GORMAN DISMISSED ON ROBBERY CHARGE

City Attorney Woody yesterday dismissed the case against Thomas Gorman, who was to have been tried before Justice of the Peace Dyson, on the basis that sufficient evidence could not be found against him. Gorman was one of the four men arrested Sunday on the charge of having robbed a man in the Montana saloon, and when brought before the court for their preliminary hearing all but Gorman pleaded guilty and will be tried in the district court. Gorman, however, pleaded not guilty, and was dismissed today.

Deafness Cannot Be Cured.
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; cases occur out of ten are caused by neuralgia, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO., Toledo, O. Sold by druggists. See "Little Family Pills for Constipation."

CONVENES DISTRICT COURT

JUDGE MYERS SENTENCES THREE MEN TO PENITENTIARY—OTHER CASES HEARD.

Judge Myers convened court here yesterday, disposing of a number of cases before adjournment. The temporary restraining order prayed by the Clark Realty company to prevent the Chicago, Milwaukee & Puget Sound Railway company from blasting by means of the excessive use of powder or other explosives within 1,200 feet of the Clark dam below Bonner, was granted by the court.

The petition by the Chicago, Milwaukee & Puget Sound company for a condemnation order covering property owned by Mary K. Bandmann was continued to March 15, when arguments will be heard.

James Riley, Frank Stork and Joe Murphy, who pleaded guilty in the justice court to the charge of robbing a man in the Montana saloon last Sunday night, were sentenced to serve two years in the state penitentiary.

The case of Louis May and Harry Gold, who are held to the district court on the charge of gambling, were continued to March 15, and bail bond in each case fixed at \$500.

In the case of J. C. Kelly, charged with burglary, a demurrer to the information submitted was overruled by the court. The prisoner pleaded not guilty and in lieu of bail bond in the amount of \$750 was held in jail pending a later hearing.

A. (S. B.) Protine, charged with assault in the first degree, pleaded not guilty and his bail bond was fixed at \$1,000, in default of which he was returned to the county jail. Protine was charged with assaulting John Dean at Salses on February 1.

Z. D. Brown, held on the charge of burglary of the Kern garage, pleaded not guilty and his bond was placed at \$1,000.

A "MARINER MISSIONARY."

On Sunday evening, March 14, Dr. Wilfred T. Grenfell, the famous "Mariner Missionary," will deliver a free lecture at the First Methodist Episcopal church on his thrilling work among the destitute deep sea fishermen of the far north—Labrador and its ice packs.

Dr. Grenfell has already established five free hospitals, an orphanage and a hospital ship for his work along that 2,000 miles of rocky, barren coast. He is devoting his entire time this winter to lecturing in the states in order to raise money to carry on his work among the fishermen of the frozen north. The demand is urgent. His lecture will be illustrated with stereoscopic views of his life work, showing icebergs, ice packs, wrecks on that rocky coast, reindeer and dog teams, snow scenes, etc.

When navigation is possible Dr. Grenfell forces his hospital ship through the ice from settlement to settlement, helping the sick and ministering to their souls. When the ice packs prevent his travels hundreds of miles along the coast by dog team.

IN THE THEATERS

If you want to laugh until you cry, if you want to see a play which excites all the human emotions, filled with pretty girls, catchy songs, marvelous dances and played by a splendid cast, you will see "The Girl Question," the delightful musical play which will be at the Barneto theater for one night, Thursday, March 11.

"The Girl Question" is now nearing its 100th performance, having been played 200 consecutive times at the La Salle theater, Chicago, and more than 500 on its tour throughout the country—a tour which has extended from Portland, Me., to El Paso, Texas.

"The Girl Question" was the second of that marvelous trio of successes written by Adams, Hough and Howard, young Chicago boys who have never yet known what it was to write a failure, and like the others of this wonderful trio, "The Time, the Place and the Girl" and "Stubborn Cinderella," this charming entertainment tells a story of every-day characters who by their naturalness and "spontaneity" at once excite the sympathy and admiration of an audience.

The production was staged by Harry Hanlon and there is incessant action, vivacity and enthusiasm displayed by the chorus in each of the songs and dances. No more fascinating, alluring crowd of beautiful show girls were ever seen in this city than will be found with "The Girl Question," while its ranks also include the famous "One Thousand Dollar Beauty Broilers."

APPLIES FOR NATURALIZATION.

CLOSING FORESTRY LECTURE GIVEN

STUDENTS HEAR F. I. ROCKWELL IN LAST OF MOST INTERESTING SERIES.

The last number of the series of 12 lectures at the state university by members of the local forestry staff was given yesterday afternoon by F. I. Rockwell, acting chief of products. Mr. Rockwell's lecture was on "The Use and Preservation of Forest Products," which proved to be an interesting as well as instructive subject for the close of the series.

The 12 lectures, which has been open to all the students and the public, have served as a fitting introduction to the establishment of a department of forestry at the state university. Many students who otherwise would not have been attracted to forestry are keenly interested in its study. There is a class this semester in elementary technical forestry work under E. C. Clifford of the local forestry staff. There is also a decided increase of interest in botany and other allied subjects. The forestry department will be already well started next fall, when a regular professor will be appointed.

In his talk yesterday Mr. Rockwell supplied some very interesting details relating to the products of the national forests and the necessity of taking care of the preserves. The speaker told of the need of curtailing the consumption of wood as fuel in order to preserve it for more valuable use. He told of the substitutes for wood which were being placed on the market, quoting the uses by the railroads of steel ties in their track beds where wood was formerly used. Mr. Rockwell stated that the railroads were beginning to see the approach of a dearth of wood for track building purposes, and were fortifying against famine. "One of the first steps toward conservation of forest resources," said Mr. Rockwell yesterday, "must be an attempt to better utilization of the harvested products." He said that a great waste attended the handling of wood from the time the timber is felled to the moment when the finished product is turned out of the hands of the manufacturer. The lecturer talked interestingly of the utilization of timber and made a number of good suggestions relative to the more economical management of the national forests.

The Tenderfoot Farmer

It was one of these experimental farmers, who put green spectacles on his cow and fed her shavings. His theory was that it didn't matter what the cow ate so long as she was fed. The questions of digestion and nourishment had not entered into his calculations.
It's only a "tenderfoot" farmer that would try such an experiment with a cow. But many a farmer feeds him- self regardless of digestion and nutrition. He might almost as well eat shavings for all the good he gets out of his food. The result is that the stomach grows "weak" the action of the organs of digestion and nutrition are impaired and the man suffers the miseries of dyspepsia and the agonies of nervousness.
To strengthen the stomach, restore the activity of the organs of digestion and nutrition and brace up the nerves, use Dr. Pierce's Golden Medical Discovery. It is an untailing remedy, and has the confidence of physicians as well as the praise of thousands healed by its use.
In the strictest sense "Golden Medical Discovery" is a temperance medicine. It contains neither laxatives nor narcotics, and is as free from alcohol as from opium, cocaine and other dangerous drugs. All ingredients printed on its outside wrapper.
Don't let a dealer delude you for his own profit. There is no medicine for stomach, liver and blood "just as good" as "Golden Medical Discovery."
