SEND DELEGATES TO EUROPE

Cuba Now Trying to Secure Trade Concessions in European Countries.

[BY ASSOCIATED PRESS.]

New York, June 25.—President Palma and cabinet have decided to ask Minister Quesada to obtain from Washington data explanatory of General Wood's settlement of the church claims. The Cubans invoke the Foraker law and question the right of any permanent arrangement.

Insular agricultural societies are uniting to send commissioners to Europe to urge the boards of trades in England, Germany, France and Spanish cities to establish closer relations with Cuba.

The Planters' association has petitioned congress to free all estates from taxation for five years and all private mortgage loan and banking institutions for 50 years.

A proposition has been presented to congress to grant admittance free of duty for the next 20 years of all materials manufactured in the homes of the poorer classes.

SEVERAL DAYS OF SUSPENSE

(Continued from Page One.)

INSURANCE COMPANIES TO SUFFER SERIOUSLY

If the King Should Die They Will Lose More Than by the Death of Any Other Man.

[BY ASSOCIATED PRESS.]

New York, June 25.—In the event of the death of King Edward VII the insurance companies of England will suffer the most staggering blow known in the history of that branch of financial investment. It will cause a loss of tens of millions of dollars to the regular organized life insurance companies of various other kinds which have taken heavy risks on the king's life at high rates of interest.

American life insurance companies, however, will suffer no loss, because in this country to obtain life insurance policies the applicant must establish an insurable interest in the person insured.

King Edward carried the enormous sum of \$1,600,000, placed with English companies. This on personal policies upon which he pays premiums out of his private purse.

The total risks on his life on policies by business men is placed at \$21,000,000. The czar of Russia is said to carry personal insurance of \$4,000,000 as well as \$1,500,000 on the life of the czarina and \$2,500,000 on that of Grana Duchess Olga.

The emperor of Germany carries \$5,000,000 personal policies.

AMERICAN SPECIALISTS TALK

They Say It Will Be Three or Four Days Before the Crisis Passes.

[BY ASSOCIATED PRESS.]

New Haven, Conn., June 25.—Doctor Roswell Park, director of the State Pathological Institute, professor of surgery in the medical department of the University of Buffalo and a number of physicians who attended President McKinley in Buffalo, in discussing the nature of King Edward's illness, made the following statement:

"The only question in regard to the outcome is whether the disease was taken in time. From the fact that the king was out driving a few days ago, after the first trace of the disease had been discovered, it would appear that the disease had not got much headway, and that the operation was performed in time to prevent serious results.

"On account of the age of the king it will be three or four days before the crisis is passed successfully and it will take three or four weeks convalescence. Until the favorable condition, it will not be possible for the king to take part in the tedious ceremonies of the coronation for six weeks or two months.

EXPLANATION OF THE CAUSE BY SPECIALISTS

Book Written on the Disease by the Man Who Performed the Operation— Variety of Peritonitis.

[BY ASSOCIATED PRESS.]

London, June 25.—According to Sir Frederick Treves, who performed the operation on King Edward, and himself one of the greatest living surgeons and specialists on abdominal troubles, the chances of death in cases of perityphilitis, where abscesses form, as in the case of King Edward, are about one to three.

Sir Frederick Treves also declares that the period when death is most likely to occur, if at all, is from the fifth to the eighth day.

Judging from the opinions of this distinguished physician, it may be assured that either the king's condition has developed suddenly or he has been very sick for several days, and the physicians have been attempting to "patch up" their patient for this week's ceremonies.

Explains Disease.

What physicians regard as one of the

exhaustive essays written on the subject of perityphilitis, is that of Sir Frederick Treves, published in a medical work known as "The System of Medicine." Every phase of the malady is treated in that essay and many of the typical cases cited bear remarkable similarity to that of King Edward. Following are some of the extracts from that essay of interest to laymen.

EDWARD'S COMPARATIVE CHANCES OF RECOVERY

No Similarity Between the Cases of President McKinley and the English Monarch.

New York, June 25.—Doctor Matthew D. Mann, the surgeon who performed the operation on President McKinley, says a World special from Buffalo, made the following statement:

"The operation on King Edward is one that is performed very frequently and is more frequent in this country than in England.

"The results are satisfactory in a very large percentage of cases.

"It is impossible, of course, to give an opinion on the outcome of the king's illness without that data. The case of King Edward bears no resemblance whatever to President McKinley's.

"The one is an inflammation, the other is a gunshot wound. All things being even, I should say the king's chances of recovery are a great deal better than was the president's.

"Taken altogether, I suppose that more than ninety five per cent of the appendicitis cases get well, provided they are taken in time, while in cases of bullet wounds of the stomach, probably not more than sixty per cent get well.

"Treves, who performed the operation on King Edward, is a well-known man, especially in abdominal surgery, and has written on it in books of high standard.

"I have been tempted to cable to Treves one of the many telegrams I received when President McKinley was ill. It read: 'Every one is praying for McKinley; some are praying for the doctors.'

Consternation in Germany.

[BY ASSOCIATED PRESS.] New York, June 25.—Consternation is the only word that can be used to describe the feeling provoked here, says a Berlin dispatch by special editions of the papers containing news of the postponement of the coronation. It is generally admitted that King Edward is a strong connecting link between this country and England.

FIXING UP THE BOUNDARY

Dispute Between Chile and Argentine Republic Is Now About Settled.

New York, June 25.—Colonel Sir Thomas Holdich has returned from a trip through Patagonia, where, as arbitration commissioner, he has been studying the question of the disputed boundary between Argentina and Chile.

He declared that he is convinced that the matter will be settled without delay and that Argentina and Chile will be satisfied with the award, which will be announced probably before the end of the year.

Sir Thomas Holdich desires to soon return to England. Moreno and Virasorono, delegates, will also return to London, there to remain until the award is made public.

UNDERWRITERS ARE TAKING A CHANCE

INSURANCE COMPANIES LOSE ON ACCOUNT OF POSTPONEMENT OF THE CORONATION.

EXORBITANT CHARGES SINCE KING'S ILLNESS

Companies Seemed Willing to Take the Risk Even After It Was Well Known That the King Was Sick—Former Ventures of the Same Concerns Proved Good Speculations.

[BY ASSOCIATED PRESS.]

London, June 25.—Postponement of the coronation means an enormous loss to the underwriters.

An underwriter of prominence estimates that the claims which will have to be faced will amount of £850,000 to £900,000.

For many weeks policies have been applied for and promptly granted, insuring the risk of the coronation not taking place on the 26th and 27th instant.

During the past day or two, since rumors of the king's illness has been prevalent few policies of this kind were written, and then only at exorbitant rates, but prior to the disquieting reports, a heavy business had been transacted with those who had stands on which they intended to let seats, tradesmen, whose interests would suffer and innumerable individuals and corporations whose financial loss would be serious in the event of the postponement.

The rates charged in April were 12 to 15 guineas per cent (12-10 to 15-7-10 per cent). By a week ago it had gotten down to 5 guineas per cent (5-1-4 per cent).

During the recent smallpox excitement Lloyd's underwriters issued thousands of policies against catching the disease at a rate of 25, 6d. per cent (1-8 of 1 per cent) and had only a few claims to meet.

Former Success.

The underwriters also came out exceedingly well on their speculation as to the queen's jubilee procession in 1897, and all who had won on that occasion went in for the coronation premiums as greedily as if there had been no risk to be feared, and the premium was all profit. Others who kept aloof from such commitments in connection with the jubilee plunged in hungrily on the coronation gamble.

Many of the underwriters have policies on the life of the king for six months. The rate for this last week was 10 guineas per cent (10-1-2 per cent), but it rose on Tuesday to 50 guineas per cent (52-1-2 per cent).

FORMALLY ACCEPT THE ST. LOUIS INVITATION

Largest Collection of Fine Arts in South America, Including Many Subjects of Widespread Interest.

World's Fair Grounds, St. Louis, June 25.—Letters received from Jose de Olivares, World's Fair commissioner to the Argentine republic, Chile and Bolivia, bring the information that important action has been taken with reference to the exhibit of that country at the Louisiana Purchase exposition.

He writes: "The Argentine National Museum of Fine Arts has formally accepted the invitation we recently extended the institution to participate in the World's fair, and estimates are now being made as to the space that will be required in the fine arts building at St. Louis.

"Senor Eduardo Schiaffino, director of the National Museum of Fine Arts, called at the office in person on Monday last to notify me of the official acceptance of the invitation which is now being put into writing and will be sent to me."

"The director is very enthusiastic over the outcome of the negotiations and assures me that he will use every effort to surpass any art exhibit ever before made by this country. The National museum here is accredited with possessing the largest collection of fine art works in South America, not excepting the Chilean museums, and includes many subjects that have won high awards in Paris and elsewhere before being installed here. The fine arts department is a national institution and its action involves the government, in that the expense of sending the exhibit is to be borne by the department of public instruction."

"Senor Francisco Segui, member of the Argentine congress, has just reported the result of his interview with President Roca with the object of securing the financial support of the government on behalf of the national chamber of commerce, 'La Union Industrial Argentina,' at the World's fair. The interview was entirely favorable, the president expressing his approval of the measure and commending the 'Union Industrial' on its enterprise in co-operating with the World's fair. The plan is for a general national exhibit through the medium of the 'Industrials,' the latter having the principal elements already in hand, which will result in the saving of an immense amount of time and expense in the general work of preparation."

"In addition to the fine arts and industrial exhibits, I am hopeful of securing an interesting naval display consisting of models and plans of the modern Argentine war ships, which are of such a class as would reflect credit upon any country."

BARRETT IS IN YOKOHAMA

World's Fair Commissioner Busy Wining and Dining the Japanese.

[BY ASSOCIATED PRESS.]

Tokio, June 24, via Victoria, June 25.—Hon. John Barrett, commissioner general for the St. Louis World's fair, continues to excite active interest in that enterprise. He has spoken before the chief commercial bodies in Tokio and Yokohama. Wednesday the commissioner gave a banquet to over thirty of the highest government officials and leading business men of Japan together with Americans and Britons.

The principal idea expressed in all these speeches was that Japan should make a greater exhibit at St. Louis than she had at any other exposition and so benefit the friendly political and commercial relations existing between the two countries.

No Negotiations on Foot.

[BY ASSOCIATED PRESS.] Liverpool, June 25.—The foreign office is authority for the statement that the cablegrams received here to the effect that negotiations are on foot between Chile to resolve the question of the ownership of the provinces of Tacna and Arica by a treaty of alliance are untrue and that since January, 1901, when the Chilean congress rejected the Billinghurst-Latorre protocol, providing for the arbitration of the dispute, no negotiations with Chile have been opened.
