

It May Interest You to Know Some of the Technical Points About

WHISKEY.

In the first place there are High Wines. In the second place there are pure spirits, made from High Wines.

In the third place there is compound Whiskey, which consists of Spirits and Straight Whiskey.

In the fourth place there are patent process or early maturing Whiskies. These goods are made after the cheapest formula, and are matured early by artificial means.

In the fifth place we have regular Sweet Mash Whiskey. These goods are distilled from a sweet mash, and yeast is used to increase the yield. They mature earlier than sour mash, but never develop the same fine qualities.

In the sixth place we have the old-fashioned hand-made Sour Mash Whiskey, such as our fathers drank 50 years ago. This Whiskey is not only superior to anything else made in Kentucky, but is admitted by connoisseurs to be superior to the finest French Brandy as a beverage.

The Old Continental Distillery, while not the only one, is among the few houses remaining in Kentucky where old-fashioned hand-made Sour Mash Whiskey is made. All admit the great superiority of this process, but the yield is so small that few distillers find the limited profit in making it attractive. Its perpetuation depends upon those who are more devoted to quality than to large margins.

The Old Continental Whiskey is made down among the hills of old Nelson county, from pure spring water and the choicest grain. It is mashed by hand in small tubs, and is singled and doubled in copper over fire. It is in every sense of the word a pure Whiskey. Unlike the cheap imitations it does not derange the stomach of those who drink it, and there isn't a headache in a barrel of it. It is soft, rich and fruity, and while it supplies health and strength to the feeble who use it, it also supplies the demand for a beverage of the very highest order.

The fact that it was awarded the gold medal over all other Kentucky Whiskies at the World's Exposition in New Orleans, and also at the World's Fair at Chicago, goes largely to substantiate what we have said in its favor. The proof of the pudding is in the eating, however, and we suggest that you call and sample the "Continental" for yourself.

THE TEACHERS' INSTITUTE

About 120 Teachers of the Young Gathered at the High School Building.

Exercises Which Were Both Interesting and Full of Good Things.

Miss DeVore, Miss Magness, Prof. Merritt, Superintendent Steers and Prof. Templeton the Instructors.

The Lewis and Clarke county teachers' institute opened yesterday morning at the high school with a full attendance of the city teachers, and a large number from the county, in all about 120. Miss Minnie Heifnerath, county superintendent, had prepared an attractive program, and the work was commenced without loss of time. Prof. Young was to have had charge of the reading, but being ill, Miss Heifnerath assumed the services of Miss Edith Joyce De Vore, who recently came to the city to teach education and who is employed in that capacity at the university. Although Miss De Vore had but a day's notice of what was required of her, she proved herself quite equal to the emergency, and gave a very instructive address upon reading, laboring upon the following points: diaphragm breathing, correct use of the vocal cords, proper placing of the throat, tongue and lips, use of the powers of mimicry, original expression of thought, correct inflection, and others.

Miss E. Frank Magness, of the high school, then took up the subject of dictionary work, and read a witty little address upon the subject. Miss Magness then gave some points upon methods of making this work interesting, mentioning some of the best works upon the subject. A table of words including the diacritical marking was placed upon the blackboard, and an explanatory lesson with device for making it interesting to children was given. The study of word pronunciation is of interest to many people outside of the school room, and it is astonishing as well as amusing to note how many words are carelessly mispronounced. There are some words or classes of words that are mispronounced in communities; such colloquialisms tend to excite, and the educator often has to work against prejudice to establish correct pronunciation. A few minutes was then spent in discussing the use of music in literary schools, and in examining and singing from a little pamphlet Miss Heifnerath had prepared for use in the district. Miss Magness afterwards continued with the subject of literature, reading a most interesting paper, distinguishing between literary and the history, and dwelling more particularly upon the latter. Class work then followed, the subject chosen being Irving. Mention was made of the condition and events during the life of Irving, his attitude towards politics and how his visits abroad tinged his writings. Some of his works were briefly considered, and a few extracts given.

After an intermission and music, Prof. S. A. Merritt took up the subject of arithmetic, and for an hour held his audience's close attention. He briefly considered the methods of instruction, claiming that methods were individual and no more communicable than a teacher's manner, personality or electrical force; yet many underlying principles were common and might be used by all. Comparing the foundation, he reviewed by a process of natural development, a method of teaching addition, subtraction, multiplication, etc., in which he claimed a child of average ability could understand the fundamental principles and thus do the work by rote, rather than by a mechanical process. Principles of division were also considered. Prof. Merritt laid great stress upon the consideration of principles rather than upon the great amount of drill work usually given in schools. Cancellation and the properties of numbers were considered in the same way, Prof. Merritt contending that if children have been properly taught the previous steps the same consideration of principles involved is of much more importance than mere drill.

In the afternoon the subject of diction was considered for half an hour, and then Hon. E. A. Steers, superintendent of public instruction, took the subject of history. A diagram was placed upon the board, containing places for dates, names of assembly, place of meeting and number and name of colonies present, all to be used in a rhyme showing development of the union. Beginning with the earliest assembly, dates were filled, and names of the proceedings of each assembly was indicated, down to 1775, in which all the thirteen colonies were represented in Philadelphia in the first continental congress.

Prof. Templeton of the university followed with an hour of geology, in which the term was defined as the science and art of school teaching. Materials were then spoken of, including the child, who was resolved into a "bundle of desirous possibilities and experiences"; his physical condition, his home and social life, heredity, intelligence and curiosity. The parent also came under scrutiny, his influence over interest, education, religion, politics. As the time was then up the remainder of the lesson was left until next day.

After a recess, Prof. Templeton gave a dissertation upon the subject of rhetoric. The difference between grammar and rhetoric was pitifully given as correct speaking and effective speaking. The grammatical sentence was considered, then the rhetorical, each with its difference. The rhetorical sentence was elaborated upon; the periodic sentence, the loose sentence, the balanced sentence, and the proper and effective use of each, with examples from authors. This discussion closed the exercises for the first day and the teachers dispersed to meet again in the evening to listen to an address by Hon. E. A. Steers.

The enrollment of teachers in the institute is as follows: Louise E. Man, Adelle Dutton, Mrs. L. LeDuc, J. H. Brantley, G. F. Brantley, Emma McKillop, Marysville, R. A. McKee, Minnie Griffith, Alice Abercrombie, East Helena; J. V. Donnell, Ethel Rodgers, S. H. Garvin, Augustus; E. P. Flower, W. J. Creek; Mammie Bacon, U. Aig; Nona B. Eddy, Kewanee; Mary Riordan, Canyon; E. E. Lawson, Prickly Pear valley; Mrs. E. Estill, Hogan; W. S. Van Ouel, Union; Minna Lantz, Mitchell; H. P. Sta rest, Wickers; Lizzie Teasdale, Helena; Mrs. H. L. Fatchler, College Park; Sophia Long, Butler; Adeline White, Louise; Hailey, Clara Avery, F. Annes-Cram, Minnie Allison, Ada J. Whit, Gertrude Heifnerath, Emma Hoover, Lily Klein-schmidt, Athalia Shaffer, A. S. Botkin, Helen Kelli, Delic Mecker, Mary Rickman, Edith Bryan, E. C. DeCamp, Sara R. Udall, Fannie Davis, Edith Bradley, M. R. Bickelstone, Eva Miller, Ida Fullerton, Abbe Shaw, Maribona Ko r, Harriet Pope, Verma Olds, H. C. Carpenter, A. Woodard, B. J. S. Young, Ella D. Wilk-son, Delia Burton, M. P. H. Byer, T. Bickerton, K. Johnson, Eva Giles and W. E. Harsh, Helena.

COMING ATTRACTIONS.

Miss Katie Emmett, a great favorite to Helena, will be the attraction at Ming's opera house on Friday evening, Oct. 5, and reserved seats are on sale at Lockwood's drug store.

Regarding this clever little artist, Elwyn A. Barron, the dramatic critic of the Chicago Inter-Ocean, says: "Katie Emmett is a genuine little actress, and though full of vivacity and good nature, modest in all her performance. On the program she is billed as "The Princess Irish Colonel," and she very well merits the title as she appears in her new play, "Killarney," written by Con. T. Murphy. The play runs along conventional lines, but is brightly and amusingly written in the vein of Irish comedy. Miss Emmett is sunny and winsome in her work, and intelligence governs her acting. She plays the part of a young Irish girl who is guile and host-ess to tourists who visit the Lakes of Killarney, and in the course of the play, the better to discover a scheme of rascality, she takes the part of a boy, a blundering young goosoon, in which Miss Emmett does some very clever acting, her impersonation of a boy being capital. Miss Emmett has secured an unusually good company.

BITTER ROOT APPLES.

A Montana Industry That is Bound to Keep Growing.

Few people in Montana realize the importance which the fruit growing industry in the Bitter Root valley has already attained. During the month of September one fruit house in Helena handled 2,304 boxes of apples and crab apples, grown in the Bitter Root valley. The same firm has arrangements made for shipping 800 boxes more from Bitter Root points this week. In two years from now it is safe to say that that fertile valley will produce enough fruit to supply the needs of consumption in Montana. Of course there will be some early apples shipped here from California, but after Sept. 1, when the home grown apples come into market, Montanians will have no use for either eastern or western apples, both of which are eclipsed in appearance and flavor by the apples grown in the Bitter Root valley.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance. Syrup of Figs is for sale by all druggists in 50 cent bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

There Is a Law

In Vermont against adulterating maple syrup. There should be a law in Montana against selling Tough Meat. The meats you generally buy are not tender because the average butcher either does not care to take the trouble to select the best or does not know the best when he sees it. We have had twenty years' experience and believe we know Good Meats. If you want the tenderest, the best of any kind, call us up, telephone 116.
