### Receive More Pay—Several ex-Soldiers in Anaconda Will Receive Additional Compensation for Past Services.

(Special to Inter Mountain.)

Anaconda, Feb. 3.—The ex-members of the Eighth Army Corps of the war in the Philippines, residing in Anaconda are much pleased at their prospects of receiving another bunch of back pay from the government.

The Army and Navy Journal gives the matter under the head of bills before congress, as follows:

"H. R. 3859, Mr. Bell authorizes the secretary of the treasury to pay each commissioned officer, non-commissioned officer and private soldier who served in the Philippine Islands and who were honorably discharged from the service of the United States without having received the amount of travel pay allowed by law to such persons when discharged from service while in Manila, in the island of Luzon, the same amount of money as shall equal the amount of travel pay now allowed by law to such persons as are discharged for the service of the United States at Manila in Luzon for travel pay from Manila to San Francisco in California."

Nearly all the members of the First Montana regiment will be included in this, and the boys are already speculating as to how they will spend their money when it is received.

## SIXTY TONS DAILY

### AMOUNT OF HAY FED ON WALKER & BIELENBERG RANCHES.

## FIFTEEN TEAMS ARE ENGAGED

### Fifteen Hundred Head of Beef Cattle Are Being Prepared for the Market in the Big Hole Basin.

(Special to Inter Mountain.)

Anaconda, Feb. 3.—Sixty tons of hay is consumed daily at the Walker & Bielenberg ranches in the Big Hole basin.

That amount seems a whole lot; but it is not so much after all, when the number of cattle being fed there is taken into consideration.

Mr. D. D. Walker, the senior member of the firm, came in from a trip to the Big Hole a few days ago and gave out some interesting information concerning what is going on in the winter time in one of the greatest stock growing regions of the United States.

"At this time of the year," said Mr. Walker, "it keeps 15 teams steadily engaged every day hauling hay to feed our stock and at the present time 60 tons is eaten up every 24 hours. It doesn't take very long to get rid of one of the Big Hole haystacks at that rate."

## Shipping Cattle.

"We are fattening about 1500 head of beef cattle and getting them in shape for market early in the spring," continued Mr. Walker.

"They are doing very nicely and when the proper time comes we will drive out as fine a bunch of fat cattle as was ever seen in Montana."

Only a few years ago, the only market for Montana cattle of any consequence was in the East.

Chicago took the bulk of the stock from the ranges, but the development of the Pacific coast cities, and the opening of the Alaskan and Klondike markets has created a new field.

Last year nearly all the cattle raised in the Western part of the state were sent to the chopping blocks of the Pacific.

Several train loads of Walker & Bielenberg's choicest animals were served to the people of Tacoma and Seattle and several hundred were shipped direct to Alaska and the Klondike for slaughter.

## Exhausted the Supply.

In fact the demand that came from the Puget Sound cities and those of the far North cleaned up the supply of beef cattle from the Big Hole ranches.

No doubt this will be repeated this year, and it is expected that the buyers who visited this section last year, will again be in the field before the end of March to make a bid for the immense herds now being fed.

Altogether over 4500 cattle are being wintered on the Walker & Bielenberg ranches, to say nothing of the other ranches located in that favored section.

Several hundred head of horses are ready for market in the Big Hole country and in the past week, buyers have been gathering up a shipment of work horses for use on Iowa farms.

Mr. Walker states that the weather was extremely cold while he was on a visit to the ranches, but so far there has been very little snow, consequently, with an abundance of feed, stock has been doing well.

## "BARBARA" AT THE MARGARET.

### Great War Drama Will Open Next Wednesday Evening.

(Special to Inter Mountain.)

Anaconda, Feb. 3.—Some idea of the terrible realities of the war of the rebellion is brought vividly to mind in a speech by Barbara Fritchle in the second act of Clyde Fitch's great war drama that is to be presented in this city next Wednesday evening at the Margaret theater by Mr. James Neill and the famous Neill company. Barbara talks to her Northern lover, Captain Turnbull in the following language: "Perhaps the South is wrong. But still I'm between the two—you whom I love best on one side—everything else I love stands on the other—and this war, this cruel war blackens our skies with its powder clouds—stains our grass with our own hearts' blood, destroys our home and ruins the land we cherish. What can we women do?"

"My brother escaped today and will be with our—with his troops—when they march into Hagerstown this mornin'."

"His gun points towards your heart, yours towards his."

## LOOT FROM CHINA.

### Americans to Auction Off the Dowager Empress' Seals in London.

(By Associated Press.)

London, Feb. 3.—John Dillon, Irish nationalist, in the house of commons yesterday attempted to get the home secretary, Ritchie, to intervene in the sale at auction, announced for today, of the seals said to have belonged to the dowager empress of China which, it is claimed, were looted at Peking.

The seals are now the property of an American, E. M. O'Brien, who bought them from a Russian officer.

Mr. Ritchie pointed out that as the seals were not the property of a British subject the government had no "locus standi." Mr. O'Brien did not know the seals were stolen, and although it was set forth in the catalogue the auctioneer declined to guarantee the genuineness of the seals.

## SON'S BRUTAL TREATMENT.

### He Keeps His Aged Father in an Insane Asylum.

(By Associated Press.)

Niles, Mich, Feb. 3.—Aged and bearing marks of violence, as the result of brutal treatment received during six years of confinement in an insane asylum at the instigation of his son, Michael Kennedy, sat in court and heard read a verdict awarding him \$1500 damages from his alleged persecutors.

He had sued the son, Richard Kennedy, for \$10,000. On the witness stand, the father had told a distressing story of hardship and deprivation said to have been suffered while he, a sane man, was kept a prisoner in the asylum.

He was owner of a large amount of property, and he charged that the object of the son was to secure possession of this property.

## BIG LOCOMOTIVES

### IMMENSE NEW "DECAPOD" BUILT FOR THE SANTA FE.

### HALF AS HIGH AS NIAGARA

### Can Pull the Harvest of 10,000 Acres of Wheat—Firebox as Big as a Room in a Flat.

(By Associated Press.)

Schenectady, N. Y., Feb. 3.—The largest and most powerful locomotive in the world, which was built at Schenectady by the American Locomotive company, is on its way from the Mohawk valley to the West, where it will haul heavy freight on the Santa Fe road.

From the end of the tender to the point of the pilot it measures 70 feet. Two engines of 989's type, if they could be suspended in the air one above the other, would reach a height nearly as high as Niagara. The top of the stunted smokestack is 15 feet above the ties.

On a level track 989 could haul a train a mile and a half long, carrying the harvest of 10,000 acres of wheat. Ten massive driving wheels, nearly as tall as a man and so heavily counterbalanced that they appear almost solid, grip 20 feet of track. On these 10 drivers, which gave the name of decapod to this type of engine, a weight of 232,000 pounds is carried.

## Big as a House.

Its firebox, made of carbon steel tested to a tensile strength of 60,000 pounds to the square inch, is about as big as the bed chamber of a New York flat.

Its two thick shells are held together by nearly 3000 tough staybolts, each one capable of lifting a yard engine without breaking.

The grate area is 60 square feet, which is unapproached in any other locomotive ever built.

The heating surface of the Santa Fe's great freighter measures nearly double that of the English record-breaker, or exactly 4682 square feet. Between the tube sheets 989's boiler measures 18 1/2 feet, and in the big barrel are massed flues 2 1/4 inches in diameter. Placing end to end, these flues would make a pipe a mile and a half long.

In 989 the massive low-pressure cylinders are next to the forward drivers. The smaller high-pressure cylinders are directly ahead, a construction which makes one piston rod do for each pair of cylinders.

The cylinders of 989 are the greatest castings ever made in the Schenectady shops. Their gross weight in the molds was 25,340 pounds.

The De Witt Clinton, tender and all, did not weigh as much as one of these castings.
