CO-OPERATIVE PLAN FOREST FIRES RAGE MARKET MOVEMENTS OF THE DAY

ADOPTED

IMPORTANT DECISION REACHED BY TWO WELL-KNOWN MULLAN MINING COMPANIES.

Another event of importance which promises to open up about 2,200 feet along the strike of one of the proven vein fissures of the Mullan district took place recently. This is an agreement between the Star Mining company and that of its immediate western neighbor, the Ivanhoe Mining company. By the terms of this agreement the latter company acquires a right of way in the 2,100-foot tunnel conjointly with the Star company and the use of its plant and power at a nominal consideration for the development of the Ivanhoe ground.

The agreement is one of the best examples in the district of the benefits to be derived through co-operative working. The Star company has driven west 250 feet on the strike of the vein fissure, with more or less ore in sight, and with 1,000 feet to drive to get out of their ground. The Ivanhoe people take up the work at this point, driving the 1,000 feet along the strike to enter their own territory, of which they have 1,200 feet, spreading over a distance to be driven of 2,200 feet before reaching the end lines west and developing the ground 1,500 feet below the outcrop. Every foot driven will be along a productive strike, which according to Lindgreen of the geological survey stretches for six miles in a south-southeasterly direction from the Gem-Frisco-Black Bear on the Canyon creek side toward the Morning mine at Mullan.

Neighboring Ground.

On the east end of this productive strike is the Morning mine, which has mined up to 1906 over 131,542 tons of metallic lead and 4,951,779 ounces of silver, and is still a producer on a large scale.

On the west end are the properties of the Frisco group, which produced to 1906 over 4,261 tons of metallic lead and 3,966,801 ounces of silver, having been worked to a level of 1,600 feet below Canyon creek through a shaft. This system of vein fissures is probably the most distinctly marked in the Coeur d'Alene region. It cuts the bedding almost vertically for its total length; is at right angles to the strike of the beds, and has been followed underground in excess of 5,000 feet along the six-mile zone, in places widening to commercial shafts and in others pinching to a narrow black streak marked persistently.

The recent strike in the Black Bear fraction, lying next to the Frisco group, emphasizes the fact of this being about as valuable a piece of territory undeveloped as is in the Coeur d'Alene region.

The tunnel levels of the Black Bear Fraction company on the Canyon creek side and that of the No. 6 of the Morning mine of the Federal company at Mullan are approximately the same. It will require about 4,500 to 5,000 feet along the strike of the vein fissure to tap the Ivanhoe-Star ground, by driving east from Canyon creek. At the same time by driving west on the vein fissure strike the Morning can tap the ground at about the same distance. A tunnel north to crosscut the Star in Giroux gulch will require a greater footage, and will, in the main, be an unproductive piece of work when compared with the first. The former will allow of tapping Canyon creek for the water supplies for milling, giving an independent outlet, and the competition of two lines of railway running up Canyon creek for the handling of the finished products.

There is room here for one of the largest consolidations in the history of the Coeur d'Alenes, and it is interesting to note the co-operative feeling of harmony which prevails among the independent producers along this belt. So far it promises to cut development expense to a low figure, as the work will be confined exclusively to the lode system of vein fissures, every foot of which holds possibilities sufficient to rivet the keen attention of investors.

THREE EARTHQUAKES FELT AT ACAPULCO

Mexico City, Aug. 17.—A delayed dispatch from Acapulco says three severe earthquake shocks were experienced there yesterday. The ocean dropped far below its usual level and along the entire shore line of the port the beach was exposed for a distance of 30 feet. The shocks are believed to have been those registered at the Washington observatory.

The people of Acapulco are still living in the open, not having ventured to return to their homes since the disastrous shock of a fortnight ago.

CURTISS ABOUT AGAIN.

Rheims, France, Aug. 17.—Glenn H. Curtiss, the American aviator who sprained his ankle in his accident yesterday, is today able to direct the repairs to his aeroplane but he said he could not state when he would resume his flights.

The storm that last night swept over the aerodrome here, destroying its roof, was responsible for slight injuries to 200 workmen.

Household Remedies

which have stood the test of time deserve a place in the medicine chest of every family. Mothers are today administering to their children the remedies their grandmothers used. For 30 years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been curing the women of this country from the worst form of female ills, and merit alone could have stood such a test of time and won such an enviable record.

CONFLAGRATION SUPPOSED TO BE OF SERIOUS NATURE ON KANIKSU FOREST.

District Forester W. B. Greeley has been notified that three serious forest fires, which later united to form one large conflagration, had broken out on the Kaniksu national forest and are threatening to become dangerous to life and property. The fires are located south of Priest's lake in northern Idaho, and the fire demon is said to be raging in all his might and glory.

Supervisor W. N. Miller and a large force of rangers, guards and other field men are fighting the fire and endeavoring to reduce the loss to a minimum, but with what success is not yet known in Missoula, the headquarters of district No. 1. It is reported that all of the available field men are at the scene and that the force is entirely too small to cope with the blaze.

The cause of the fire and its extent are unknown to the local officials, but information is looked for this morning. It is thought that the fire is spreading over a large area, but how large is problematical. If it is seen that the present force is inadequate, the chances are that rangers and guards will be requisitioned from adjacent forests. But at any rate, full information is expected to be here today.

SHIPWRECKED MEN SAVED FROM DEATH

New York, Aug. 17.—After clinging for several hours to the bowsprit of their stranded vessel, swept by the heavy seas and all but drowned seven men, including the captain, of the schooner Arlington of Boston, were rescued by a life-saving crew this morning. One man who had put out from the schooner on a life raft drifted out to sea toward Sandy Hook. The schooner, a three-masted vessel, piled up on Long Beach before daylight during an easterly gale. Her decks were swept by the seas and her crew took refuge on the bowsprit, while the beach life saving crew tried vainly to shoot a line over the vessel or to launch a life boat. One of the schooner's crew finally launched a raft in an attempt to carry a line to shore, but the raft drifted to sea, the waves breaking over his frail craft constantly. After several hours' effort a life boat reached the schooner and the crew was rescued. The man on the raft has not been found.

GAS MAY BE USED AS MOTIVE POWER

Washington, Aug. 17.—Gas as a motive power on men of war is a possibility of the future in the opinion of naval experts here. It would mean a material reduction in coal consumption and in turn a greatly increased steam-pressure radius for the ships, and would avoid the necessity of stopping so often to replenish the coal bunkers.

Admiral Clegg, who commanded the torpedo flotilla on its way from the Atlantic coast to San Francisco, and who is now chief of the bureau of steam engineering, is gathering information on the subject, and recently sent Commander William W. White to visit several large manufacturing plants in the west.

Act Quickly and you'll save yourself a lot of suffering and trouble. If you have a sudden chill—or taken cold—if you have colic, cramp or diarrhoea, don't wait a minute. Take at once a teaspoonful of Perry Davis' Painkiller in half a glass of hot water or milk. You'll be safe and on the right road to quick recovery. Then you'll escape serious illness. But you ought to have this tried and proven remedy on hand for immediate use. Being prepared is half the battle when there's pain to subdue. New size bottles 35c, also in 50 cent sizes.

EMPEROR ENTERTAINS BUSINESS DELEGATION

Tokio, Aug. 17.—The big delegation of business men from the civic and commercial institutions of Tokio, Yokohama, Osaka and Nagoya, who will leave for Seattle August 19 to make an extended tour of the United States, was entertained by the emperor at luncheon today at Shiba palace. Premier Katsura, Count Komura, the foreign minister, and the minister and vice minister of the imperial household, were present. The emperor entrusted to the delegation an especial message of courtesy to the people of America, and asked the delegates to carry with them on their trip the best wishes of Japan to America.

SUES THE CITY.

Seattle, Aug. 17.—Samuel A. Bonfield, owner of bank in Bolbit, Kas., president of the First National bank of Fairbanks, Alaska, and reputed to be a millionaire, sued the city of Seattle today for \$150,000 damages for false imprisonment last March when he was found helpless on the street, taken to the police station, booked as a drunk and then taken to a hospital where he was under treatment for three weeks.

MARKET MOVEMENTS OF THE DAY

New York, Aug. 17.—The reactionary tendency manifested by the stock market yesterday became more pronounced today with early declines in a majority of the standard issues. Sentiment appeared to have switched around very decidedly, although surface conditions were for the most part unchanged. There was a recurrence of rumors regarding the health of a prominent financier now abroad and the long-continued drought in the Nebraska corn belt excited some apprehension. From the very outset the market was irregular, chiefly owing to a series of bear attacks which converged largely around the Harriman issues. The only prominent stocks to display steadiness were New York Central and Atchafalaya. Transactions were again very large, with London reported a seller here to the extent of 35,000 shares, mostly the Harrimans and United States Steel company. There was a general late recovery from the heavy tone, which had its inception in a fresh buying movement in United Pacific, the balance of the active list moved along in sympathy, the net result being gains which ranged from fractions in the Harriman issues to 3 points in Chicago & Northwestern and a point or more in Atchafalaya, New York Central and the steel issues. Illinois Central and Louisville & Nashville did not participate in the recovery and some of the less active stocks, including American Cotton Oil, registered material losses. There was a statement from a representative of the interstate commerce commission predicting a revival of the enormous railroad traffic of 1907. In international banking circles there was talk of a resumption of gold exports to Argentina. The money market was very strong with further indications of a stiffening of sales. Some call loans were again made at 2 1/2 per cent, but this was the maximum figure.

Bonds were irregular. Total sales, par value, \$3,880,000. Government bonds were unchanged on call.

Wool.

St. Louis, Aug. 17.—Wool—Firm: medium grades, combing and clothing, 22 1/2-28; light fine, 20 1/2-24; heavy fine, 13 1/2-16 1/2; tub washed, 25 1/2-30.

Grain and Provisions.

Chicago, Aug. 17.—The wheat market opened weak with prices unchanged to 1/2c lower, owing to a decline of 1/2 to 1d at Liverpool. During the greater part of the day sentiment was inclined to the bear side of the market, but in the final hour a firmer feeling developed because of confirmation of reports of wet weather and damage to the wheat crop in the northwestern part of North Dakota. Trade in general was of light tone. The close was steady with prices a shade to 1/4-1/2c higher compared with the previous close.

Oats closed easy with prices a shade to 1/4-1/2c lower. Provisions were strong and closed 1/2c lower to 3/4c higher, the latter advance being in September pork.

Chicago Livestock.

Chicago, Aug. 17.—Cattle—Receipts estimated at 4,000; market strong; heaves, \$4.00-7.50; Texas steers, \$4.00-5.50; western steers, \$4.00-6.00; stockers and feeders, \$2.50-5.25; cows and heifers, \$2.25-6.40; calves, \$5.00-8.50. Hogs—Receipts estimated at 8,000; market strong; to 5c higher; light, \$7.50-8.00; mixed, \$7.35-8.00; heavy, \$7.00-8.00; rough, \$7.00-7.25; good to choice heavy, \$7.35-8.00; pigs, \$6.50-7.50; bulk of sales, \$7.50-8.00. Sheep—Receipts estimated at 25,000; market weak; native, \$2.50-5.00; western, \$3.00-5.50; yearlings, \$1.50-3.50; lambs, native, \$1.25-4.75; western, \$1.50-3.00.

Metal Market.

New York, Aug. 17.—Tin was firm, with sales of five tons for August delivery at \$29.94 and five tons of spot on deck at \$29.50. The London market closed steady, with spot quoted at 113 1/2 lb and futures at 137.

The market for standard copper on the metal exchange was quiet and no sales were reported. Closing quotations were firm. The London market closed quiet, with spot quoted at 139 7/8 6d and futures at 140 7/8 6d. There were sales of 300 tons spot and 300 tons futures. Local dealers quoted lake at \$1.12 1/2-1 1/4; electrolytic, \$1.00-1.12 1/2, and casting at \$1.25-1.27 1/2.

Lead was quiet but steady, with spot closing at \$1.37 1/2-1 3/4. The London market closed at 42 1/2 3/4. Spelter closed firm, with spot quoted at \$5.65-5.85. The London market was unchanged at 122.

The Electric Sign Is Indorsed by Visitors

THEY WILL GO BACK TO THEIR HOMES AND TALK ABOUT IT

LOTS OF IT.—They stood at the Florence corner one night and looked up the avenue along the lengthy line of illuminated signs. There were four of them and they were strangers in the city; they talked enthusiastically of some of the things they had seen here and were particularly interested in the electric signs. "I'll bet you," said one of them, "that there is more electric power represented in those signs on that one street than is used in our whole city at home." Wherever he came from, that young man is the sort of visitor that Missoula likes to have. He is representative of the people, as a whole, who are registering. And it is worth while to have this sort of fellows stop with us, if it is only for a day. They learn something about us and they like us and go away with good words on their tongues for Missoula and her people. There can be no mistake made in the proper treatment of the strangers who are with us this summer. It is to the lasting credit of the people of the city, especially of the hotel men, that visitors are going home well pleased.

Electric Lighting and Electric Advertising Boosts the City

as a whole as well as the progressive merchant who uses it liberally.
