Children accompanying their parents, 10c, downstairs.

MATINEE—Monday, Wednesday and Saturday at 3 p. m. Admission: 10c and 15c any part of theater.

COMPLIMENT IS PAID BY TAFT

PRESIDENT TALKS OF CIVIL SERVICE EMPLOYEES IN SUNDAY ADDRESS.

Washington, July 11.—In assisting today to lay the cornerstone of a church which has for a part of its equipment a gymnasium, a swimming pool, bowling alleys and club rooms, President Taft paid tribute to the civil employees of the government.

"As I understand the plan of this church," said the president, "it is to make religion a part of the life of those who are members of it. It is to make the church so attractive that those who are members of it shall regard religion as a necessary part of life."

It is well, the president said, that the church was established in Washington, the seat of the government. He said he did not mean the president and the cabinet, nor the senate nor the house of representatives.

"There is something," he said, "that goes to make up this government as a machine that continues to operate when the president goes to the sea coast and the senate and house go home and when the members of the cabinet disappear. And that is the government of the civil servants—trained civil servants who know how things ought to be done."

"They are willing for a reasonable compensation, sometimes much too low, to give out what is best of them to carrying on this government in an honest, effective way—men who are philosophers enough to know that by the enjoyment of a small compensation they can get more happiness out of life in seeing their families grow than by aspiring to be millionaires and plutocrats."

FLY CARRIES GERMS MERELY AS SIDE LINE

New York, July 11.—The tsetse fly, the insect that jumped from scientific obscurity to public notice on the eve of Theodore Roosevelt's departure for Africa, received a certificate of character today at the Rockefeller institute. Dr. S. B. Minton, one of the affiliated specialists, announced that the dreaded sleeping sickness is carried by the tsetse fly only incidentally as the common house fly may carry typhoid. His bite is not venomous, says the physician, while the real offender is the only disease germ known to have the power of communicating its infection.

Since the sleeping sickness first made its appearance in Uganda in 1901, 200,000 have died by it in one district alone and its toll from the Congo has been almost unbelievably heavy.

MAKES CHARGES.

Paris, July 11.—Bartzeff, the Russian revolutionist who recently charged General Harting, chief of the Russian political police board, with complicity in a plot against Alexander III, has written a letter to the Matin accusing the Russian political police of intercepting the correspondence of Russian residing abroad.

MISSOULIAN WANTS ADS BRING QUICK RESULTS.

GENTRY SHOWS HERE TODAY

CHILDREN RIDE THE ELEPHANTS WITH THE GENTRY SHOWS.

There was a delighted set of youngsters in town yesterday, pleased at first with the prospect of seeing the dogs and ponies of the Gentry shows at their Sunday rest and, later, enthusiastic over the experience of a tour of the Gentry tents with the sight of the splendid animals off duty. There was something sociable about the intelligent creatures in their informal "at home" which was thoroughly enjoyed by all of the juvenile visitors and, as well, by their elders who accompanied them. As a result of this invitation to visit the tents during Sunday afternoon, there was a large attendance of visitors at the informal reception and the youngsters got well acquainted with the individual members of the canine and equine company.

The Gentry shows reached here early yesterday morning and the stable tents were soon pitched. As soon as the animals were made comfortable the Sunday rest began and with the exception of the duties of the evening committee yesterday afternoon, there was nothing doing about the big shows. Such is the custom of this company. This morning, however, it will be different and there will be a lot of the stir and bustle which attends the preparation for a performance. The parade will start at 10:30 this forenoon. The two performances will be at 2 and 8 o'clock. The show-going public is familiar

with the trained animals of the Gentry shows. These have made a delightful impression in former years in Missoula. The program this year embraces all of the old attractions and some others that are entirely new. Some of the accomplishments of the quadruped performers are almost incredible. There have been added to the shows this season some rare acrobatic attractions. The Aronov twins are skilled wire-runners and jumpers and their act is one of the most interesting ever presented to the public here; the Eddy family gives an acrobatic performance that is wonderful. There are hosts of other attractions and there is the parade this morning which, as stated, will start promptly at 10:30.

'FRISCO MAY LOSE PAINTING

"THE LOST SPIKE," A WONDERFUL WORK OF ART, TO BE SOLD TO EASTERNER.

San Francisco, July 11.—The famous painting, "The Last Spike," which pictures the scene at the driving of the last spike that marked the completion of the Central Pacific railroad and its junction with the Union Pacific, is in danger of being lost to San Francisco. The painting is now in the museum at Golden Gate park, but John Washburn, son-in-law of the late Thomas Hill, the artist, is negotiating for the sale of the picture to an eastern man for \$10,000. An effort is being made to arouse the people of San Francisco to raise \$10,000 in order to save the painting for the city. Should the effort to preserve the picture to San Francisco fail, the descendants of the men who built the first trans-continental road

will endeavor to procure the picture for themselves. To that end they have begun negotiations with the estate of the late artist.

Thomas Hill, the artist, was to get \$50,000 for painting the picture, but a misunderstanding arose and the picture was left on his hands. Four thousand people are shown in the picture, 70 of them by portraits, grouped according to official prominence.

COSSACKS RETREAT BEFORE SINGLE GUN

Tcheron, July 11.—Russian Cossacks, commanded by Russian officers and other troops of the shah, numbering altogether 1,200, this morning made an attack upon the united nationalist forces under Sipadar and Saradrazad at a point 15 miles from Tcheron. Although the royalists shelled the nationalists' position with four guns for two hours, they failed to dislodge the enemy. Two hundred of the Cossacks advanced to within half a mile of the nationalists, keeping up a heavy fire with Maxim's and quick-firing guns.

The nationalists replied at intervals with a single gun, dropping a number of shells among the Cossacks and compelling them to retire.

No information has been received here as to the number of casualties.

NEWS OF THE MINES.

Spokane, Wash., July 11.—Official announcement is made that George A. McLeod of Spokane has closed a deal for Spokane and eastern parties to bond the McKinley property on the North Fork of Kettle river, 40 miles north of Grand Forks, B. C., and that active development work will be pushed. The McKinley is one of the most important holdings on the North Fork. Work was discontinued last fall as better equipment was necessary. Besides doing a large amount of stripping and tunnel work, the company has done 4,000 feet of diamond drilling. The work was under the supervision of A. D. McPhos, who had charge of operations from the time that the mine was a prospect. He was assisted late in the summer of 1906 by L. A. Stabler, a mining engineer of Butte, who made a long stay at the property.

Stockholders of the Alpena Copper Mining company, near Wallace, Idaho, believe that the directors will soon declare dividends. The building of the Chicago, Milwaukee & Puget Sound railway has made it possible for the Alpena to obtain easy transportation, and there is sufficient shipping ore on the dump and docked out in the mine to place it in the list of the steady shippers for a time. The ore is rich in copper and all that remains to make the property one of the best in the region is the assurance that the ore struck in the upper workings goes down. A long tunnel is being driven.

Stockholders of the Showstern Mining company will meet at Larson, Idaho, July 27, to discuss the action of the management in cutting down the output of the mine as a result of the differences with the railroad companies.

Lynnan Carter of Spokane, president of the Blue Bird Mining company will take over its property, near Roseland, B. C., on November 1, 1909. The property is now under lease. The company will do extensive work as soon as it takes charge. Plans are already being made to follow up work on the new strike, and also to go deep

for other ledges known on the surface. Five ledges show on the surface. One is 12 feet wide. It is believed the five veins come together, and it is planned to sink a shaft where they meet. The ore from the new strike is averaging \$80 a ton.

Duluth Mining company has been organized at Wallace, Idaho, by Al Olin, Ed Hedlin, Charles Andrews, J. J. Murphy, L. Greenwood, J. Boer and Dobson & Whiteside of Duluth. The property which it is proposed to develop is located between the Great Western and the Flynn group and adjoining the Midway Summit. The property was located three years ago by Mr. Andrews.

Midnight Mining company, operating on George gulch, near Burke, Idaho, voted to levy an assessment of 2 cents a share. It is proposed to drive a tunnel of 2,000 feet to tap the vein at a great depth in the sulphide zone where the deposits of massive galena are found in all of the district's producing mines. Eugene R. Day was elected president; J. N. Murphy, vice president and manager; Edwald Hedlin, secretary and treasurer, and J. W. Lyden and W. C. Robinson of Duluth, Minn., directors.

Republic mine in the Republic district in eastern Washington has shipped its fourth 50-ton car of sacked ore to the smelter. This ore runs above \$150 a ton. A strike of telluride ore was made in the footwall of the big slope a little below the No. 2 level a few days ago. The seams of petzite and sylvanite, which are intersected, run by special assay from \$10,000 to \$25,000 a ton. This is the third ore body from one to three feet in width in the footwall in 12 feet. The 25-horse-power plant is in operation.

Eighty-one per cent lead and 100 ounces of silver to the ton, with copper values are shown in assays of ore recently encountered on the Caldwellia property in the Coeur d'Alenes. The mine is now on a self-sustaining basis, and employs 25 men. It was reported that the payment of dividends would begin soon, but Manager McKinley says the date of the first dividend disbursement of profits has not been settled.

Start the Day Just Right

You can get breakfast at Ye Olde Inn at 7 o'clock and on through the morning. Hot waffles a specialty.

Dr. E. H. Freeze
PHYSICIAN AND SURGEON
Special attention to diseases of women.
