

# PRISON ASSOCIATION ATTENTION DRAWN TO LEAGUE ADJOURNS

INTERESTING MEETING AT SEATTLE IS BROUGHT TO A SUCCESSFUL CLOSE.

Seattle, Aug. 19.—The annual congress of the American Prison Association ended tonight with a meeting in the Alaska-Yukon-Pacific auditorium. At 6 o'clock the delegates were entertained at an informal dinner in the Washington state building by Governor or Marion E. Hay. After the dinner the delegates met in a final session. The report of the committee on preventative and reformatory work was read by its chairman, Corwin S. Shank of Seattle. The report of the committee on the care of released prisoners, of which DeCarat M. Sawyer of New Jersey, is chairman, was read and discussed. The report said: "On every side we see efforts being made to keep people out of prison by modifying the laws and providing for release on parole, suspended sentences, etc., but it seems to me the weak spot today everywhere is either the utter absence of care by the state of its discharged prisoners or the half-hearted and inadequate care which is given generally to men put out on parole. Great states spend endless effort to reform men while they are within the prison walls and then let them come out with all the temptations of life around them, and none but the most perfect care at the time when they most need encouragement, reproof, warning and support. It must be individual treatment; the paroled man must feel that he is something more than a number and there is no wholesale way in which it can be done."

AMERICAN HEALTH ASSOCIATION TAKES ACTIVE STEPS IN ITS WORK.

Washington, D. C., August 19.—The activities of the American Health Association in matters affecting the general public health has attracted attention to this somewhat unique organization. The league is the progeny of the "Committee of One Hundred," which was formed as a section of the American Association for the Advancement of Science, and which was charged with the investigation of public health conditions and the recommendation of legislation in that connection. The president of the "Committee of One Hundred" is Dr. Irving Fisher of Yale, and among its vice presidents are Rev. Dr. Lyman Abbott, Miss Jane Addams, Felix Adler, Professor James A. Angell of Ann Arbor, Hon. Joseph H. Choate, Dr. Charles W. Elliott, ex-president of Harvard, Archbishop Ireland, ex-President Roosevelt, and others. The list of its membership reads like a roll call of the most distinguished men of the country who are interested in civic advancement. This committee formed the American Health League to include in its membership all persons who seek to elevate the condition of the public health, it being understood that it was to be an organization of laymen as distinguished from those of physicians or scientists, or of parties who might have a commercial interest in propositions affecting the general health. For the benefit of its members the American Health League issues a periodical called "American Health," and also bulletins from time to time. The league has several state branches, the strongest of which is in Ohio, where Dr. C. O. Probst, of Columbus, is the state president, and Ben LaBree of Cincinnati, is secretary-treasurer. Among the vice-presidents are Governor Judson Harmon, ex-Governor Myron T. Herrick, Dr. Charles A. Reed, Thomas L. Johnson, Charles P. Taft, Julius Fleischman, M. E. Ingalls, D. B. Gamble, L. E. Holden, Brand Whitlock, Frank J. Jones, Charles W. Dabney and others equally prominent. The American Health League has become a great civic movement, including economists and scientists who approach the problem of public health from a broad point of view. It is especially interested in the creation of a department of public health which will do for the men, women and children of the country what the department of agriculture is doing for the sheep, hogs and cattle, plants and trees. It recognizes the value of the pure food act and the Ohio branch of the league has been especially active in opposing benzoate of soda, alum, borax and all chemical, artificial preservatives, having recently sent two scientists, Dr. Julius H. Eichberg of Cincinnati and Dr. H. A. Webber of Columbus, Ohio state university, to represent the consumer in a hearing on alum before the board of food and drug inspection. They appeared in opposition to the use of alum in pickle products and baking powder. The American Health League will present its views on the creation of a department of public health to President Taft and the latter has promised careful consideration before making the recommendations which he intends to incorporate in his first annual message to congress next December.

# CLARK IS VISITING THE CAPITAL CITY

Helena, Aug. 19.—W. A. Clark is in the city tonight. He is here looking after his interests in the Missouri River Power company. In an interview he stated that the Missoula electric railway, which he is building, will be ready for operation in about five months. The system includes an interurban line to Bonner, and its completion is looked forward to. Mr. Clark says, as a great factor in the development of the agricultural district adjacent to the city of Missoula. Mr. Clark will remain in Helena for several days.

# NEW CRISIS ARISES IN STREET CAR CASE

Chicago, Aug. 19.—A new crisis in the street railway situation, which threatened to break into a strike two weeks ago, and then was supposedly settled by an agreement over a new wage scale, arose here tonight. By an overwhelming majority the Chicago Railways company employees rejected the company's terms. Many clamored for a strike, but President William Quinan of the local union held them in check and telegraphed to W. D. Mahon, international president of the Amalgamated Association of Street and Electrical Railway Employees, to come here at once and try to avert a walk-out. Tonight's action affects only the north and west side systems.

# STRUCK BY LIGHTNING.

Lima, Mont., Aug. 19.—Under a high hill, beneath a lonely pine tree, Stephen Cook a sheepman, 12 miles from Lima, found the dead body of one of his herders yesterday. The man evidently had been struck by lightning. His name is unknown.

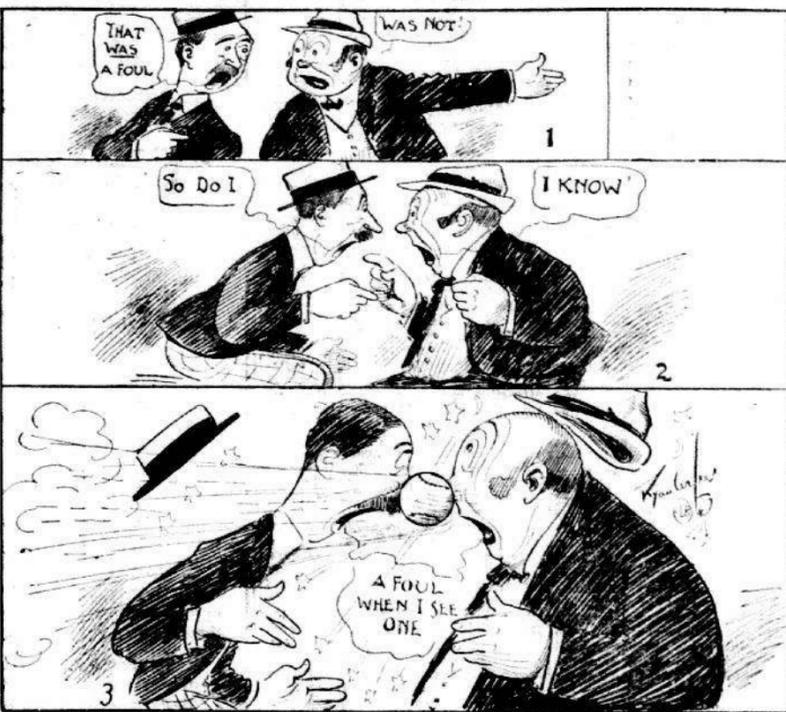

## GET ABOARD 1909 SEASON OF DE LAVAL Cream Separator Prosperity

De Laval Cream Separators and farm prosperity almost invariably go hand-in-hand. The farming outlook was never before so promising as now. First and always best, as they have been for thirty years, the De Laval Cream Separators were never before so good as are the new and improved 1909 machines. Midsummer, the most profitable separator season, is now at hand. There was never a better time to make this most profitable of all farm implement purchases. It's high time to get aboard. Why not order NOW? As a special inducement for this month only we prepay the freight to any railroad station in Western Montana.

# TWO NOSES THAT KNOW

# WRIGHT AND SISTER AVIATORS WELCOME IN BERLIN IN PORTLAND

FAMOUS AMERICAN AVIATOR WILL MAKE DEMONSTRATION FLIGHTS IN GERMANY.

Berlin, Aug. 19.—Orville Wright, his sister Katherine and Hart O'Berg, the European business manager of the Wright brothers arrived here today from London. Mr. Wright is to make a series of public flights on the Tempelhof parade grounds in the suburbs of Berlin. If he is ready by the end of the month Emperor William will probably witness one of his flights. The emperor is coming to Berlin to review the Berlin and Potsdam garrison and to receive Count Zeppelin, who is expected to make his long voyage from Friedrichshafen to Berlin, August 28. The two masters of the different schools of aviation will then meet and compare methods. Mr. Wright, in his flights here, will use an aeroplane built in Germany. He went out to the shops at Tegel today, and examined the craft. He has two complete machines to choose from. A pamphlet written by Captain Von Hilderbrand on the Wright brothers is being widely sold in Germany. Some pride is taken in the fact that the grandfather of the Wrights was a German.

NEW OFFICE BUILDING HAS A PLACE PREPARED FOR USE OF AIRSHIP MEN.

Portland, Aug. 19.—Aviators will be welcome on the roof of Portland's newest office building, now being erected at the corner of Third and Washington streets, by Z. C. Spalding. The plans include a landing platform for flying machines, the first to be provided on any Pacific coast skyscraper. Captain R. S. Greenleaf, who has charge of the construction of the building, regards this feature as a utility that is demanded because of the progress being made in aviation. He describes the proposed landing as a platform that will cover almost the whole roof, so constructed as to ease the drop of the bird-like machines that are expected to be soaring over the city before very long. The aeroplane pilot may pause there to regain his balance or the captain of a dirigible may alight to take on or set down passengers or load in supplies. "Flying machine landings must be provided here as well as in the east," said Captain Greenleaf. "They will be constructed on the roofs of New York and Chicago skyscrapers and modern office buildings of Portland must be equipped in the same manner. These landings will soon be a public convenience, for remarkable changes are being brought about by the perfection of flying machines, and we will be ready for them when our building is finished."

# CHANGE IN TARIFF TO REOPEN MINES

Joplin, Mo., Aug. 19.—The highest price paid for zinc ore in this district in six years was reached, when \$54 per ton was offered by the representatives of different smelters. This increase from a \$31 basis results from the tariff of 1 cent per pound on the metallic contents of zinc ore. On account of the high price, large mining companies which have been closed for two years will resume operations.

# DIFFICULTIES ARISE.

Brussels, Aug. 19.—The Journal de Brussels' Pekin correspondent says that serious difficulties have arisen between the Japanese and Russians north of Tchong Chou, Manchuria, and that each side has mobilized troops.

# DAMAGE DONE BY RAIN

Bridge is covered with sand and debris three feet deep. Both of the Denver & Rio Grande and Colorado Midland railways are operating trains west of Leadville, but regular traffic has not been resumed. Today the river at Florence washed out 100 yards of reinforced embankment below the headgates of the Union ditch. It has been rising almost constantly for the past 24 hours. Water reached Denver that the dyke at Lake George, at the head of the South Fork of the South Platte river, had broken and an immense body of water had been released. The Lake George dam is located above the Cheesman dam, the latter being the main source of water supply for this city. A heavy storm tonight on the Sange de Christo range is adding to the flood in the Arkansas river. At Salida 500 tourists are floodpooled. No eastern trains were being operated and traffic to the west continues via the southern route. This necessitates the retaining of Pullman sleepers here, as the southern route is narrow gauge. A terrific storm was raging tonight on the plateau 20 miles south of Montrose.

# KILLED DURING QUARREL.

Armstead, Mont., Aug. 19.—Following a quarrel, in which Shattuck Doyle was accused of stealing a watch, he was shot and killed early this morning by Joseph Nevins, who then fled, and thus far has eluded pursuit. Doyle recently came to Armstead from San Francisco and was a bootmaker.

# COLLECTOR IS MISSING.

Special to The Daily Missoulian. Wallace, Aug. 19.—The sheriff is searching for Lee Cabbage, a collector for the Mullan laundry, who mysteriously disappeared and is said to be short in his accounts to the extent of \$100 or more. He is supposed to be making his way to Spokane.

# CONFERENCE IS HELD.

New York, Aug. 19.—A conference of the most intimate friends and physicians of E. H. Harriman was held today and it was determined, on his arrival, to take him off the steamer by a small boat and move him at once to his country place to recuperate.

# NO DIVIDENDS TODAY.

Special to The Daily Missoulian. Wallace, Aug. 19.—The Snowdrift mine will declare no dividends tomorrow, owing to the trouble it has had with the railroad company over shipping rates on ore. The usual dividend is \$45,000.

# FALLS INTO HATCHWAY.

Special to The Daily Missoulian. Wallace, Aug. 19.—While rubbing his eyes, into which had blown some dust John Miller, a miner, walked into an open hatchway today and sustained a broken rib and a badly lacerated hand.

# HAMPTON'S MAGAZINE

SEPTEMBER—ON SALE NOW  
Among the twenty other great features that will make you say that this is the "Best Magazine in America" are—  
"Lifting the Curse from Kansas"—By G. W. Ogden. The story of Coburn, the man who made Kansas.

103 Higgins Avenue Missoula, Montana

# NOTICE!

## From the Burlingame Telegraphing Typewriter Company

Your model machines were demonstrated in the cities of Missoula, Hamilton and Helena, between the dates of July 7th and August 15th, 1909, and our representatives gave notice to all parties interested that the stock, then selling at \$6 per share, would advance to par (\$10) not later than August 15th, 1909. Many of Montana's citizens took advantage of the opportunity and backed their judgment with their money, others hesitated and now are sorry they did not take advantage of the opportunity presented.

We are here now to give you the chance to take advantage of the present conditions at par (\$10) before the next rise in value.

Mr. A. A. Shepard, district agent, will have his permanent office at the Missoula hotel, rooms 3 and 4, and if this matter appeals to your better judgment, you are invited to either call on him or address card to the following address:

**A. A. Shepard, District Agt.**
