

GARDEN CITY

The social attractions of the past week have proved not only numerous but varied. Dances, dinners, card parties and college functions have vied with each other for popularity, and were all gratified in a most delightful manner. Probably the most pleasing of all events was the club meeting at which Mrs. Theresa Bandmann announced her intention of giving land to the Women's club, thus making possible the long cherished plan of a club house.

The "Senior Swing Out," a pretty custom in college life, proved interesting and was a source of much pleasure to those participating in the event.

The skating rink lost none of its popularity during the week, the excellent weather and the good condition of the ice, attracted new devotees to the sport each day.

For the literary inclined, the reading of Miss Ruth Kellogg on Tuesday evening at the public library proved an instructive and delightful diversion. In fact it may be said that society for the past week has proved all things to all people, and if "Dame Rumor" is to be believed the coming week will prove an enjoyable repetition of the gaiety of last, and social whirl will increase until Ash Wednesday brings the much needed rest.

St. Valentine's day will doubtless bring many social affairs, as the day offers excuse for novel and beautiful decorations besides being an outlet for the sentiment of the people.

ORDNANCE HAS MANY CURIOSITIES

ODD INVENTIONS HAVE PROMINENT PLACE IN HISTORY OF ARTILLERY.

Among the curiosities of artillery odd inventions have a great place. Cannon have been made of the most unlikely materials. Leather was used as early as Henry VIII's day at the siege of Boulogne. The very articles were stored in the tower once, and Evelyn saw them there, inscribed "Non Marti opus est cui non deficit Mercurius." Are they still lying in some corner of a forgotten lumber room? The Scotch employed leather guns in 1640 to batter Lord Conway's fortifications at Newhouse, and they did the work well. Describing the fearful alarm in Paris in 1792, Carlyle says: "One citizen has wrought out the scheme of a wooden cannon, which France shall exclusively profit by in the first instance. It is to be made of staves by the coopers, of almost boundless caliber, but uncertain as to strength."

Two small pieces brought to France by the Siamese ambassadors as presents from their king to Louis XIV. were the only artillery pieces for the attack on the Bastille—of eccentric model no doubt, adorned with dragons and golden inscriptions, but efficient workmanship. We read of gold cannon in India. There were two so described at Baroda in Burton's time, "to which regular adoration was offered." In fact, the tubs were of steel, but the massive gold casing cost £20,000.

For the defense of Malta in the old days the knights "invented a kind of ordnance of their own, unknown to all the world beside," says Brydson, an eyewitness. They hollowed out the natural rock here and there in such fashion that the cavity was like a mortar, put a barrel of gunpowder into the hole, plugged it with a wooden disk exactly fitting, and heaped miscellaneous projectiles thereupon. About fifty of these singular cannon defended creeks and landing places. Some of them were six feet in diameter and threw 10,000 pounds weight of iron or stone into the air. Doubtless if all went well they would do tremendous execution upon an enemy, trying to disembark.

But there are eccentricities still more curious on record. In a tomb on the island of Chinal, near Caumacina, Mexico, was found a cannon four feet eleven inches long of terra cotta, with terra cotta bullets. It is suggested that when Cortes retired after his great fight at Ceuta, Tabasco, the natives copied the Spanish guns in clay, hoping to produce the same results.—London Standard.

ONLY A FINE.
Waycross, Ga., Feb. 6.—It cost Kinch Williams \$150 to kill his step-mother. Williams, a young man, shot and killed his step-mother in November, 1904. After being a fugitive from justice for four years he surrendered to the sheriff here yesterday and was given an immediate trial. He was allowed to plead guilty to "shooting at another" and was given the alternative of a fine of \$150 or nine months' imprisonment. Williams promptly paid the fine.

When It Is Dyspepsia, You'll Know It

That's different from Indigestion. You may experience the first symptoms of Indigestion without knowing what they really portend. Kodol, however, prevents Dyspepsia by providing for complete digestion.

Where there is complete and perfect digestion there is, of course, no room for dyspepsia. And it is, for various reasons, more satisfactory to prevent dyspepsia than to attempt to cure it. Fact is, you must depend upon Nature for a cure, and Kodol assists Nature.

Nature will cure a sick stomach quicker than any medicine in the world—if you give Nature a chance. But Nature cannot cure the stomach while the stomach is overworked. That is impossible.

In order to be cured the stomach must rest. To rest the point. And that is what Kodol is for—to rest the stomach. It digests every particle of food for the stomach, so that the stomach has nothing to do but get well. Then it gets well.

You would be surprised if you knew how many persons have indigestion. And, of course, most of them have dyspepsia, ultimately—if they neglect the indigestion. Then Nature is in urgent need of assistance. And nervous dyspepsia is a terrible thing to those afflicted with it.

Kodol supplies this assistance just the same as in the early stages of indigestion. But more time and more rest are required for Nature to effect a cure. It is best not to wait until one gets dyspepsia.

Nearly all classes of people are subject to indigestion. Healthy appearance, outwardly, is no indication of a healthy stomach. Neither are sound muscles any safeguard against an unhealthy stomach.

The indications of digestive derangement are bloated feeling, gnawing pain in the pit of the stomach, sourness of stomach, belching of gas and nauseating fluid, heartburn (so-called), diarrhetic condition, headaches, dullness and lassitude, etc. When you experience any of these, you need Kodol.

Kodol is a digester of unquestioned merit. Unquestioned, because one cannot question the merit of a thing that does all it is claimed to do, or was intended to do. Kodol does this. It completely digests all food. That is all that is required, because Nature does the rest.

Eat what you want, let Kodol digest it. You don't have to take Kodol all the time. You only take Kodol when you need it.
