 and at the Butte Reduction works 32. Following the early government forecast came moderation.

E. J. Glass' Forecast.
The weather forecast for the 24 hours ending at 6 o'clock tonight is: Generally fair; continued cold.
E. J. Glass of the government weather bureau says:
"The temperature has fallen slightly over the Rocky Mountain division, except a rise of 4 degrees at Helena, 8 degrees at Kalspell, 10 degrees at Calgary and 12 degrees at Spokane. The isothermal line of zero extends from Calgary along the Rocky mountains south of Denver, thence eastward to Omaha. The coldest weather is central over the north portion of Minnesota, North Dakota and the east portion of the Northwest territory.
The barometer is above the normal at all stations, it having fallen slightly over the Rocky Mountain and Pacific Coast region, and risen over the Lower Missouri and Upper Mississippi Valley regions. It is highest over Minnesota, and also in the vicinity of Spokane. An area of low is indicated off the coast of the south portion of California. There are no indications of warmer weather during the next 36 hours."

JUDGE BOYLE COURT
PRETTY MAY MURPHY GIVEN HER LIBERTY.

TOOK SHAWL TO KEEP WARM
Tenderloin Pickpockets Fined—Stealing Coal Is No Worse Than Selling Short Weight Tons of Fuel Says His Honor.

Cold weather and circumstances are what pretty May Murphy attributed her arrest to this morning when she stood before Judge Boyle to answer to the charge of larceny.
May ascribes between Butte and Anaconda, having a home in each, but she is always ready and willing to leave either of her happy homes for the other. Unfortunately for her, she appropriated a shawl from her Anaconda home without notifying the landlady and was arrested for larceny.
Judge Boyle dismissed the case against her in consideration of the temptation which the cold weather brings and—the fact that she returned the shawl.
It cost "Soda" of Galena street, twenty dollars to steal ten, so she came out loser.

While William Clancy was taking a siesta in her residence she relieved him of the bill. She was extremely indignant that the court should cast such a marked aspersion on her reputation for honesty and fine her \$20.

If there is one pardonable crime on the calendar just now it is stealing coal. Yesterday Judge Boyle dismissed the charge of larceny against Mike Shea, Mike Murphy, Ed. Trevathen and Joe Morley charged with stealing coal from the Butte Sewer Pipe and The company.

Touched Coal Dealers.
In rendering his decision the judge stated that he could not be severe on men accused of stealing coal to provide warmth for their destitute families, and that he did not think any more serious offense than the practice of coal dealers who give short weight to their customers.

"This allusion, however," said the judge, "has no reference to the coal company concerned in this complaint."
"Uneasy lies the head that rests near a saloon."

Because the slumbers of Lewis Goldstein, a tailor, who lives at 306 North Main street, were disturbed by the festivities in Pat Mullins' saloon, next door the tailor appeared in court for redress.
Goldstein, however, will have to find a more sequestered place to sleep, as Judge Boyle dismissed the case.
The four men—Finkham, McCall, Regan and Douley, arrested for assaulting officers Auerbach and Choiniere yesterday were arraigned before Judge Boyle this morning. They pleaded not guilty and will have their hearing February 4, at 3 p. m.
The case against C. A. Eivers, who is charged with assaulting a boy named Rosenbaum, in a dispute about some socks, was set for trial Friday afternoon.

FIRTH PROMOTED
From Traveling Passenger Agent to General Passenger Agent.
W. H. Firth of Denver, who has been filling the position of traveling passenger agent for the Chicago, Rock Island & Texas road, has been appointed general passenger and ticket agent for the same road. He will probably make Fort Worth his headquarters.
Mr. Firth is well-known in Butte, he having made numerous trips to the Montana metropolis in the interest of his line. He is very popular among the railroad boys of this city, many of them looking upon him as a guiding star and an expounder of precepts which, if followed, might carry them into the White House at the national capital or make them welcome guests of St. Peter at the close of their earthly run.
Decided.
(Brooklyn Life.)
Mrs. Innocent—What did you enjoy most about your fishing trip, dear?
Mr. Innocent—I got most excited when I was reeling in my love.
Mrs. Innocent (bursting into tears)—And to—to-think you promised me y-you wouldn't d-drink a drop.
Uniformly Heated.
(Judge.)
"How do you like the place?" asked his satanical majesty of the new arrival.
"Well, there is one thing in its favor," rejoined the n. a., who had formerly lived in a flat: "you have a janitor that knows his business."
