

QUIET IS RESTORED IN TURKEY

NEW GOVERNMENT OFFICIALS TAKE OFFICE AND TROOPS RETURN TO BARRACKS.

Constantinople, April 14.—After the stirring events of yesterday and the early part of today in Constantinople, the successful formation of the cabinet and the issue of an imperial proclamation, ordering the observance of the Sheri laws and the preservation of the constitution, served to bring about a comparatively peaceful situation here tonight.

The formation of the cabinet, has greatly relieved the tension. Most of the people passed a sleepless night owing to the continued discharge of musketry. Tonight the city is quiet; the troops have returned to their barracks and the crowds in the Stamboul quarter have returned to their homes.

Confidence is gradually returning, although the military situation will require all the energies of the new government for its successful handling and the promulgation of wise measures so that the army may be placed on a more satisfactory basis.

It is noteworthy that while the revolution of last July was the work of officers, the present movement was carried forward by the soldiers, aided by the religious party.

The grand vizier, Shiek Ul Islam, arrived at the porte in state and was cheered by an immense crowd. The precincts of the porte were crowded in every part and the hall where the ministry was installed was packed to overflowing.

An imperial order was issued proclaiming Tewfik Pasha grand vizier and confirming Zia Eddin Effendi as Shiek Ul Islam. It also ordained the strict observance of the Sheri laws and the preservation of the constitution.

The sultan adds that the observance of the instructions laid down in the order is of the utmost importance, and concluded by invoking divine assistance on the efforts of the grand vizier and the cabinet, which is composed of elements outside of the parliamentary parties and which generally is considered as transitory and likely to lead eventually to the return of the former grand vizier, Kiamil Pasha, and the former war minister, Nazim Pasha.

PRESIDENT ATTENDS THEATER

MR. TAFT SEES PRODUCTION OF "IF I WERE KING" IN NEW YORK CITY.

New York, April 14.—President Taft, on his way to New Haven to attend a meeting of the Yale corporation tomorrow, stopped over in New York tonight as the guest of his brother, Henry W. Taft.

Today's brief respite from official duties was decidedly agreeable to the president. He usually passes from eight to nine hours a day in the executive offices of the White House, and rarely eats luncheon.

As announced from Washington, the new summer capital will be at Woodbury Point, Beverly, Mass. The president is looking forward to playing a great deal of golf. He hopes to reach his summer home soon after the first of June.

A number of the senate leaders have expressed the opinion that the new tariff bill will be ready for his signature by June 1.

The president still is being strongly urged by western senators and representatives to make an extensive trip through the middle west this summer, but the matter is being held in abeyance.

Experts in cut glass recommend the following as the best method of cleaning cut glass articles: Wash the glass thoroughly with warm soapsuds and cover with sawdust.

Vessels of the German navy have been equipped with a novel life-saving apparatus resembling a huge basket with its sides made of rope ladders.

DR. DODD AT THE MISSOULA HOTEL

IS BEING KEPT BUSY—MANY WEARING GLASSES WHICH ARE INJURY TO THEM.

The above pictures show a divergent squint. This woman was given up to die from "tuberculosis." After six months she was well and doing the housework for her husband and six children.

COAL RATE HEARING COMMENCES

OPERATORS AND RAILROADS ARE WELL REPRESENTED AT SESSION IN HELENA.

Special to The Daily Missoulian. Helena, April 14.—The coal operators of Montana and the railroads were well represented in the hearing on the coal rates which began here today before the state railroad commission.

The principal complainants were operators in the Bear Creek field, who objected to the 50-cent a ton arbitrary rate which they have to pay the railroads and the Red Lodge mines escape.

All of the operators wanted a lower rate on slack and steam coal into Butte, saying that the Oregon Short Line made such a rate from Utah and Wyoming, so as to enable, out of the state operators, to market that grade in Butte, which the Montana operators could not do.

THAD LANE IS FREED FROM RESPONSIBILITY

Thad (Shorty) Lane and his brother, Noyes, the latter of whom was cut in a free-for-all fight in a saloon Sunday night, were brought before Justice of the Peace Small yesterday afternoon in order that the official might determine what action to take in the case.

Experts in cut glass recommend the following as the best method of cleaning cut glass articles: Wash the glass thoroughly with warm soapsuds and cover with sawdust.

HERE'S a rough-weather overcoat, called an autocoat, but useful for any wearer who wants protection.

Big, double breasted style, with buttons from chin to ankle, with big patch pockets and buttoned flaps; it's a Hart, Schaffner & Marx special style, and it has all the characteristics which make these clothes so much better than any others.

The, all-wool fabrics, the smart style, the thorough tailoring; all these are found in this and all the garments they make.

Plenty of other overcoat styles here, \$15 to \$35; suits \$12.50 to \$40.

This Store Is the Home of Men's Good Wearing Apparel.

MISSOULA MERCANTILE CO.

GOTCH VICTORIOUS IN MATCH

CHAMPION WRESTLER OF THE WORLD SUCCEEDS IN RETAINING HIS TITLE.

Chicago, April 14.—Frank Gotch of Humboldt, Iowa, succeeded in retaining his title to the world's championship tonight by defeating Yussif Mahmut of Bulgaria in a fast and furious wrestling match.

Declared a Draw. The second preliminary, between Henry Gehring of Cleveland and Charles Post of Buffalo, was declared a draw in order to hurry the program.

Butted About. For the first three minutes the two men butted about the ring without either getting a hold.

Notes of Science. It takes 13.82 cubic feet of air to weight a pound.

Over 100,000,000 tons of coal are used by the railroads of the United States annually.

By soaking corks used in glue or mullage bottles in vaseline their sticking will be prevented.

The Canadian government has imported six Siberian yaks and will try to breed them in Ottawa as a food animal.

It is estimated that the number of failures in electrically-welded rail joints is not more than 2 per cent.

Electric power is used on 2,288 miles of street railways in Great Britain to 18 miles operated by other means.

Experiments with ostrich farming in Australia, the eggs being hatched by artificial incubation, are proving successful.

With a circle of 49 miles in diameter, with its center in New York, there are more telephones than in all Great Britain.

During the past 10 years the Russian government has spent \$84,510,000 on improving old railroads and building new ones.

A pound of coppers and eight ounces of carbolic acid to a gallon of water will make a cheap and effective disinfectant.

The total pig iron production of the United States last year was 15,936,018 long tons as against 25,781,361 tons in 1907.

above the street, probably will be utilized as a wireless telegraph station, to be controlled by the municipality.

The chief ingredients in the "paste" from which imitation jewels are made are potash, oxide of lead, borax and silica, in varying quantities, according to the gem to be counterfeited.

The artesian wells of Gulfport, Miss., a city of 10,000 population, are sufficiently powerful to drive the water through the pipes with pressure enough for ordinary fire-lighting purposes.

About 600 patents are granted each year to British women upon inventions ranging from articles distinctly feminine in nature to motors, railroad cars, flying machines and wireless telegraphy.

In government tests at Washington samples of the chain to be used on the gear of the Panama canal locks withstood tensile tests of 153,000 pounds to the square inch before the metal parted.

Probably the world's swiftest battleship is the British Helderophor, which recently made 25 1/4 knots in an official trial.

A French naturalist claims that man could not exist nine years after the birds were exterminated as insects would destroy all vegetation despite the use of all the poisons that could be made.

An inexpensive electric message outfit may be made by connecting two ordinary table lamps with as many battery cells as are desired. The operator can be insulated by wearing kid or rubber gloves.

The naval observatory at Washington has abandoned the work of tracking the movements of newly-discovered asteroids and an appeal has been issued to the astronomers of America to take the work up.

A new type of electric locomotive, of which the New York Central railroad will soon have 20, is capable of 4,000 horsepower at high speed, the armatures being mounted directly on the driving axles.

Austria is seeking to establish a government monopoly upon all coal mines to be opened in future as well as on sites for which permits have been granted but which shall not be developed for three years.

France is about to amend its patent law to provide that a patent shall lapse if its holder shall fail to exercise his right in France or in the colonies of France for a period of three years from its granting.

By using two highly sensitive pendulums suspended in a well German scientist has found that the surface of the earth rises and falls about eight inches every 24 hours, having tides similar to the oceans.

The largest pontoon bridge in the world is in India, connecting Calcutta with Howrah, an important railroad terminal and cotton and manufacturing center.

A monkey wrench, with a pivoted handle, so that it can be folded and carried in the pocket, is the invention of an Indiana man. A lock nut keeps it rigid when opened.

To aid horses to keep their footing on slippery streets, a Massachusetts veterinary has invented a chain tread, which may be buckled upon their hoofs without the use of tools.

A Russian engineer claims to prevent scale in boilers by introducing a small amount of linseed oil in a perforated tank, from which the oil percolates to the surface of the water.

Probably the oldest derricks in the world that still are in use are two at Trier, Germany, erected in 1413, and one at Andernach, Germany, built in 1554. The loads are chain-lifted by train wheels, 18 feet in diameter.

With no companions but Eskimos and dogs, Albert Harrison, the explorer, expects next year to travel by sledge from the delta of the Mackenzie river in North America, over the unexplored polar regions of Spitzbergen.

Rambler Runabout at a Bargain Price

This machine is second-hand, but in the very cream of condition. It has a top, folding glass front, new extra tire and all the necessary equipments of a machine of this kind. Call and inspect it.
