Eddy Looks Better

Late news from Saltese is that not only the Bryan but the Stillinger property has struck rich ore. Wherever a ledge is encountered in this camp these gray coppers come in, showing it to be one of the principal minerals there. Some few people here in Missoula have held off buying Eddy thinking it would be cheaper toward spring. Someway they have not the faith in this Saltese country that they should have. We make the announcement that Eddy stock will be 15c on March 1. If the two strikes above mentioned are half what report claims for them, then Eddy stock will be worth 25c and will be selling for that. People in other parts of the country are buying this stock today at price asked and think they have a bargain. We know they have. Remember that the ledge of the Stillinger property is traceable through the entire length of the Eddy ground as plain as an old traveled wagon road, while the ledge that runs through the Bryan passes through the upper part of the Eddy ground. The ledge that the Eddy people are working on is the same ledge that was encountered in the Stillinger property. These are conditions that can be easily verified either by inquiry or by visiting the ground. We are still offering a little of this stock at 10c, but should we be fortunate enough to strike as rich ore as has been encountered in either the Bryan, Ben Hur or Stillinger property, you will not get Eddy stock less than 11. A. M. STEVENS, Secretary.
