

IT'S LIKE THIS

We want to sell the Treasury Stock of Kennedy Creek Coal and Coke at 20c, to raise money to put the property on a paying basis.

We want to sell it to you because it is a good buy and will show you a handsome profit in a short time and will grow, and grow and grow in value--we both win you see. We get the money we need; you get the profit you want.

In order to convince you that we have absolutely the finest coal proposition ever put up to any man we offer to take you to the property and let you see for yourself what we have. Could anything be fairer? Don't you think that it is good business for you to investigate such a proposition? If you will look we'll show you the greatest surface outcrop of coal in the entire Northwest. We will show you over our entire property and convince you that we have a large area of valuable coal land. We will show you our prospecting drill at work. We will show you how the coal burns; how it cokes; how very, very profitable the mining of it will be and we will also show you where and how we propose to use the money that we get from the sale of this Treasury stock. Now, when we show you all this we know what you will do--and so we make you our offer to show you absolutely free that we have the best investment on the market today. All you have to do is to come in and say you are willing to be shown. We will reserve a seat in our auto for you, take you to the mine and let you see for yourself. All we ask is that you come in and make your reservations as early as possible for we may have to refuse some of the late comers for lack of room to carry them. There will be no crowding and we promise you a very pleasant trip.

HENEY GOES FISHING IN ALASKA

SAN FRANCISCO GRAFT PROSECUTOR MAKES A TRIP WITH S. W. ECCLES.

Corwova, Alaska, July 20.—After making a trip over the Copper River & Northwestern, Francis J. Heney, the San Francisco graft prosecutor, today went with S. W. Eccles, president of the road, on a fishing expedition. This morning Mr. Heney called instructions to his associates in San Francisco to go ahead with the Calhoun trial without waiting for his return. Mr. Heney said today that there would be no letup of the Calhoun prosecution on account of the approaching November election.

Major General J. Franklin Bell, chief of staff of the United States army; Mrs. Bell, Captain Staden of the Fourteenth infantry, and Major J. W. Hutchinson, chairman of the Alaska road commission, who with Mr. Heney have been guests of Mr. Eccles, left today for Fort Lisicum. From there they will go to Fort William H. Seward and then take a trip down the Yukon river.

MAY INSPECT RIVER.

Washington, July 20.—Letters from 25 governors of states in the middle-west and south, urging President Taft to make a trip of inspection down the Mississippi when he goes to attend the annual convention of the Lakes and the Gulf Deepwaterway's associa-

tion at New Orleans in November next, were presented to him today. The president told his callers that he would be pleased to make the inspection if it could be arranged and his secretary, Mr. Carpenter, said he believed the inspection could be arranged for the latter part of October or early in November.

PURITY AND QUALITY DEMANDED FOR BOOZE

Washington, July 20.—By reason of the briefs from lawyers and letters from women, whose attention had been directed to the fight over "what is whisky?" President Taft is forced to remember the subject even when wrestling with the tariff. "Purity and quality in 'wet goods' are what the women, who are writing the president, want. They do not set themselves up as a rule, as consumers of the commodity, nor are they prepared to subscribe to the sentiment that all whisky is good. What they seek is to have the president adhere to the ruling of former President Roosevelt, that straight whisky, made from distillation of grain, is the only form in which it meets the requirements of the pure food act. Another form of whisky, under the law as construed by Mr. Roosevelt, must bear a label proclaiming it to be adulterated.

THE MISSING BOOKS OF BANKS SECURED

Los Angeles, July 20.—State Superintendent of Banks Alden Anderson today secured the missing minute book of the state Savings & Commercial bank, which, with its affiliated institution, the Union State bank, was ordered closed last Saturday, and has placed an expert at work on the accounts of the two banks, which he declares must be liquidated. The investigation is expected to throw some light on the cause of the suicide of the former paying teller, William von Meyernek, at Larkspur on Friday night.

Vagaries of a Cold.

You can never be quite sure where a cold is going to hit you. In the fall and winter it may settle in the bowels, producing severe pain. In the summer it may give you colic with diarrhoea or summer complaint. Do not be alarmed nor torment yourself with fears of appendicitis or inflammation of the bowels. At the first sign of the pain or cramp take Perry Davis' Painkiller in warm, sweetened water and relief will come at once. There is but one Painkiller, Perry Davis'. It is now put up in a large 35c size as well as the regular 25c size.

WASHINGTON NEWS

THE MISSOULIAN'S SPECIAL SERVICE.

Washington, July 20.—The following orders affecting the postal service in Montana have been issued by the post-office department:

From August 2 increase the star postal service between Chester and Marias to twice a week, Tuesday and Friday. Discontinue special service at Boots, Custer county, from Baker, and at Marco, Dawson county, from Glendive. Change star route from Glendive to Mondak so as to supply Marco, between Glendive and Burns.

Last May 384 people died in Montana, according to a report of Surgeon General Wymon of the public health and marine hospital service. The largest number, 24, were from consumption; 10 were from diphtheria; 6 from enteric fever; 11 from scarlet fever, and 1 from measles. The sick list during the month included 256 cases of scarlet fever, 112 of measles, 72 of diphtheria, 51 of smallpox and 18 of enteric fever.

The treasury department has designated the First National bank of Boston as reserve agent for the Great Falls National bank.

The department has approved the appointment of C. E. Copeland as assistant cashier of the First National bank of Lewistown.

The forestry service is planning to experiment in signaling on the forests with the standard heliograph now used by the war department. The scenes of operation will be on the Kaniklu forest, Idaho, and the Stanislaus forest in California. The idea is to determine whether the instrument can be practicable in reporting fires on forests or send messages for assistance when communication is hard to make.

As the climate and species of inflammable trees in the Idaho and California forests selected for the tests are entirely different, the test is expected to be conclusive.

Last year a total of \$2,526,998 was spent by the forestry service in caring for the 18 national forests in the country. The forestry officials have figured this out to represent about 1 1/2 cents per acre. For permanent improvements, including the construction of 3,400 miles of trails, 100 miles of wagon roads, 3,200 miles of telephone lines and 40 miles of fire lines, \$522,182 were expended.

The detail of First Class Sergeant George L. Richter, signal corps, from St. Paul, Minn., to Fort Assiniboine to install a telephone system, has been ordered by the war department.

The secretary of war has ordered the dismissal without honor from the army of Private John A. Campbell of Company K, Sixth infantry, who was imprisoned under sentence of a civil court, Campbell was in service at Fort Missoula, and the papers in the

case have just passed through the hands of the judge advocate general of the army and the secretary of war, with the result given above.

The war department, upon the urgent request of Representative Pray, has authorized the expenditure of \$5,500 for repairs to revetment work on the Missouri river at Judith and Fort Benton.

Paper birch does not rank with the most important hardwoods; it is, nevertheless, a valuable species in the northeast section of the United States, particularly in Maine. It is used almost exclusively by a number of wood-working industries, and no satisfactory substitute for it has been found in the manufacture of certain articles. From the point of view of the forester also it is a particularly interesting tree, because it grows mainly on burned-over areas, and the present extensive stands of it are due to forest fires.

The annual cut of paper birch in the northwest averages about 85,000 cords. The wood supplies small mills for the most part, the largest of them not using more than 10,000 or 12,000 cords a year. The wood is made into spools, shoe pegs, shoe shanks, toothpicks, dowels, various wood novelties, and a wide variety of miscellaneous articles.

The spool industry is the most important of the industries dependent upon paper birch; it uses annually more than half of the total cut of birch. Spool mills are located throughout the birch region, but the industry may be said to center in the valleys of the Piscataquis and Penobscot rivers in central Maine, where the largest mills are located, and where the birch is used almost exclusively for this purpose. The wood used must be sound and free from red heart and other defects. Many substitutes for paper have been tried in the manufacture of spools, but so far none has proved wholly successful.

The next most important use for paper birch after the spool industry is for the manufacture of shoe pegs and shoe shanks. This industry, which uses about 11,000 cords of paper birch annually, is confined entirely to the northeastern section of the United States, and except for a small quantity of yellow birch, uses paper birch exclusively.

The greater part of the toothpicks used in this country are manufactured in the northeast, and, with the exception of a few hundred cords of poplar and maple used for this purpose, are there made entirely from birch. Approximately 3,000 cords of birch are used annually in their manufacture. The highest grade material only can be used. This material is usually selected from stock which is being cut for other purposes, and sells for from \$15 to \$25 per cord at the mill.

Dowels, toys and novelties and various miscellaneous articles, such as clothespins, hairpin boxes, bobbins and shuttles, consume annually about 22-

000 cords of paper birch, chiefly among which are yellow birch, sugar maple and birch. These articles can also in many cases be made of an inferior grade of birch. A small per cent of red heart is usually allowed in most dowels, and cheap toys and novelties are not infrequently made entirely from red heart and knotty wood which could not be used for other purposes. This fact is sometimes taken advantage of by combining spool and novelty mills, so that the novelty mill can be largely supplied by the waste from the spool mill.

The principal market for paper birch and its products is in this country. The spools are mainly manufactured near the source of the timber supply and are then shipped to the thread mills in various parts of the country, chiefly to Rhode Island, Connecticut, New Jersey, and, to some extent, to California. The shipment of spool bars to Scotland is, however, an important part of the trade, and these shipments amount to about 4,000,000 board feet. Shoe pegs and to a lesser extent shoe shanks are sent in considerable quantities to Germany, Japan and other countries. Shipments of toothpicks have been made recently to England, France and Germany. In all, the manufactured equivalent of about one-seventh of the total cut of paper birch is exported annually.

DON JAIME LEAVES PARIS.

Paris, July 20.—Don Jaime, son of Don Carlos of Bourbon, the pretender to the Spanish throne, who died at

Varese yesterday, left Paris today for Varese. The law passed by the French parliament after Don Carlos in 1881 allied himself with Count de Chambord, forever banishes the eldest representative of any family that ever reigned in France. A dispatch from Madrid says: Although the Carlist leaders are divided, the majority believe the accession of Don Jaime as head of the Carlists will give a new impetus to the party. Don Jaime made repeated visits in disguise to Spain in order to consult with his followers.

AHEAD OF THE SCHEDULE.

Mankato, Minn., July 20.—Traversing excellent roads from Minneapolis to Mankato, 132 miles, the Golden tour-ists arrived here today two hours ahead of their schedule. The tourists will leave at 8 o'clock tomorrow morning for Fort Dodge, Iowa.

BREAKS WALKING RECORD.

Winnipeg, Man., July 20.—At the Canadian athletic championship here Saturday it was announced today that George M. Goulding of Toronto, in the mile walk, broke the world's record in 9 minutes 25 seconds.

MINE IS PURCHASED.

Helena, July 20.—The Belmont mine in the Marysville district has been purchased from John and John Henry Longmaid of this city by Colonel Thomas Cruse at a price said to be close to \$50,000. The Belmont has

been a famous producer of gold and adjoins the Bald Mountain, owned by Colonel Cruse and which promises to be a second Drummond. It is said the rich chute from the Bald Mountain extends into the Belmont.

NOTICE OF SALE—SALE OF TIMBER, Missoula, Mont., July 6, 1909. Sealed bids, marked outside "Bid Timber Sale application, June 19, 1909, Lolo," and addressed to the District Forester, Forest Service, Missoula, Mont., will be received up to and including the 5th day of August, 1909, for all the merchantable dead timber, standing and down, and all live timber marked for cutting by the forest officers, located on an area to be designated by the forest officers or approximately 1,400 acres of the watershed of Rainy creek, in unreserved township 19 north, range 32 west, T. M., within the Lolo National forest, Montana, estimated to be: White pine, 3,100 M.; Engelmann spruce, 7,300 M.; western hemlock, 4,500 M.; Douglas fir, 3,500 M.; larch, 3,000 M.; lowland and Alpine fir, 1,700 M.; lodgepole pine, 1,500 M.; cedar, 100 M.; dead timber of all species, 700 M., in board feet log scale, more or less. No bid of less than \$4.50 per thousand feet B. M. for all species will be considered, and a deposit of \$1,000 must be sent to the Western Montana National bank, United States depository, at Missoula, Mont., to accompany each bid submitted to the district forester. Timber upon valid claims is exempted from sale. The right to reject any and all bids is reserved. For further information and regulations governing sales, address Elers Koch, Forest Supervisor, Missoula, Mont. W. B. Greeley, District Forester.

WOMEN SUFFER NEEDLESS PAIN

Many Mysterious Aches May be Cured by Curing the Kidneys.

Every woman has so much pain, work and worry in life that any needless daily suffering from backache, headache, dizziness, languor or other kidney ills is unfortunate indeed. Doan's Kidney Pills have brought new life, health and strength to thousands of women afflicted in this way, by curing the kidneys. If you don't just understand your condition, don't forget that it may be the kidneys.

Women easily fall victim to kidney ills. The confining work a woman does, the tight, heavy clothing she wears, the constant bending, reaching and lifting of housework, the cares of bringing up children, are all trying. Any fever, cold, chill or strain may weaken the kidneys and set up congestion, with backache and disturbances of the urine. Too many women have come to think that backache, pain through the hips, headache, "blues," dizzy spells, sick headache, nervousness and swelling of the ankles, wrists or limbs, are troubles peculiar to the sex. Don't make that mistake. Suspect your kidneys first. Men have similar aches when the kidneys are sick. It is a woman's duty to herself and to her family to detect the first signs of kidney weakness, and to give the kidneys prompt help. A special rem-
