### AMERICAN LEAGUE.

**Red Sox Win 9th.**  
Boston, June 21.—Boston won two exciting games from Philadelphia today, the first 6 to 5 and the second 4 to 1. Scores:  
First game—R. H. E.  
Philadelphia 5 10 3  
Boston 6 11 3  
Batteries—Plank and Thomas; Ryan, Schiller and Carrigan.  
Second game—R. H. E.  
Philadelphia 1 2 0  
Boston 4 7 1  
Batteries—Coombs and Livingston; Wood and Spencer.

### Honors Even.

New York, June 21.—Washington and New York again broke even in a double-header today. Scores:  
First game—R. H. E.  
Washington 5 9 1  
New York 4 13 3  
Batteries—Hughes, Gray, Johnson and Street; Warhop, Kleinow and Blair.  
Second game—R. H. E.  
Washington 6 11 3  
New York 4 7 1  
Batteries—Hughes, Gray, Johnson and Street; Warhop, Kleinow and Blair.

Washington, June 21.—Detroit took another game from St. Louis today, 2 to 0. Donovan pitched in fine form. Score: R. H. E.  
St. Louis 0 5 2  
Detroit 2 6 1  
Batteries—Graham, Bailey and Stephens; Donovan and Strang.

**"Wild Bill" in Form.**  
St. Louis, June 21.—Detroit took another game from St. Louis today, 2 to 0. Donovan pitched in fine form. Score: R. H. E.  
St. Louis 0 5 2  
Detroit 2 6 1  
Batteries—Graham, Bailey and Stephens; Donovan and Strang.

**Rain.**  
Chicago, June 21.—Chicago-Chicago and game postponed; rain.

### NATIONAL LEAGUE.

**Rather Listless.**  
Pittsburgh, June 21.—In a rather listless game today Pittsburgh defeated Philadelphia, 5 to 3. Score: R. H. E.  
Pittsburgh 5 7 0  
Philadelphia 3 9 2  
Batteries—Lefield, Brock and Gibson; McQuillen and Jacklisch.

### NORTHWESTERN LEAGUE.

**Vancouver, 1; Portland, 0.**  
Portland, June 21.—Score: R. H. E.  
Vancouver 1 3 1  
Portland 0 4 2  
Batteries—Hall and Brooks; Kin-sella and Murphy.

**Spokane, 5; Aberdeen, 1.**  
Spokane, June 21.—Score: R. H. E.  
Spokane 5 8 1  
Aberdeen 1 2 3  
Batteries—Oritz and Kreitz; Wright and Spencer.

**Seattle, 8; Tacoma, 4.**  
Seattle, June 21.—Score: R. H. E.  
Seattle 8 9 2  
Tacoma 4 7 2  
Batteries—Seaton and Custer; Berger and Kellocky.

### AMERICAN ASSOCIATION.

**At St. Paul—Indianapolis, 9; St. Paul, 5.**  
At Milwaukee—Toledo, 1; Milwaukee, 4.  
At Minneapolis—Louisville, 3; Minneapolis, 1.  
At Kansas City—Kansas City, 2; Columbus, 6.

### WESTERN LEAGUE.

**At Wichita—Des Moines-Wichita game postponed.**  
At Topeka—Omaha, 6; Topeka, 6.  
At Denver—Lincoln, 2; Denver, 7.

### COAST LEAGUE.

**Sacramento, 6; Vernon, 1.**  
Los Angeles, June 21.—Score: R. H. E.  
Vernon 1 7 2  
Sacramento 6 9 0  
Batteries—Bitt and Kunkel; Binn and Byrnes.

## MISSOULA CALLS OFF HAMILTON BALL GAME

Owing to the rain and the threatening weather it was found necessary to cancel the two games which were scheduled for the south side ball grounds Sunday. The Hamilton team was at the depot all ready to come down to meet the Giants and the Victor valley league team when a telephone message was received from Missoula stating that owing to the bad weather the game would have to be called off.

### ACCEPTS CHALLENGE.

Young Thompson announced to The Missoulian last night that he is ready and anxious to accept the challenge of Kid Oglesby of Wallace, Idaho, at any place between now and July 1. Thompson says that he will meet Oglesby upon any terms which are satisfactory, and is willing for his part to let the gate receipts go to a hospital or other charitable institution. He is willing to make a side bet with Oglesby, he asserts.

### ON THE HOME STRETCH.

Walt Walz, Wash., June 21.—Ford car No. 2 in the New York to Seattle automobile race arrived here at 6:40 this morning and left for Seattle at 8:15 o'clock. The drivers expect to reach their destination Wednesday.

### Shawmut in Second Place.

Baker City, Ore., June 21.—The Shawmut car in the coast-to-coast automobile race arrived here at 9 o'clock this morning. The Shawmut passed Ford No. 1 at Walla Walla. Ford car No. 1 arrived here 40 minutes after the Shawmut car.

### CHANGES IN INTERMOUNTAIN.

Boise, June 21.—Before leaving here Sunday night, Manager John S. Barnes of the Boise baseball club released "Weezer" Dell, pitcher, and Babe Roberts, outfielder. Manager Marshall of Boise has released Pitcher Westall and Infielder Hutchinson.

## RAVAGES OF INSECTS EXPLAINED

FOREST SERVICE OFFICIALS INVESTIGATE ATTACKS IN SNOWY MOUNTAINS.

The officials of District One of the forest service have issued the following comments on the ravages of insects in the Snowy mountains. There has recently appeared in a number of western Montana papers an article in regard to the insect damage being done in the Snowy mountains. While it is true that bark beetles are at work in that locality, their ravages have not as yet gotten beyond control. So far, only about one thousand trees have been attacked. The forest service is now co-operating with the bureau of entomology in an effort to check the insect damage.

The item which has appeared in various papers usually connects with this insect injury in the Snowy mountains the considerable amount of damage which has been done the forest by unfavorable weather conditions during the past winter in many parts of central and western Montana. One can scarcely help noticing the rusted colored bands which occur on the trunks of many trees in timber of various species and ages. This band seems to be limited quite definitely by an upper and lower elevation contour.

The explanation which seems most reasonable, and which is advanced by many technically trained foresters, is that the damage is due to the unusual action of the weather. As most people will remember, there was a very warm spell last January, when the ground was covered with snow. At the time the warm weather began, the sap in the leaves, trunks and roots of the trees was frozen hard. As the warmer weather continued, however, the sap in the trunks of the trees chose the level of the snow and in the leaves thawed out. The action of the warm air and the sun started the liquid sap to evaporating through the leaves, just as it does in the summer time when the trees are actively growing. In January, however, with the roots frozen, as soon as the sap in the trunks and the warmer part of the trunk had passed off into the air in the form of vapor, the action had necessarily to cease because of the frozen condition of the roots. Then, no more sap being supplied to the leaves, they gradually turned brown, in the case of most of the trees, fortunately, the buds remain undamaged. While the old leaves are in many instances damaged beyond repair by nature, the young leaves will be put forth as usual, and most of the trees will recover, although retarded considerably in their growth so far as this year is concerned.

At just this time the trees are looking their best, with the exception of the exposed old leaves, which are brown and the young leaves have not yet come out. Many trees will probably be made

## Will the Trusts Control Air and Water?

How often have you used that good old joke about the trusts controlling everything but the air we breathe?

You may soon have a chance to turn this jest to earnest. There is a fat young trust forming just now that proposes to reach its tentacles into the air we breathe and draw therefrom a product which will enable the monopoly to "levy tribute on every loaf of bread, every pound of beef and every manger of fats."

We are quoting from their own prospectus. This interesting trust is now a part of the hustling group which is grabbing our water powers. With cheap water power they will produce a fertilizer which in Germany enables the farmer to raise 400 bushels of potatoes to the acre, and in slow old behind-the-times U. S. A. we average only 75 bushels. Other crops are benefited in the same proportion.

Energy in the soil; energy in the streams. Those are things we've got to wake up and protect; or else these trust gentlemen will do just what their prospectus says they'll do: Levy a tribute on every thing we use.

John L. Mathews is a world-expert on water and soil. He has written the most amazing article you ever read. Get it today. In

NEWS OF THE MINES.

Spokane, June 21.—Twenty-eight tons of ore in a recent shipment from the H. E. M. mine, near Wallace, Idaho, netted \$327. The smelter assays show the value of lead was 5.2 per cent and 1.1 ounces of silver in the ton. The sampling was at Wallace. The company's assay, however, gave a slightly higher assay. Russell P. Collins of Spokane, one of the principal owners, today whose attention the property is being developed, says the shipment consisted of ore taken from an unexpected shoot in No. 2 tunnel, which is being driven to uncover the ledge encountered in the No. 1 tunnel. Twelve men are at work on the property, which mining men believe will soon be added to the regular shipping list. Another shipment of ore will be sent to the smelter in a short time, after which extensive development work will be pushed.

Six feet of carbonates and some solid galena ore have been encountered in the lower tunnel of the Main Standard company's property on Moon creek. The claims are so situated that the vein which traverses them can be drifted upon from either end. The present workings are at the creek level, but the vein has been opened in two other places above. Alex Murphy, one of the original locators, has charge of the development work.

There is much excitement in and near Burke, Idaho, on account of an ore strike on the Great Northern company's property. Several idle properties have resumed operations as a result. The cross-cut tunnel on the Great Northern has been driven 400 feet, and for the last 20 feet chlorides assaying 14 ounces in silver have been coming in the face of the country rock formation indicating a rich ore shoot ahead. This muck was thrown on the dump, where it was observed by miners, who spread the news. Two shifts are being worked under Ed Eismann, manager, who predicts that he will have a shipping property before the snow flies. The vein is a true fissure, and on the surface shows a width of 18 feet, carrying values in lead, silver and copper. The principal

owners live in Los Angeles. They have given orders to push the work.

John Hughes of Susanville, Ore., has sold the Ophir property in the Summitville district to Thomas S. Kinnersly and Edward H. Willets of Trenton, N. J., for \$200,000. \$15,000 of which was paid in hand. The Ophir consists of the Badger and the Stockton claims, and is one of the leading producers of that section, having virtually paid from the mine roots. A shaft is down 180 feet, and the new owners intend to sink another 100 feet and then drift both ways on the ledge. Messrs. Kinnersly and Willets have also secured a lead and zinc ore in the Golden Eagle property in the Greenhorn district, which adjoins the Gold coin, the latter having been owned by Mr. Kinnersly for some time. A contract has been let to S. C. Richardson for drifting a drift 250 feet through the Golden Eagle to the intersecting line of the Golden Coin.

Wallace N. Morphy of Spokane, president of the Dixie Meadows Mining company, announces that the mill on the property near Prairie City, Ore., has resumed operations after five years' idleness. Experts say the company can develop a big mine if a method can be found to save all the values in the ores. It is located in what is known as the "Quartzburg" district, and consists of 10 patented claims. Twenty-nine hundred feet of underground development, of a total of 2,500 feet, has been completed. The company will erect a modern mill and have it completed by the time the Sumpter Valley railroad has built its spur from the middle fork of the John Day river, the contract for which was awarded a short time ago.

Advices received in Spokane from Rossland, B. C., are that \$200,000 has been subscribed in England for furthering the development work at the Le Roi mine, which was closed three months ago. No official confirmation is obtainable here. Various plans for development have been considered, but nothing definite has yet been decided upon. It is given out that 70 men will be employed at first, and more as the work shows progress.

Octave Gray, president and general manager of the Hypotheek Mining company, operating in the Coeur d'Alenes, announces that 75 feet of a 700-foot tunnel has been driven, and that four feet a day is being gained. The drift was started from the bottom of the shaft, which is down 800 feet, and is being run toward the hanging
