HELENA—Sixth and Main.
NEW YORK—368 Canal.

It's prices that talk nowadays. They talk louder here than elsewhere because of better buying facilities and cash sales.

It would surprise you to learn what immense profits are made on jewelry by regular dealers. We want profit of course, but a reasonable one, and if our price is half what you pay elsewhere it is not taken out of the quality but out of the profits.

Coin silver hunting case Watches, Elgin or Waltham movement, full jewelled. Sold elsewhere from \$15 to \$20.

Our Price \$9.50.

All other grades of watches at like prices.

MISSOULA COUNTY MINES

They Continue to Be Worked Successfully Despite the Price of Silver.

The Kennebec Showing Up Well in Lead, Silver, Copper and Gold.

A Strike in the Charcoal in Camas Prairie—Work at Martins—The Development Elsewhere.

Special to The Independent.
MISSOULA, Jan. 18.—In spite of the low price of the white metal a number of silver mines in the vicinity of Missoula continue to be worked successfully and at a profit. The recently declared dividend of two cents a share, aggregating \$10,000, made by the Iron Mountain Mining company is a most cheering and satisfactory evidence of the permanence and richness of the mine.

It is something to be regretted that the mineral resources of the county have not been as well appreciated by local capitalists as by those from the outside. This fact has resulted in the best mining properties of the district being developed and owned by parties residing beyond the limits of the county and the bulk of the profits being transferred to other sections.

The Iron Mountain mine is one of the best developed and most economically worked mines in the state. The management early in its history recognized the value of mechanical appliances and before the disastrous drop in the lead and silver market had supplied the property with such machinery as has enabled them to continue operating the property under adverse circumstances.

The present depth of the mine is 1,000 feet below the croppings. The size of the ore chute has increased with depth and one of the features is that much less zinc is found in the lower workings than in those immediately above. There is now blocked out in the mine sufficient ore to supply the concentrator for the next six or eight months.

Near the Iron Mountain concentrator is located the Kennebec, a very promising property on which some development work is now being done. Although the Kennebec is in a formation very similar to that of Iron Mountain and not more than a mile and a half distant, there is considerable difference in the nature of the ore. The Iron Mountain ore contains principally lead and silver, while those of the Kennebec carry lead, silver and copper and are also high grade in free gold. Pieces of this ore are found in the mine which show to the naked eye large colors of gold and the ore all shows by panning a good prospect of free gold. The value of the lead in the ore is about equal to the silver and the grade is high in each. It promises to be a productive and profitable mine.

A strike of considerable importance was recently made on the Charcoal mine in Camas Prairie. This mine has been a steady producer for the past eighteen months. The recent strike was made a considerable distance from where any ore had been previously extracted. It is farther up the hill and if found to be continuous will give a much larger yield than the ore above the present drainage tunnel. The streak is also larger than any heretofore found in the mine and is said to average from 500 to 1,500 ounces in silver. The ore was struck in a cross-cut from the bottom of a shaft forty feet deep.

At Martins the Nine Mile company are steadily operating their twenty stamp mill and employing about sixty men in the heavy country. It is said to be a half million dollars of ore in sight in the mine. The San Martins company owning adjoining property have four men at work. Their recent developments are understood to be of a very satisfactory nature and will result in the erection of a ten stamp mill early in the spring. It is also reported that a quartz mill will be erected on Sheep creek. The discovery of gold quartz made on the stream about eight months since was of the most encouraging nature. The ore was very rich in free gold. Prominent Butte capitalists have quietly obtained control of a large number of claims which while there has been very little talk about the enterprise are thoroughly practical mining men of large experience and abundant means.

Charles Wing, the well known Conard's mine man, is developing a promising gold prospect near Saltese, in the St. Helens country. It is understood that he is backed by Spokane capitalists. Eight men are employed.

A number of gentlemen from Milwaukee, who are heavily interested in the Deep Gulch and Fisher Mining company, arrived in Missoula during the past week. The affairs of that company were immediately placed on a solid footing. It is asserted that \$10,000 has been raised to be expended in the development of the property, which is located on the tributaries of Trout creek, in the western part of the county.

The Bitter Root Prince mine, in the Bitter Root valley, has laid idle for a number of years, owing to the fact that it was a portion of two estates. Work has been recently commenced on this property and ore is being extracted for shipment. The ore is a sulphide of copper, rich in silver.

The Conroy mine and concentrator are being worked steadily and much rich ore is being shipped to the smelter from this property.

It is a considerable drifting being done on the placer mines of Oak, 7, 10 and Cedar creek and the tributes running into them. On Windfall Gulch the Sweeney brothers are said to be taking out two and a half ounces of gold to the eight-foot car.

Telegraphic Honeymoon.

SAN FRANCISCO, Jan. 18.—The steamer today brought advices from Singapore. Harold M. Sewall, of Maine, formerly United States consul general at Samen, and wife, who were married in San Francisco six months ago and were on their honeymoon trip around the world, took passage at Manila for Singapore on the steamer Normandy. On Dec. 6, in the China sea, the steamer was wrecked. Sewall and wife were the only passengers, and in the mate's boat, with part of the crew, were finally landed on an island. Drowned and shoreless, after drifting about all night and suffering intensely. They were cared for by the natives, and later the controller of the steamer, a Dutch settlement, sent a government steamer and took them to Singapore.

One dollar will buy 1 yard of "Fruit of the Loom" muslin at The Ice House.

Mobbed the Lecturer.

APLINGTON, Wis., Jan. 18.—Major Sims, an A. F. A. lecturer, was mobbed at Kankana, last night and his meeting broken up. A mob of 2,000 collected outside and stormed the building. Sims and party guarded and barricaded the doors and resisted the assault of the mob. The sheriff partly dispersed the mob and with the help of local officers escorted Sims to his boarding place. The mob followed, throwing stones. Sims was knocked senseless by a stone, but the officers fought the mob off and got him safely to his lodgings, when the crowd dispersed. Sims was escorted to the train this morning by men armed with Winchester, and left for Ashland.

POPULAR WITH LADIES.

The Way the Souvenir Cook Book Has Leaped into Popularity.

Something over two years ago THE INDEPENDENT began offering premiums. During that time it has placed in hundreds of Montana homes standard books of various kinds. Some of these have been devoted to natural history, some have been the works of the best authors of fiction, and others have been world-famous narratives of travel and adventure. A short time ago the management decided to get something especially for the ladies, and after giving the best very carefully, good luck and perseverance made it possible to secure, exclusive for this state, the most complete and best cook book that has ever been placed upon the market, known as the "Home Queen, World's Fair Souvenir Cook Book." This book was only ready for delivery to INDEPENDENT subscribers about six weeks ago, and in that time so great has the demand been that the first consignment of several hundred copies has been exhausted. A few days ago the second consignment was received, and the orders now on file will be filled in the order of receipt. Of all the premiums THE INDEPENDENT has offered this has proved to be the most popular. And there is little wonder, for it not only contains recipes from ladies of national reputation for the preparation of almost every dish conceivable, but it contains general information on table etiquette, the properties of various food products, the science of selecting and serving meats, and the hundred or more other topics germane to the subject of cookery. It has never been equaled in any cook book or other publication of like character. One great advantage of the large majority of its recipes lies in the fact that one does not have to live in New York or New York City to make a dish after them. It is the poor man's, as well as the rich woman's cook book.
