

### NEWSPAPERS LEADING THE FIGHT

FIFTY THOUSAND INCHES OF SPACE GIVEN TO THE CAMPAIGN AGAINST DISEASE.

Consumption is receiving nearly one-half mile of publicity a week, is the unique statement which the National Association for the Study and Prevention of Tuberculosis issues. According to some recent statistics compiled by that body, the various newspapers of the United States printed articles concerning tuberculosis, which, when measured, amounted to over 50,000 column inches of space in two weeks.

The investigation which the national association conducted included all of the daily and weekly newspapers throughout the United States as well as some of the larger journals and magazines. In the two weeks which were taken as a standard, it was found that 51,557 column inches of space was devoted to the subject of tuberculosis. If all of this matter were gathered together at one time, it would make a newspaper the ordinary size of 88 pages printed solid without any advertisements, all on the subject of tuberculosis. If it were arranged in one long chain, it would make a single column of matter four-fifths of a mile long and two and one-quarter inches wide.

Press Leads Fight. Among the numerous agencies which are today joining in the fight against tuberculosis such as the school, church and labor unions, the press is in the foremost rank. Never before in the history of American journalism has the press taken such a lively and continued interest in a subject pertaining to human health. When it is considered that tuberculosis alone kills nearly 200,000 people in the United States every year, and that there are at the present time at least 600,000 cases of this disease in the various parts of the United States, a sufficient warrant for the activity of the press is given.

The following states are leading at the present time in the amount of publicity being given to tuberculosis: New York, Pennsylvania, Massachusetts, Connecticut, New Jersey, Ohio, Missouri, Texas and Illinois. However, there is not a state in the Union in which the press is not devoting space to the subject of tuberculosis.

Tuberculosis Good News. Not only is the campaign being promoted by the weekly and daily press, but it has also been taken up by the various magazines, weekly story papers, trade journals, religious papers and others of a similar nature. Even the foreign papers are interested. A bulletin sent out recently by the national association was printed in five different languages. An instance of the readiness to co-operate in the campaign against tuberculosis may be noted in the experience of one prominent weekly journal which devotes itself entirely to philanthropic and charitable subjects. Seven years ago, when this paper started to publish items on tuberculosis, a number of its readers considered it extremely bad policy, because of the apparent indifference and repugnance of the subject. Today such articles are read largely and thoroughly.

Education Needed. The national association declares that consumption will never be wiped out until the prevalent ignorance con-

cerning this disease is overcome. To combat successfully this lack of knowledge, immense amounts of literature of various sorts are being distributed constantly. Within a year's time thousands of tons of leaflets, aggregating over 100,000,000 pages, are distributed by the various organizations engaged in the warfare against tuberculosis. But more than all of these individual agencies, the national association believes that the press is the greatest means of educating the masses concerning this disease. If the present rate of interest on the part of the newspaper world continues, it is estimated that within a few years every man, woman and child in the United States will have learned the simple doctrines of tuberculosis.

### NUMEROUS SALOONS MUST QUIT

RESULT OF ELECTION IN NINETEEN COUNTIES IN MICHIGAN IS "DRY."

Detroit, Mich., April 6.—More than 600 saloons and 10 breweries will be forced out of business in the 19 counties of the state which voted "dry" at yesterday's election. Returns late last night gave the "drys" 20 of the 27 counties in which the liquor question was voted upon but later figures swing Owasco county which has 17 saloons, into the "wet" column by 172 majority. In the eight counties which the liquor interests carried there are 300 saloons giving to the Anti-saloon league victory over two-thirds of the saloons which they attacked. The slender majority of 41 votes which the "drys" received in Jackson county, where there is a population of 47,000, indicates the bitterness of the fight. A recount is considered a certainty in this county. Washtenaw, Berrien, Monroe and Ottawa counties were the four big "wet" victories.

Washtenaw, with the University of Michigan within its borders rejected prohibition by 800 majority. In Berrien the "wets" secured 2,900 majority, in Ottawa 1,500 and in Monroe 1,500 majority.

CASE TO BE TRIED.

Washington, April 6.—Arguments upon the appeal taken from the decision of Judge Wright adjudging Samuel Gompers, Frank Morrison and John Altshoff in contempt of court for their alleged violation of the injunction granted against them upon the petition of the Buck Stove & Range company of St. Louis will begin April 19 before the district court of appeals.

"One Touch of Nature Makes the Whole World Kin."

When a rooster finds a big fat worm he calls all the hens in the farm yard to come and share it. A similar trait of human nature is to be observed when a man discovers something exceptionally good—he wants all his friends and neighbors to share the benefits of his discovery. This is the touch of nature that makes the whole world kin. This explains why people who have been cured by Chamberlain's Cough Remedy write letters to the manufacturers for publication, that others similarly ailing may also use it and obtain relief. Behind every one of these letters is a warm heartfelt wish of the writer to be of use to someone else. This remedy is for sale by all druggists.

### PROSPECTOR WINNER AT LAST

APPLICANT FOR TITLE TO PROPERTY IN HEART OF TOWN OF BURKE WINS OUT.

Spokane, April 6.—John Mader, a prospector in the Coeur d'Alenes, whose application for a patent on the Neversweat property in the heart of the town of Burke, Idaho, has been contested in every court having jurisdiction, has finally come into his own. The department of the interior decided in his favor after the lower courts and the district land office had turned down his petition. A letter from Frank Pierce, first assistant secretary of the department of the interior contains this information among other things:

"It is reasonable to believe that with more extensive development a rich mine might be opened in this claim. It is true that the owners have not done as extensive development upon the property as might have been done, but the records show that they have been hampered on every side by the protestants and others, all of which had a tendency to drain their resources and discourage them. Upon the whole record the evidence shows that a patent should be issued to the applicants. The judgment of the land office is reversed."

Mr. Mader, who is the chief owner of the property, announces that he will proceed with the development of the property, using modern machinery for extensive operations. The shaft has been sunk 82 feet from the surface, giving a depth of 22 feet below the tunnel level, and there a station is being cut for the installation of the machinery. The shaft will be sunk 150 feet below the present tunnel level, to crosscut for the vein.

D. J. Burr, a mining engineer, who recently made an expert examination of the Abbey Cyanide Gold Mining & Milling company's property of 35 claims on the eastern slope of the North Massena mountains near Kendall, Mont., says in his report that the ore body disclosed by the workings show an immense body of ore suitable for milling and amenable to treatment by cyanide process, adding that it can be milled and treated for \$2 a ton. The shaft has been sunk 200 feet down from the upper workings, and from the bottom of this shaft a crosscut has been run 256 feet which has cut the vein at a depth of 400 feet from the surface. From this point 110 feet of drifting has been done and cross cuts along this drift have shown the ore body to be 34 feet wide. Assays have been made from 12 samples taken across the entire width, and these give an average value of \$7 in gold to the ton.

Announcement is made that the Peck Mining and Milling company, which is now taking \$75 copper ore from the tunnel on its property near Peck, Idaho, will ship before the close of the summer. The tunnel is now in 300 feet, where the high values were found. The surface showing was not much above \$7 a ton. The recent strike has aroused new interest in the district and this will result in the working of many properties. The Peck property was located four years ago. While considerable development work has been done, the company did not prosecute such development as would fully determine the values of the ore. The work last winter has done more than any previous efforts to show the extent of the veins and the increase in values as the greater depth is attained.

L. N. Hyde, manager of the Copper Age and Edison properties east of the Monitor and four and one-half miles from Salsese, said on his arrival in Spokane that the tunnel is in 500 feet. The last 250 feet the men have been drifting on the vein, which is 28 feet wide. Several crosscuts have been made. The face is now in three feet of ore, running from 15 to 30 per cent. Alongside of this ore, found at a depth of 600 feet is a streak of oxide of copper with values in gold anywhere from \$10 to \$150. Mr. Hyde says that lack of fuel is responsible for the shut down at the Monitor mine.

Fred Shilling, manager of the Bonite Mining & Smelting company, owning 150 acres of patented ground on the Pend d'Oreille river, six miles below Newport, Wash., reports that the miners have been following a lead of copper ore for 30 feet. The vein is 200 feet wide and averages \$30 to the ton. This was struck at a depth of 200 feet, and has been improving steadily. There is a good water power on the property, which is equipped with a ventilating system, steel rails and accommodations for the men. He added that the company will soon be in position to ship ore.

James F. McCarthy, manager of the Alice property in the Coeur d'Alenes, made this statement in Spokane: "Development work on the Alice mine in the Coeur d'Alenes the coming summer will consist of a 100-ton mill and a new tunnel at the lower level. A winze has been sunk 250 feet from the breast of the present tunnel and the new one will be at a level with the bottom of the winze. The improvements and additional development will be done by assessment."

Reed Brothers have bonded the Pine Bar property, a free gold quartz proposition in the copper zone of the Grangeville district in northern Idaho, and active development work will be carried on throughout the season. The fissure is exposed on the level of the Snake river and the ledge is reported to be rich in gold. A strike of importance in the same district is reported on the Hinkson property, at one time a producing placer mine, but it is now a quartz proposition.

Preparations are being made in the vicinity of Stites, Idaho, for extensive operations on placer properties. The ditch and pipe line built on the Ligger workings last year will be extended to Meadow creek this season and it is expected to have a full head of water next year. Archibald Bishop, manager of the Moose creek place claims, will put 20 men at work

# Donohue's Opening Days

## While Easter Looms Within the Distance

"The Big Modern Store" presents an informal event wherein there is a style exhibit that outclasses anything of its kind heretofore attempted within our city. A parading of the products of master minds, domestic adaptations of Parisian gowns and millinery, tailored suits for everybody and Easter requisites of every character, in all the prevailing styles.

Come early in the week and avoid the flurry and haste of the days next receding Easter. Not only can we serve you advantageously, but you will serve yourself best by making your selections deliberately, carefully and, as a consequence, more tastefully.

## Easter Clothing for Men

Not a single point has been overlooked in our Men's department. No matter what profession a man may follow, we have good, reliable clothing here that was made especially for men in his particular walk of life. Clothes may not make the man, but they certainly have a great deal to do with it.

For the conservative man, the business man, the man who is extremely sensitive about his personal appearance, the famous Alfred Benjamin New York-made clothing is cheerfully recommended. These clothes are made for us by Alfred Benjamin & Co. in the great style center, and this enormous concern makes it possible to wear the prevailing New York styles for men today—not a season hence. That these garments are the highest type of fashionable tailoring, best workmanship and handsome patterns passes without question. Very moderately priced from \$22.50 to \$40.

For the dashing young man or college student who desires slightly conspicuous clothing we are prepared—garments that proclaim him a rising and thriving young gentleman. "Harvard Cut" and "Sophomore" clothes meet every demand for the accentuated fashionable cut, high-class materials, novel finish and adornments; modest prices, from \$22.50 to \$40.

Worthy clothing may be had in our "Pile of Style" and other good makes that contain more merit than you would ever expect to find in suits priced as low as \$15 to \$22.50.

## Exclusive Easter Gowns

The most discriminating shopper will appreciate this display of beautiful costumes. They are copies and adaptations of the original Parisian models and are thus suited to the conditions, requirements and means of the average woman. Refined and charming afternoon gowns made up in fancy Foulards and Messalines, with the delightful color schemes that are peculiar to the French artists in dressmaking. Add to all this the graceful lines of the all popular empire effects, all heavily embroidered with silk or silver and gold, satin sashes, exquisite lace yokes and other garnitures. Detailed description, no matter how accurate, could never do them justice. The lines as a whole are very, very pleasing, and we feel justified in saying that nothing quite so rich and beautiful in silk costumes has ever been shown in or about Missoula. The window display shows a very small part of these 50 different models. All these handsome Easter gowns are exclusive with us and are priced from \$20 to \$50.

## Tailor-Made Suits

Our showing of tailor-made suits is very complete. All the new spring materials and colorings are very much in evidence. Every suit is from one of New York's best manufacturers and authorities. Popular prices \$20 to \$40.

# Gorgeous Easter Millinery

Nothing is of more importance to the carefully dressed woman than the selection of her new spring or Easter hat, and justly so, for nothing can make or mar a handsome gown or suit more easily. The fame of our Millinery department has long since established us the leaders in fashionable hats. The season's styles permit of a vast array of pretty hats in both large and small shapes, and our stock was never so complete, permitting us to meet all demands.

Our pattern hats embody all the elegance and artistic color effects that the foremost designers of New York are capable of, and that is saying a great deal. There is a seemingly endless variety of handsomely plumed and appropriately trimmed pattern hats that have just arrived and are on display for the first time. These handsome and highly desirable copies of French models may be had as low as \$1.50, and absolutely exclusive ones from \$12.50 to \$40.

The strength of our Millinery section, however, lies in its extensive assortment of Popular Priced Trimmed Hats. We cannot be excelled by anyone in the individuality and character of our enormous line of trimmed dress hats at \$8.50 and \$10. This line includes the very best shapes, most exquisite trimmings, and the most becoming and desirable colors that it is possible for such a small amount of money to buy anywhere. Moreover, our own milliners are able to present some creations and make alterations that will bring out the lines and contour of the face to the best advantage—a very essential point when we must conform to fashion's decree for the prevailing modes of the season. Exclusive lines of fashionable trimmed hats priced from \$2.50 to \$12.50.

Also, we are showing an extensive line of children's bonnet effects and flats in white, pink, pale blue and cream. Many other new spring shapes and shades for misses and children pleasingly priced from 50¢ to \$5.

# D. J. DONOHUE CO.

In about two weeks. Other properties which will soon be in operation are the Montana and Big Sandy.

Butte-Cheban Gold Mining company, operating near Cheban, Wash., netted \$127,500 a ton on a shipment of 11,000 pounds of ore shipped last winter. It is announced that development work, which was pushed vigorously the last six months will be continued.

### POLITICS AND POLITICIANS

President Taft has accepted an invitation to attend the Mecklenburg celebration at Charlotte, N. C., May 29.

Charles Nagel, secretary of commerce and labor, is the first native Texan to hold a position in the cabinet.

The baby member of the house is Polite Elvins, of the Thirtieth Missouri district, who was sworn in the day he completed his 31st year.

William Allen White, editor of the Emporia Gazette, is being boomed for the republican nomination for lieutenant governor of Kansas.

Albert Abraham of Roseburg, a member of the state senate, has added his name to the list of prominent Oregonians who have announced their candidacy for the gubernatorial nomination in 1910.

The legislature of Minnesota, with but one dissenting voice, passed resolutions requesting representatives of the state in both houses of congress to use their best efforts to see that lumber, lumber products and coal are placed on the free list.

Governor Harmon of Ohio, Governor Marshall of Indiana and Representative Champ Clark of Missouri are to be chief speakers at the Jefferson day banquet of the National Democratic club in New York city on April 13.

In political circles in Mississippi there is a well-defined belief that the approaching senatorial contest will be a three-cornered affair and that Senator A. J. McLaughlin and ex-governor J. K. Vardaman will not be allowed to fight it out themselves. The name of J. S. Sexton, president of the Mississippi Bar association, is mentioned as a probable aspirant.

Lloyd W. Bowers, the new solicitor general of the United States, is 50 years old and a native of Springfield,

Mass. He was graduated from Yale college in 1879 and from Columbia university law school in 1882. He was admitted to the bar in Chicago in 1882 and since 1893 he has been general counsel for the Chicago & North-western Railway company. For several years he was president of the Chicago Law club.

President Taft will open the fourth Lakes-to-the-Gulf Deep Waterways convention in New Orleans next November. The convention will last three days, beginning on November 18. President Taft has pledged himself to attend the convention and has gone on record as favoring a big up-raise in the votes of union men on the deep waterways movement.

With the hope of carrying out the political program outlined last fall by the American Federation of Labor, an organization known as the working-man's political party has been launched in New York. Work is being done in every assembly district and an attempt will be made to concentrate the votes of union men on assembly candidates who will pledge themselves to work in the legislature for a modification of the injunction laws.

In view of the present widespread fight for equal suffrage it is interesting to note that Australia, New Zealand and Sweden give women full suffrage, as do the Isle of Man, Iceland and Finland. In Canada and Cape Colony, as in parts of India, women vote under various conditions for school and municipal officers. In Great Britain women who possess the necessary qualifications can vote for all officials except members of parliament.

### REDUCTION ORDERED.

Helena, April 6.—The state board of railroad commissioners today, as the result of a recent public hearing in this city, ordered a reduction in the rate on lime rock from B. & M. siding to Great Falls from 50 to 45 cents, but decided to make no changes into Butte, Helena, Anaconda and other smelting points.

Into each life some sorrow must fall; Wise people don't sit down and bawl; Only fools suicide or take to flight; Smart people take Rocky Mountain Tea at night. —David C. Smith. F. G. Peterson.

# BIG BLACKFOOT MILLING CO.

BONNER, MONTANA

# Pine Lumber

IN THE WEST

Mills at Bonner, St. Regis and Hamilton, with an Annual Production of One Hundred and Sixty Million Feet.

Complete factories for the manufacture of Box Shooks, Sash, Doors, Molding and all kinds of Interior Finish.
