Dress Patterns Just 1/2 Price

Dress lengths of French worsted fabrics in dainty stripe and shadow check designs; 6-yard dress patterns worth \$12 on sale today for only **\$6.00**

THE MARTIN CO.

MARKET MOVEMENTS ARE SPOTTY

PERIODS OF MODERATE WEAKNESS AND STRENGTH ALTERNATE AT INTERVALS.

New York, Jan. 13.—The stock market today was of much the same character as yesterday. Periods of moderate strength and weakness alternated and the tone was spotty and irregular at all times. There were no effective demands in the market, but a strong tendency to aggressive accumulation, but evidence of some support at a defined point in a decline gave the bears warning of obstacles to be encountered in too bold an attack on values. The sentiment amongst the professional operators was not optimistic and the events of the day, while not of great importance, were construed unfavorably. Stock exchange members on the floor engaged in some discussion of the trade prospects in this country and were inclined to give ear to views expressing disappointment over the rate of business improvement. In this connection the rate at which money is coming back from the country into bank reserves is a disquieting evidence of a lack of demand for it in the circulation. Besides the shipments of currency by express from the interior, the operations of the treasury department reflect the heavy deflection of bank notes back to their source of issue.

Bonds were irregular. Total sales, par value, \$5,340,000. United States 2s registered declined 1/4 per cent on call.

Silver and Drafts.

Silver bars, 92 1/2%; Mexican dollars, nominal. Drafts, sight, 7 1/2 per cent; telegraph, 10 per cent.

Grain and Provisions.

Chicago, Jan. 13.—Financial difficulties involving an influential grain concern at Duluth caused some signs of demoralization in the wheat pit at the opening, owing to selling out of a long line of wheat held by that firm. Local bears took advantage of the situation and pounded the market vigorously the first quarter of an hour, but were unable to force prices below the opening level, which was from 1/4c above to 1/2c below the previous close. The attempt was made futile by the support given the market by the principal bulls who took all offerings. Coverings by shorts eventually resulted in sharp upturns in the price of all deliveries. May option advanced 2c and the more distant deliveries rose 1 to 1 1/2c. A better demand for cash wheat also had a strengthening influence. The market closed strong, with prices at the top. Final quotations on May being \$1.06 and on July 87 1/2c.

Chicago Livestock.

Chicago, Jan. 13.—Cattle—Receipts, estimated at 18,000. Market steady. Hogs—Receipts, estimated at 32,000. Market 10c higher. Light, \$5.00@6.10; mixed, \$6.00@6.30; rough, \$5.75@6.50; good to choice heavy, \$5.90@6.40; pigs, \$4.00@5.50; bulk of sales, \$5.60@6.20. Sheep—Receipts, estimated at 15,000. Market steady. Natives, \$3.25@5.85; western, \$3.25@5.90; yearlings, \$5.25@7.25; lambs, natives, \$5.25@8.15; westerns, \$5.25@8.10.

Metal Market.

New York, Jan. 13.—The London tin market was a little higher, with spot quoted at \$127 1/2 and futures at \$128 1/2. The local market was quiet, but higher in sympathy with spot, quoted at \$27.95@28.15. Copper was lower in London, with spot quoted at \$133 1/2 and futures at \$134 1/2. The local market was said to be weak in tone. It is reported that a large sale has been made for February shipment to Italy of electrolytic copper at 14 1/2c. Generally speaking, this is the price asked by the larger

selling agencies for shipment in 30 days, but in the local market scattering lots can be secured at considerable concessions. On spot Lake is quoted at \$14.37 1/2@14.62 1/2, electrolytic at \$14.12 1/2@14.25 and casting at \$14.00@14.12 1/2. Lead was unchanged at \$13 3/8 6d in London and \$4.17 1/2@4.22 1/2 in the local market. Spelter was unchanged in both markets, being quoted at \$21 7/8 6d in London and \$5.12 1/2@5.17 1/2 locally.

Wool Market.

St. Louis, Jan. 13.—Wool nominal. Medium grades, combing and clothing, 18 1/2@23 1/2; light fine, 16 1/2@20; heavy fine, 10 1/2@15; tub washed, 23@31 1/2c.

Treasury Statement.

Washington, Jan. 13.—Today's treasury statement: Available cash balance, \$156,642,889; gold coin and bullion, \$26,028,142; gold certificates, \$26,671,180.

MINER SUCCUMBS.

Ely, Nev., Jan. 13.—David Simons, a miner employed at the Boston-Elys mines, was overcome by gas yesterday and carried to the surface. Every effort was made to save his life, but he expired last night.

PLANS TO DEDICATE NEW BUILDING

PRESIDENT HAMILTON PREPARING FOR FORMAL OPENING OF NEW BUILDING.

Bozeman, Jan. 13.—One of the most important events in the history of the Montana Agricultural college will be held in this city on the occasion of the dedication of the new agricultural building. The state has not been definitely decided upon yet, but President Hamilton stated it would be about the first of next month. He intends to go to Helena the latter part of this week to make final arrangements for the exercises. Governor Edwin Norris will be the principal speaker. President Hamilton will also make arrangements for several members of the state legislature to be among the speakers. It is probable that the legislature will be invited to attend in a body.

IN THE THEATERS

No artistic event in the dramatic year approaches the interest and importance attached to the coming of Louis James in "Peer Gynt," the most discussed play in many years.

When Richard Mansfield first produced this comedy of life, a wave of disputation swept the country as to whether the theme carried some hidden meaning, if the characters impersonated were symbolic or real, and if the play was really worthy of the player. The answer is now well known, for not only did Mr. Mansfield achieve the crowning triumph of his career, but established the works of Ibsen upon a more solid foundation than had heretofore been his fortune. When Mr. Mansfield answered to nature's last call, his trustees, in looking over the possible claimants for this coveted prize, chose Louis James as the player most endowed with the necessary requirements, physically, historically and temperamentally, to continue in this great work, with the result that Mr. James is duplicating the success made by his illustrious predecessor.

Mr. James presents the entire original Richard Mansfield production intact, embellished with all the Greig music, scenic grandeur, ballets, choruses, etc., and the largest and best selected company that he has ever had the honor of offering here. Aphie James is his leading lady and is an actress of charming personality and histrionic attainments.

"The Alaskan."

All of the properties used in the presentation of the opera "The Alaskan" are the genuine goods, having been purchased by John Cort from the Alaskan Indians and brought direct to the states for use in the production. The furs worn by the chorus in the first act, as well as the coats of the male members, were originally part of the wardrobe of the natives of one of the Alaskan villages. They were first brought to Seattle and, after being thoroughly fumigated and cleaned, were sent east and first used in the original production of the opera at the Knickerbocker theater, New York

MONTANA DAIRYMEN EXPOSITION PROGRESS IN SESSION UNUSUAL

SET OF LAWS TO REGULATE DAIRYING IS DRAFTED BY DELEGATES.

Bozeman, Jan. 13.—The Montana State Dairymen's association continued its meeting here today and settled down to real business. The matter of state laws was taken up and discussed, and a set of proposed laws were formulated entitled, "An act creating a dairy and food commission and regulating the manufacture and sale of dairy and food products." The act consists of two articles and 26 sections. Among the subjects for which legislation is asked are: Dairy and food commission, power of commission and employes, annual report, chemist's certificate, inspection rights, principal's liability for agent's acts, care and feed of cows, adulterated milk, milk vessels, unsanitary places for milk, butter and cheese factories, Babcock test regulations, imitation butter, mixing extraneous fats with cream of milk, renovated butter, patent butter, prohibition of coloring matter, sale of skimmed milk, skimmed and filled cheese, weights and measures, and penalties.

BLEACHING OUT OATS FOR MARKET

NEW PROCESS WILL ADD MILLIONS TO THE REVENUE OF WESTERN FARMERS.

Chicago, Jan. 13.—An increase of \$100,000,000 a year in the value of corn and oats at primary markets through a cheap method of bleaching and drying those grains is the prospective result of extensive experiments by the government and individuals, which have now reached a point of practical success. This interesting estimate of the value of a process available by grain dealers and large farmers the country over was arrived at by computation upon the crop of 1907 of those three cereals, which amounted to 2,295,350,000 bushels, to which an added value to grain buyers of 2 to 4 per cent per bushel by improved grade will be given by a cheap process to improve the grade. It was not the government this time, but an individual, E. P. Arnold, a local expert in grain handling, who has solved this problem and put into practical operation in South Chicago a process which seemed likely to deprive the big elevators and companies of the cities of their present profit for drying and bleaching corn and oats for market, and make that operation practical in the smaller elevators throughout the country. For several years the department of agriculture has been at work on the problem of the grading and standardization of grain. In addition to the laboratories at Baltimore and New Orleans, new laboratories have recently been established at Minneapolis, Duluth, St. Louis and New York. Here elaborate tests have been made in the effort to devise better means for bringing grain up to the standard and making grain products more valuable after they have been harvested. Like the split log road drag and some other devices of small cost that have put hundreds of thousands of farmers into the pockets of farmers in the last few years, the process is perfectly simple, once it was discovered, and the cost of construction trifling compared with present methods or the saving involved. Meanwhile the work of the government laboratories is being continued and should lead, according to Secretary Wilson's last report, to the discovery of other devices to aid the farmer and the elevator man in straightening out some of the other unsatisfactory conditions which are still to be found in the business of growing food for \$5,000,000 people.

BURTON IS ELECTED.

Columbus, Ohio, Jan. 13.—The general assembly of Ohio in joint session today officially declared that Congressman Theodore E. Burton of Cleveland the successor of Joseph B. Foraker in the United States senate. Mr. Burton followed with a speech of acceptance.

SIX ARE DISQUALIFIED AS JURORS

EXAMINATION OF TALESMEN IN CALHOUN CASE SHOWS BIAS TO EXIST.

San Francisco, Jan. 13.—Six men were disqualified as jurors, the examination of a seventh was not completed and the securing of 12 men to try Patrick Calhoun upon an indictment charging bribery of a former supervisor of this city was discouraging as far as the present panel is concerned when the second day of the trial ended at the usual hour of adjournment this evening. Of the nine talesmen thus far subjected to the cross-fire of questions by prosecution and defense, eight have admitted bias or prejudice and two have openly expressed a belief that the defendant is guilty of the crime charged against him. A tenth took advantage of technical exemption from jury service and the eleventh, whose fitness to serve probably will be determined tomorrow, was apparently unsatisfactory to the prosecution by reason of his attitude upon one or more of the many questions that have occupied public attention since the municipal scandal of two years ago.

PRISONERS BURNED TO DEATH:

Hot Springs, Ark., Jan. 13.—In an attempt to escape from jail today prisoners set fire to the structure. George Lacey and Lassie Collins were burned to death.

ICE CARNIVAL KILLS BUSINESS

RAILWAYS AND POSTERS SAY THE WINTER PORTS INJURE COUNTRY'S REPUTATION.

Chicago, Jan. 13.—The final passing of what was once one of the most picturesque features of winter life in many of the northern states from New York to Minnesota is foreshadowed in the announcement here that plans for a revival of the Montreal ice carnival, which was one of the most famous on the continent, are about to fall through. Twenty years ago St. Paul, Albany and a score of cities had their annual winter festivals, but one by one they were discontinued, with their picturesque palaces, snow fights and skating contests, because it was thought that the event gave rise to erroneous or exaggerated ideas concerning the coldness of the climate and checked the coming of new citizens and settlers from other parts. Since then, however, the verdict of facts has overcome the bugaboo of popular superstition about the rigors of the north. In Canada in particular the enormous yield of the western wheat fields alone has disproved this. In Quebec, Ontario and other western provinces the winters are cold, but no colder than in many places in the United States, and in the warm "chinko" winds temper the rigor of the air and produce a mild equable climate. Hence the people of Montreal thought it safe to revive the old festival and thousands of outdoor lovers and devotees of the winter sports in the United States were cheered at the thought that the day of the ice palace and its accompanying festivities had not quite passed. Now comes the announcement that the Canadian railroads are still doubtful of the result and that the carnival will probably have to be abandoned. Here is the wording of the decree of the Eastern Canadian Passenger association, which will probably settle its fate: "Whereas, the extensive advertising of unusual and novel features required to attract any considerable number of visitors to winter carnivals or similar winter events creates wrong or exaggerated ideas regarding winter conditions in Canada, and therefore tends to injure the best interests and permanent growth of the country, it is resolved that the lines in this association will not make or participate in any special reduced fares for such undesirable enterprises or otherwise encourage them."

ANTI-JAP MEASURES TO BE PRESSED

JOHNSON OF SACRAMENTO POSSES TO FIGHT FOR SUCCESS OF HIS BILLS.

Sacramento, Cal., Jan. 13.—The three anti-Japanese bills introduced in the assembly by Grove L. Johnson of Sacramento and the one by A. M. Draw of Fresno, prohibiting aliens from holding land in the state, have attracted such wide interest that the 1,000 copies of each ordered printed are already exhausted and there is a demand for more. The Johnson bills are designed to prevent Japanese, being members of corporations, to segregate their children in the schools and to segregate all Japanese by defining limits in which they must live. The two, first named were introduced last session by Mr. Johnson and action upon them was suspended at the telegraphic request of President Roosevelt during the diplomatic negotiations between the United States and Japan over the action of the San Francisco school board in excluding Japanese youths from public schools. Discussing his measures today, Mr. Johnson said: "I look for a solid vote from the San Francisco delegation upon all of the bills, and I believe the sentiment against the Japanese has grown to such an extent that the bills will pass. "I am prepared to make a fight for them, and even should Washington interfere again, I would not stop until the legislature was on record. I regard the presence of Japanese as more dangerous a hundredfold than of Chinese. In our schools Japanese youths of 16 to 18, with their characteristic disregard for the virtue of women, should not be permitted to sit beside our own children. They are a menace to the girlhood of the state. "I am not prompted by the Asiatic league or any other organization or person in presenting my measures. "The Japanese already have a lobby on the scene and will contribute considerable money to the fight. "The hearings will be held in a few days.

GETS A DIVORCE.

London, Jan. 12.—Mrs. George Guy Chetwynd, daughter of the late Charles Secor of New York city, was granted a decree in the divorce court today against her husband, Mrs. Chetwynd's husband is the son and heir of Sir George Chetwynd.

Patriotism

The stomach is a larger factor in "life, liberty and the pursuit of happiness" than most people are aware. Patriotism can withstand hunger but not dyspepsia. The confirmed dyspeptic "is fit for treason, stratagems and spoils." The man who goes to the front for his country with a weak stomach will be a weak soldier and a fault finder. A sound stomach makes for good citizenship as well as for health and happiness. Diseases of the stomach and other organs of digestion and nutrition are promptly and permanently cured by the use of Dr. Pierce's Golden Medical Discovery. It builds up the body with sound flesh and solid muscle.

The dealer who offers a substitute for the "Discovery" is only seeking to make the little more profit realized on the sale of less meritorious preparations. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the paper covered book, or 31 stamps for the cloth bound. Address World's Dispensary, Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.
