

### IMPORTANT STRIKE REPORTED

**GOOD COPPER-BEARING ORE IS FOUND ON WOLF CREEK, IN MONTANA.**

Spokane, April 7.—Confirmation of an important strike of copper-bearing ore on the Wolf Creek Mining company's property on Wolf creek, Montana, is made by C. E. Russell of Spokane, manager of the property, who says that the ore body cut at a point 200 feet below the apex of the vein is four feet in width. It was encountered in an upraise made from a crosscut off the main tunnel, which is now in 447 feet. The face of the tunnel is in good ore. Samples of the entire ledge assayed average values of \$1.50 the ton based on 12 1-2 cents ore, which picked specimens run more than 40 per cent copper. The development work will be pushed. The company is a Spokane corporation and most of the stock is held in eastern Washington and western Montana. T. G. Cooper is president, C. E. Russell is vice president and manager and R. E. Vincent is secretary and treasurer.

Representatives of an eastern steel company will be in Spokane the second week in April to look over the property of the Deer Park Mining company, owning and operating tungsten deposits at Deer Park, Wash., which was recently inspected by an agent for a Duluth concern. The company has increased its activities on the Tungsten King property and will soon begin crosscutting on the ledges. The miners have followed the ledge down 80 feet and drifted 20 feet off the hill, ore coming in all the time. It is announced that development work will be rushed this spring and summer. The properties are 27 miles north of Spokane and there is every facility for handling the ore.

Stockholders of Idelwilde Mining company elected these officers at a meeting in Spokane: President, George Shell; vice president, F. J. McCormick; secretary and treasurer, J. W. McCune; directors, August Shtatz and W. R. Eisenhour. The properties near Elk City, Idaho, are being developed by the stockholders. The tunnel to tap the ore body at 400 feet at a depth of 250 feet is now in 310 feet. The surface of the vein has been thoroughly explored. At a depth of 30 feet, from a vein of eight feet, \$25 free milling ore was taken. It costs \$7 a ton to mine and mill the ore. If the tunnel cuts a good body of ore a 10-stamp mill will be erected.

Herman Froehlich, contractor on the Hamburg-American property on the Little North Fork river in the Coeur d'Alene, has brought out samples showing good copper values. The tunnel is in 100 feet. The property is located near Handspeck mine, which is doing well. The building of the smelter near these properties has stimulated mining the copper ledges in that district. The Hamburg-American company owns a number of claims with excellent copper showing on the surface and expects to tap its ledge within the next 100 feet.

Inrush of water has halted the work in the shaft on the Caledonia property in the Gardner district. An electric pump of 75 gallons a minute against a 500-foot head will be installed. Sinking will be resumed as soon as the water is out of the shaft.

Meanwhile drifting on the vein is being continued and the lead-silver ore is being taken out and stored at the rate of about 50 sacks a day. The company has on hand several cars of ore for shipment, which is being held awaiting better market conditions. The Caledonia will be among the regular shippers as soon as the market improves.

John Speal of the Coeur d'Alene Central Mining & Milling company, working since the spring of 1907 on the west branch of Big creek in northern Idaho, near the Bunker Hill & Sullivan holdings, reports the face of the drift is now in 600 feet, where a crosscut has disclosed 21 feet of mineralized quartz with stringers of solid galena at a depth of about 225 feet. A Herman, secretary and treasurer of the company, will make a personal inspection of the property in a short time.

G. W. Thompson, who has just returned from the Welpe district in Idaho, where he has been examining state-leased iron lands, has assays showing hematite ranging from 18 to 50 per cent. Diamond-drilling will be necessary to determine the extent. He says the development work will continue throughout the season and if the body of ore is found to be in the quantities indicated then Lewiston will become the Pittsburg of the west.

Eastern people have bonded the controlling interest of the North Fork Consolidated Mining company for \$250,000, effective May 1. The property, which is in the Coeur d'Alenes, consists of 24 1-2 claims adjoining the Snowstorm mine on the east.

J. R. Painter of Painter, Wyo., who bonded the Golden Crown group of quartz claims in the Elk City district, Idaho, is in camp preparing to begin more extensive work. He has had two shifts at work driving a crosscut tunnel all winter.

Joseph F. Thorn, superintendent of the Buster mine, has returned to Elk City from a visit to Boise basin, where he investigated some mining property by the Bradley syndicate, owners of the Buster.

J. L. Harper, manager of the New Republic company of Republic, Wash., announces that he has made a two years' contract with the Tacoma branch of the American Smelting & Refining company for treating its ores. The smelter is treating the lead ores from the Coeur d'Alene, among them the Hercules and Bunker Hill and Sullivan, and the silicious ores from Republic camp blend with the wet ores. Three cars of ore were shipped this week. It is similar to that which recently netted \$8,000 a ton. Neil Cochrane, formerly superintendent of the Mountain Lion mine and now managing the Jumper mine in California, will be identified with the camp in June.

**DOWIE DEFEATED.**  
Muskegon, Mich., April 7.—Complete returns now available show that the political debut on Monday of A. J. Gladstone Dowie, son of John Alexander Dowie, the prophet of the Zion movement, resulted in defeat. Gladstone Dowie was a candidate for clerk of Montague township on an independent ticket.

Foley's Honey and Tar is a safeguard against serious results from spring colds, which inflame the lungs and develop into pneumonia. Avoid counterfeits by insisting upon having the genuine Foley's Honey and Tar, which contains no harmful drugs. Garden City Drug Co., Geo. Freisheimer, Prop.

### PUBLIC LAND LAWS ARE IDEAL

**CONDITIONS IMPOSED UPON HOMESTEADERS IN HAWAII ARE VERY EASY.**

Honolulu, April 7.—The control of the public lands of Hawaii is vested in the territorial government, subject to some general conditions imposed by congress in the organic act under which the territory is constituted. The governor, through the commissioner of public lands, has the power to lease and sell lands under various conditions of homesteading; and steps are now being taken to open up a number of tracts to American settlers under easy conditions. A large part of the public lands suitable for agriculture have been under lease to sugar corporations, most of which leases were made before annexation and for long periods. Most of these leases will expire, however, within the next few years, and while the governor has the power to release them for a period not exceeding 15 years, every new lease must bear a clause permitting the government to cancel it at any time that it may be desired to use the lands for homesteading or for public purposes. The territory is thus in a position to supply its lands to settlers as fast as may be necessary.

Although the law provides a number of systems by which the lands may be disposed of, the governor has the option of making use of such form as he sees fit. At the present time a special form of agreement is being used which has proved most satisfactory to everybody, making the conditions extremely easy to the settler, and insures the territory largely against speculators. Land opened under this agreement is sold at approximately 25 per cent of its appraised value, and the payments may be extended over a period of 20 years, with without interest for the first 10 years. 5 per cent is due. Thereafter 5 per cent is required on receiving right of entry, and two years later a second 5 per cent is due. Thereafter 5 per cent per year is required to be paid.

**Ten Years.**  
The homesteader cannot receive a patent in less than 10 years, but at the end of that time he may make all his payments, and receive a patent in fee simple.

Five years' residence upon the property is necessary to secure a title, but the settler may spread this over the first 10 years if he desires, thus permitting him to get his land to producing an income before being required to actually live on it. He is also required by his agreement to have at least 10 per cent of his arable land under cultivation within two years after date of sale, and 10 per cent additional each succeeding year until he shall have at least 50 per cent under tillage. As much of the land in the territory is interspersed with land not available for cultivation, the agreement requires that when a portion of a settler's land is of this character, he shall be required to plant it in trees—five trees per acre within the first two years, and five additional per acre each succeeding year until a total of 25 per acre have been planted.

**Much Easier.**  
Except in the length of time required for residence, and to obtain a patent, the conditions of the Hawaiian law is in every way easier for the bona fide settler than the federal homestead laws. The land commissioner, with the consent of the governor is empowered to extend time of payments, of cultivation, tree planting, etc., when there is good reason why the settler has been unable to fulfill any of these conditions. The desire of the administration and of public sentiment in the territory, to have the lands occupied by prosperous American citizens, insures the most liberal and helpful interest being taken in every person taxing up land in good faith.

Another feature, which is not a part of the federal laws, and which should appeal most strongly to the homesteeker, is the provisions applying to forfeitures. If a settler for some reason fails to make good in his agreement, and thereby forfeits his holdings, the law provides that upon the sale of the surrendered property, an appraisement shall be made on the permanent improvements and this figure added as an upset price to the value when the land is resold. The first holder will receive the value of the improvements, and a portion of any increase over the original selling price of the land, less such rentals and costs as he may owe. This provision of the law has made it possible for the settler to borrow money for developing his land, giving a lien on his buildings and other improvements. The territorial government recognizes this right, and has a form of mortgage acceptable to it in this connection.

The territorial land office has had a greater number of inquiries from the mainland since the first of the year, from persons who desire information concerning the possibilities in Hawaii, and every steamer from the coast brings homesteaders, an increasingly large number of whom are returning.

**CITED FOR CONTEMPT.**  
Reno, Nev., April 7.—George Graham Rice and Merritt Teague, editors of the Nevada Mining News were ordered cited for contempt of court by Judge Lagan today for publishing an article on March 25, accusing Bank Examiner F. E. Wilds of malfeasance in office and attacking Judge Lagan for not ousting him. The citation is issued for April 24.

**GREAT DAMAGE DONE.**  
San Francisco, April 7.—Great damage was done by a tidal wave that swept over the islands of Biuanga and Moorea on March 15, according to reports brought by the steamer Mariposa arriving today from Tahiti. No lives were reported lost. The wave is attributed to recent volcanic eruptions in New Zealand.

**BASEBALL PLAYER DIES.**  
New York, April 7.—George Miller, known as "Calliope" or "Fog-Horn" Miller, well known a decade ago as a professional baseball player died yesterday at his home in Brooklyn.

### GAMBLING CASES SET FOR TRIAL

**ARRESTS OF DARBY RESIDENTS CAUSE GREAT SENSATION AT HAMILTON.**

Special Correspondence.  
Hamilton, April 6.—A sensation has been created as a result of the numerous arrests that have been made in Darby during the past few days. Today the delegation from that place all came to Hamilton in a bunch and the justices of the peace and County Attorney R. Lee McCulloch have been busy setting the dates for trying the numerous cases. The cases were set for hearing in Justice Whaley's court as follows:

James Shelton, charged with gambling; put under \$500 bonds; trial set for April 15.

Robert Burns, charged with gambling; put under \$500 bonds; trial set for April 17.

Louis Connor, charged with assault and battery on Justice of the Peace Smith of Darby; put under \$500 bonds; trial set for May 3.

George Wildie and F. A. Gorus, charged with fighting game cocks; trial set for April 26.

Thompson and Lee Shelton, charged with netting game cocks; trial set for April 27.

Milton Hammond and A. McGlaughlin, charged with fighting game cocks; trial set for April 28.

The rest of the offenders will be tried in Justice White's court, their trials being set as follows:

Harry Gilford and Ed Ballill, charged with fighting game cocks; bonds fixed at \$200; trial set for April 19.

James Borgoyne, arrested for permitting "black jack" to be played in his saloon for money; bond fixed at \$200; trial set for April 21.

Louis Connor, arrested for conducting a game of poker; bond fixed at \$200; trial set for April 19.

Milton Hammond, charged with permitting poker to be played in his bar room; bonds put at \$200; trial set for April 23.

**HERPICIDE'S MISSION.**  
It Takes Away the Dread of Birthdays.

Nothing is more annoying to men and women of middle age than to see those unmistakable signs of age—thin hair and grayness—approaching. But science has discovered that these conditions are no longer "unmistakable" evidences of old age, for the dandruff germ theory proves that even very young people may suffer hair loss, while those fortunate enough to escape the ravages of the scalp germ, retain their abundant locks to a ripe old age. Newbro's Herpicide kills the dandruff germ and removes the risk of appearing old before your time. Save your hair and your feelings, by using genuine Herpicide. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit Mich. Two sizes—50c and \$1. Missoula Drug Co., special agents.

### HADLEY DISCUSSES SALOON QUESTION

Jefferson City, Mo., April 7.—Whether by submitting to the voters of the state a proposed constitutional amendment providing for state-wide prohibition and thus making the subject a matter of active controversy for two years, any useful public purpose would be served, was declared by Governor Hadley today to be the test by which the legislature should treat the measure. This opinion was expressed in a special message which the executive addressed to the general assembly early in which he discussed the liquor question at length. Some stringent laws against the sale of liquor in counties which have adopted local option is recommended.

**CONTRACTORS INDICTED.**  
Little Rock, Ark., April 7.—A. M. Morrow, A. G. Price and R. L. Leonard, three Mississippi river lead contractors were indicted in the federal court here today charged with working their employes over eight hours per day on government work.

### A Clean Man

Outside cleanliness is less than half the battle. A man may scrub himself a dozen times a day, and still be unclean. Good health means cleanliness not only outside, but inside. It means a clean stomach, clean bowels, clean blood, a clean liver, and new, clean, healthy tissues. The man who is clean in this way will look it and set it. He will work with energy and think clean, clear, healthy thoughts.

He will never be troubled with liver, lung, stomach or blood disorders. Dyspepsia and indigestion originate in unclean stomachs. Blood diseases are found where there is unclean blood. Consumption and bronchitis mean unclean lungs.

**Dr. Pierce's Golden Medical Discovery** prevents these diseases. It makes a man's insides clean and healthy. It cleans the digestive organs, makes pure, clean blood, and cleans, healthy flesh.

It restores tone to the nervous system, and cures nervous exhaustion and prostration. It contains no alcohol or habit-forming drugs. Constipation is the most unclean uncleanliness. Dr. Pierce's Pleasant Pills cure it. They never gripe. Easy to take as candy.

# Milady's Headdress

**Millinery Lore of Great Moment to Every Woman When Selecting Her Easter Bonnet**

**Materials** This is a year of distinctly new things in the art of millinery. A glance at the portraits of the ladies of the time of Napoleon and Empress Josephine will show draped toques which give inspiration for a revival of the styles of today. The keynote is simplicity. Bonnet effects and turbans of horsehair braid and other filmy material over wire frames are consequently very popular, but a season of straws is inevitable, the most important ones being Milan, chip, hemp braids, Tuscan, Leghorn and rough straws of many kinds.

**Shapes** Whether the hat be large or small, high or low, depends on the taste of the wearer. Turbans are to have a great vogue, and while the Cossack is very prominent, the very latest ideas are the flower pot or lamp shade effect. The bowl shape and bee hive are also destined to be very popular with many. Other styles in larger hats are conspicuous by their drop brims, mushrooms and Charlotte Corday ideas, quite different from last season's shapes. A few sailors with large, flat crowns may also be had. Though large hats are much thought of, the designers have prepared many small shapes along lines of latest fashion, but greatly modified, in which our showing is remarkably strong.

**Colors** The great feature of this season's colorings is their exquisite delicacy. In the flowers, particularly, the colors are as subtle and dainty as could be imagined. To enumerate them as lavender, pink, rose, purple, cerise, blue, gray, yellow and so forth does not convey the idea, for though they are the fundamental colors, each is presented in such a marvelously delicate and suggestive tone as to defy description. Amethyst shades are a feature of the season, wisteria colorings are prominent, as is also Catawba, but old rose shades are most popular because of the general becomingness.

**Ornaments** Fancy pins studded with gems and buckles of all sizes are very important to fashion's schemes for spring and summer. Though gold and silver braids and garnitures are very pronounced, jet trimmings are decidedly the favored thing, jet tassels and pendants, beads in strands and festoons and novelty bands of all kinds are being used. A most striking effect is noticeable in the combining of black and white garlands of diminutive roses are ornaments worthy of particular note.

# D. J. Donohue Co.

**SEVERAL DECISIONS OF IMPORT EXPECTED**

Paris, April 7.—The meeting of French episcopate to be held in Rome April 18, on the occasion of the beautification of Joan d'Arc is expected to result in several important decisions, especially with regard to the future political attitude of French catholics. It is reported that disciplinary matters are contemplated against Mgr. Amitté, the archbishop of Paris, for a passage in a diocesan address counselling respect for the laws of the republic and against Mgr. Mignot, archbishop of Toulouse and Mgr. Pussat, archbishop of Rouen, for modernist views.

We often wonder how any person can be persuaded into taking anything but Foley's Honey and Tar for coughs, colds and lung trouble. Do not be fooled into accepting "own make" or other substitutes. The genuine contains no harmful drugs and is in a yellow package. Garden City Drug Co., Geo. Freisheimer, Prop.

**DIES OF NEPHRITIS.**  
Bellingham, Wash., April 7.—Kenneth Martin of Rossland, B. C., a wealthy hotel owner and politician of British Columbia, who was taken from a Great Northern train Monday night suffering from loss of memory and apparently demented, died of acute nephritis.

**ESTIMATES FURNISHED FROM PLANS**  
Largest stock of seasoned timber always on hand for the prompt filling of orders for the commercial trade. Write for price list.

Retail yards in Butte, Helena and Missoula, dealing in Lumber, Mill Work, Lath, Coal, Lime, Building Paper, etc.

The Missoula yard is now making deliveries of the 16-inch mill wood at \$3.75 per cartload. Phone 106 and order a load.
