Notice of Closing Streets and Alleys.

Whereas, a petition in writing of the Chicago, Milwaukee & St. Paul Railway company of Montana, the owner of lots on certain streets and alleys, hereinafter described, and situated in the Knowles and Sunnyside additions to the city of Missoula, Montana, asking that those certain streets and portions of streets and certain alleys and portions of alleys in said additions be vacated, closed and therefor discontinued as public highways, has been filed with the city clerk of the city of Missoula:

Notice is hereby given that on Monday, the first day of March, 1909, at the hour of 8 o'clock p. m., of said date, at the council chamber of the city of Missoula, at the city hall in the city of Missoula, has been and is fixed at the time and place for hearing any objections of any person or persons, to the granting of said petition, and for action on said petition by the city council.

The alleys and parts of alleys, and streets and parts of streets sought to be vacated, closed and discontinued by the said petitioner are described as follows:

All that portion of Myrtle street lying north of the line of Third street.

All that portion of Hazel street lying north and east of a line drawn from the southeast corner of the north half of block thirty-nine (39), to the southwest corner of the south half of block thirty-eight (38).

All that portion of South Second street, west, beginning at a point sixty-two (62) feet east of the southwest corner of block thirty-eight (38), and running to a point on the south line of said South Second street, one hundred and twenty (120) feet east from the northwest corner of block thirty-five (35).

Also the alley dividing the north half from the south half of block thirty-eight (38).

All that portion of South First street, west, lying east of a line drawn from the line dividing lots ten (10) and eleven (11), in block forty-eight (48), to the line dividing lots two (2) and three (3), in block thirty-nine (39).

All the alley dividing the north half of block forty-eight (48), from the south half of said block.

All that portion of the alley dividing block thirty-five (35), lying east of a line drawn from the southeast corner of the southeast corner of lot one (1), of said block thirty-five (35), and running thence southeasterly to a point on the south line of said alley beginning twenty-two (22) feet west from the northeast corner of lot twelve (12).

All of River street lying north and east of a line drawn from the southeast corner of block fifty (50), to the northwest corner of block forty-eight (48), and also all of Chestnut street lying

north of said line, and south of the line of Dakota street.

All of the alley dividing block forty-nine (49), lying between the east line of Chestnut street and the line drawn across said alley, beginning at the southeast corner of lot four (4), block forty-nine (49), and running to the northeast corner of lot nine (9), block forty-nine (49).

All of the alley dividing block fifty (50).

All of Orange street lying between the south line of Dakota street, and a line drawn from the southeast corner of lot one (1), block fifty-two (52), to the southeast corner of lot six (6), block fifty-one (51).

All that portion of an alley lying immediately west of lot six (6), block fifty-three (53).

The above mentioned streets and alleys being in Knowles and Sunnyside additions to the city of Missoula, according to the map and plat of said Knowles and Sunnyside additions to the city of Missoula, as the same is now on file and of record in the office of the clerk and recorder of Missoula county, Montana.

All persons desiring to protest against or object to the vacation, closing and discontinuance of said streets and parts of streets, alley and parts of alleys are notified to appear at the time and place hereinbefore specified and present any objection they may have to the granting of said petition.

J. S. KEMP, City Clerk.

Notice to Contractors.

The city council of the city of Missoula, Montana, will receive sealed bids up to 8 o'clock p. m., Monday, March 1, 1909, for the construction of the wing dam in the Missoula river east of the Northern Pacific Bitter Root branch railway bridge. Contractor to furnish all labor and material to complete dam, and specifying the driving of the piling.

Plans and specifications to be had from the city engineer, W. A. Mayo, room 39, Higgins block. Each bid to be accompanied with a certified check of 10 per cent of bid.

The city council reserves the right to reject any or all bids.

MISSOULIAN WANT ADS BRING QUICK RESULTS.

MEETING AT SPOKANE IS PLANNED

AMERICAN IRRIGATION FEDERATION WILL HOLD SESSION THIS SUMMER.

Spokane, Feb. 21.—The American Irrigation federation, which has vice presidents and members in practically every state and territory where water is applied to lands by scientific means, will meet in annual convention in Spokane on August 8, the day before the Seventeenth National Irrigation congress is formerly organized by President George E. Barstow of Barstow, Texas.

G. L. Shunway of Scottsbluff, Neb., chairman of the executive committee of the federation, conveys the foregoing information in a letter to R. Insinger, chairman of the local board of control of the congress.

Mr. Shunway adds it is likely that the governor of Nebraska and a representative delegation interested in reclamation and forestry in his state will attend the congress. He urges that advocates of private irrigation enterprises, the Carey act and other matters of similar character and scope be given a full hearing, saying that the good points of all are certain to be brought out in spirited debates.

The officers of the federation are: President, L. Bradford Prince, Santa Fe, N. M.; secretary, D. H. Anderson, editor The Irrigation Age, Chicago; vice presidents, Presley E. Horn, Hatley, Idaho; Professor J. D. Tinsley, Mesilla Park, N. M.; Tom Richardson, Portland, Ore.; Judge Cyrus Happy, Spokane; C. T. Johnson, Cheyenne, Wyo.; Professor F. D. Coburn, Topeka, Kas.; William Hale Thompson, Chicago; John Hall, Lampasas Springs, Texas; A. J. Cobban, Rhineland, Wis.; executive committee, Lute M. Wilcox, editor Field and Home, Denver; Zera Snow, Portland, J. Turley, Turley, N. M.; C. Brainard, Payette, Idaho, and John McAlpine, Duluth, Minn.

Washington Once Gave Up

to three doctors; was kept in bed for five weeks. Blood poison from a spider's bite caused large, deep sores to cover his leg. The doctors failed, then "Bucklen's Arnica Salve" completely cured me," writes John Washington of Boqueville, Tex. For eczema, boils, burns and piles it's the supreme; 25c at Geo. Frelshelmer's.

Exhaustive inquiries into the history of several thousand European families have demonstrated that the third, fourth and fifth children of a couple are more able to resist disease than their older brothers or sisters. This is especially the case in the offspring of early marriages.

To defeat the wiles of the Mississippi river, which frequently shifts its channel, a bridge to be erected across it at Keokuk, Ill., will be so constructed that any one of a number of spans can be made a draw by moving the elevating machinery.

The lammagior, or bearded vulture of southern Europe, is known by the natives of the countries it inhabits as the "bone-breaker" from its habit of dropping bones upon rocks from great heights to crack them, enabling it to get at the marrow.

A prize of about \$2,400 offered in Germany in 1874 for the best method of preventing pollution of streams by sulphite liquor from paper mills still remains unawarded. Scores of methods have been tried, but none has been notably successful.

Come Around at Noon

Splendid merchants' lunch from 11:30 to 2 o'clock every day at Ye Olde Inn. 40 cents.

BIG BUILDING RESTS ON GOLD ORE

BANK STRUCTURE IN COLORADO IS ON GROUND CARRYING GOOD VALUES.

Colorado Springs, Colo., Feb. 21.—Built upon a foundation of gold ore, a seven-story bank building is in course of construction at Colorado Springs. Many hundreds of tons of low grade ore, running in value from \$1 to \$3 a ton, have been shipped from the mines and dumps on Bull Hill in the Cripple Creek district to Colorado Springs, and used in the massive foundations for the Exchange National bank building. The ore has no mineral shipping value, but it makes an exceptionally strong building material when mixed with cement. The total value of the gold in the foundation is estimated at \$2,000,000, the cost of a modern cottage. It is doubtful if there is another bank in the country which rests literally on a foundation of gold.

To save the American elk from the same fate which has overtaken the buffalo, an active campaign is being made by the members of the B. P. O. E. to secure at the present session of congress an appropriation of \$20,000 for the creation of an elk preserve in the southwest corner of the Yellowstone national park. Most of the wild elk now in existence are in Wyoming. Grand Exalted Ruler R. L. Holland of Colorado Springs has transmitted to every lodge a communication asking for the adoption of resolutions urging upon congress this action. The crusade is the result of reports which gained circulation a few years ago that elk were being slaughtered and their teeth might be secured for the B. P. O. E. emblems.

By purchase from the state of Colorado the National Association of Letter Carriers has secured a tract of 150 acres adjoining the Union Printers' home east of Colorado Springs as the site for its proposed national home and sanitarium. Following the St. Paul convention in September it is expected that work will begin on the institution to cost \$100,000 or more.

New process of ore treatment which has just been discovered by the Portland Gold Mining company, the largest producer of the Cripple Creek district, after years of experimentation by metallurgists all over the world, will make possible the successful and profitable treatment of raw, low grade telluride ores which run as low as \$1 a ton. This is an announcement made in the annual report of President P. J. Peck of that company, means not only that large dumps, abandoned workings and numerous non-producing mines of the Cripple Creek district can be worked at a profit of from \$1 to \$2.50 a ton, but it is of general significance to the mining world. The Portland company plans to erect at the mouth of East mountain a 200-ton mill to treat the millions of tons of ore lying in its 40 miles of workings and stacked upon its dumps.

Equally as important is the announcement of the discovery in the 1,500-foot level of extensive new ore bodies. This, with similar discoveries in the lower workings of other large mines, tends to strengthen the theory that large deposits are to be opened by deep mining where indications close to the surface are not promising. It seems to further assure Cripple Creek's permanence as a deep mining district and to indicate that the completion of the deep drainage tunnel will unwater much valuable territory.

As a result of the action taken by the charter convention recently elected for the purpose of revising the municipal government, it is probable that Colorado Springs, Colo., will shortly join the ranks of American cities employing the commission form of government. The convention has declared in favor of placing all power and authority in the hands of a council composed of a mayor and four other members and of abolishing the ward system. It is proposed to place the mayor in charge of the city's water system. At the charter election a ticket headed by woman suffragists, who sought representation in the convention, was defeated.

TIMELY RECIPES.

Put in six tablespoonfuls of flour in a basin with a teaspoonful of salt; make this into a batter of the proper consistency, as thick as double cream, with three large eggs, well beaten, and a little milk; beat this mixture briskly with a wooden spoon till every lump is smooth; then stir in a tablespoonful of sauce, hence a tablespoonful of minced herbs and a good dust of pepper. Let the batter stand a few hours; then fry a small teaspoonful at a time in boiling fat or lard. As each pancake is finished roll it up bolster fashion, sprinkle pepper and salt over, and serve as quickly as possible.

Hard boil six fresh eggs, and cut each into four even slices lengthways. Melt one ounce of butter in a stewpan, add one ounce of flour; stir together till well blended; then add a half pint of milk, stir the sauce till it boils; simmer for five minutes; add one ounce of grated cheese and a seasoning of white pepper and salt. Butter some small earthenware cups and arrange a layer of eggs in each; cover with sauce, then cheese, then more sauce; sprinkle with grated cheese; cover with white breadcrumbs, on which put small pieces of butter, and put in a very hot oven for 10 minutes, until they are nicely browned on top. This is a very nice dish, and if fish is unobtainable makes an excellent substitute.

Soldier Balks Death Plot. It seemed to J. A. Stone, a civil war veteran, of Kemp, Texas, that a plot existed between a desperate lung trouble and the grave to cause his death. "I contracted a stubborn cold," he writes, "that developed a cough that stuck to me, in spite of all remedies, for years. My weight ran down to 130 pounds. Then I began to use Dr. King's New Discovery, which recovered my health completely. I now weigh 178 pounds. For severe colds, obstinate coughs, hemorrhages, asthma, and to prevent pneumonia it's unrivaled; 50c and \$1.00. Trial bottle free. Guaranteed by Geo. Frelshelmer.

BRIQUETTED COAL IS VALUABLE

TESTS MADE BY THE GOVERNMENT SHOW IT POSSESSES FINE QUALITIES.

For the purpose of procuring data that could be used in estimating the value of the briquetting process as applied to American fuels, the United States geological survey, in co-operation with other interests, began in 1904, at the Louisiana Purchase exposition, certain experiments involving the production and use of bituminous coal briquets. Machines were installed at St. Louis, and later at Norfolk, for the manufacture of such briquets, and the output of these machines has been tested in locomotive service on several railroads in comparison with natural fuels. An elaborate and carefully executed series of tests involving the use of natural coals and of briquets made from the same coal, previously crushed, has been carried out on a locomotive mounted at the testing plant of the Pennsylvania Railroad company at Altoona, Pa.; less extensive tests were made on several other railroads; and some preliminary experiments involving the use of the briquets in marine service have been made in connection with one of the government's torpedo boats.

A description of these tests, prepared by W. F. M. Goss, has been published by the survey in Bulletin 363, which is now ready for distribution and may be obtained on application to the director of the survey at Washington, D. C.

Results of Experiments. The results obtained in these tests are said to sustain the following general conclusions:

1. The briquets made on the government's machines have well withstood exposure to the weather and have suffered but little deterioration from handling.

2. In all classes of service involved by the experiments the use of briquets in place of natural coal appears to have increased the evaporative efficiency of the boiler tested.

3. The smoke produced has in no test been more dense with the briquets than with coal; on the contrary, in most tests the smoke density is said to have been less when briquets were used.

4. The use of briquets increases the facility with which an even fire over the whole area of the grate may be maintained.

5. In locomotive service the substitution of briquets for coal has resulted in a marked increase in efficiency, in an increase in boiler capacity, and in a decrease in the production of smoke. It has been especially noted that careful firing of briquets at terminals is effective in diminishing the amount of smoke produced.

6. In torpedo-boat service the substitution of briquets for coal improves the evaporative efficiency of the boiler.

FOR WOMEN AND HOME. The best way to set the dye of black flax-throwed hose is to put a couple of good pinches of common salt in the washing water.

Mending should be regularly done, and not allowed to accumulate from one week's end to the next, or it will prove almost impossible to accomplish it.

Patent leather shoes should be cleaned with sweet oil applied with a piece of flannel and afterward with a soft duster or wad of cotton.

If a shoe be accidentally scorched it can be restored by spreading soft soap over the place immediately and, when cool, rubbing off the soap and rubbing the leather with a little sweet oil or vaseline.

A small piece of borax dissolved in the mouth relieves hoarseness, and often allays a cough induced by throat irritation. Used often as a gargle it is healing for a cankered mouth or sore throat.

To loosen a glass stopper soak a corner of a glass cloth in boiling water and then wrap it around the neck of the bottle. The heat will cause the glass of the neck to expand and the stopper may then be easily removed.

To the woman who values her personal appearance a pair of chamois gloves are a boon and a blessing during the renovating periods. They save the hands greatly, can be worn until soiled, and when washed in tepid water and soap suds are just as good as ever.

The fine china or colored glass may be neatly mended by painting the edges with the white of an egg slightly beaten, dipping the edge in finely powdered unslacked lime, and quickly pressing the two edges together, holding them firmly for a few minutes. The lime will slacken and harden very quickly.

To prevent a bruise from becoming discolored, immediately apply a cloth wrung out in water as hot as can be borne, changing the cloth as soon as it loses its heat. If hot water is not to be had, moisten some dry starch with cold water and cover the bruised part with the paste thus made.

Don't let your kitchen be a work-room only. For the convenience of your maid, let there be an easy chair, in one corner put a looking glass, in the other a timepiece. If there is an unused door, make it a pretty closet by setting, in the frame work, three or four shelves, which, when painted, make a tidy place for odds and ends of the tailors.

Crinkled Japanese paper, which comes in greens, blues and soft tans, is being used in bedrooms and dressing rooms for the covering of shelves and dresser tops. Where the colors harmonize with those of the walls and carpet of the room, the effect is very pleasing. The edges of the paper are pulled out slightly and are allowed to fall over the edge of the shelf or dresser top.

Embossed leather may be cleaned with turpentine applied with a soft cloth. This removes the stains but slightly stiffens the leather, which must be made pliable again by being rubbed briskly with crude oil. Use a very little oil and go over the piece with one of the clean cloths upon which no oil has been put; as care must be taken to get all the surface grease off to prevent soiling the clothes.

Plain Sailing

Don't worry, don't get flustered. If you've lost anything.... if your cook leaves.... if you need a nurse.... if there's sickness in the family.... if there's any other urgent need of extra help.... if you want an errand boy.... or a clerk.... extra hands for the factory or farm.... a driver.... a salesman.... a collector.... a porter.... or a handy man—no matter how urgent the need, just insert a classified ad in The Missoulian. You will find it is all plain sailing. You can easily find the lost article or hire any kind of help through the little Missoulian ads. What's more—you can easily find and buy, at an advantageous price, any article or property you may need. It pays to read The Missoulian Munnimaker ads. It pays to use them, too.

LOST. LOST—FOX TERRIER PUP, REWARD for return to Orvis Music house.

One insertion of this ad was effective. At 9 o'clock on the morning it appeared the lost dog was restored to the owner.

TRY IT YOURSELF.
