

It Was Said Harry Thaw Was Crazy When He Shot Stanford White It May Be He Was But He Made Good

It has been said that the writer of this ad, Jim Rhoades, was crazy when he asked and sold South Missoula lots six years ago for \$100 to \$150 each, but he made good, and those who purchased from him made good and doubled their money.

I have the same proposition today in Car Line addition. Today we are offering you lots in this beautiful addition at from \$50 to \$120 each, on terms of \$5 cash and \$5 per month, with a guarantee of street car service, city water, electric lights, telephone, all modern conveniences, and in less than two years you will say to yourself and your friends, "I could have bought those Car Line addition lots from Rhoades & Rhoades for half what I can buy them for today. I wish I had done so." But it will be too late then; the other fellow who believed in Missoula's future has beaten you to it, and he has made the profits while you sat back and looked on, as hundreds of others have done here the past five years. The fellow that acts is the one who gets the plum; the one who looks and never acts never gets ahead. Act now, act quickly, act on your own judgment, and don't be influenced by the knocker; he ain't got anything and will never have. Come in today and buy yourself a few of these good lots and we say to you sincerely they will make you money and make it quickly.

NEWS OF THE RAIL FOR A DAY

RECENT HAPPENINGS OF LOCAL INTEREST IN THE RAIL-ROAD WORLD.

The announcement yesterday of the fact that the Harriman interests have finished their work puts the Lolo Pass situation in a new light. It is evident, on the strength of that announcement, that the Northern Pacific has not as yet frozen out its rivals, and that the O. R. & N. still has a line through the Clearwater in view. If the Harriman people really mean business it is not likely that they will delay long and the contract for the construction will probably be let before many weeks have passed. The fact that the Northern Pacific is still inactive after the contract has been awarded puts the O. R. & N. on practically the same basis as the N. P., and if the road is in earnest it should be through with its line just as quickly as its rival. The railroad magnates are rapidly coming to realize the importance of a commanding situation in the western country while it is still in the first stages of development, and it is very likely that both roads will ultimately be constructed through the pass. The announcement of the confirmation of the awarding of the N. P.'s contract is expected here within a few days at the most, and Grant Smith & Co., who are at present actively engaged in construction in the west and are in a position to begin work at once, will probably have equipment and men in the field inside of a month. The construction of this line is going to be a task of several weeks. The present contract is for 40 miles only, from Missoula to Lolo Pass, and there are nearly 100 miles to be built after this part is finished, through a wild and almost impenetrable country. Railroad contractors here state that a year at least will be taken in the building of this first section, and the second part will take twice or three times as long. In view of this fact, a delay of a couple of weeks will not count for much to either party, and the O. R. & N. will probably be through by the time the N. P. is ready.

An announcement which will be of considerable interest to the local members of the G. A. R., who intend to take in the annual encampment in Salt Lake is given in the Billings Gazette. The local Northern Pacific officials have as yet heard nothing on the subject, but it is very likely that that road will join with the others in giving a low rate to the encampment. The announcement coming from General E. S. Pease is as follows:

General E. S. Pease, commander of the department of Montana, yesterday received word from the Great Northern railroad that in accordance with the request of the Grand Army veterans of this state that road would put on a special rate from this city to Butte which will enable those who wish to attend the grand encampment in Salt Lake to obtain reduced rates for the entire trip. It is also said that the Northern Pacific will make rates to meet those of the Great Northern, which are one and a third fare for the round trip from Montana points to Butte.

The Oregon Short Line has made a rate of \$12.50 for the round trip from Butte to Salt Lake City, and will provide a special train for the benefit of the Montana delegation to the encampment. The special rate tickets may be obtained on August 6 and 7 and will have a return limit good until August 21.

The big oil burner which was sent out from the Deer Lodge shops last week returned to Missoula yesterday after a very satisfactory trial trip over the division to Alberton. The engine was sent out with the through freight from Deer Lodge and returned yesterday with it. Everything worked smoothly and a couple of days will see the other two of the same class in service. About 500 gallons of oil were used in the trip from Alberton to Missoula, and the engine was able to make the whole trip on one tank full of oil. The locomotives do not differ materially from the regular coal burners, the only radical difference being that they have a tank in the tender where an ordinary engine carries the coal. These locomotives are at present supplied from Missoula, where a tank car is stationed, but oil tanks built on the lines of water tanks will be erected in the near future at Missoula, Haugan and Avery. The engines carry 230 gallons, which is calculated to last them 500 miles, and these three tanks are capable of keeping them supplied.

Messrs. Burton and Chandler of Rock Island spent yesterday in Missoula with Freight House Foreman Wilson of the Puget Sound. The two young men will register here and go on their way west in a couple of days.

Washington, Aug. 1.—A reciprocal trade treaty between the United States and Germany of far reaching importance to the commercial world was simultaneously promulgated at noon today by President Taft and the emperor of Germany. The effect of the convention will be that American manufacturers will be relieved of the existing requirement that in order to sell their products in Germany they must manufacture them on the basis of patents in Germany, which called for investments of large sums of money in maintaining duplicate plants.

Inventors will greatly benefit from the fact that the treaty relieves them from the German restrictions under which their patents have hitherto been forfeited if not actually worked in Germany within three years.

Ivory Soap—it keeps the country clean.

There is no exaggeration about this statement. It is a fact.

Nearly every grocer sells Ivory Soap. Nearly every well-to-do American family uses it; for the bath, for the toilet or in the laundry—for the finer things.

Ivory Soap
99 1/2 Per Cent. Pure.

UNCLE SAM HAS ACE IN THE HOLE

REPORT FROM LONDON SAYS UNITED STATES HAS NEW INSTRUMENT OF WAR.

Chicago, Aug. 1.—A special cable from London to the Tribune says: From an authoritative source it has been learned that the reason the American government remains apparently so little concerned about the advances in aerial navigation made by foreign experimenters is that an officer in the American army stationed at Fort Omaha has worked out an electric invention which is likely to paralyze all other existing or proposed engines of war.

The invention, he said, is to be exclusively the property of the United States government, and up to the present the essential details are carefully guarded. The machine is said to project through the air a column of electric energy of almost any desired strength at any given point for a distance of many hundreds of yards. The informant, who is an expert in war, said: "Such an electric column would queer every mechanism on every warship, stop the engines, annul the dynamo, kill the signaling apparatus, make the guns unworkable, slay hundreds of men by shock alone, and might even explode the magazines. Its possibilities for offensive warfare are almost unlimited. Of course, I don't say it is absolute infallibility, yet it is assured, but from certain knowledge I can say in entire confidence that the experiments made point convincingly in this direction."

DUSKY FANATIC HEEDS VOICE OF AN ANGEL

Chicago, Aug. 1.—Following the injunction of an angel, as he said, William Haskell, a colored preacher, buried himself alive in a grave in the rear of his house yesterday evening. He dug his grave some four feet deep, six feet long and three feet wide and laying down in it paved the dirt over himself, leaving only his head showing.

He covered the grave with a canvas sheet, inside of which was spread a white mantle set with seven candles and decorated with palm leaves and ferns. After nightfall the candles caught the eyes of passers-by and soon a great crowd gathered, some to scoff and others to offer to join in the prayers in which Haskell seemed to be finding beatific joy. A squad of police arrived presently and with difficulty worked their way through the throng. "Do not talk to me; I am praying," said Haskell in reply to questions. "I made a solemn promise to an angel that I would do penance by remaining buried seven days."

"It is resurrection day right now," the police retorted. "Come out of your grave or we'll turn on the hose." Haskell dug himself out and, wrapped in his scanty attire, stalked to the house.

MISSOULA WILL NOT ENTER DYING LEAGUE

Just before leaving with his team for Helena late last night Manager Jack Huston, when asked concerning his plans for the remainder of the season, said to a Missoulian reporter: "I have worked hard and offered every inducement within my power to persuade the Missoula team to yet come into the Intermountain league and finish out the season. It seems, however, that the directors have done their best to secure the support which would be necessary, have failed to do so, and taken a firm stand on the question. The answer I received to night seems to be final and is plainly 'No.'"

Under these circumstances I am taking my team home with the firm intention of keeping it together for the rest of the season. We will play independent ball and get along the best way we can with Livingston and Bozeman."

At the present rate the excavation of Pompeii will not be completed before 1910.

TWO MEN ARRESTED FOR VIOLATING LAWS

The police officers are busy these days watching for violations of the law regarding the closing of saloons at 1 o'clock in the morning, the first arrests under the act being made yesterday, when Night Chief Pete McDonald and Officers Carver and Whitcomb arrested a "bellhop" from the office bar for peddling beer to the crib on West Front street. The man gave his name as Tom Murray and obtained his liberty under a \$50 bond.

The second arrest was made by Officer Eklor, who arrested John Larson, a swamper in the I. X. L. saloon, for selling beer out the rear door of the place at 1 o'clock in the morning. The man gave a \$50 bond and was released.

Notice.

The board of county commissioners of Missoula county will meet in extra session Monday, August 2, at 10 a. m., and transact such business as may come before them.

F. W. KUPHAL, County Clerk.

INSURANCE MAN HAS NEW IDEA

RITTENHOUSE WOULD REDUCE RATE BY ESTABLISHING HEALTH BUREAU.

New York, Aug. 1.—Declaring that there are three millions seriously ill in the United States at all times, an insurance company has announced its intention of establishing a health bureau for the benefit of its policy holders. The idea originated with E. E. Rittenhouse, former state insurance superintendent of Colorado, who came here six months ago to take charge of one of the companies.

Policy holders will be invited to keep the health bureau of the company fully informed at all times as to their physical condition. They will be asked to describe all of their symptoms, and then at stated periods the ailing may attend clinics conducted by the company physicians in various parts of the country. They will be personally and thoroughly examined and fully advised as to what treatment to pursue.

Mr. Rittenhouse said: "The determined fight which has been made against consumption has reduced mortality from that source about 28 per cent in New York in the last 20 years. There is no reason why we should not be as successful in the treatment of diseases of the heart, kidneys and brain. In the last 20 years the combined death rate from apoplexy and all diseases of the heart and kidneys has increased from 19.2 per 10,000 in population to 36.3, or about 90 per cent increase. President Roosevelt's conservation commission estimated that more than one-third of the deaths in this country are premature. By reducing our death rate we can reduce the premiums the insured must pay."

MICK BREAKS RECORD.

New York, Aug. 1.—The Clan na Gael track and field games at Celtic park, Long Island, today, were productive of a new world's record in the two hops and jump. Daniel F. Ahern of the Irish-American Athletic club covered 50 feet, 6 1-2 inches, which is six inches more than the recognized world's record made by Daniel Shanahan of Limerick, Ireland, nearly 20 years ago. Ahern, in a similar contest yesterday in Boston, made 50 feet, 2 7-8 inches.

Today's mark was carefully measured by the Amateur Athletic union officers and will stand.

Car Line addition will have the athletic park, car line, city water. The addition of homes. Buy now, \$5.00 down, \$5.00 per month takes any lot.

RHOADES & RHOADES.

Fifteen

to-order-made unclined two-piece serge suits, selling at bare cost, at

Thueson's

WESTERN HOTEL BUILDING

\$100 EACH---45 LOTS

EASY TERMS.

These lots are one mile nearer the city than Daly addition lots. Fine water right goes with them. Nearly new four-room house, good barn and chicken house (all the improvements are good); 150 bearing apple, cherry, pear and plum trees, large patch strawberries and raspberries, two acres in potatoes now, fine shade trees.

This bunch of fine lots (they must all be sold together), will be sold at once at a sacrifice price, which is only \$100 a lot. Just think a moment! Other lots a mile further from the center of the city, with no improvements and no water right are selling at 50 per cent higher prices.

We make you easy terms, too. This property WE KNOW is a genuine bargain. Don't wait. Come at once if you want your money's worth.

THOMPSON WALLOPS HOPE TEAM

IN SESSION LASTING ELEVEN INNINGS BUNCH FROM IDAHO MEETS DEFEAT.

Special to The Daily Missoulian. Thompson, Mont., Aug. 1.—Hope and Thompson played an 11-inning game here today, the windup showing a score of 6 to 7 in favor of the team from the falls. The game was exciting from start to finish, both teams playing good ball, except that each had one off-inning. Anderson, pitching for Thompson, granted three passes and was touched for two hits in the second, resulting in four runs for Hope. Hope had its off-inning in the fifth, when Thompson scored three runs on an error at third followed by three safe drives. The locals scored two more in the sixth, the score standing 5 to 4 until the ninth, when Hope tied the score. Neither side scored in the tenth, and Hope's chances looked good in the eleventh, when they added one run, but their opportunity passed when Thompson scored two men on two safe drives and an error, with none out in their half of the eleventh, and the game was over.

The score by innings:
Thompson.....0 0 0 2 0 0 0 2-7
Hope.....0 4 0 0 0 0 1 0 1-6
Batteries—Thompson, Anderson and Flynn; Hope, Urquhart and Beems. Struck out—By Anderson 11; by Urquhart, 7. Hits—Thompson 12; Hope, 7. Empire—Thelring.

One of the simplest agents for removing sunburn is said to be the white of eggs and lemon juice, in equal quantities, slowly heated to just below the coagulating point and briskly stirred.

"SOO" SURVEYORS NEAR GREAT FALLS

Great Falls, Aug. 1.—A small party of "Soo" surveyors are at work on the Blackfoot reservation, north of Great Falls, according to a Tribune special. They are at work in the neighborhood of Habb, and explained that they were merely running preliminary lines and looking up a feasible route through the mountains. At Habb they made arrangements for men and teams to work with a larger party which, it was stated, would follow in about two weeks. It was stated that the party would run lines north from the Great Northern to Emigrant pass, near where it was expected to meet a party working south from the Canadian Pacific.

CHEAP LANDS ON BEAUTIFUL PUGET SOUND WHERE GREEN GRASS GROWS THE WHOLE YEAR 'ROUND

Free deed to family, in case of buyer's death. Free extension for six months in case of sickness. Plenty of work in nearby saw and stave mills. Big local market for everything you grow. Rich soil, pure spring water, level land, logged off, burned over, easy to clear. Fine dairy, poultry, berry, vegetable and fruit land. No failures, no irrigation, no chances to take on government land lotteries. Everybody wins.

Right at railway station, new electric line surveyed by the tract; near big cities; 150 tracts to select from; 10 and 20-acre tracts, \$40 per acre; \$100 down, \$10 per month. Send for booklet. We are owners, not agents.

Elwood Lumber & Timber Co.
816 White Building Seattle, Wash.

TEN YEARS AHEAD OF ALL OTHER CREAM SEPARATORS

In skimming efficiency, simplicity, durability and convenience, the new improved De Laval Cream Separator are fully ten years ahead of any other machine on the market today. Thirty years of experience, protecting patents, and many other improvements devised and perfected by the De Laval engineers in all parts of the world during the past three years are responsible for this fact. Every feature of the De Laval has been improved, from the supply can to the base. The new center-balanced bowl with its separate spindle is alone a triumph in separator construction and must be seen to be fully appreciated. Then, there is the new one-piece "anti-splash" sanitary supply can, adjustable shelves for skim-milk and cream receptacles, new frame designs, and many other but less important improvements—all combining to make the De Laval as nearly ideal as a separator for farm and dairy use can be made. There is the proper size machine for every size dairy from the smallest to the largest, and no cow owner can afford to be without one of these improved machines. It will cost you nothing to see and examine the new De Laval, and right at your own home, too, if you will but say the word. A new illustrated catalogue describing the De Laval improvements in detail is sent for the asking. Write us at once and you will receive this interesting book by first mail with full information as to how you may have a free demonstration of the improved De Laval in your own home. It will pay you to do so and your only regret will be that you didn't investigate sooner.
