Directors: Ferdinand Kennett, M. A. Fish, G. A. Wolf, John C. Lebsou, J. H. T. Ryman. A General Banking Business Transacted. Billiken, \$1. Send to Reeves' Music House, Helena.

GIANT WATER POWER AVAILABLE

GREAT ELECTRICAL ENERGY CAN BE DEVELOPED AT GOVERNMENT LOCK.

St. Paul, June 15.—An exhaustive investigation just completed by a commission of government engineers, acting with local officers of the government engineer's office, city officials of St. Paul and Minneapolis and prominent business men, has demonstrated that 15,000 horsepower of electrical energy can be developed at the lower of the two low navigation locks on the Mississippi just above St. Paul, by the expenditure of an additional \$250,000. The government makes the unusual proposition that it will permit the use of power at the lock, provided the two cities or other interests will bear the additional cost. That the power will be used is already settled. Whether it will be used by a private power company, or jointly by the state of Minnesota and the two adjacent cities, is a question which will be determined by a joint commission, composed of three men named by Governor Johnson and three by each of the two mayors.

The government has completed one lock and dam and partially completed the second, or lower, of the two. To develop the power the second dam must be raised 15 feet, utilizing present foundations and the work already completed. This will provide a 30-foot dam, raising a large head of water and developing enormous power. The state is already interested and wishes a portion of the power for use at the state university, the state agricultural school, which is one of the largest in the United States, and the state fair grounds. The government requires 1,000 horsepower, and the two cities of St. Paul and Minneapolis have need of the balance.

The government's proposition, while it does not establish a precedent, is unusual, and the proposed improvements will be the first of its kind in the northwestern United States. The investigations prove that the power can be developed at exceptionally low cost. The most important problems now to be faced are the division of the expenses and the division of power to be developed as between the government, state and the cities. The partnership in power, while novel, has been proven feasible. The power plant, when built, will be only a short distance from Fort Snelling, an immense military post, and convenient both to the state institutions and to St. Paul and Minneapolis. The government was represented in the conferences by Major C. S. Ichnie, in charge of the upper Mississippi improvement work; Major Shunk, engineer who supervised the construction of the locks, and Major Irwin, of Minneapolis, who had the assistance of Major S. W. Miller, U. S. A., and J. D. Du Sane, John Wade and G. W. Freeman, government engineers from the St. Paul office. Mayors Lawler of St. Paul and Hayes of Minneapolis, together with officers of the city government, council members and business men participated in the investigations. The report of the joint commission will be made to the board of engineers, after which the project will be referred to Washington. Legislation will be required before St. Paul and Minneapolis will be able to participate in the cost.

St. Paul, June 15.—The efforts of students of the University of Minnesota for the past two years to persuade the regents to establish a course in journalism have succeeded and the university will begin making newspaper men according to the most approved rules in the fall. The course has finally received the hearty endorsement of the university authorities, and will be made thoroughly comprehensive. Minnesota's action follows that of Missouri and of several leading American universities. The course laid out for the training of Minnesota youths in the newspaper profession will be thoroughly practical, and one of its important features, already decided upon, is that in addition to the regular class-room work the course will be largely dependent upon lectures from prominent newspaper men in the northwest, known for their experience and ability. These lectures will constitute the mainstay of the course and the other work will be built up around them in such a way as to bring the practical problems of newspaper making and news-gathering to the fore. Governor John A. Johnson, who is, by profession, a newspaper man, and who has had long experience in reporting in the editor's chair and as an owner of newspapers, will be one of the lecturers this fall, and associated with him will be other men equally well known in the profession in the northwest. The course is designed to prepare bright young men with requisite qualifications for work on modern newspapers, and the ambition of the university authorities is to make the course sufficiently complete and to conduct it along such lines that a graduate will be equipped to take up the work of newspaper reporting without other experience. It is believed that with the co-operation of northwestern newspaper men this can be brought about. The university offers its own field for practice, the students themselves being the subscribers of a bright daily newspaper of considerable pretensions. There are several other student publications, several of which have already done good work in training students for active newspaper work.

JAPANESE TO FIGHT DEPORTATION CASE

Vancouver, B. C., June 15.—K. Hirada, the Japanese banker of Seattle, charged with importing Japanese women, who has asked to be allowed to re-enter the United States, will fight deportation to Japan. Canadian officials have taken up the case and have forwarded to Ottawa a synopsis of evidence similar to that which it is believed will be placed before the American officials. This evidence consists of a number of affidavits. One relates to the coming of a woman from Japan to Helena, Mont.

PLUNGES OVER CLIFF TO TERRIBLE DEATH

Seattle, June 15.—A dispatch from Juneau, Alaska, says that Noel Ogilvie, head of the Canadian survey party, has arrived with news of the tragic death of James York, one of the members of the surveying party at Skagway. York was on a precipice attempting to take a picture when he lost his footing and plunged down 2,000 feet.

The Bijou Theater

Presents for this evening a most delightful program, comprised of the following numbers: "AN UNWRITTEN LETTER." Illustrated song: "MEET ME AT THE KISSING GATE." By Ed Levesque. "THE FAIRY'S PRESENCE." "SUSPICION'S FENCING MASTER." "THE LOVESICK BARBER." A collection of motion pictures capable of amusing, interesting and instructing you.

JOURNALISM SCHOOL ESTABLISHED

COURSE IS ADDED TO CURRICULUM OF THE STATE UNIVERSITY OF MICHIGAN.

St. Paul, June 15.—The efforts of students of the University of Minnesota for the past two years to persuade the regents to establish a course in journalism have succeeded and the university will begin making newspaper men according to the most approved rules in the fall. The course has finally received the hearty endorsement of the university authorities, and will be made thoroughly comprehensive. Minnesota's action follows that of Missouri and of several leading American universities. The course laid out for the training of Minnesota youths in the newspaper profession will be thoroughly practical, and one of its important features, already decided upon, is that in addition to the regular class-room work the course will be largely dependent upon lectures from prominent newspaper men in the northwest, known for their experience and ability. FIFTY-SIX MINES ARE IN OPERATION

Spokane, June 15.—Fifty-six placer mines are in operation in the Florence district in central Idaho, where the entire topography is being changed by the giant hydraulic sluices, a battery of which is tearing down the hills. The dirt is pumped for gold with excellent results. Veteran prospectors say that not since the early days, when thousands of men battled with the forces of nature in their quest for the rich yellow dust and nuggets, has there been such activity in the camps. The heavy blankets of ice and snow in the mountains are slowly being converted into water, always a boon to the placer miners, and every indication is there will be sufficient water for a long run during the summer. The dirt is panning out from 3 to 20 cents worth of gold for each shovelful, and the miners are happy. Experts report that the total cleanup will be anywhere from \$700,000 to \$1,000,000, most of which will find its way into the regular channels.

HEINZE IS INDICTED BY THE GRAND JURY

F. AUGUSTUS HEINZE. New York, June 15.—The federal grand jury today handed down indictments against F. Augustus Heinze, head of the United Copper company; his brother, Arthur P. Heinze, and Sanford Robinson, Heinze's counsel, charging conspiracy and an attempt to obstruct the administration of justice by spitting away the books of the United Copper company while the company was under federal scrutiny and also by interfering with United States marshals in the performance of their duties. Collis Warfield, vice president of the Ohio Copper company, a Heinze institution, and one of the old board of directors of the United Copper company, was also indicted in the same connection, as was Calvin O. Geor, a clerk, who is said to have overheard a conversation in reference to the removal of the books. The five men will be arraigned tomorrow.

TAFT WILL PRESENT MESSAGE

WILL URGE ADOPTION OF RESOLUTION SUBMITTING CONSTITUTIONAL AMENDMENT.

Washington, June 15.—President Taft tomorrow will send to congress a message urging the passage of an amendment to the tariff bill imposing a tax of 2 per cent upon the undistributed net earnings of corporations and the adoption of a resolution submitting to the several states an amendment to the constitution giving congress the power to impose a tax on incomes.

This understanding was reached at a session of the cabinet today and was approved by republican senate leaders who conferred with the president. In order that there shall be no question that the two propositions to be recommended have the support of the administration, the attorney general will draft both the amendment and the resolution. In view of the emphatic stand taken by President Taft, a number of progressive republicans have signified their intention of following his recommendations, but some of the progressive republicans are not satisfied and may protest. Democratic senators are also expected to denounce the tax on corporations as a substitute for a direct tax on incomes. The president favors an amendment providing for a tax upon the net earnings of corporations, not only because of the added revenue it would produce, but also because he believes it would throw a healthy light of publicity upon the affairs of corporations. The president is said to be convinced that if the suggested amendment is properly drawn, it would give government officials access to the books of all corporations, in the language of one of the president's advisers, it would do away with corporation money counting, and would insure to the stockholders the responsibility for corporation management.

Although the story is not wholly understood, the fungus causes greater moist at the time the trees blossom, as this condition is favorable for the development of the disease. As a result of the attack the flowers shrivel, and the crop may be entirely destroyed, generally, however, some of the flowers escape complete destruction, but if the caterpillars are not removed they will be covered with small apples showing numerous fungus spots upon them. This, in some sections, is spoken of as the June drop. Like all fungus diseases the "apple scab" can be controlled by the thorough use of the Bordeaux mixture. This is composed of from three to four pounds of copper sulphate and four to five pounds of stone lime in 50 gallons of water. Efficiency depends very largely on proper mixing and spraying. State the formula carefully, dissolve the copper sulphate by putting it in a coarse sack and suspend it in 10 gallons of water so that it will be just below the surface until all is dissolved. Add water to both the lime and the copper sulphate until there is 25 gallons of each, then pour together simultaneously into the spray tank. Always strain all spraying solutions through a fine sieve. Bordeaux mixture should always be tested to guard against any burning of the foliage. A reliable test is to drop a few drops of ferro-cyanide of potassium into the solution. This can be obtained at any drug store at ten cents (10c) per ounce. If there is no change in the color it is all right and ready to use, but if there is any purple or pink tint more lime should be added, as in this condition it would burn the foliage and perhaps injure the fruit. The best results are usually obtained at any drug store at 10 cents made just before the buds have opened or while they are in the bud, but after they have developed, blossomed and the petals fallen good results can be obtained. The spraying should be as thorough as to give them a complete coating and at the same time cover the entire foliage of the tree. To do this the tree should be sprayed from at least two sides, but four is better. The pump should be one which will give a high pressure to drive the fine spray into the calyx of the blossoms.

FALLS FROM TRAIN AND IS CUT IN TWO

Special to The Daily Missoulian. Clonive, June 15.—Mr. and Mrs. E. Pratt of Wadena, Minn., who arrived here last night on their way to the Seattle exposition, took the first train back to investigate the disappearance of their 11-year-old son from the train. A terrible discovery awaited them for the boy, who had not been missed until the train reached the vicinity of Medina, N. D., and fallen from the train near Charles, N. D., and his body was cut in two. The parents say the lad was subjected to sleep-walking and that he probably waked off the train while in a somnolent condition.

NEW FOREMAN TO REBUILD VILLAGES.

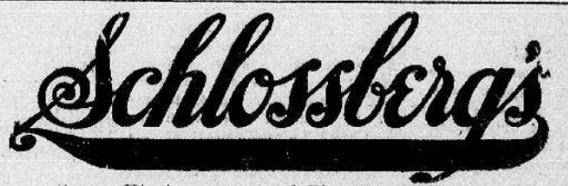

Paris, June 15.—The government is elaborating a plan for rebuilding the villages in the south of France destroyed by the earthquake of a few days ago. It will contribute part of the expense contingent and arrange loans on easy terms for the balance. President Fallieres has contributed \$4,000.

The Latest of Styles McCall Patterns

The Home of Regal Shoes.

Corner Higgins avenue and Pine street, Missoula.

APPLE SCAB

Inspector-at-Large M. L. Dean's latest bulletin is entitled "Apple Scab." It reads as follows: We are informed that in some sections of Montana the apple crop of 1908 was badly damaged by spots upon the fruit. Some attributed the loss to the frost, others to cold, damp weather at blossoming time. Undoubtedly a careful examination at blossoming time in the orchards would have revealed a greenish mold or mildew in the calyx of the blossom. This is the apple scab fungus, a disease which later on attacks the leaves and the growing fruit and often does great harm. Although the injury is not wholly understood, the fungus causes greater moist at the time the trees blossom, as this condition is favorable for the development of the disease. As a result of the attack the flowers shrivel, and the crop may be entirely destroyed, generally, however, some of the flowers escape complete destruction, but if the caterpillars are not removed they will be covered with small apples showing numerous fungus spots upon them. This, in some sections, is spoken of as the June drop. Like all fungus diseases the "apple scab" can be controlled by the thorough use of the Bordeaux mixture. This is composed of from three to four pounds of copper sulphate and four to five pounds of stone lime in 50 gallons of water. Efficiency depends very largely on proper mixing and spraying. State the formula carefully, dissolve the copper sulphate by putting it in a coarse sack and suspend it in 10 gallons of water so that it will be just below the surface until all is dissolved. Add water to both the lime and the copper sulphate until there is 25 gallons of each, then pour together simultaneously into the spray tank. Always strain all spraying solutions through a fine sieve. Bordeaux mixture should always be tested to guard against any burning of the foliage. A reliable test is to drop a few drops of ferro-cyanide of potassium into the solution. To do this the tree should be sprayed from at least two sides, but four is better. The pump should be one which will give a high pressure to drive the fine spray into the calyx of the blossoms.

LAND OFFICE CASES HEARD IN HELENA

Helena, June 15.—Two land office cases were heard today in the Helena land office. One is that of the United States against John Wendel and was instituted by forest officers to knock out the claims of Mr. Wendel, situated on the Elkhorn division of the Helena forest reserve. Judge Adkinson appears for Mr. Wendel and J. W. Atwell for the government. The other case is that of Henry A. Jacobson against the desert land entry of H. K. Howry in Meagher county. Jacobson alleges the land is not arid in character. He is represented by S. W. Langhorne and Mr. Howry by W. D. Tipton.

DIVORCE GRANTED.

Hamilton, June 15.—A divorce was granted yesterday by Judge Henry Meyers to Florence Cowdray from her husband, Oliver Cowdray. Non-support was given as the ground for the action and the wife was awarded \$100 per month.

LEGALS.

Sale of School Bonds. Victor school district No. 7, Ravalli county, Montana, will sell \$5,300 10-20 optional school building bonds at par. The lowest rate of interest, payable semi-annually, January 1 and July 1 of each year, to determine the sale. Certified check, \$500. Denominations, nine \$500 each, one \$300. Bids opened 10 a. m. July 1, 1909, in county treasurer's office, Hamilton, Mont. Bonds to be signed and delivered to county treasurer July 5, 1909, to be taken up July 15, 1909. J. J. BOND, Clerk School Board.

Notice of Road Poll Tax Due the City of Missoula.

A special tax of three dollars (\$3.00) is levied on all able-bodied male residents of the city of Missoula, between the ages of 21 and 45 years, as a road poll tax for the year ending 1909 and is now due and payable at the city treasurer's office in the city hall. T. G. HATHWAY, City Treasurer.

Pound Notice.

Notice is hereby given that I have, on the 14th day of June, 1909, taken up and impounded the following described stock: One roan horse, branded V with a bar over it on the left shoulder, and unless the owner or owners of the same make satisfactory proof of ownership and pay the pound fee of \$1.00 for the year ending 1909 and the cost of keeping same while so impounded, on or before the 23rd day of June, said stock will be sold at public auction to pay the fee and costs above mentioned. Witness my hand this 15th day of June, 1909. J. R. VEALEY, Chief of Police.

Notice to Contractors.

Sealed bids will be received by the city council up to 3 o'clock p. m. of Friday, June 18, 1909, for the repairing of the temporary wagon bridge across the Missoula river at Higgins avenue.

Specifications may be had at the office of the city engineer, room 39, Higgins block.

The contractor to furnish all material. Each bid to be accompanied by a certified check for Fifty (\$50.00) Dollars.

The city council reserves the right to reject any or all bids. J. S. KEMP, City Clerk.

HOSS IS APPOINTED.

Helena, June 15.—T. E. Collins, Jr., having tendered his resignation as first assistant, H. H. Pigott, state examiner, today appointed F. E. Hoss of Helena as his successor.

Weather forecasts by wireless telegraph are furnished vessels in the Atlantic by the British bureau.
