The Grange.

The National grange is to hold its next session at Washington, D. C.

Has the grange any cause for discouragement? None in the world. Its principles underlie all progress. It is especially adapted to the wants of the farmer. It has come up out of surrounding condition—a necessity of the time—just as the engine necessarily followed the discovery of the power of steam, or the markets of the world followed the steamboat and telegraph. It is no exaggeration to say only recently has the farmer come to the front and kept step with the world. Nature's laws work in his favor. The grange is only part of the developments of the age. It has in its favor what other social organizations have not—a necessity, an adaptation to surrounding circumstances, and an income. We cannot believe that the farmer can be so blind to his own interests and the future of agriculture as to throw away his chance.—Grange Bulletin.
