ARCHITECTS' PLANS ACCEPTED

SPECIFICATIONS OF LINK & HAIRE FOR WEST SIDE SCHOOL CHOSEN BY BOARD.

At last the matter of a new school house for the west side has taken definite form; plans for its construction have been accepted. This was done by the school board at their meeting yesterday afternoon after they had heard the different architects explain the details of their plans every day for a week. Link & Haire were the architects whose plans were at last accepted, and they will at once prepare for their part of the work of construction.

The plans which have been accepted are for a two-story building 518x8 feet, built of brick throughout. According to the estimates of the contractors the building is to cost between \$35,000 and \$36,500, without the furniture, which, it is estimated, will cost about \$3,500 more. This will bring the entire cost of the building with all of the fixtures within the \$40,000 mark, which was set in the recent school election. Link & Haire have designed a great many similar buildings for cities all over the country, and the present structure has benefited by their experience in that it will contain every modern convenience and appliance which it is possible to put in.

Special Features.

The special features of the building will be in the line of heating and ventilating. The board has laid especial stress on these two points, and as a result the school has been so designed as to give the best possible service in these lines. The boiler room is to be lined with concrete and made fireproof in every way, and the exits and stairways will be fitted so that the building may be emptied without delay in case of fire or other accident. For the ventilation a huge fan has been provided in addition to the ordinary flues and air passages, so that a current of air may be assured on the quietest days. This fan will be run with a dynamo in the summer and by steam from the boiler in the winter.

The sewer problem was another hard proposition for the board to handle, for there are no sewers on the west side, and the river is distant from the building at least a mile. The board will, however, according to the present plans, put in what is called a septic tank, which does away with all the sewage by means of a chemical change.

According to the plans of the architects as passed upon by the board, the building will contain eight rooms, all of them large and airy and each with

MEETING DISCUSSES IMPROVEMENT PLANS

The property holders on University avenue met last night in the rooms of the Missoula club and discussed the matter of the improvement district which had recently been created covering the street. City Engineer W. A. Mayo met with them and explained the plans of the city in regard to the district, and asked that the city be informed as to the wishes of the meeting in regard to the work before the council should meet again. In accordance with this a committee of three, consisting of Messrs. Newlon, Hughes and Mayo, was delegated to appear before the council at its next meeting and present the case of the residents of the avenue.

After the meeting had been adjourned it was, on suggestion of W. H. Smead, called together again as a meeting of the south side, and a committee of three, W. H. Smead, Frank Keith and Dr. J. P. Rowe, appointed to meet with the council at some future date and petition them to open up South Higgins avenue to its full width.

ADVERTISED LETTERS.

Unclaimed letters remaining in the Missoula post office for week ending April 23. If people would use care in having mail properly addressed it would save the post office trouble and keep letters out of these lists. One cent due for advertising.

CLOSER RELATIONS WOULD BE WELCOMED

St. Petersburg, April 23.—The Novoe Vyrema today publishes a leading editorial article bearing evidence of inspiration, in which the prospective negotiations in the matter of Russo-American accord are approved and welcomed. The paper points out that Russian public opinion already has shown itself in full sympathy with closer relations between Russia and America and that a conclusion of an understanding at the time of William H. Taft's visit to St. Petersburg would have been welcome. The paper says that such an understanding would imply no hostility to Japan, since Russia's political conflict with her eastern neighbor has passed, but would merely serve to insure the agreements already concluded with Japan.

DEATH PROBABLY DUE TO WHEAT ACTIVITIES

Denver, April 23.—The recent skyrocketing in wheat and flour may have been responsible for the suicide early this morning of an unknown German, apparently about 50 years of age, who deliberately threw himself underneath the wheels of a street car at Fifteenth street and Cleveland place. The man was dragged nearly a block, his body being terribly mangled. Clippings from Chicago papers but a few days old were found in his pockets, all of them containing articles on the wheat and flour situation.

"I'd Rather Die, Doctor, than have my feet cut off," said M. L. Bingham, of Princeville, Ill., "but you'll die from gangrene (which had eaten away eight toes) if you don't," said all doctors. Instead—he used Bucklen's Arica Salve till wholly cured. Its cures of Eczema, Fever Sores, Bolls, Burns and Piles astound the world! 25c at G. Freishelmer's.

ball had been thrown. The winners started the game with Dallas on the slab, but he only lasted two innings, and was replaced by Stover, who pulled the team out of the hole by one run. Prescott was at the receiving end of the third division's battery and did some good work on the pan. Will Hoopes dealt out the curves for the fourth division bunch, but his opponents were a little too much for him, and a few hits, combined with a little bad fielding, lost the game. Clay Spain caught for the fourth division. The boys will meet again Monday and play a return game.

J. MONTGOMERY, 1630 BOULDER AVE

CURED OF HEADACHE, NEUROUSNESS, DIZZINESS, STOMACH TROUBLE BY DR. DODD.

"My eyes were failing me, I suffered with dizzy spells of frequent occurrence, pain in head and back. I had indigestion of the worst form. I consulted Dr. Dodd and was fitted with glasses. He advised me what to eat and drink and what to avoid. I followed his directions and wore his glasses, and now after 10 days I find that I am practically a well man. I can truthfully say that I feel 10 years younger. My eyes are in perfect condition, no dizziness or pain in head and back and my stomach trouble has almost entirely disappeared. My son has been in bad health for some time. Not a week passed that he was not laid up. His rapid improvement is what prompted me to consult Dr. Dodd. My eyes are in perfect condition. He never complains now and is able to attend school regularly. Dr. Dodd has my permission to publish this testimonial and I would add that I had been subject to slight fainting spells from which I have recovered entirely under his treatment."

"JOHN MONTGOMERY."

Dr. Dodd may be consulted free at the Missoula hotel. He is permanently located in Butte and comes here with the indorsement of bankers and business men from all parts of the state.
